(e) *Loan secured by building and machinery.* Machinery and equipment in a building which are adapted to the use being made of the land and building, and which are intended to be permanent additions thereto, in general will constitute a portion of the real estate and may be taken into account in calculating the maximum permissible loan for purposes of 12 U.S.C. 371. This standard governs the application of 12 U.S.C. 371 to national banks throughout the country, notwithstanding that the law of the particular state is otherwise for tax or other special purposes.

(f) *Home improvement loans.* Home improvement loans made in substantial reliance upon the credit standing of the borrower, insurance, collateral, or combinations of these factors, are not real estate loans, and additional security in the form of junior mortgages, taken as a matter of prudent banking practice, need not meet the requirements of 12 U.S.C. 371.

(g) *Perfecting personal property security interest.* A loan made in reliance upon the security of a mobile home will not be considered a real estate loan, although as a prudent banking practice the security interest is recorded or otherwise perfected as if the mobile home were real estate.

(h) *Reliance on rentals.* A loan made to a lessor of real estate in substantial reliance upon the creditworthiness of the lessee, including an assignment of rentals to be due from the lessee following completion and occupancy of the leased premises, is not a real estate loan, although as a matter of prudent banking practice the loan may also be secured by a mortgage upon the real estate.

(i) *Interim financing and mortgage warehousing.* (1) A loan secured by a real estate mortgage, made for the purpose of sale to a mortgage investor pursuant to his takeout commitment and tailored to meet his specifications, is not a real estate loan. The warehousing of loans secured by real estate mortgages is not within the purview of 12 U.S.C. 371.

(2) In either case, the takeout commitment shall provide that the mortgage investor is unconditionally committed to purchase or repurchase the loan or loans within a reasonable time.

§ 7.2005 **Loans secured by real estate mortgages of others.**

Where the borrower pledges or assigns a real estate mortgage of another to secure a loan for his own account, the loan is not a real estate loan within the meaning of 12 U.S.C. 371, nor subject to the requirements thereof, since the pledged or assigned mortgage on real estate is personal rather than real property.

§ 7.2020 **Improved real estate.**

(a) *Law—12 U.S.C. 371.*

• • • may make real estate loans • • • upon improved real estate, including improved farm land and improved business and residential properties.

(b) *General requirements.* Generally, real estate is improved within the meaning of 12 U.S.C. 371 when substantial and permanent construction or development has contributed substantially to its value.

(c) *Improved farm land.* Farm land is improved when it is useful for agricultural purposes without further substantial improvements. Agricultural purposes include animal husbandry as well as the growing of crops. Usefulness for such purposes may be demonstrated either by actual past or present use, by the appraisal of persons familiar with the value of agricultural land or by both. The appraised value of improved farm land for the purpose of the limitations contained in 12 U.S.C. 371 is its value for agricultural purposes.

(d) *Improved business and residential property.* Business and residential property is improved when substantial and permanent improvements have been constructed or developed on the property, or when its value has been enhanced by such improvements in its immediate vicinity. Examples are:

(1) Land upon which a shell home has been placed on a permanent foundation and connected with the usual utilities.

(2) A commercial recreation area which included 75 campsites with picnic tables, tent bases, toilet facilities, fireplaces, dockage, and a beach.

(3) A trailer park consisting of 30 sites with facilities for sewage, running water, and electricity.

(e) *Offsite improvements.* Whether offsite improvements have enhanced the value of property is a question of fact to be determined in each case. Examples of real estate improved by offsite improvements:

(1) Property which is valuable because the improvements of a developed urban area are immediately available to it.

(2) Lots in a housing subdivision for which substantial improvements such as streets, water, sewer, and other utilities have been provided.

(3) Prime industrial property enhanced in value because it is located on a paved street with utilities and transportation facilities available.

(4) An undeveloped residential tract almost completely surrounded by developed and rapidly developing residential property, and which is adjacent to a major university campus in the process of development.

(f) *Development loans.* National banks may make loans where the proceeds thereof are to be used to acquire and convert undeveloped property into improved real estate. At such time as the proceeds of the loan have been paid out and the improvements completed, the loan must be secured by improved real estate within the meaning of 12 U.S.C. 371.

§ 7.2040 **First liens.**

(a) *Law—12 U.S.C. 371.*

• • • may make real estate loans secured by first liens upon improved real estate • • •.

(b) *General definition.* A first lien on real estate within the meaning of 12 U.S.C. 371 is any lien which grants to the holder thereof a claim against the property so secured which is prior to the rights of all others with respect thereto. Such a lien will normally be created by an instrument in the form of a mortgage or deed of trust but may also consist of a judgment which by operation of law creates a lien against certain property of the judgment debtor or a land contract such as that described in § 7.2000(d).

(c) *Effect of life estates and similar claims.* A mortgage on the fee simple interest in real estate which is subject to an existing life tenancy or other existing or potential claim whereby under local law the interest of the life tenant or other claimant may vest in whole or in part in a third party free of the mortgage is not an eligible first lien under 12 U.S.C. 371 unless said third party joins in the mortgage or otherwise agrees to subordinate his interest in the mortgaged property.

(d) *Effect of certain permitted liens.* (1) A mortgage on real estate will be subject from time to time to various liens, charges and encumbrances which, although they may be paramount to the bank's security claim in the form of a mortgage, do not substantially affect the value or use of the real estate. Liens for taxes and assessments imposed by a governmental body for the current year, zoning laws and ordinances, construction liens not yet filed or relating to obligations not overdue, permits, rights-of-way, easements, leases, and encumbrances will not prevent such mortgage from constituting a first lien within the meaning of 12 U.S.C. 371.

(2) A mortgage on real estate may be a first lien within the meaning of 12 U.S.C. 371 although subordinate to another lien if the bank (i) holds funds pledged by or on behalf of the borrower in an amount sufficient to cover at all times the prior lien and (ii) may at any time effect payment of the prior lien.

(e) *Exclusion of oil, gas, or mineral rights from lien of mortgage.* A mortgage on the fee title to realty is a first lien thereon despite the fact that the mortgage may expressly provide that it does not cover oil, gas, or mineral rights. This is true regardless of whether the mortgagor has already transferred or mortgaged such rights to a third person or simply retains such rights by excluding them from the lien of the mortgage given to the bank.

(f) *Merger of first and second liens.* A national bank may hold a first and a second mortgage on qualifying real estate if there is no intervening lien and if the aggregate of the amounts due on both mortgages, as well as their terms of payment, conform with the provisions of 12 U.S.C. 371. In such a case the combined

mortgages will be regarded as merged into one qualifying first lien. A lien which arises only upon the bank's election of its remedy under mortgage insurance or guaranty, applicable to the first lien, is not an intervening lien.

(g) *"Cover-all" or "open-end" mortgages.* Mortgages sometimes contain a provision that the mortgaged properties shall secure both the loan for which it is given as well as all other present and future indebtedness of the borrower to the bank, i.e., a "cover-all clause," such mortgage being frequently termed an "open-end" mortgage. In such case, if the loan for which the mortgage is given is a real estate loan within the meaning of 12 U.S.C. 371, then the amount of all other loans made by the bank in primary reliance upon the security of the real estate must be added together with the initial loan to determine if the requirements of 12 U.S.C. 371 have been met.

(h) *Personal liability of mortgagor.* The requirement of 12 U.S.C. 371 that a real estate loan shall be secured by a first lien does not require that the mortgagor have personal liability for the mortgage loan.

§ 7.2100 Conditions upon which national banks may make real estate loans.

(a) *Law—12 U.S.C. 371.*

Any national banking association may make real estate loans secured by first liens upon improved real estate • • •. A loan secured by real estate within the meaning of this section shall be in the form of an obligation or obligations secured by a mortgage, trust deed, or other instrument upon real estate, which shall constitute a first lien on real estate in fee simple • • • and any national banking association may purchase any obligation so secured when the entire amount of such obligation is sold to the association.

(b) *Requirements for all loans which are real estate loans within the meaning of 12 U.S.C. 371.* Any loan which is a real estate loan within the contemplation of 12 U.S.C. 371 must comply with the following requirements:

(1) The real estate must be improved. See § 7.2020.

(2) The real estate must be owned in fee simple. (For loan secured by leaseholds see § 7.2200.)

(3) The security must be a first lien.

(4) The security instrument must be a mortgage, trust deed or a similar instrument.

§ 7.2120 Participation in real estate loan.

(a) *Law—12 U.S.C. 371.*

• • • [A]ny national banking association may purchase any obligation so secured in whole or in part and at any time or times prior to the maturity of such obligation.

(b) *In general.* (1) A national bank may not invest in real estate bonds in the guise of purchasing a participation in real estate loans. Purchase of such bonds shall be in compliance with the Investment Securities Regulation (Part 1 of this chapter).

(2) However, a national bank may participate in the making of a real estate loan and may purchase a participation in an existing real estate loan without becoming owner of the entire loan, if the participation interest of the bank is, in either case, adequately protected by the terms of the participation agreement.

§ 7.2125 Amortization of real estate loans.

(a) *Amortization.* Amortization requires that there be reduction of the principal of the debt during the life of the loan. This ordinarily contemplates a regular schedule of payments. Any deviation from a regular schedule of such payments should be based on prudent banking judgment.

(b) *When amortization is required.* A real estate loan must be amortized when the amount of the loan exceeds 50 percent of the appraised value of the property which secures it, or when the term of such loan exceeds 5 years.

(c) *Amortization requirements of 12 U.S.C. 371.*

Loan as percentage of appraised value	Term of loan in years	Minimum rate of amortization
0-50	0-5	None.
	5-10	A-1, A-2, or A-3.
0-66⅔	0-10	A-1, A-2, or A-3.
	10-20	A-2, or A-3.
0-90	0-30	A-3.

A-1—Installment payments sufficient to amortize 40 percent or more of the principal of the loan within a period of not more than 10 years.
A-2—Installment payments sufficient to amortize the entire principal of the loan within a period of not more than 20 years.
A-3—Installment payments sufficient to amortize the entire principal of the loan within the period ending on the date of its maturity.

(d) *One-year real estate loans.* A real estate loan of not more than 1 year meets the amortization requirements of 12 U.S.C. 371 although no reduction of principal is required before maturity. Any renewal must qualify with the amortization requirements set forth above.

§ 7.2145 Real estate loans insured or guaranteed.

(a) *Government-insured loans.* Where the bank in its judgment relies substantially on the insurance or guaranty of a governmental agency in making a loan, it does not constitute a real estate loan within the meaning of 12 U.S.C. 371. See §7.2000.

(b) *Veterans Administration guaranteed loans.* Any loan at least 20 percent of which is guaranteed or insured by the Administrator of Veterans Affairs is not a real estate loan within the meaning of 12 U.S.C. 371 and, therefore, not subject to the restrictions thereof.

(c) *Private mortgage insurance or guaranty.* Where a national bank makes a loan in substantial reliance upon private company mortgage insurance or guaranty, the loan does not constitute a real estate loan within the meaning of 12 U.S.C. 371, to the extent of the guaranty. Appropriate evidence to demonstrate justification for such reliance should be retained in the bank's files.

(d) *Real estate as additional security.* Where the bank in its judgment makes a loan in substantial reliance on the insurance or guaranty of a governmental agency, private company mortgage insurance or guaranty, the creditworthiness of the borrower, or collateral other than real estate, the loan may also be secured by real estate as a matter of prudent banking practice or because such security is required by the insurer or guarantor.

(e) *Leasehold loans.* For applicability of above rulings to loans secured by leaseholds, see § 7.2200(c).

(f) *Guaranty of State or political subdivision.* A loan secured by a mortgage on real estate is not a real estate loan to the extent a State or political subdivision thereof, possessing general powers of taxation, including property taxation, guarantees the loan and pledges its full faith and credit in support of its guaranty. The lending bank should obtain the opinion of competent counsel that the guaranty is a valid and enforceable obligation of the public body. See § 7.1185 and § 1.3(g) of this chapter.

§ 7.2146 Loans participations with Small Business Administration.

Loans in which the Small Business Administration cooperates through agreement to participate on an immediate or deferred basis under the Small Business Act are not real estate loans within the purview of 12 U.S.C. 371.

§ 7.2148 Real estate mortgage errors and omissions insurance.

A national bank may purchase real estate mortgage errors and omission insurance for the purpose of protecting itself against loss in its capacity as mortgagee, mortgage fiduciary or mortgage servicer, due to its own errors or omissions, the errors or omissions of the mortgagor, or the inadequacy of insurance obtained by the mortgagor.

§ 7.2150 Loan in excess of appraised value.

A real estate loan which is excessive in relation to the appraised value of the real estate will not be considered in violation of the statute if the excessive portion is fully guaranteed or is fully secured by pledged collateral in the form of a savings account, certificate of deposit, assignment of rents, or other security to which the bank has ready access and first claim.

§ 7.2155 Maximum aggregate of real estate loans.

(a) *Law—12 U.S.C. 371.*

No such association shall make loans in an aggregate sum in excess of the amount of the capital stock of such association paid in and unimpaired plus the amount of its unimpaired surplus fund, or in excess of 70 per centum of the amount of its time and savings deposits, whichever is the greater.

(b) *In general.* The aggregate outstanding balances of real estate loans made or purchased may not exceed at the time of making a real estate loan the unimpaired capital plus the unimpaired surplus of the bank or 70 percent of the time and savings deposits of the bank, whichever is greater.

(c) *Existing commitment.* An existing commitment to make a real estate loan is not includable in the aggregate amount of real estate loans which a bank is permitted to make under 12 U.S.C. 371.

§ 7.2160 Commitment by Government agency to insure.

Where a Government insuring agency has issued to a national bank a firm commitment to insure, the mortgage loan covered thereby is considered, for the purpose of 12 U.S.C. 371, to be an insured loan. A conditional commitment differs from a firm commitment in that no specific mortgagor is named therein, the insuring agency merely agreeing to insure a mortgage in the amount and under the terms specified, provided a borrower (mortgagor) is obtained who is satisfactory to the insuring agency.

§ 7.2170 Purchase at premium or discount.

A national bank may, at its option, charge off or amortize all premiums paid for mortgages. Mortgages purchased at a discount may be carried on the books either (a) at cost price or (b) at the amount of unpaid balance, with an appropriate offset for the amount of unearned discount.

§ 7.2190 Demand and short-term real estate and construction loans.

(a) A real estate loan in an amount in excess of 50 percent but not more than 90 percent of the appraised value of the real estate security may be made on a demand basis if provision in writing is made whereby in the absence of demand the entire principal of the loan will be liquidated within a stated period of time not exceeding 30 years by regular payments of principal.

(b) Loans made to finance the construction of industrial or commercial buildings or of residential or farm properties may come within the third paragraph of 12 U.S.C. 371, even though they are made payable on demand instead of having a stated maturity of not more than 60 months, provided that the parties intend that the loan be paid off or refinanced within the 60-month period, and provided that demand is made or the loan paid within such period.

§ 7.2195 Condominium loans.

Where State law permits or recognizes condominium ownership, the purchaser of a condominium apartment takes title to improved real estate eligible as security for real estate loans within the meaning and limitations of 12 U.S.C. 371. In condominium ownership the owner-mortgagor owns, separately, one or more single dwelling units in a multiple-unit apartment building and has an undivided interest with the owners of the other apartments in common areas and facilities serving the building. Many States have not enacted enabling legislation recognizing this form of real estate ownership. In the absence of such legislation, national banks must satisfy themselves that these loans will meet the requirements of 12 U.S.C. 371.

§ 7.2200 Real estate loans secured by leaseholds.

(a) *Law—12 U.S.C. 371.*

Any national banking association may make real estate loans secured by first liens upon improved real estate • • •, under such rules and regulations as may be prescribed by the Comptroller of the Currency, on a leasehold under a lease which does not expire for at least 10 years beyond the maturity date of the loan • • •.

(b) *Requirements for all real estate loans secured by leaseholds.* (1) Any real estate loan secured by a leasehold within the meaning of 12 U.S.C. 371 must comply with the following conditions:

(i) The leasehold must be on improved real estate. See § 7.2020.

(ii) The security must be a first lien on the leasehold.

(2) In order to qualify as an acceptable leasehold for security for a real estate loan made by a national bank, the covenants and restrictions contained in the lease which provide for forfeiture or reversion in the event of a breach must not be more onerous or burdensome than those contained in leases in general use in the area in which such bank is located, and the lease should permit acquisition of the leasehold by the lending bank by voluntary conveyance or assignment by the lessee, and acquisition and sale under judicial process, without being subject to such restrictions as would jeopardize recovery of the security value of such leasehold.

(3) The security instrument must be a mortgage, trust deed or similar instrument.

(4) The loan must mature at least 10 years before the date on which the lease is due to expire. This requirement may be met by an option to renew for a period of 10 years beyond the term of the mortgage.

(5) The loan must be amortized as are loans secured by first liens on real estate owned in fee simple.

(6) The "appraised value" of a leasehold, for the purpose of 12 U.S.C. 371, shall be determined by the use of accepted and reliable methods of appraising leasehold values including, in areas where such information is available, a consideration of the sales prices of comparable leaseholds.

§ 7.2400 Construction loans.

(a) *Law—12 U.S.C. 371 (third paragraph).*

Loans made to finance the construction of industrial or commercial buildings and having maturities of not to exceed 60 months where there is a valid and binding agreement entered into by a financially responsible lender to advance the full amount of the bank's loans upon completion of the buildings and loans made to finance the construction of residential or farm buildings and having maturities not to exceed 60 months, shall not be considered as loans secured by real estate within the meaning of this section but shall be classed as ordinary commercial loans whether or not secured by a mortgage or similar lien on the real estate upon which the building or buildings are being constructed: *Provided*, That no national banking association shall invest in, or be liable on, any such loans in an aggregate amount in excess of 100 per centum of its actually paid-in and unimpaired capital plus 100 per centum of its unimpaired surplus fund. Notes representing loans made under this section to finance the construction of residential or farm buildings and having maturities not to exceed 9 months shall be eligible for discount as commercial paper within the terms of (12 U.S.C. 343) if accompanied by a valid and binding agreement to advance the full amount of the loan upon the completion of the building entered into by an individual, partnership, association, or corporation acceptable to the discounting bank.

(b) *Application.* (1) The third paragraph of section 371 is intended to enable a national bank to finance the construction of industrial or commercial buildings, or residential or farm buildings, to a limited extent, without such credits having to conform to the provisions of the first paragraph of section 371.

(2) The construction loan requirement for commercial and industrial buildings contained in the third paragraph of section 371, that there be a "valid and binding agreement entered into by a financially responsible lender to advance the full amount of the bank's loans upon the completion of the buildings" may be met by any form of takeout provision which includes a valid and binding agreement by a financially responsible party and which will result in the full repayment of the bank's loan upon completion of the buildings. The purpose of the statute is that there be adequate provision for the repayment of the full amount of the bank's loan within the time prescribed. This may be provided by a financially responsible buyer as well as by such a lender. The words "lender" and "advance" should be regarded as illustrating rather than requiring a particular form of takeout provision.

(c) *Residential buildings.* Loans made to finance the construction of buildings intended primarily for residential purposes are considered residential loans rather than commercial loans under the third paragraph of section 371.

§ 7.2405 Combined construction and permanent real estate loans.

A national bank may make a combined construction and permanent loan secured by residential, farm, industrial or commercial property for a period up to 30 years and 60 months. Section 371 does not require that interim and permanent financing be made separately.

§ 7.2410 Construction loans held beyond the permissible period.

Construction loans which have been held by a bank for a period exceeding 60 months and which are secured by liens on realty are to be considered real estate loans subject to the first paragraph of section 371. If the real estate security meets the requirements of section 371, or can be made to conform to such requirements, the loans will constitute conforming real estate loans. The total amount of such loans must be taken into account in determining whether the bank can make additional real estate loans within the aggregate limit prescribed by section 371.

§ 7.2600 Loans on forest tracts.

(a) *Law—12 U.S.C. 371 (fourth paragraph).*

(b) *Chattel mortgage loans.* Where the laws of a State permit a valid chattel mortgage on standing timber, a loan so secured is not a real estate loan under the second paragraph of 12 U.S.C. 371.

Subpart C—Bank Ownership of Property

§ 7.3000 General authority.

Law—12 U.S.C. 29.

§ 7.3005 Real estate necessary for accommodation in the transaction of business.

Real estate necessary to the accommodation of the bank's business includes real estate other than that upon which bank buildings are located. Thus, real estate used for parking facilities and data processing centers is necessary in the transaction of business. Such real estate also includes that held for future banking use, where the bank in good faith expects to utilize such property as bank premises. This will permit a prudent program of property acquisition for future bank use. Such real estate is to be treated as bank premises owned and so reported.

§ 7.3010 Municipal parking lots.

Where parking facilities are acquired by means of expenditures toward the acquisition and operation of municipal parking lots, such expenditures ordinarily represent a business expense to be charged off rather than treated as an investment.

§ 7.3020 Real estate acquired as salvage on uncollectible loans.

(a) *Disposal of "salvage" real estate within 5 years.* (1) A national bank may comply with the last paragraph of 12 U.S.C. 29 by retaining or transferring to a subsidiary or affiliate, for use in the business of the bank, subsidiary or affiliate, real estate acquired by the bank for a debt previously contracted.

(2) Compliance with the last paragraph of 12 U.S.C. 29 may also be accomplished, subject to prior approval of the Regional Administrator of National Banks, by disposal of real estate so acquired under an arrangement by which the bank will realize additional compensation upon the ultimate disposition of the property by the transferee where (i) the bank has been unable to dispose of the real estate except at an unreasonably low price resulting in a substantial loss to the bank and (ii) there is no reason to believe that a substantially higher price is obtainable for such real estate within a reasonable period.

(b) *Payment of existing liens on "salvage" real estate.* A national bank may assume or pay off encumbrances on real estate which it properly acquired as salvage in connection with a debt previously contracted, provided the bank's interest in the property is sufficient to justify such action.

§ 7.3025 Other real estate owned.

(a) Sections 7.3000 and 7.3020 set forth the legal requirements and Office policy relating to the acquisition and disposition of other real estate owned. The preferred method of disposition is through sale at a price sufficient to cover the bank's investment and costs of acquisition. When consummation of such a sale has not taken place and where the requirements of the last paragraph of 12 U.S.C. 29 cannot be met under the provisions of § 7.3020(a)(1), the following policy is to be initiated by the bank.

(1) The book value of each parcel of real estate should represent only the balance of the loan when transferred to Other Real Estate Owned. Accrued interest, taxes and attorney fees should be charged off upon transfer.

(2) A new appraisal of the property should be made at the time of its acquisition. When the book value exceeds this appraised value, the difference should be charged off.

(3) Except where authorized to the contrary by the Comptroller of the Currency, each parcel of real estate should be written down annually to achieve its elimination by the expiration of the statutory period imposed by 12 U.S.C. 29.

1st year—10 percent of book value as described in subparagraph (1) of this paragraph.
2d year—15 percent of book value as described in subparagraph (1) of this paragraph.
3d year—20 percent of book value as described in subparagraph (1) of this paragraph.
4th year—25 percent of book value as described in subparagraph (1) of this paragraph.
5th year—30 percent of book value as described in subparagraph (1) of this paragraph.

(b) Banks currently following a chargeoff program established prior to September 1, 1964, may be allowed to continue if they so desire.

(c) An alternate policy is permissible if, in the judgment of the Examiner, such a charge against profits would be harmful to the bank in view of more immediate problems such as asset weaknesses, earning power, capital or any other reason. In this case a substitute program may be initiated if fully supported by the facts as set forth in the Report of Examination.

(d) If a bank has any loan secured by a lien on real estate and the mortgagee is in possession of the property, collecting rents or entitled to collect rents, and looks to the sale of the real estate to liquidate the debt, the same rules as set forth in subparagraph (1) of this paragraph should be applied unless the obligation is being carried out in accordance with its terms.

(e) Loan write-downs as set forth in subparagraph (1) of this paragraph may be made as direct charges against the parcels of real estate, as unallocated charge offs or as credits to a valuation reserve set up specifically for that purpose.

§ 7.3100 Investment in bank premises or stock of a corporation holding premises.

(a) *Law—12 U.S.C. 371d.*

Hereafter no national bank, without the approval of the Comptroller of the Currency, • • • shall (1) invest in bank premises, or in the stock, bonds, debentures, or other such obligations of any corporation holding the premises of such bank or (2) make loans to or upon the security of the stock of any such corporation, if the aggregate of all such investments and loans, together with the amount of any indebtedness incurred by any such corporation which is an affiliate of the bank, as defined in (12 U.S.C. 221a) will exceed the amount of the capital stock of such bank.

(b) *Bank premises—(1) Permissible means of holding.* Real estate for bank premises may be acquired and held directly by a national bank by any reasonable and prudent means, including ownership in fee, a leasehold estate, or interest in a cooperative. Such real estate may be held either directly by the bank or by one or more subsidiaries or affiliates.

(2) *Furniture and equipment.* A bank premises corporation may own fixed assets, including bank furniture and data processing equipment, in addition to real estate. A bank premises corporation owning electronic data processing equipment leased to the bank for operation by the bank is not a bank service corporation within the meaning of the Bank Service Corporation Act. (12 U.S.C. 1861 et seq.)

(c) *Computation of investment in bank premises.* When a national bank proposes to make an investment in bank premises in any of the ways described in the statute, then the aggregate of all such investments must be added to the indebtedness incurred upon bank premises and other fixed assets by any corporation in which the bank has invested and which is affiliated with the bank in the manner described in 12 U.S.C. 221a in order to determine whether the approval of the Comptroller of the Currency is required. No such approval is required for investments made by an affiliated corporation holding the premises of the bank if the bank itself has made no investment in the affiliated corporation in any of the ways described in the statute.

(d) *Options to purchase.* An unexercised option to purchase bank premises or stock in a corporation holding bank premises is not an investment in bank premises. Prior approval of the Regional Administrator of National Banks is necessary to exercise the option if the purchase price, including the amount paid for the option, together with the bank's other investment in fixed assets would exceed the amount of the bank's capital stock.

(e) *Approval by Regional Administrator.* The approval of the Regional Administrator of National Banks shall be obtained before the consummation of any plans under which the bank's investment in bank premises will be increased to an amount exceeding its capital stock. The Regional Administrator of National Banks will ordinarily approve an investment in fixed assets aggregating in amount up to 50 percent of capital stock, surplus and undivided profits where a reasonable need for such investment can be shown.

§ 7.3300 Leasing of public facilities.

A national bank may purchase or construct a municipal building, such as a school building, or other similar public facility and, as holder of legal title, lease the same to a municipality or other public authority having resources sufficient to make payment of all rentals as they become due. The lease agreement shall provide that upon its expiration the lessee will become owner of the building or facility.

§ 7.3400 Leasing of personal property.

A national bank may become the owner or lessor of personal property acquired upon the specific request and for the use of a customer and may incur such additional obligations as may be incident to becoming an owner and lessor of such property. Lease transactions do not result in obligations for the purpose of 12 U.S.C. 84. Since lease payments are in the nature of rent rather than interest, 12 U.S.C. 85 and 86 are not applicable.

§ 7.3500 Utilization of data processing equipment.

Incidental to its banking services, a national bank may make available its data processing equipment or perform data processing services on such equipment for other banks and bank customers.

Subpart D—Corporate Practices

Shareholders' Meetings

§ 7.4000 Notice of shareholders' meetings.

At least 10 days notice by first class mail, postage prepaid, should be given of the time, place and purpose of all shareholders' meetings. A longer period may be required by the articles of association, bylaws or law. Where action other than election of directors is contemplated, the relevant statutory provision may require not only a longer period of notice but that notice be given by certified or registered mail, by publication or both; e.g., 12 U.S.C. 214a, 215, and 215a, relating to conversions, consolidations and mergers of national banks.

§ 7.4005 Date of shareholders' meeting.

The date of the annual meeting of shareholders is required to be specified in the bylaws of a national bank. See 12 U.S.C. 71. Accordingly, article Fourth of the Articles of Association should be amended to read as follows:

FOURTH. The regular annual meeting of the shareholders of this Association shall be held at its main banking house, or other convenient place duly authorized by the board of directors, on such day of each year as is specified therefor in the bylaws.

§ 7.4010 Quorum for shareholders' meeting.

The statutes regulating national banks are silent with regard to the number of shareholders required to constitute a quorum at a shareholder meeting. Therefore, the articles of association or bylaws of a national bank may specify the vote necessary for the transaction of business at a shareholder meeting. If neither the articles of association nor the bylaws specify what constitutes a quorum, the rules of general corporate law are applicable.

§ 7.4015 Solicitation of proxies for shareholders' meeting.

(a) *Comptroller's regulation.* Solicitation of a proxy with respect to stock of a national bank having a class of equity securities held of record by 750 or more persons (after May 1, 1967, 500 or more persons) is subject to Part 11 of this chapter.

(b) *Convertible capital debentures.* The owner of a convertible capital note, capital debenture, or similar obligation is not a holder of an equity security until exercise of the conversion right.

§ 7.4020 Director or attorney as proxy.

Any person or groups of persons, including directors or attorneys for the bank may be designated to act as proxy but not officers, clerks, tellers, or bookkeepers of the bank.

Directors

§ 7.4100 Number of directors.

The number of directors is fixed by 12 U.S.C. 71a at not less than five nor more than 25.

§ 7.4105 Annual meeting for election of directors.

When the day fixed for the regular annual meeting of the shareholders falls on a legal holiday in the state in which the bank is located, the shareholders' meeting shall be held, and the directors elected, on the next following banking day. The provision that directors "shall hold office • • • until their successors are elected and have qualified" is simply for the purpose of preventing the bank from being without a directorate in the event that, due to inadvertence or emergency, the shareholders' meeting is not held on the specified date or there is delay in the qualification of persons elected to the new board.

§ 7.4110 Honorary directors or advisory board.

Honorary or advisory members of the board of directors may be appointed by a national bank to act in advisory capacities without the power of final decision in matters concerning the business of the bank. Any listing of such honorary or advisory directors must distinguish between them and the bank's board of directors or indicate their advisory status.

§ 7.4200 Qualifications of directors.

Law—12 U.S.C. 72.

§ 7.4205 Person convicted of crime serving as director, officer, or employee.

Law—12 U.S.C. 1829.

§ 7.4210 Ownership of stock necessary to qualify as director.

To comply with the requirements of 12 U.S.C. 72 relating to the ownership of stock, a director must own his qualifying shares in his own right.

(a) *Joint ownership and tenancies in common.* Bank shares held jointly or as a tenant in common are qualifying shares held by a director "in his own right": *Provided,* That the aggregate par value of the shares which the director would be entitled to receive on dissolution of the joint tenancy or tenancy in common is not less than $1,000.

(b) *Pledge shares.* National bank shares pledged by the holder to secure a loan do not constitute shares owned "in his own right" for purposes of qualifications as a director.

(c) *Shares subject to repurchase option.* Shares of national bank stock which are purchased subject to an absolute option vested in the seller to repurchase the shares within a specified period are not owned by the purchaser "in his own right" for purposes of qualifying as a director of the bank under section 72. The retention of such an option by the seller would enable him to disqualify the purchaser as a director at any time simply by exercising the repurchase option, and this possibility would be inconsistent with the concept of bona fide independent ownership upon which the stock ownership requirement is based.

(d) *Shares in voting trust.* Shares deposited in a voting trust where the depositor surrenders (1) legal ownership (depositor ceases to be registered owner of the stock), (2) power to vote the stock or to direct how it shall be voted, or (3) power to transfer legal title to the stock, are not owned so as to qualify as directors' qualifying shares.

(e) *Shares in inter vivos trust.* Shares deposited by a director in a living trust as to which the director is a trustee and retains an absolute power of revocation are qualifying shares owned by the director "in his own right."

§ 7.4300 Cumulative voting in election of directors.

(a) *Law—12 U.S.C. 61.*

In all elections of directors, each shareholder shall have the right to vote the number of shares owned by him for as many persons as there are directors to be elected, or to cumulate such shares and give one candidate as many votes as the number of directors multiplied by the number of his shares shall equal, or to distribute them on the same principle among as many candidates as he shall think fit; and in deciding all other questions at meetings of shareholders, each shareholder shall be entitled to one vote on each share of stock held by him • • •.

(b) *Example.* For example, where a national bank with a board of directors consisting of seven members, one shareholder, owning 150 shares cumulates his 1,050 votes so as to cast 525 votes each for two of nine candidates. The remaining (majority) shareholders, owning 300 shares, cast 300 votes for each of seven other candidates. The two candidates who received 525 votes would be elected. None of the seven candidates who received 300 votes each would be elected to the remaining five directorships. A second ballot should be held to elect five directors, and in his second ballot the

shares which were voted for the two directors elected on the first ballot could not be voted. In other words on the second ballot (and any subsequent ballots which prove necessary) a stockholder is not entitled to vote shares which he has already fully cumulated and voted in favor of a successful candidate. This rule is based on the fact that to permit such shares to be voted again would result, in some cases, in defeating the proportional representation of all interests which is the purpose of cumulative voting.

§ 7.4305 Filling vacancy in or increasing board of directors.

(a) *Law—12 U.S.C. 74.*

Any vacancy in the board shall be filled through appointment by a majority of the remaining directors then in office, and any director so appointed shall hold his place until the next election.

(b) *Appointment pursuant to articles of association.* If authorized by the bank's articles of association or an amendment thereto, a national bank may properly increase the number of its directors within the limits specified in 12 U.S.C. 71a and appoint persons to fill the resulting vacancies between meetings of stockholders. Such authorization to increase the number of directors shall be limited to not more than two where the number of directors last elected by shareholders was 15 or less and not more than four where the number of directors last elected by shareholders was 16 or more.

§ 7.4400 Organization meeting.

Upon receiving the returns of the judges of election, the chairman or secretary should notify the directors-elect of their election and of the time at which they should meet for the purpose of taking their oaths and organizing the new board. After the board has organized, it should appoint committees of the board and officers, fix salaries for the ensuing year, and transact such other business as may properly come before the organization meeting.

§ 7.4410 List of directors.

(a) Immediately after the organization meeting of the new board, the president, cashier, or secretary of the bank should forward Form CC 7022–10 to the Comptroller of the Currency.

(b) The names of the directors on this form should agree with the respective names of the directors on the oaths. The number of shares represented at the meeting should be shown on the form and if it is known that not all shares represented at the meeting were voted, this fact, to the extent practicable the number of shares represented, and the number voted should be indicated under "remarks" on the form. The form should be signed by the president, cashier or secretary. See section 7.5245.

§ 7.4415 Oath of directors.

(a) 12 U.S.C. 73 prescribes the requirements with reference to the oath to be taken by directors. A notary public who is also an officer of a national bank is not eligible to administer the oath to directors of that bank. A notary public who is a director but not an officer of a national bank is eligible, however, to administer the oath to directors of that bank.

(b) Directors in attendance at the organization meeting who are residents of the same State should execute the joint oath (Form CC 7022–08), and those who are residents of separate states should execute the individual oath (Form CC 7022–09). This form is also appropriate for directors not in attendance at the meeting. A reelected director who has had uninterrupted service is required to file another oath upon reelection.

(c) Oaths of directors shall be immediately transmitted to the Comptroller of the Currency and shall be filed and preserved in his office for a period of 10 years.

§ 7.4420 Quorum of board of directors; proxies not permissible.

The articles of association or bylaws of a national bank should provide that, for the transaction of business, a quorum of the board of directors shall consist of not less than a majority of the entire board then in office. A national bank director cannot vote by proxy.

§ 7.4425 Delegation of directors' duties.

The board of directors of a national bank may not delegate responsibility for its duties but may assign the performance thereof.

OFFICERS, DIRECTORS, AND EMPLOYEES

§ 7.5000 Bonus and profit sharing plans.

A national bank may adopt any reasonable bonus or profit-sharing plan designed to insure adequate remuneration of bank officers and employees.

§ 7.5010 Pension plans.

National banks are encouraged to provide employee pension plans and to make reasonable contributions to the cost thereof. Eligibility standards should be applied uniformly and there should be no discriminatory provisions in the plan which would result in special benefits to any officer or employee. The plan should be submitted to shareholders for approval. Ordinarily, it is desirable that such plans qualify under section 401 et seq. of the Internal Revenue Code of 1954, as amended.

§ 7.5015 Employee stock option and stock purchase plans.

National banks may provide employee stock purchase and stock option plans in accordance with § 13.1 of this chapter.

§ 7.5200 President as director.

Pursuant to 12 U.S.C. 76, the president of a national bank must be a member of its board of directors. A director other than the president may be elected chairman of the board.

§ 7.5210 Same person holding offices of president and cashier.

As various statutory provisions require documents to be executed by either the president or the cashier, or both, separate persons should occupy those offices. See § 7.5245.

§ 7.5215 Fidelity bonds covering officers and employees.

(a) All officers and employees of a national bank must have adequate fidelity coverage, and the failure of directors to require bonds with adequate sureties and in sufficient amount may make them liable for any losses which the bank sustains because of the absence of such bonds. Directors should not serve as sureties on such bonds.

(b) The board of directors should determine the amount of such coverage, premised upon a consideration of such factors as (1) internal auditing safeguards employed, (2) number of employees, (3) amount of deposit liabilities, and (4) amount of cash and securities normally held by the bank, among others.

§ 7.5217 Indemnification of directors and officers.

(a) In order to secure and retain competent personnel, a national bank may amend its articles of association to provide for the indemnification of directors, officers, and other employees against legal and other expenses incurred in defending law suits brought against them by reason of the performance of their official duties.

(b) Payment of premiums for insurance covering such indemnification of officers, directors, and other employees is a permissible expense.

(c) It should be understood, however, that in order to preserve incentives for sound banking principles neither the bank's articles of association, bylaws, shareholder resolutions nor insurance shall provide for the indemnification of bank personnel who are adjudged guilty of, or liable for, willful misconduct, gross neglect of duty, or criminal acts.

§ 7.5220 Contracts of employment.

The board of directors of a national bank, pursuant to paragraph Fifth of 12 U.S.C. 24, may enter into employment contracts with its officers and employees upon reasonable terms and conditions.

§ 7.5225 Defalcations by employees.

(a) An immediate written report shall be made by an appropriate officer of the bank to the Regional Administrator of National Banks, the nearest office of the FBI, the U.S. attorney for the bank's district, and the bonding company, of any of the following events:

(1) Any known or suspected theft, embezzlement, check-kiting operation, misappropriation or other defalcation involving bank personnel or bank funds in any amount. Where there is reason to suspect any person or persons in connection with the event, the identity of such persons and the reason for suspicion shall be included in the report.

(2) Any state of facts growing out of the affairs of the bank known or suspected to involve criminal violation of any other section of the United States Code.

(3) Any mysterious disappearance or unexplained shortage of bank funds or other assets of $1,000 or more.

(b) The chief executive or other appropriate officer shall notify the board of directors not later than at their next meeting, of the filing of any report hereunder.

§ 7.5230 Purchase of employee's residence.

As a legitimate part of a program for the development and efficient utilization of bank personnel, a national bank may purchase the residence of an employee who has been transferred to another area, in order to spare him a loss in the prevailing market. The bank should arrange for early divestment of title to such property.

§ 7.5245 Duties of cashier performed by secretary.

The bylaws of a national bank may assign to the bank's secretary, or to any other officer the board of directors designates to carry out the functions usually performed by a corporate secretary, some or all of the duties previously assigned to the banks' cashier, including custody and use of the corporate seal and the execution of stock certificates and other documents.

SHARES, STOCK CERTIFICATES, AND DIVIDENDS

§ 7.6005 Restricting transfer of stock and record dates.

(a) The provisions of 12 U.S.C. 52 permit a national bank to impose conditions upon the transfer of its stock reasonably calculated to simplify the work of the bank with respect to stock transfers, voting at shareholder meetings, and related matters and to protect it against fraudulent transfers.

(b) Stock records of a national bank may be closed for a reasonable period to ascertain shareholders for voting purposes. As an alternative, the bank may fix a record date for determining the shareholders entitled to notice of and to vote at any meeting of shareholders. Such record date should be in reasonable proximity to the date of giving notice to the shareholders of such meeting.

§ 7.6010 Facsimile signatures on bank stock certificates.

12 U.S.C. 52 requires that every national bank stock certificate shall be signed by the president and the cashier of the association, or by such other officers as the bylaws of the association shall provide, and shall be sealed with the seal of the association. Such signatures may be manual or facsimile.

§ 7.6015 Lost stock certificates.

A national bank may adopt procedures for replacing lost, stolen, or destroyed stock certificates that meet the requirements of the law of the State in which the bank is located in the event that the bank's articles of association or bylaws have no provisions for such procedures.

§ 7.6025 Books and records of national banks.

(a) *Inspection.* The only provision of Federal banking law authorizing persons other than the Comptroller of the Currency or his authorized representatives to inspect books or records of a national bank is contained in 12 U.S.C. 62, relating to the right of shareholders, creditors, and certain tax officials to inspect the list of shareholders of a bank. Production of records may, however, be required under normal judicial procedures.

(b) *Visitorial powers.* The exercise of visitorial powers over national banks is vested in the Comptroller of the Currency. See 12 U.S.C. 484. Other officials, including State banking officials, have no authority to conduct examinations or to inspect or require the production of books or records of national banks, except as authorized by law. Federal law provides special procedures for verifying payroll records for unemployment compensation purposes (26 U.S.C. 3305(c)), for enforcing the Fair Labor Standards Act (29 U.S.C. 211), and for ascertaining the correctness of Federal tax returns within the purview of 26 U.S.C. 7602.

(c) *Reports of examination.* The report of examination made by an examiner selected by the Comptroller of the Currency is designed for use in the supervision of the bank. The bank's copy of the report is the property of the Comptroller of the Currency and is furnished to the bank solely for its confidential use. The bank's directors, in keeping with their responsibilities both to depositors and to stockholders, should thoroughly review the report. However, under no circumstances shall the bank, or any of its directors, officers, or employees disclose or make public in any manner, the report or any portion thereof. Accordingly, such report shall not be made available to other banking institutions in connection with proposed transactions such as mergers and consolidations. Similarly, such report shall not be made available to a clearing house association. However, this Office has no objection to the voluntary disclosure by a bank of information concerning its affairs to such association where such disclosure is through reports prepared by the bank or by others at the request of the bank. See § 4.18 of this chapter.

§ 7.6030 Purchase of own shares or loan secured by own shares.

(a) *Law—12 U.S.C. 83.*

No association shall make any loan or discount on the security of the shares of its own capital stock, nor be the purchaser or holder of any such shares, unless such security or purchase shall be necessary to prevent loss upon a debt previously contracted in good faith; and stock so purchased or acquired shall, within 6 months from the time of its purchase, be sold or disposed of at public or private sale; or, in default thereof, a receiver may be appointed to close up the business of the association, according to (12 U.S.C. 192).

(b) *Permitted agreements, relating to bank shares.* A national bank may require a borrower holding shares of the bank to execute agreements (1) not to pledge, give away, transfer, or otherwise assign such shares, (2) to pledge such shares at the request of the bank when necessary to prevent loss, and (3) to leave such shares in the bank's custody.

(c) *Use of capital notes and debentures.* A national bank may not make loans secured by a pledge of its own capital notes and debentures. Such notes and debentures must be subordinated to the claims of depositors and other creditors of the issuing bank, and are, therefore, capital instruments within the purview of 12 U.S.C. 83.

§ 7.6040 Fractional shares.

To avoid complicated record keeping in connection with fractional shares, a national bank issuing additional stock by stock dividend, upon consolidation or merger, or otherwise, may adopt arrangements such as the following preclude the issuance of fractional shares:

(a) Script or warrants for trading in fractions may be issued.

(b) If there is an established and active market in the bank's stock, the bank may make reasonable arrangements to provide those to whom fractional shares would otherwise be issued an opportunity to realize at a fair price upon the fraction not being issued through its sale, or the purchase of the additional fraction required for a full share.

(c) The bank may remit the cash equivalent of the fraction not being issued to those to whom fractional shares would otherwise be issued. The cash equivalent shall be based on the market value of the stock, if there is an established and active market in the bank's stock, or, in the absence of such a market, on a reliable and disinterested determination as to the fair market value of the stock if such stock is available.

(d) The bank may sell full shares representing all the fractions at public auction or to the highest bidder after having solicited and received sealed bids from at least three licensed stock brokers. The proceeds of sale shall be distributed pro rata to shareholders who otherwise would be entitled to the fractional shares.

§ 7.6050 Preemptive rights.

The articles of association of a national bank, by affirmative vote of the holders of two-thirds of the bank's outstanding voting shares, must provide for or specifically negate the vesting of preemptive rights in the shareholders thereof.

§ 7.6060 Voting trusts.

(a) From a supervisory viewpoint, a voting trust of national bank stock is not objectionable if there is nothing in the operation of the voting trust that adversely affects the welfare of the bank.

(b) The law of the State in which the bank is located should also be observed in the preparation of the trust agreement.

§ 7.6100 Limitations on payment of dividends.

The board of directors of a national bank may, subject to the following limitations, declare quarterly, semiannual or annual dividends of so much of the net profits of the bank as it may judge expedient. No dividend may be declared which would impair the capital of the bank. The payment of dividends is subject to the following additional statutory limitations.

(a) Until the surplus fund of a national bank is equal to its common capital, no dividends may be declared unless, in the case of quarterly or semiannual dividends, not less than one-tenth of the bank's net profits of the preceding half-year has been carried to the surplus fund and, in case of annual dividends, not less than one-tenth of its net profits of the preceding two consecutive half-year periods has been carried to the surplus fund (12 U.S.C. 60).

(b) In addition to the foregoing limitations, the approval of the Regional Administrator of National Banks is required if the total of all dividends, including the proposed dividend, declared by the bank in any calendar year exceeds the total of the bank's net profits of that year combined with its retained net profits of the preceding 2 years, less any required transfers to surplus or a fund for the retirement of preferred stock (12 U.S.C. 60(a). For the purpose of this and the preceding subparagraph (1), the term "net profits" means "the remainder of all earnings from current operations plus actual recoveries on loans and investments and other assets, after deducting from the total thereof all current operating expenses, actual losses, accrued dividends on preferred stock, if any, and all Federal and State taxes." (12 U.S.C. 60(b)).

(c) No dividend may be declared or paid on the common stock of a national bank until cumulative dividends on outstanding preferred stock have been paid in full (12 U.S.C. 51b) and no dividends may be paid if the bank is in default on the payment of any assessment due to the Federal Deposit Insurance Corporation (12 U.S.C. 1828(b)).

§ 7.6120 Dividends payable in property other than cash.

In addition to cash dividends, directors of a national bank may declare dividends payable in property with the approval of the Comptroller of the Currency. Even though the property distributed has been previously charged down or written off entirely, the dividend is equivalent to a cash dividend in an amount equal to actual current value of the property. Before the dividend is declared, the excess of actual value over book value should be shown on the books of the bank as a recovery, and the dividend should then be declared in the amount of the full book value (equivalent to actual current value) of the property being distributed.

§ 7.6125 Payment of dividends; bad debts.

(a) Matured debts due a national bank on which interest is past due and unpaid for 6 months are statutory bad debts, unless well secured and in process of collection, to be deducted in computing funds available for the payment of dividends. Overdue indebtedness of every type owing to the bank must be taken into account, whether in form of ordinary loans made by the bank or in the form of investment securities owned by it, or otherwise.

(b) The statutory reference (12 U.S.C. 56) to debts due to the bank means debts which have matured. Maturity may be the result of demand, arrival of the stated maturity date, or acceleration either by contract or operation of law.

(c) In the absence of demand for payment, demand obligations become overdue only after a reasonable time for payment has elapsed; what constitutes a reasonable time depends on all the circumstances of each particular case. For purposes of 12 U.S.C. 56, relating to withdrawal of capital and unearned dividends, demand obligations which are 6 months or more behind a schedule on interest payments (and not well secured and in process of collection) constitute bad debts.

(d) Installment obligations on which interest is past due for 6 months are statutory bad debts subject to the other conditions of the statute, to the extent that payments of principal are in default.

(e) For purposes of 12 U.S.C. 56, it is immaterial whether all or part of the 6-months' period of default on interest has run before the debt matures.

(f) In order to be well secured, a loan must be secured by collateral in the form of mortgage or liens on, or pledges of, real or personal property, including securities having a realizable value sufficient to discharge the debt in full or the guaranty of a financially responsible party.

(g) For purposes of the statute, the amount of the debt is the amount at which it is carried on the bank's books, after deducting any chargeoff which has been made.

(h) In the case of claims against bankrupts' or decedents' estates, a debt is considered well secured only in the event (1) the obligation is fully secured by a specific lien on realty of personalty or (2) the claim of the bank against the estate has been filed, the statutory period for filing claims has expired and the assets of the estate are adequate to discharge all obligations in full.

(i) The requirement that a defaulted debt, even though well secured, must be in process of collection to be removed from the category of statutory bad debts is not satisfied unless collection of the particular debt is proceeding in due course, either through legal action, including judgment enforcement procedures, or in appropriate circumstances, through vigorous collection efforts not involving legal action which may reasonably be expected to result in repayment of the debt or in its restoration to current status at an early date.

(j) When a debtor has been adjudicated bankrupt or has died and his estate has been subjected to administration, it is often impossible for a creditor to do more than file a claim with the trustee, executor or administrator. In such cases, if the claim has been duly filed, it is considered by the Comptroller of the Currency as being in process of collection, although it will still be a bad debt if it is not well secured.

Subpart E—Miscellaneous

Guaranties and Suretyship

§ 7.7000 Guaranty or endorsement of notes or other obligations sold by the bank.

A national bank may lawfully endorse or otherwise guarantee notes or other obligations sold by the bank for its own account. The amount of the obligations covered by such guaranty or endorsement should be reflected as a liability on the records and in the reports of condition of the bank and such liabilities are to be included in computing the aggregate indebtedness of the bank which, pursuant to 12 U.S.C. 82, may not exceed (with certain exceptions) the amount of the bank's capital stock plus 50 percent of its unimpaired surplus fund.

§ 7.7010 National bank as guarantor or surety on indemnity bond.

(a) A national bank may lend its credit, bind itself as a surety to indemnify another, or otherwise become a guarantor, if it has a substantial interest in the performance of the transaction involved or has a segregated deposit sufficient in amount to cover the bank's total potential liability. For example, a bank, as a fiduciary, has a sufficient interest in the faithful performance by its cofiduciary of his duties to act as surety on the bond of such cofiduciary.

(b) Under appropriate circumstances, foreign branches may exercise additional powers pursuant to 12 U.S.C. 604a.

§ 7.7012 Foreign operations.

A national bank may guarantee the deposits and other liabilities of its Edge Act and agreement corporations and of its corporate instrumentalities in foreign countries.

§ 7.7015 Check "guaranty" plans.

An arrangement whereby a bank holds out to the public that it will honor checks drawn on it up to a certain amount by a depositor displaying a so-called "check guaranty card," is in essence an agreement by the bank with its depositor to extend credit to the depositor, if necessary, to honor his checks. Such an arrangement is essentially a commitment to lend and is within the power of a national bank.

§ 7.7016 Letters of credit distinguished from guaranty.

A national bank may issue its own letters of credit to or on behalf of its customers in the normal course of its business provided that the bank's obligation may legally be described as a letter of credit and not as a mere guaranty. In order to constitute a true letter-of-credit transaction, the following elements must all be present: (a) The bank must receive a fee or other valid business consideration for the issuance of its undertaking; (b) the bank's undertaking must contain a specified expiration date or be for a definite term; (c) the bank's undertaking must not be unlimited but be up to a stated amount; (d) the bank's obligation to pay must arise only upon the presentation of specific documents and the bank must not be called upon to determine disputed questions of fact or law; (e) the bank's customer must have an unqualified obligation to reimburse the bank on the same condition as the bank has paid.

Insurance

§ 7.7100 National banks acting as general insurance agents.

12 U.S.C. 92 provides that national banks may act as agents for any fire, life, or other insurance company in any place the population of which does not exceed 5,000 inhabitants. This provision is applicable to any office of a national bank when the office is located in a community having a population of less than 5,000 even though the principal office of such bank is located in a community whose population exceeds 5,000.

§ 7.7115 Insuring lives of bank officers.

A national bank may purchase insurance for the benefit of the bank on the life of an officer whose death would be of such consequence to the bank as to give it an insurable interest in his life.

§ 7.7200 Authority to act as "finder."

A national bank, pursuant to request, may act as "finder" in bringing together a buyer and seller, where the bank's activity is limited to the introduction and it takes no further part in the negotiations. For this service the bank may accept a fee.

Interest Charges and Usury

§ 7.7310 Charging interest at rates permitted competing institutions; charging interest to corporate borrowers.

(a) A national bank may charge interest at the maximum rate permitted by State law to any competing State-chartered or licensed lending institution. If State law permits a higher interest rate on a specified class of loans, a national bank making such loans at such higher rate is subject only to the provisions of State law relating to such class of loans that are material to the determination of the interest rate. For example, a national bank may lawfully charge the highest rate permitted to be charged by a State-licensed small loan company or morris plan bank, without being so licensed.

(b) A national bank located in a State the law of which denies the defense of usury to a corporate borrower may charge a corporate borrower any rate of interest agreed upon by such borrower.

§ 7.7312 Loan agreement providing for share in profits, income or earnings.

A national bank may take as consideration for a loan a share in the profit, income or earnings from a business enterprise of a borrower. Such share may be in addition to or in lieu of interest. The borrower's obligation to repay principal, however, shall not be conditioned upon the profit, income or earnings of the business enterprise.

§ 7.7315 Charging additional fee for credit report or investigation of borrower.

Subject to contrary or limiting State statute, a national bank may exact from a borrower, in addition to interest taken at the highest rate permitted under State law, reasonable fees or compensation for credit reports or investigations with respect to a borrower's credit.

Transactions With Affiliates

§ 7.7355 Debts of affiliate as bank indebtedness.

(a) For purposes of 12 U.S.C. 82, a national bank's indebtedness or liability does not include the debts or liabilities of an affiliate of the bank, such as a premises holding corporation (12 U.S.C. 371d), except to the extent of each debt of, or other claim against, the affiliate with respect to which the bank is personally liable either as obligor or guarantor. Similarly, for purposes of 12 U.S.C. 56, a national bank's bad debts do not include bad debts due to an affiliate.

(b) This section does not apply to debts of operating subsidiaries described and discussed in § 7.7376.

§ 7.7360 Loans secured by stock or obligations of an affiliate.

Where a loan is otherwise adequately secured, additional security in the form of the capital stock, bonds, debentures, or other such obligations of an affiliate need not be considered in determining the limitation contained in 12 U.S.C. 371c with respect to the aggregate amount of loans secured by stock or obligations of an affiliate.

Operations Through Subsidiaries

§ 7.7376 Operating subsidiaries.

(a) *General rule.* With the prior approval of the Comptroller of the Currency, a national bank may engage in activities, which are a part of the business of banking or incidental thereto, by means of an operating subsidiary corporation. In order to qualify as an operating subsidiary hereunder, at least 80 percent of the voting stock of the subsidiary must be owned by the parent bank.

(b) *Activities permitted.* An operating subsidiary may perform any business function which the parent bank is permitted to perform. For example, through a bank department or an operating subsidary, a national bank may issue credit cards, service mortgages, lease property, offer travel services, or operate a credit bureau.

(c) *Transactions with parent bank.* Transactions between the parent bank and the operating subsidiaries are subject to the limitations contained in 12 U.S.C. 371c, unless the operating subsidiary is a kind of company excepted by the provisions of that section. Companies engaged solely in furnishing services to or performing services for a parent bank constitute an excepted category. Any service performed by an operating subsidiary as defined herein, may be presumed to be performed for its parent bank, for the purpose of section 371c. Therefore, the limitations contained in 12 U.S.C. 371c will ordinarily not be applicable to transactions between a parent bank and its operating subsidiary.

(d) *Applicability of banking laws.*—(1) *Banking laws applicable.* Except as otherwise permitted by statute or regulation, all provisions of Federal banking laws applicable to the operations of the parent bank shall be equally applicable to the operations of its operating subsidiaries.

(2) *Consolidation of figures.* Unless otherwise provided by statute or regulation, pertinent book figures of the parent bank and its operating subsidiaries shall be consolidated for the purpose of applying applicable statutory limitations, such as sections 56, 60, 82, 84, or 371d.

Example. The combined exposures of the parent bank and all of its operating subsidiaries to a single borrower shall not exceed the bank's loan limit (12 U.S.C. 84).

Example. (The combined borrowings of the bank and all of its operating subsidiaries shall not exceed the bank's borrowing limit (12 U.S.C. 82)).

(3) *Examination and supervision.* Each operating subsidiary shall be subject to examination and supervision by the Office of the Comptroller of the Currency in the same manner and to the same extent as the parent bank. If, upon examination, the Comptroller of the Currency shall ascertain that the subsidiary is created or operated in violation of law or regulation or that the manner of operation is detrimental to the business of the parent bank and its depositors, he may order the bank to dispose of all or part of such subsidiary upon such terms as he may deem proper.

(4) *Report of disposition of operating subsidiary.* Prior to disposition of an operating subsidiary, the parent bank shall inform the Comptroller of the Currency and the Regional Administrator, by letter, of the terms of the transaction.

§ 7.7378 Issuance of credit cards.

A national bank may issue credit cards, either directly or through a subsidiary corporation.

§ 7.7379 Servicing of mortgage and other loans as agent.

A national bank may act as agent in warehousing and servicing of mortgage and other loans, either directly or through a subsidiary corporation.

§ 7.7380 Loans originating at other than banking offices.

(a) A national bank may utilize the services of and compensate persons not employed by the bank for originating loans.

(b) Origination of loans by employees or agents of a national bank or of a subsidiary corporation at locations other than the main office or a branch office of the bank does not violate 12 U.S.C. 36 and 81 provided that the loans are approved and made at the main office or a branch office of the bank or at an office of the subsidiary located on the premises of, or contiguous to, the main office or branch office of the bank.

§ 7.7390 Bank service corporations.

(a) The provisions of 12 U.S.C. 1861–1865 permit national banks to invest an amount not exceeding 10 percent of capital and surplus in the stock of a corporation organized to perform bank services for two or more banks. The term "invest", as used in the Act, includes both the purchase of stock in and loans to a service corporation. Nothing in the Act or its legislative history would preclude banks from sharing in the ownership of the corporation with individuals or with corporations other than banks. "Bank services" is defined to include check and deposit sorting and posting; computation and posting of interest and other credits and charges; preparation and mailing of checks, statements, notices, and similar items; or any other clerical, bookkeeping, accounting, statistical or similar function performed for a bank. No national bank may cause these services to be performed for it by any means unless assurances satisfactory to the Comptroller of the Currency are furnished that the performances thereof will be subject to his regulation and examination. No such assurances are necessary where the bank owns the equipment outright, however. When a national bank invests in a bank service corporation, the bank must obtain from said corporation a letter recognizing the right of the Comptroller to examine and regulate its activities. This letter must be retained as a part of the permanent records of the bank and, in addition, a copy must be entered in the minutes of the board of directors. The examiner at the time of the regular examination will review the assurances for compliance with the requirements of the statute. In the instance where a bank contracts for the performance of such services, rather than invests in a bank service corporation, the bank must obtain this letter from the supplier of said service.

(b) 12 U.S.C. 1863 prohibits a discriminatory denial of bank services by a bank service corporation to a competitor of any bank holding stock therein. In addition, such corporations may only perform bank services for banks. Bank services, however, as defined in the Act, would include any service which a bank would ordinarily perform for a customer. Accordingly, if a bank undertakes to handle the payroll accounts or the accounts receivable of a customer, a bank service corporation may perform for the bank the service necessary to enable the bank to fulfill its undertaking.

OTHER RULINGS

§ 7.7400 Deposits by national banks in nonmember banks.

12 U.S.C. 463 forbids member banks to keep on deposit with any nonmember State bank or trust company a sum exceeding 10 percent of capital and surplus. The bank of North Dakota is not a nonmember State bank within the meaning of this section and national banks, therefore, may maintain deposits with that bank in excess of 10 percent.

§ 7.7405 National banks as depositaries of public money.

12 U.S.C. 90 and 12 U.S.C. 265 govern the appointments and regulation of national banks as depositaries of public money. Upon request from any national bank asking to be designated a depositary for public moneys the Deposits Branch, Bureau of Accounts of the Treasury Department will furnish the bank with appropriate instructions, including applicable Treasury regulations.

§ 7.7410 Pledge of bank assets as security for deposits.

National banks lack the power to pledge their assets to secure private deposits. However, Federal statutes permit national banks to pledge assets as security for public money (12 U.S.C. 90); certain Indian moneys (25 U.S.C. 156, 162 and 162a); insolvent national bank funds (12 U.S.C. 192); Government of Puerto Rico funds (48 U.S.C. 780); proceeds of sale of U.S. obligations (31 U.S.C. 771); funds deposited or held in trust awaiting investment (12 U.S.C. 92a) and bankruptcy funds deposited under the provisions of 11 U.S.C. 101.

§ 7.7415 Surety bond in lieu of pledged assets.

If an insurance company's surety bond is acceptable to a public depositor as surety for public deposits, a national bank may obtain such a surety bond and pledge securities or other assets in order to reduce its premium.

§ 7.7420 Acceptances.

National banks are not limited in the character of acceptances which they may make in financing credit transactions, and bankers' acceptances may be used for such purpose, since the making of acceptances is an essential part of banking authorized by 12 U.S.C. 24.

§ 7.7430 Preparing income tax returns for customers or public.

While a national bank may not serve as an expert tax consultant, it may assist its customers in preparing their tax returns, either gratuitously or for reasonable fees.

§ 7.7434 Business hours.

Agreements, arrangements, undertakings, or understandings among banks, through clearing houses or otherwise, concerning hours or days when such banks may be open for business are not permissible in any form. Wherever a bank has been involved in any of the practices cited, the board of directors should review its banking hours independently of any other bank, and take appropriate action to establish independently a schedule of banking hours. In taking this action, it is appropriate to make such changes in the schedule of banking hours as are deemed necessary or desirable in the light of the individual bank's costs and competitive position.

§ 7.7435 Banks remaining closed.

There is no Federal law governing holidays for national banks. Local counsel should be consulted on the question of possible liability under State laws affecting the validity of transactions consummated on days designated legal holidays by State authorities and also on the question of possible liability if the bank remains closed on any day not designated a legal holiday by State authorities.

§ 7.7445 Charitable foundations.

A national bank may establish a charitable foundation (either in the form of a charitable trust or a nonprofit corporation as provided by State law) to assist in making the charitable contributions permitted by paragraph Eighth of 12 U.S.C. 24 if the following conditions are met:

(a) The instrument creating the foundation (1) sets forth the purposes of the foundation in such fashion as to make it exclusively a charitable, philanthropic or benevolent instrumentality, and (2) provides that the operations of the foundation shall be fully disclosed to the Office of the Comptroller of the Currency upon request.

(b) The trust department of the bank or one or more directors or officers of the bank acts as trustees or directors of the foundation.

(c) Contributions by the bank to the foundation in any one year do not exceed the amount permitted by Federal law as a deduction from income for the purpose of the Federal tar on corporate income.

§ 7.7455 National banks holding collateral stock as nominee.

In accepting stock of another bank or other corporation as collateral for a loan, a national bank may have such stock transferred to its name, as nominee.

§ 7.7475 National banks acting as travel agents.

Incident to those powers vested in them under 12 U.S.C. 24, national banks may provide travel services for their customers and receive compensation therefor. Such services may include the sale of trip insurance and the rental of automobiles as agent for a local rental service. In connection therewith, national banks may advertise, develop, and extend such travel services for the purpose of attracting customers to the bank. See § 7.7376

§ 7.7479 Charitable contributions.

Pursuant to the provisions of paragraph Eighth of 12 U.S.C. 24, a national bank may contribute to community funds or charitable, philanthropic or benevolent instrumentalities conducive to public welfare, provided that it is located in a State the laws of which do not expressly prohibit State banking institutions from making such contributions and provided that the amount contributed does not exceed that which is allowed by the Internal Revenue Service as a deduction from income.

§ 7.7480 Investments in community development projects.

Occasionally banks are asked to contribute to a community development

corporation, wherein the bank will receive an equity interest in or evidence of debt which may have value in the future, but which is clearly not a bankable asset by ordinary standards. Such "investment" may be made and charged off as a contribution. If the bank wishes to carry the investment as an asset, the examiners will treat it as permissible under the paragraph Eighth of 12 U.S.C. 24: *Provided*, That the following conditions are met:

(a) The project must be of a predominantly civic, community or public nature and not merely private and entrepreneurial.

(b) The bank's investment in any one project does not exceed 2 percent of its capital and surplus and its aggregate investment in all such projects does not exceed 5 percent of its capital and surplus.

(c) Such investments are accounted for on the bank's books under "other assets."

§ 7.7482 Postal service by national banks.

(a) A national bank may maintain and operate a postal substation on banking premises and receive income therefrom. The services performed by the substation may include meter stamping of letters and packages and the sale of related insurance. The bank may advertise, develop, and extend the services of the substation for the purpose of attracting customers to the bank.

(b) The operation of the postal substation shall be in accordance with the rules and regulations of the U.S. Postal Service. The books and records of the substation shall be kept separate from those of other banking operations. Under 39 U.S.C. 705 and regulations issued pursuant thereto, the Postal Service may inspect the books and records of the substation.

§ 7.7485 National banks acting as payroll issuer.

A national bank may disburse to employees of its customers payroll funds deposited with it by such customers. Disbursement may be made by direct payment to any employees, or by crediting an account standing in the employee's name at the disbursing bank.

§ 7.7490 Messenger service.

To meet the requirements of its customers, a national bank may provide messenger service by means of an armored car or otherwise, pursuant to an agreement wherein it is specified that the messenger is the agent of the customer rather than of the bank. Deposits collected under this arrangement are not considered as having been received by the bank until they are actually delivered to the teller at the bank's premises. Similarly, a check is considered as having been paid at the bank when the money is handed to the messenger as agent for the customer. In some States, however, this power may be limited by the branching provision of 12 U.S.C. 36 and the bank would then be required to consider those aspects of the transaction which might give the bank advantages over State chartered banks in its competition for customers.

§ 7.7491 Deposit machines.

A national bank may utilize at any location a machine which receives checks, currency, or coin for deposit. The machine shall provide documentary evidence of the transaction which states that the transaction will become a deposit upon verification and crediting at the main office or a branch office of the bank. Utilization of such machines at locations other than the main office or a branch office of the bank does not constitute branch banking. A bank may provide insurance protection under its bonding program for transactions involving such machines. In some States, however, this power may be limited by the branching provision of 12 U.S.C. 36 and the bank would then be required to consider those aspects of the transaction which might give the bank advantages over State chartered banks in its competition for customers.

§ 7.7495 Debt cancellation contracts.

A national bank may provide for losses arising from cancellation of outstanding loans upon the death of borrowers. The imposition of an additional charge and the establishment of necessary reserves in order to enable the bank to enter into such debt cancellation contracts are a lawful exercise of the powers of a national bank and necessary to the business of banking.

§ 7.7500 Sale of money orders at nonbanking outlets.

A national bank may designate bonded agents to sell the bank's money orders at nonbanking outlets. Such a draft, if signed by an authorized officer of the selling agent of the bank, is closely akin to a cashier's check on which the bank is both drawer and drawee, and which is accepted simultaneously with its issuance. Thus, the bank is solely liable for payment upon proper presentation and demand. If the draft has no provision for a signature by an officer or selling agent of the bank, the imprinted name of the bank will not be construed to be such a signature, and such a draft is closely akin to an ordinary draft on which the bank is only the drawee and upon which the bank is not liable unless the bank accepts the check upon presentation and demand. The responsibility of both the bank and its agent should be carefully defined in a written agreement setting forth the duties of both parties and providing for remuneration of the agent. Such agents need not report on sales and transmit funds therefrom more frequently than at the end of the third business day following receipt of the funds.

§ 7.7505 Accelerated depreciation for tax purposes.

In order that a national bank may benefit from widely practiced and generally accepted accounting procedures available under the Internal Revenue Code to other taxpayers, the bank may use for income tax purposes one of the accelerated methods of depreciation set forth in section 167(b) of the Internal Revenue Code of 1954, as amended, and apply a generally accepted nonaccelerated method for financial accounting purposes with respect to certain newly acquired assets selected by the bank. Once the dual depreciation treatment is applied to a given asset it must be continued until the asset is fully depreciated. Upon adoption of the above practice, accounting recognition must be given to deferred income taxes applicable to the excess of depreciation allowed for income tax purposes over depreciation expense recorded for financial accounting purposes, if such taxes are material in amount.

§ 7.7515 Service charges on dormant accounts.

A national bank may, consistent with contracts of deposit, impose such service charges on dormant accounts as its board of directors determines to be reasonable.

§ 7.7516 Sharing of banking quarters.

The operations of a national bank and another financial institution should be separately identified and maintained within any banking quarters which may be shared by these institutions. Similarly, the assets and records of such institutions should be segregated. Where a national bank and another financial institution share banking quarters, an active officer or employee of one institution may engage in the performance of work for the other institution pursuant to an agency agreement and under such conditions as to insure that the agency relationship is readily known to the customers of either institution.

§ 7.7517 Accounts without service charge.

No newly organized national bank may offer checking accounts without service charge, without the prior approval of the Comptroller.

§ 7.7518 Bank indebtedness; Federal funds, securities repurchase agreements, Federal Reserve bills payable.

For purposes of 12 U.S.C. 82, a national bank's indebtedness or liability does not include Federal funds purchased (see § 7.1130) obligations to repurchase securities sold (see § 7.1131), or bills payable to the Federal Reserve (12 U.S.C. 82(5)). Accordingly, for purposes of § 14.5(b) of this chapter, a national bank's indebtedness or liability is determined without regard to such items. Also see §§ 7.7355 and 7.7530.

§ 7.7519 Loan repurchase agreements.

The sale by a national bank of notes or other paper in its loan portfolio under a repurchase agreement is to be considered a borrowing by the selling bank subject to the limitations contained in 12 U.S.C. 82. The liability of the bank to the purchaser of such paper is equal to the total amount of the obligations covered by the repurchase agreement.

§ 7.7530 Issuance of promissory notes.

(a) A national bank may issue at part or discount its negotiable or nonnegotiable promissory notes of any maturity.

(b) The provisions of Part 16 of this chapter should be consulted for offering circular requirements if there is to be a public offering of such notes or a series thereof.

§ 7.7535 Receipt of stock from SBIC.

Since a national bank may purchase the stock of a small business investment company (see 15 U.S.C. 682(b)), it may also receive the benefits of such stock ownership; e.g., stock dividends. The receipt and retention of a dividend by a national bank from an SBIC in the form of stock of a corporate borrower of the SBIC is not a purchase of stock within the meaning of paragraph Seventh of 12 U.S.C. 24.

§ 7.7540 Reports of condition: Waiver of affiliate reports.

When a report of an affiliate of a national bank is required, such report shall be published by the national bank in the same manner as its own condition reports. However, reports of affiliates are no longer required unless specifically requested by the Comptroller.

§ 7.7545 Unimpaired surplus fund.

The definition of the term "unimpaired surplus fund" as contained in § 7.-1100(b) is also applicable in determining the capital requirements by which a national bank's investment securities are limited (12 U.S.C. 24); the minimum capital requirements for the establishment of branches (12 U.S.C. 36(c)); the limitations on the aggregate amount of real estate loans (12 U.S.C. 371); the limitation on the aggregate amount of loans to affiliates (12 U.S.C. 371c); and the limitation on the aggregate amount a national bank may keep on deposit with a nonmember State bank (12 U.S.C. 463). For the purpose of determining a bank's borrowing limit under 12 U.S.C. 82, the definition of "unimpaired surplus fund" contained in § 7.1100(b) is applicable with the exception of subdivision (vi) (proceeds of capital notes, capital debentures or similar obligations).

§ 7.7550 Accrual of bond discount.

Discount on any bond, including a security of Type I, II, or III (§ 1.3 of this chapter) whether arising upon original issue or purchase in the market, may be accrued if there is concurrent accrual of income tax on such discount.

§ 7.7560 Automatic payment plan account.

A national bank may, for the benefit and convenience of its savings depositors, adopt an automatic payment plan under which a savings account will earn dividends at the current rate paid on regular savings accounts and the depositor, upon reaching a previously designated age, will receive his accumulated savings and earned interest thereon in installments of equal amounts over a specified period.

§ 7.7570 Separate investment security limitations.

The 10 percent investment limitation of 12 U.S.C. 24(7) may be applied separately to each security issue of a single issuer of such securities, if the proceeds of each issue are to be used to acquire and lease real estate and related facilities to economically and legally separate industrial tenants and each issue is payable solely from and secured by a first lien on, the revenues to be derived from rentals paid by such lessee under net noncancellable leases.

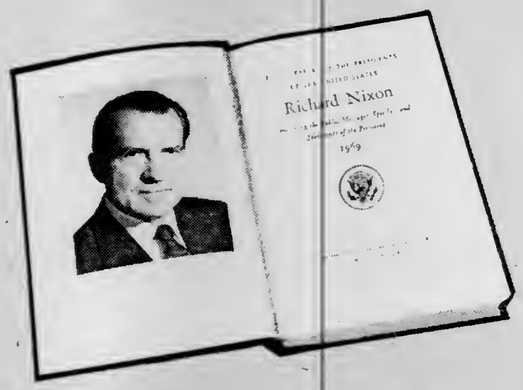
§ 7.7590 Interest rate escalation clause.

Under the ordinary rules of contract law, a loan agreement may include an interest rate escalation clause.

§ 7.7595 Acquisition of national bank stock by employees; profit-sharing or pension trust.

A profit-sharing or pension trust for the benefit of employees of a national bank may acquire, as trust assets, capital stock of such national bank provided that such an acquisition is specifically authorized by the governing instrument of the trust. The primary consideration in making investments for the trust should remain the operation of the fund for the exclusive benefit of the employees. Details of all such transactions consummated during any calendar month shall be reported not later than 10 days after the close of that month to the Comptroller of the Currency.

§ 7.8000 Charges by banks.



All charges to customers should be arrived at by each bank on a competitive basis and not on the basis of any agreement, arrangement, undertaking, understanding or even discussion among banks or their officers.

Dated: August 20, 1971.

[SEAL] WILLIAM B. CAMP,
Comptroller of the Currency.

Title 7—AGRICULTURE

Chapter VIII—Agricultural Stabilization and Conservation Service (Sugar), Department of Agriculture

SUBCHAPTER B—SUGAR REQUIREMENTS AND QUOTAS

[Sugar Reg. 811, Amdt. 6]

PART 811—CONTINENTAL SUGAR REQUIREMENTS AND AREA QUOTAS

Requirements, Quotas, and Quota Deficits for 1971

Basis and purpose and bases and considerations. This amendment is issued pursuant to the authority vested in the Secretary of Agriculture by the Sugar Act of 1948, as amended (61 Stat. 922, as amended), hereinafter referred to as the "Act". The purpose of this amendment to Sugar Regulation 811, as amended, is to revise the determination of sugar requirements for the calendar year 1971, establish quotas, prorations, and direct-consumption limits consistent with such requirements and to determine and prorate or allocate the deficits in quotas established pursuant to the Act. This action rescinds the 100,000-ton increase in requirements made effective by amendment 5 which was published in the FEDERAL REGISTER on August 17, 1971, on page 15519.

Section 201 of the Act requires that the Secretary shall revise the determination of sugar requirements at such time during the calendar year as may be necessary.

Amendment 5 increased sugar requirements by 100,000 short tons, raw value, to provide ample supplies of raw sugar in this country by October 1, 1971, as a safeguard against the possibility that a work stoppage would occur at Atlantic and Gulf ports at that time. With raw sugar inventories well in excess of ordinary working levels, refiners could then have continued operations for a longer period. The Department finds there is less tendency to accumulate stocks of sugar by cane sugar refiners than the Department had anticipated. Therefore, the raw sugar made available for importation on or before September 25, 1971 is no longer needed.

Accordingly, total sugar requirements for the calendar year 1971 are hereby reduced by 100,000 short tons, raw value, to a total of 11.2 million short tons, raw value.

Section 204(a) of the Act provides that the Secretary shall, from time to time, determine whether any area or country will be unable to fill its quota or proration of a quota. In amendment 5 of this part a deficit of 47,667 short tons, raw value, was determined in the quota for the Domestic Beet Sugar Area. That quota is decreased herein by that amount. Therefore, the deficit previously determined in the 1971 quota for the Domestic Beet Sugar Area of 47,667 short tons, raw value, no longer exists.

The deficit determined in the Haitian quota of 4,908 tons in amendment 5 is herein allocated in the customary manner by assigning 47.22 percent to the Republic of the Philippines and prorating the balance to Western Hemisphere countries.

The Department recognizes that during the period from August 12 to August 17 some importers had arranged irrevocable shipping charters to U.S. ports for raw sugar to be imported on or before September 25 solely for the purpose of supplying raw sugar pursuant to the rescinded amendment. Such importers will be given the option of bringing the sugar into the United States for storage and refining under bond pending the availability of applicable quota upon proper documentation that original and irrevocable charters were made for shipping sugar to the United States.

By virtue of the authority vested in the Secretary of Agriculture by the Act, Part 811 of this chapter is hereby amended by amending §§ 811.90, 811.91, 811.92, and 811.93 as follows:

1. Section 811.90 is amended to read as follows:

§ 811.90 Sugar Requirements 1971.

The amount of sugar needed to meet the requirements of consumers in the continental United States for the calendar year 1971 is hereby determined to be 11,200,000 short tons, raw value.

2. Section 811.91 is amended by amending paragraph (a) to read as follows:

§ 811.91 Quotas for domestic areas.

(a)(1) For the calendar year 1971 domestic area quotas limiting the quantities of sugar which may be brought into or marketed for consumption in the continental United States are established, pursuant to section 202(a) of the Act, in column (1) and the amounts of such quotas for offshore areas that may be filled by direct-consumption sugar are established, pursuant to section 207 of the Act, in column (2) as follows:

Area	Quotas (1)	Direct-consumption limits (2)
	(Short tons, raw value)	
Domestic beet sugar	3,406,333	No limit
Mainland cane sugar	1,238,667	No limit
Hawaii	1,110,000	38,304
Puerto Rico	1,140,000	168,000
Virgin Islands	15,000	0

(2) It is hereby determined pursuant to section 204(a) of the Act that for the calendar year 1971 Puerto Rico and the Virgin Islands will be unable by 960,000 and 15,000 short tons, raw value, respectively, to fill the quotas established for such areas in subparagraph (1) of this paragraph. Pursuant to section 204(b) of the Act, the determination of such deficits shall not affect the quotas established in subparagraph (1) of this paragraph.

* * * * *

3. Section 811.92 is amended by amending paragraph (a) to read as follows:

§ 811.92 Proration and allocation of deficits and quotas in effect.

(a) The domestic deficits determined in subparagraph (a)(2) of § 811.91, totaling 975,000 tons representing deficits in the quotas of Puerto Rico and the Virgin Islands were previously determined, allocated, and prorated in amendments of this Part 811 (36 F.R. 8773, 14624). As a result of the revocation of the 100,000-ton increase in consumption requirements, there is no deficit in the quota of the domestic beet area of 47,667 short tons, raw value, as previously determined. Consequently, the allocation of that quantity plus the allocation of a deficit in the quota for Haiti of 4,908 short tons, raw value, to foreign quota countries for importation before September 25, 1971, on a first-come, first-served basis as set forth in a previous amendment of this part (36 F.R. 15519) are herein rescinded. The deficit in the quota for Haiti of 4,908 short tons, raw value, is herein allocated pursuant to section 204(a) of the Act by assigning 47.22 percent to the Republic of the Philippines and prorating the balance to Western Hemisphere quota countries able to supply additional sugar.

* * * * *

4. Section 811.93 is amended by amending paragraphs (b) and (c), repealing paragraph (d)(7) and adding a new paragraph (d)(8) to read as follows:

§ 811.93 Quotas for foreign countries.

* * * * *

(b) For the calendar year 1971, the quota for the Republic of the Philippines is 1,588,733 short tons, raw value, representing 1,126,020 short tons, established pursuant to section 202 of the Act and 462,713 short tons established pursuant to section 204 of the Act. Of the quantity of 1,126,020 short tons established pursuant to section 202 of the Act, only 59,920 short tons, raw value, may be filled by direct-consumption sugar pursuant to section 207(d) of the Act.

(c) For the calendar year 1971, the prorations to individual foreign countries other than the Republic of the Philippines pursuant to section 202 of the Act are shown in columns (1) and (2) of the following table. Deficit prorations previously established in amendments of this § 811.93 are shown in column (3), and a deficit determination and the proration of a portion of such quantity to Western Hemisphere countries are shown in column (4). Total quotas and prorations are shown in column (5).

Countries	Basic quotas	Temporary quotas and prorations pursuant to sec. 202(d) [1]	Previous deficit prorations	New deficit prorations	Total quotas and prorations
	(1)	(2)	(3)	(4)	(5)

(d) * * *

(7) [Repealed]

(8) Any importer having made an original charter during the period August 12 to August 17 solely for the purpose of importing sugar made available for allocation on a first-come, first-served basis for importation prior to September 25, 1971 pursuant to subparagraph (7) of this paragraph may import such sugar for release or delivery to a refiner who is the principal on a bond accepted pursuant to Part 817 of this chapter under which the principal is obligated to hold the sugar so imported or an equivalent quantity at any location until release within an applicable quota. Any application to import such sugar under bond must be accompanied by evidence acceptable to the Department that an original and irrevocable charter was made effective between August 12 and August 17, 1971 to import such sugar into the United States prior to September 25, 1971.

(Secs. 201, 202, 204, and 403; 61 Stat. 923, as amended, 924, as amended, 925, as amended, 932; and 7 U.S.C. 1111, 1112, 1114, and 1153)

Effective date. This action decreases requirements for the calendar year 1971 by 100,000 tons, and allocates and prorates a deficit of 4,908 tons in the Haitian quota. In order to promote orderly marketing, it is essential that this amendment be effective immediately so that all persons selling and purchasing sugar for consumption in the continental United States can promptly plan and market under the changed marketing opportunities. Therefore, it is hereby determined and found that compliance with the notice, procedure, and effective date requirements of 5 U.S.C. 553 is unnecessary, impracticable, and contrary to the public interest and this amendment shall be effective when filed for public inspection in the Office of the Federal Register.

Signed at Washington, D.C., on August 24, 1971.

KENNETH E. FRICK,
Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc.71-12592 Filed 8-24-71;3:47 pm]

PART 814—ALLOTMENT OF SUGAR QUOTAS, MAINLAND CANE SUGAR AREA

1971 Quotas

Basis and purpose. This allotment order is issued under section 205(a) of the Sugar Act of 1948, as amended (61 Stat. 926, as amended), hereinafter called the "Act" for the purpose of allotting the 1971 sugar quota for the Mainland Cane Sugar Area among persons who process sugar from sugarcane and market such sugar for consumption in the continental United States.

Section 205(a) of the act requires the Secretary to allot a quota whenever he finds that the allotment is necessary among other things: (1) To prevent disorderly marketing of sugar or liquid sugar; and (2) to afford all interested persons an equitable opportunity to market sugar or liquid sugar. Section 205(a) also requires that such allotment be made after such hearing and upon such notice as the Secretary may prescribe.

Pursuant to the applicable rules of practice and procedure a preliminary finding was made that allotment of the quota is necessary and a notice was published on May 19, 1971 (36 F.R. 9071), of a public hearing to be held in Pensacola, Fla., at the Rodeway Inn, Palofox and Cervantes, on June 9, 1971, beginning at 10 a.m., e.d.t., for the purpose of receiving evidence to enable the Secretary (1) to affirm or revoke the preliminary finding of necessity for allotments, (2) to establish a fair, efficient, and equitable allotment of the 1971 quota for the Mainland Cane Sugar Area, (3) to revise or amend the allotment of the quota for the purposes of (a) allotting any increase or decrease in the quota, (b) prorating any deficit in the allotment for any allottee when written notification of release by an allottee of any part of an allotment becomes a part of the official records of the Department, and (c) substituting revised or corrected data where such data becomes a part of the official records of the Department, and (4) to make provision for transfer and exchange of allotments.

The hearing was held at the place and time specified in the notice and testimony was given with respect to all of the issues referred to in the hearing notice. In arriving at the findings, conclusions, and regulatory provisions of this order, all proposed findings and conclusions were carefully and fully considered in conjunction with the record evidence pertaining thereto.

Omission of the recommended decision and effective date. The record of the hearing shows that the supply of sugar available for marketing is substantially in excess of the quota of 1,238,667 tons and that 1971 marketings of mainland cane sugar, unless restricted, would substantially exceed the 1971 quota for the Mainland Cane Sugar Area. The proceeding to which this order relates was instituted for the purpose of alloting the quota for the Mainland Cane Sugar Area to prevent disorderly marketing and to afford each interested person an equitable opportunity to market sugar within the quota for the area. In view of the need for allotments, it is imperative that processors know as soon as possible the approximate quantity of sugar each may market within the quota during the balance of the year in order to plan marketings and prevent disorderly marketing that could occur if the effective date of the allotment order is unduly delayed. Accordingly, in order to fully effectuate the purposes of section 205(a) of the Act it is hereby found that due and timely execution of the functions imposed upon the Secretary under the act imperatively and unavoidably requires the omission of a recommended decision in this proceeding. It is also hereby further found and determined for the reasons given above for the omission of a recommended decision that compliance with the 30-day effective date requirement of 5 U.S.C. (80 Stat. 378) is impractical and contrary to the public interest, and consequently, this order shall become effective when published in the FEDERAL REGISTER.

Basis for findings and conclusions. Section 205(a) of the Act reads in pertinent parts as follows:

* * * Allotments shall be made in such manner and in such amounts as to provide a fair, efficient, and equitable distribution of such quota or proration thereof, by taking into consideration the processings of sugar or liquid sugar from sugar beets or sugarcane, limited in any year when proportionate shares were in effect to processings to which proportionate shares, determined pursuant to the provisions of subsection (b) of section 302, pertained; the past marketings or importations of each such person; and the ability of such person to market or import that portion of such quota or proration thereof allotted to him. * * * The Secretary is also authorized in making such allotments of a quota for any calendar year to take into consideration in lieu of or in addition to the foregoing factors of processing, past marketings, and ability to market, the need for establishing an allotment which will permit such marketing of sugar as is necessary for the reasonably efficient operation of any nonaffiliated single plant processor of sugar beets or any processor of sugarcane and as may be necessary to avoid unreasonable carryover of sugar in relation to other processors in the area: *Provided*, That * * * marketing allotment of a processor of sugarcane shall not be increased under this provision above an allotment equal to the effective inventory of sugar of such processor on January 1 of the calendar year for which such allotment is made: * * * *Provided further*, That the total increases in marketing allotments made pursuant to this sentence * * * to processors in the mainland cane sugar areas shall be limited to 16,000 short tons of sugar, raw value, for each calendar year. In making such allotments, the Secretary may also take into consideration and make due allowance for the adverse effect of drought, storm, flood, freeze, disease, insects, or other similar abnormal and uncontrollable conditions seriously and broadly affecting any general area served by the factory or factories of such person. * * *

The record of the hearing indicated that the prospective supply of mainland cane sugar available for marketing in 1971 exceeds the quota for that area to an extent that allotment of the quota is necessary (R. 12, 13).

The Government witness introduced for the record annual data on processings, marketings, and inventories for the most recent 5-year period (R. 13, 14, Ex. 6).

The three factors of "processings," past marketings," and "ability to market," the adverse effect of storm, freeze, and other similar abnormal conditions and the provision of section 205(a) of the Act added by the Sugar Act Amendments of 1965 which provides for establishing an allotment for any processor as may be necessary to avoid unreasonable carryover of sugar in relation to other processors in the area have been considered by the allotment method herein adopted as set forth in Finding 4.

The allotment method adopted is the same as that proposed by the Government witness at the hearing and was also supported at the hearing by the witnesses representing all Mainland Cane processors.

The Government witness proposed that the factor "processings from proportionate shares" should be measured for each processor by the higher of either its production of sugar from 1970 crop sugarcane or 87 percent of his average production from the 1968 and 1969 crops of sugarcane in short tons, raw value, expressed as a percentage of the total of the measure for all processors and weighted by 60 percent. The primary purpose for using an alternative measure of "processings" (87 percent of his average production from the 1968 and 1969 crops of sugarcane), is to give protection against a crop failure or some other unavoidable occurrence which reduced processings of the crop used for the measure of processings.

Giving consideration to "past marketings" by using the average annual marketings for each processor for the 3-year period 1968 through 1970 and giving this factor a weighting of 20 percent in determining allotments contributes to an orderly rate of change in the marketings of each processor relative to others. Measuring the factor "ability to market" as herein adopted and giving this factor a weighting of 20 percent in determining allotments gives recognition to the sugar produced from 1970 crop sugarcane which each processor will have available for marketing within the 1971 quota and also recognizes the relative sharing of each processor in past new-crop marketings within the quota.

The allotment method adopted herein gives consideration to the provision in section 205(a) of the Act which provides for increasing allotments for any processor to avoid unreasonable carryover of sugar in relation to other processors in the area.

An allotment of 25 short tons, raw value, is established herein for Louisiana State University as proposed by the witnesses representing mainland sugarcane processors.

Findings and conclusions. On the basis of the record of the hearing, I hereby find and conclude that:

(1) The quantity of sugar available for marketing in 1971, consisting of January 1, 1971, effective inventories of mainland cane sugar of 974,358 tons plus 1971 crop sugar produced before January 1, 1971 of between 800,000 and 900,000 tons would substantially exceed the current 1,238,667-ton quota established for the area.

(2) The supply situation makes necessary the allotment of the 1971 sugar quota for the Mainland Cane Sugar Area to assure an orderly marketing of sugar, and to afford all interested persons equitable opportunities to market sugar within the quota.

(3) Twenty-five short tons, raw value, shall be set aside from the quota, and an allotment of 25 short tons, raw value, shall be established for the Louisiana State University.

(4) The remainder of the 1971 Mainland Cane Sugar Area quota for consumption within the continental United States, after setting aside 25 tons as provided in finding (3) shall be allotted to processors other than Louisiana State University by measuring and weighting each of the three factors of "processing," "past marketings," and "ability to market" specified in section 205(a) of the Act; and by giving consideration to the need for establishing an allotment for any processor as may be necessary to avoid unreasonable carryover of sugar in relation to other processors in the area (within specified limits) and provided in section 205(a) of the Act; and by determining allotments as follows based on data in the hearing record and any revised or corrected final data of which official notice will be taken:

(a) The factor "processings from proportionate shares," shall be measured for each processor by the higher of either his production of sugar from 1970 crop sugarcane in short tons, raw value, or 87 percent of his average crop-year production from the 1968 and 1969 crops of sugarcane in short tons, raw value, expressed as a percentage of the total of the measure for all processors and weighted by 60 percent.

(b) The factor "past marketings" shall be measured for each processor by his average annual quota marketing for the years 1968 through 1970 in short tons, raw value, expressed as a percentage of the total of the measure for all processors and weighted 20 percent.

(c) The factor "ability to market" shall be measured by the sum of (i) each processor's January 1, 1971, effective inventory, and (ii) his share of the difference between the 1971 quota in short tons, raw value, for the Mainland Cane Sugar Area after deducting 25 tons set aside under finding (3) and the total of the effective inventories of all processors. Each processor's share of such difference shall be determined by applying to the area total difference the percentage that his average 1968 through

1970 new-crop marketings were of the total average new-crop marketings of all processors for such years. The sum of (i) and (ii) in short tons, raw value, expressed for each processor as a percentage of the total of the measure for all processors shall be weighted 20 percent.

(d) To determine each processor's basic allotment in short tons, raw value, the total percentage for each processor derived by measuring and weighting the three factors as heretofore proposed shall be multiplied by the quota for the Mainland Cane Sugar Area in short tons, raw value, less 25 tons set aside under finding (3). If the basic allotments computed for each processor under this paragraph (d) equals or exceeds each respective processor's January 1, 1971, effective inventory, the basic allotments computed pursuant to this paragraph will constitute the marketing allotments of the 1971 quota.

(e) In the event any processor's basic allotment established pursuant to paragraph (d) of this finding is less than the respective processor's January 1, 1971 effective inventory, the basic allotments established in paragraph (d) shall be adjusted as provided in this paragraph (e) and the resulting allotments will constitute the marketing allotments of the 1971 quota. Basic allotments established pursuant to paragraph (d) of this finding which are less than the respective processors' January 1, 1971, effective inventories are subject to upward adjustments by a total not to exceed 16,000 short tons, raw value, and the basic allotments of processors having January 1, 1971, effective inventories less than their basic allotments shall be reduced proportionately as necessary to make total adjusted allotments equal to the area quota in short tons, raw value, less 25 tons set aside under finding (3), except, that no processor's basic allotment shall be reduced to a level less than the respective processor's January 1, 1971, effective inventory. The basic allotments of those processors having January 1, 1971, effective inventories larger than their basic allotments are subject to upward adjustments (not to exceed 16,000 tons) in the following manner: (i) The basic allotments of processors having January 1, 1971, physical inventories in excess of basic allotments shall be increased to the level of the physical inventories, (ii) the remainder of the 16,000 tons or lesser quantity (if such lesser quantity will provide adjusted allotments equal to January 1, 1971, effective inventories) shall be added to the basic allotments of the other processors in such a manner that will not permit any processor to market a larger percentage of its January 1, 1971, effective inventory by the use of this adjustment than other processors. No increased allotment established pursuant to this subdivision shall be larger than the respective processor's January 1, 1971, effective inventory.

(f) Any revision in allotments made to give effect to any increase or decrease in the Mainland Cane Sugar Area quota shall be determined by the full application of the formula for determining allotments as provided in paragraphs (a) through (e) of this finding (4).

(g) Any revision in allotments made to give effect to a release of all or a part of an allotment by an allottee shall be determined by prorating such release or deficit to all other allottees to the extent they are able to market additional sugar on the basis of adjusted allotments as determined pursuant to preceding paragraphs of this finding (4).

(5) Final adjustments in the data for the 1970 crop including January 1, 1971, effective inventories, were made on the basis of sugar production and marketing reports covering the period ending April 30, 1971.

(6) The following processors shall succeed to the interest in the historical data, pertinent to determining allotments of the former allottee, Young's Industries, Inc., to the extent shown; Billeaud Sugar Factory, 31.250 percent; Breaux Bridge Sugar Co-op., 3.488 percent; Levert-St. John, Inc., 4.214 percent; M. A. Patout & Son, Ltd., 35.239 percent; and Vida Sugars, Inc., 25.809 percent.

(7) The quantities of sugar and the percentages referred to in finding (4) and the computation of processor allotments are set forth in the following table:

Processors	Processings of sugar [1]		Average quota marketings [2]		Ability to market					Processor's basic allotment [3]	
					Effective inventory Jan. 1, 1971 [3]	New crop quota marketings		Measures used

[1] The higher of either the production of sugar from the 1970 crop sugarcane or 87 percent of the average production for the 1968 and 1969 crops of sugarcane.
[2] Average annual quota marketing for each processor for years 1968 through 1970.
[3] Effective inventory, Jan. 1, 1971, is the physical Jan. 1, 1971, plus processings from 1970 crop cane in 1971.
[4] The difference between 1,238,642 tons (quota for 1970 established by S.R. 811, less 25 tons reserve for Louisiana State University) and the total January 1, 1971, effective inventories for all processors amounting to 918,695 tons. This difference of 319,947 tons prorated on the basis of each processor's average 1968-70 new-crop marketings.
[5] Col. (10) was determined by weighting "processings," col. (2) by 60 percent; "marketings," col. (4) by 20 percent; and "ability," col. (9) by 20 percent. Col. (11) was determined by multiplying the quota, less 25 tons reserved for Louisiana State University, by col. (10).

(8) The order shall be revised without further notice or hearing for the purpose of (a) allotting any quantity of an allotment to other allottees when written notification of release by an allottee of any part of an allotment becomes a part of the official records of the Department, (b) revising allotments by the substitution of revised or corrected data which have become a part of the official records of the Department; and (c) revising allotments to give effect to any increase or decrease in the quota made by the Administrator pursuant to the provisions of the Sugar Act of 1948, as amended. Any revision in allotments made to give effect to (a) of this finding (8) shall be made by increasing proportionately the allotments as provided in finding (4)(g), except that the quantity prorated to any allottee releasing allotments in excess of a specified quantity should be limited in accordance with the written statement of release by any such allottee. In making changes under (b) and (c) of this finding (8) allotments shall be determined by the full application of the formula for determining allotments as provided in paragraphs (a) through (e) of finding (4).

(9) Official notice will be taken of (a) written notification to the Agricultural Stabilization and Conservation Service by an allottee that he is unable to fill all or a part of his allotment when the notification becomes a part of the official records of the Department, (b) substitution of revised or corrected data where such data becomes a part of the official records of the Department, and (c) any regulation issued by the Administrator, after publication in the FEDERAL REGISTER, which changes the 1971 Mainland Cane Sugar Area quota.

(10) To facilitate full and effective use of allotments, provision shall be made in the order for transfer of allotments under circumstances of a succession of interest, and under circumstances involving an allottee becoming unable to process sugar cane and such sugar cane as he would normally process, if operating, is processed by other allottees.

(11) To aid in the efficient movement and storage of sugar, provision shall be made to enable a processor to market a quantity of sugar of his own production in excess of his allotment equivalent to the quantity of sugar which he holds in storage and which was acquired by him within the allotment of another allottee.

(12) Allotments established in the foregoing manner and in the amounts set forth in the order provide a fair, efficient, and equitable distribution of any 1971 Mainland Cane Sugar Area quota that may be established for consumption within the continental United States and meet the requirements of section 205(a) of the Act.

Order. Pursuant to the authority vested in the Secretary of Agriculture by section 205(a) of the Act: *It is hereby ordered*, That § 814.9 be amended to read as follows:

§ 814.9 Allotment of the 1971 sugar quota for the Mainland Cane Sugar Area.

(a) *Allotments.* The 1971 sugar quota for the Mainland Cane Sugar Area of 1,238,667 short tons, raw value, is hereby allotted to the following processors in the quantities which appear opposite their respective names:

Processors	Allotments (short tons, raw value)
Albania Sugar Co.	10,405

Total all mainland cane	1,238,667

(b) *Marketing limitations.* Marketings shall be limited to allotments as established herein subject to the prohibitions and provisions of §§ 816.1 through 816.9 of this chapter (33 F.R. 8495).

(c) *Transfer of allotments.* The Director, Sugar Division, Agricultural Stabilization and Conservation Service of the Department, may permit marketings to be made by one allottee, or other persons, within the allotment established for another allottee upon relinquishment by such allottee of a quantity of its allotment and upon receipt of evidence satisfactory to the Director that (1) a merger, consolidation, transfer of sugar-processing facilities, or other action of similar effect upon the allottees or persons

involved has occurred, or (2) the allottee receiving such permission will process 1971 crop sugarcane which the allottee relinquishing allotment has become unable to process.

(d) *Exchanges of sugar between allottees.* When approved in writing by the Director, Sugar Division, Agricultural Stabilization and Conservation Service of the Department, any allottee holding sugar or liquid sugar acquired by him within the allotment of another person established in paragraph (a) of this section may ship, transport, or market up to an equivalent quantity of sugar processed by him in excess of his allotment established in paragraph (a) of this section. The sugar or liquid sugar held under this paragraph shall be subject to all other provisions of this section as if it had been processed by the allottee who acquired it for the purpose authorized by this paragraph.

(e) *Revision of allotments.* Allotments established under this order may be revised without further notice or hearing in accordance with findings and conclusions heretofore made, to give effect to (1) the substitution of revised or corrected data, (2) the reallocation of any quantity of an allotment released by an allottee, and (3) any change in the Mainland Cane Sugar Area quota.

(Secs. 205, 209, 403, 61 Stat. 926 as amended, 928, 932; 7 U.S.C. 1115, 1119, 1153)

Effective date. This docket will become effective when published in the FEDERAL REGISTER (8–27–71).

Signed at Washington, D.C., on August 11, 1971.

KENNETH E. FRICK,
Administrator, Agricultural Stabilization and Conservation Service.

Chapter XIV—Commodity Credit Corporation, Department of Agriculture

SUBCHAPTER C—EXPORT PROGRAMS

[Amdt. 4]

PART 1483—WHEAT AND FLOUR

Subpart—Flour Export Program (GR–346) Terms and Conditions

MISCELLANEOUS AMENDMENTS

Basis and Purpose. The Department has been requested to make eligible for an export payment under the Flour Export Program (GR–346), flour milled in the United States from wheat produced in the United States which is transshipped from a Western Canadian port to an eligible destination. Presently, flour milled in the United States from wheat produced in the United States is eligible for an export payment under GR–346 when shipped through an Eastern Canadian port if the identity of the flour is preserved until shipped from the Eastern Canadian port, but not if shipped through a Western Canadian port.

To assure continued sales to longtime U.S. commercial flour markets and to develop new markets, the U.S. exporter must reasonably assure his foreign buyer of a continued and uninterrupted supply of quality flour. If, for some reason, the U.S. exporter is unable to make shipments to meet his sale commitments, the foreign buyer must look to other exporting countries which may be able to supply flour comparable in quality to the U.S. flour he has been importing. In such cases, the United States stands to lose this market and the purpose of the Flour Export Program would not be carried out.

There currently exists on the west coast of the United States a strike which has interrupted normal commercial exports of U.S. flour. In some cases the U.S. exporter made sales prior to the strike and has been unable to fulfill his commitments to his foreign buyer as a result of this strike.

This amendment would enable payments to be made on exports of U.S. flour through Western Canadian ports meeting certain conditions when it is necessary for the United States to maintain its competitive position in foreign flour markets. In order to effectuate the purposes of the program, this change will apply to exports made after the effective date of the amendment, including exports pursuant to sales which have been made and registered under GR–346 prior to the effective date of the amendment.

Since these provisions are needed immediately in the administration of the program to assure that the United States maintains its competitive position in foreign markets and to assure continued exports of U.S. flour, it is hereby found and determined that compliance with the notice and public procedure requirements of section 4 of the Administrative Procedure Act (60 Stat. 238, U.S.C. 553), is unnecessary and contrary to the public interest and this amendment shall become effective as hereinafter provided.

The terms and conditions of the Flour Export Program (GR–346), Revision II (33 F.R. 15633 and 33 F.R. 16071 as amended by 34 F.R. 609, 34 F.R. 6769, and 35 F.R. 18505), are hereby amended as follows:

1. In § 1483.207, paragraph (d) is revised and paragraph (g) is amended by adding a new sentence after the first sentence as follows:

§ 1483.207 Definition of terms.

* * * * *

(d) "Designated country" means any destination outside the United States, excluding Puerto Rico and Canada and also excluding any country or area for which an export license is required under regulations issued by the Bureau of International Commerce of the Department of Commerce unless a license for exportation or transshipment to such country or area has been obtained from such bureau. In the case of an export under a Public Law 480 purchase authorization or an export against a sale as described in § 1483.230(a), the designated country shall mean the country to which the export is to be made under the applicable Public Law 480 purchase authorization or the letter of conditional reimbursement.

* * * * *

(g) * * * "Export" and "exportation" shall also mean a shipment of flour destined to a designated country from a Western Canadian port if (1) the exporter has received written approval for such shipment from the assistant sales manager, (2) the flour had been moved from the United States and its identity had been preserved until shipped from Canada and (3) the exporter complies with any other conditions as may be specified in the written approval by the assistant sales manager.

2. In § 1483.239, the second and third sentences of paragraph (c) are changed to read as follows:

§ 1483.239 Exportation requirements.

* * * * *

(c) * * * Exportation to the designated country specified in § 1483.238 is a condition precedent to any right to payment under this subpart. Exportation to other than such designated country shall not entitle the exporter to any payment under this subpart.

§ 1483.253 [Amended]

3. In § 1483.253, the last sentence of paragraph (a) is amended by substituting for the words "an Eastern Canadian port" the words "a port in Canada."

4. In § 1483.253, paragraph (e) is changed to read as follows:

(e) If export is from a Canadian port: (1) A signed or certified true copy of the bill of lading or other document covering the movement of the flour from the United States to the export carrier described in the on-board bill of lading issued at the point of export in Canada; (2) a signed or certified true copy of a document evidencing the preservation of the identity of the flour until exported from Canada and (3) if export is from a Western Canadian port such other documents as may be specified in the written approval from the assistant sales manager.

Effective date. This amendment shall become effective upon the date of publication in the FEDERAL REGISTER (8–27–71), with respect to exports made on or after such date including exports made pursuant to a contract between an exporter and CCC entered into prior to the effective date of the amendment.

Signed at Washington, D.C., on August 20, 1971.

CLIFFORD G. PULVERMACHER,
Vice President, Commodity Credit Corporation and General Sales Manager, Export Marketing Service.

Chapter XVIII—Farmers Home Administration, Department of Agriculture

SUBCHAPTER B—LOANS AND GRANTS PRIMARILY FOR REAL ESTATE PURPOSES

[FHA Instruction 442.7]

PART 1823—ASSOCIATION LOANS AND GRANTS—COMMUNITY FACILITIES, DEVELOPMENT, CONSERVATION, UTILIZATION

Grants for Preparation of Comprehensive Area Plans for Water and Sewer Systems

Part 1823, Title 7, Code of Federal Regulations is amended by revising Subpart G as follows:

Subpart G—Grants for Preparation of Comprehensive Area Plans for Water and Sewer Systems

Sec.
1823.201 General.
1823.202 Definition.
1823.203 Objectives.
1823.204 Source of funds.
1823.205 Eligibility.
1823.206 Comprehensive plans for use in developing water and sewer systems.
1823.207 Grant purposes.
1823.208 Technical and professional assistance for planning.
1823.209 Processing applications for comprehensive planning grants.
1823.210 Approval authority.
1823.211 Grant supervision and servicing.

AUTHORITY: The provisions of this Subpart G issued under sec. 339, 75 Stat. 318, 7 U.S.C. 1989; Orders of the Secretary of Agriculture, 29 F.R. 16210, 32 F.R. 6650.

Subpart G—Grants for Preparation of Comprehensive Area Plans for Water and Sewer Systems

§ 1823.201 General.

This subpart is supplemented by Parts 1890 and 1890i of this chapter. This subpart prescribes policies, authorizations, and procedures for making grants to assist in the preparation of official comprehensive area plans for use in developing water and sewer systems in rural areas. Farmers Home Administration (FHA) personnel may make it available to officials of local governmental units and other official public bodies who need FHA assistance in the preparation of such plans.

§ 1823.202 Definition.

The term "rural area" will include open country, an incorporated or unincorporated town, village, or other place, which does not include:

(a) Any city or town or place which has a population in excess of 5,500 permanent inhabitants, according to the latest reliable, dependable population estimates.

(b) A densely settled area (where the principal land use and occupancy if residential or commercial) surrounding, adjacent to, or growing out of a town, village, or place of more than 5,500 people.

(c) An established community or subdivision development near to, or likely to become closely associated with, a town, village, or place of more than 5,500 people. When determining whether a residential area is to be considered near to, or part of, a place of more than 5,500 people, minor open spaces due to physical barriers, commercial or industrial developments, parks, areas reserved for convenience or appearance, or narrow strips of cultivated land will be disregarded.

§ 1823.203 Objectives.

The basic objectives of grants for official comprehensive area water and sewer planning are:

(a) To facilitate the preparation of such plans by local public bodies and similar agencies which do not have funds available for the immediate undertaking of such a plan.

(b) To promote efficient and orderly development of rural communities.

(c) To provide the information necessary to avoid overlapping, duplication, underdesign, or overdesign of the community water and sewer facilities that may be constructed in the area covered by the plan.

§ 1823.204 Source of funds.

All grants for the preparation of comprehensive water and sewer plans will be made from appropriated funds specifically allotted for that purpose.

§ 1823.205 Eligibility.

(a) Organizations eligible for comprehensive planning grants include public bodies such as counties, townships, State, regional, and local planning commissions, and similar units or instrumentalities of government, and such other agencies as may have authorization to prepare official comprehensive area plans for the development of water and sewer systems in rural areas and which do not have the resources immediately available to finance the planning for which the grant is proposed. Federal agencies are not eligible for such grants.

(b) Upon receiving each application, the State Director should consult with the Office of the General Counsel (OGC) and determine whether or not the applicant has a clear authorization to prepare comprehensive plans that are official plans under State laws or to create planning boards or commissions which may prepare such plans under its direction. Official plans may require formal concurrence by elected local officials. However, the fact that the applicant has or does not have legal authority to officially adopt such plans after their preparation does not affect the eligibility of the applicant if it has authority to prepare official plans.

§ 1823.206 Comprehensive plans for use in developing water and sewer systems.

(a) *Area to be covered.* The rural area to be included in a plan may be an extensive area in open country where the people have closely related problems, interests, or future growth potential, an entire county, a series of counties, or portions of counties which form a logical geographical or economic division of the State. The area will not include any portion of any city or town or place of more than 5,500 permanent inhabitants unless the prior approval of the National Office is obtained. It is important that the comprehensive plan for water and sewer development in an area include all the immediate neighboring communities in the area which could eventually be best served either by a single water or sewer system or by one or more systems which might be closely related through such factors as common water sources, outfall sewers, treatment plants, or other major facilities.

(b) *Content of plan.* Plans financed with FHA grants must be based upon present population distribution and projected population growth, with provisions for other area functions which are deemed essential for orderly growth of the community involved. Projections and provisions for future growth should include those for the next 5 to 10 years and those for the next 20 years or more. The comprehensive water and sewer plan must achieve the most reasonable harmony possible between public plans for future investments in roads, schools, recreational facilities and utilities, and private developments of the land for residential, agricultural, commercial, and industrial uses. A suggested outline for a comprehensive water and sewer plan is available in all FHA offices.

(c) *Review and coordination.* Each plan must analyze the apparent alternatives which concern water and sewer development. Consideration must be given in the plan to the recommendations and services available from all appropriate local State, Federal, and private agencies.

(1) If the area or region covered by the plan is near or will be affected by an urban area, or is within an area covered by a State or regional plan, the plan developed for the larger area must be carefully considered to avoid conflict or duplication.

(2) Each plan must be coordinated with other comprehensive or special purpose plans, including overall economic development plans or local industrial development plans, which have been or are being prepared.

(3) State Directors will include in procedures issued by the State Office a list of those agencies which may be developing or may have developed other comprehensive or special-purpose plans. The list should include agencies such as State, regional, aid area, planning commission, conservancy districts, watershed districts, and other such bodies. In addition, the list should include Federal and State agencies that are involved in construction of highways, utilities, and other types of major developments that would significantly affect sewer and water plans or projects. Organizations receiving FHA grants for the preparation of comprehensive water and sewer plans will coor-

dinate their plans with such agencies or bodies as appropriate, giving particular attention to use of common sources of information and bases for making future plans and projections.

§ 1823.207 Grant purposes.

Grant funds may be used for:

(a) Technical and professional services for comprehensive area water and sewer planning obtained by the applicant through contracts.

(b) Salaries of technical, professional, and clerical assistants employed specifically to work on the comprehensive plan, administrative costs, including office space, transportation and publication expenses which are reasonably necessary for comprehensive water and sewer planning activities and which represent expenses outside the normal budget of the recipient organization. Such costs will not include purchases of automobiles, furniture, or other items of major equipment which will have a useful life significantly in excess of the period required for the accomplishment of planning activities.

(c) Test wells and soil and water investigations necessary to determine the amount and quality of water and soil factors that may affect location, physical facilities, and distribution lines. Test wells and soil and water investigations will not include completion or development of permanent construction items which may be used in the final operation of a water or sewer system.

§ 1823.208 Technical and professional assistance for planning.

(a) Organizations receiving grants for comprehensive area water and sewer planning are responsible for selecting professional and technical assistance needed. All contracts for such assistance, including the schedules of salaries, fees, or contract prices to be paid, will be reviewed and approved by FHA.

(b) In some States there exists a statewide or regional agency charged by a statute or other legal means with the responsibility for overseeing and coordinating comprehensive planning for the local units of government (both county and municipal) within the State or region. Where such agency does not itself have authority to prepare comprehensive plans, the local governmental units within the jurisdictional area of the agency may engage the agency as their planner to prepare a cooperative comprehensive plan for them in much the same manner as a local governmental unit engages a professional planner. To facilitate grant processing, the application may be submitted by such agency on behalf of the local governmental units and grant disbursements may be made by FHA directly to it on behalf of the local governmental units. A separate or collective agreement must be duly executed by each local governmental unit for which the plan is to be prepared, including municipal units for which a county does not have authority to prepare official plans. This agreement must contain, in addition to provisions appropriate to agreements between local governmental units and planners, provisions pertaining to the following:

(1) Ratification of the application filed on its behalf;

(2) Preparation of a single comprehensive plan for all of the participating local governmental units;

(3) Permission for the agency to receive payment from FHA in its behalf;

(4) Requirement that any subcontracting for professional planning-type services by the agency be subject to prior approval of FHA; and

(5) Separate review with the proper officials of each local governmental unit of the material and recommendations proposed to be incorporated into the State or regional plan applicable to the local governmental unit.

§ 1823.209 Processing applications for comprehensive planning grants.

(a) *Applications.* Applicant organizations may apply for grant assistance at the FHA County Office serving the area in which the organization is located. Applications will be made on Standard Form 101, "Application Federal Assistance for Public Works and Facility-Type Projects." The date that the application is filed will be entered on the reverse side of the application form near the signature line. Upon receipt of an application, the State Director will:

(1) Determine with the assistance of the OGC that the applicant organization has the legal authority to prepare official comprehensive plans for the development of water and sewer systems in rural areas.

(2) Determine that the area to be included in the plan is the logical area for comprehensive consideration and that it is a rural area as defined in this subpart.

(3) The State Director also will review the proposal to determine whether any technical or financial assistance may be available to the applicant from State or other Federal agencies or whether action on the application should be coordinated with other agencies.

(b) *State Office control.* The State Director will establish a system whereby he is informed at least monthly on the status of each application on hand.

(c) *Preparation of docket.* If the State Director makes the determinations listed in paragraph (a) of this section and decides to proceed with the application, a docket should be prepared by the County Supervisor to include the following:

(1) Application on Standard Form 101.

(2) A brief project report with supporting materials, including evidence that the organization does not have the resources to undertake the planning proposed. In some instances, a grant may be approved for a portion of the cost of the plan while the rest of the financing is obtained from funds on hand or made available to the applicant organization from some other source.

(3) Recommendation of the County Committee on Forms FHA 440-2, "County Committee Certification or Recommendation."

(4) If the group is organized, evidence of the proceedings, documents or authority by which it was organized. If the group is not yet organized, an outline of the method it proposes to use in organizing before the grant is made including a citation of the applicable statutes.

(5) A proposed grant agreement. Before any grant is made, the recipient organization will execute an agreement following the general format shown in a sample from entitled, "Grant Agreement for Rural Area Official Comprehensive Water and Sewer Planning," available in all FHA offices, to specifically set out the conditions under which the grant funds are advanced and define the respective responsibilities of the FHA and the recipient organization. Each agreement must be reviewed and approved by the OGC before it is formally executed by the recipient organization.

(6) Copy of proposed ordinance or resolution authorizing preparation of the plan and the execution of the grant agreement.

(7) Form FHA 440-1, "Payment Authorization," prepared for the full amount of the grant or if more than one advance is involved, prepare an original and copy of Form FHA 440-1 for each advance.

(8) Form FHA 440-3, "Record of Actions."

(9) Form FHA 442-14, "Association Project Fund Analysis."

(10) Form FHA 400-4, "Nondiscrimination Agreement."

(11) Form FHA 400-1, "Equal Opportunity Agreement," if required.

(d) *Grant approval.* If the State Director concurs in the proposal, he will send the docket, along with his proposed approval memorandum, to the OGC and request closing instructions.

(1) Upon receipt of the opinion and closing instructions from the OGC, the State Director will, if the grant is within his approval authority, revise his memorandum of approval to incorporate any requirements of the OGC and forward the docket, along with the original and two copies of the approval memorandum, to the County Supervisor. If the amount of the grant requires National Office authorization for approval, the State Director will revise his memorandum of approval to incorporate any requirements of the OGC and forward it along with the docket to the National Office requesting authority to approve. On receipt of such authority, he will proceed as above.

(2) State Directors may obligate grant funds when they determine and the applicants agree, that the conditions of approval can be met. Obligating documents will not be forwarded to the Finance Office until it has been determined that the applicant has legal authority to contract for the grant.

(e) *Grant closing.* When the applicant proposes to have the plan prepared under contract, the grant will not be closed until the proposed contract has been approved by the State Director. When the grant is approved, Forms FHA 440-1, FHA 440-3, and FHA 442-14, together with copies of the approval memorandum, will be sent to the Finance Office. The request for the check or checks will be forwarded as provided in § 1823.25. When the grant is closed, the original of the agreement by the recipient organization will be sent to the Finance Office.

(f) *Disbursal of funds and completion of plan.* (1) Grant funds will be placed in a supervised bank account or other controlled account and will be disbursed in accordance with Part 1803 of this chapter and the conditions of the grant agreement, except that where the grant is made to a State or State agency the funds will not be required by FHA to be placed in a separate bank account, but the State or State agency will be required to render monthly reports to FHA covering the status and application of such funds; the liabilities and obligations on hand with respect to the planning activity for which the grant was made; and, such other facts as FHA may specifically require from appropriate State records.

(2) It is anticipated that most plans will be prepared under contracts with qualified planning consultants. In such cases, the contract, including the schedule of fees and charges and provisions for payment, must be reviewed and approved by FHA before it is executed by the recipient organization. It may be necessary in some instances to accomplish the planning on a force account basis. When the force account method is used, careful control of the disbursement of grant funds must be maintained to insure that such funds are only used to pay additional costs over and above normal personnel and operational costs of the recipient organization.

(3) The County Supervisor, or other employee designated by the State Director, will periodically inspect the progress of the plan. The State Director will review and approve each completed comprehensive plan before final payment is made. Before such approval is granted, he must make sure that the plan has been coordinated with all local units of government which might be affected.

(4) One certified copy of the completed plan will be provided for each FHA County Office located in the area covered by the plan.

§ 1823.210 Approval authority.

Current information regarding limitations on loan approval authorities of various officials of the FHA may be obtained from any county or State office of the FHA or from its National Office at 14th and Independence Avenue SW., Washington, DC 20250.

§ 1823.211 Grant supervision and servicing.

(a) The County Supervisor will supervise and service each grant for a comprehensive area plan for water and sewer systems to make sure that the conditions of the grant agreements are met.

(b) After the plan financed by the FHA grant has been completed, the County Supervisor will be responsible for periodic visits to the recipient organization to make sure that the plan is serving the purpose for which it was developed and that appropriate provisions of the grant agreement are being observed.

Dated: August 24, 1971.

JOSEPH HASPRAY,
Deputy Administrator,
Farmers Home Administration.

Title 12—BANKS AND BANKING

Chapter V—Federal Home Loan Bank Board

SUBCHAPTER B—FEDERAL HOME LOAN BANK SYSTEM

[No. 71-840]

PART 523—MEMBERS OF BANKS

Liquidity

AUGUST 20, 1971.

Resolved, that the Federal Home Loan Bank Board considers it desirable to amend § 523.11 of the regulations for the Federal Home Loan Bank System (12 CFR 523.11) for the purpose of reducing the overall liquidity requirement of each Federal Home Loan Bank member from 7½ percent to 7 percent of its liquidity base. Accordingly, the Federal Home Loan Bank Board hereby amends said § 523.11 by revising paragraph (a) thereof, to read as follows, effective August 27, 1971:

§ 523.11 Liquidity requirements.

(a) *General.* For each calendar month, each member shall maintain an average daily balance of liquid assets in an amount not less than 7 percent of the average daily balance of the member's liquidity base during the preceding calendar month, except as otherwise provided in paragraphs (b) and (d) of this section. For each calendar month beginning with January, 1972, each member, other than a mutual savings bank or an insurance company, shall maintain an average daily balance of short-term liquid assets in an amount not less than 3 percent of the average daily balance of the member's liquidity base during the preceding calendar month, except as otherwise provided in paragraphs (b) and (d) of this section.

* * * * *

(Sec. 5A, 47 Stat. 727, as added by sec. 1, 64 Stat. 256, as amended, sec. 17, 47 Stat. 736, as amended; 12 U.S.C. 1425a, 1437. Reorg. Plan No. 3 of 1947, 12 F.R. 4981, 3 CFR, 1943-48, p. 1071)

Resolved further, that, since affording notice and public procedure on the above amendment would delay it from becoming effective for a period of time and since the Board determines that in view of current economic conditions such amendment should become effective so that the reduced overall liquidity requirement of 7 percent shall apply beginning with the month of August 1971, the Board hereby finds that notice and public procedure thereon are contrary to the public interest under the provisions of 12 CFR 508.11 and 5 U.S.C. 553(b); and, for the same reason, the Board hereby finds that the provision regarding the publication of such amendment for the minimum 30-day period specified in 12 CFR 508.14 and 5 U.S.C. 553(d) prior to the effective date thereof shall not apply to the above amendment; and the Board hereby provides that such amendment shall become effective as hereinbefore set forth.

By the Federal Home Loan Bank Board.

[SEAL] JACK CARTER,
Secretary.

Title 14—AERONAUTICS AND SPACE

Chapter I—Federal Aviation Administration, Department of Transportation

[Airworthiness Docket No. 71-WE-5-AD; Amdt. 39-1277]

PART 39—AIRWORTHINESS DIRECTIVES

AiResearch Model TPE331-1, -2, -25, -29, -43, -45, -47, -49, -51, -55, -57, -61, and -71 Series Engines

Amendment 39-1166 (36 F.R. 4478), AD 71-5-7, requires a repetitive 50-hour oil filter inspection. In addition, a revision to the Airplane Flight Manuals is required to advise the pilot to shut down the engine if torque fluctuation or loss of torque pressure occurs on AiResearch Model TPE331-1, -2, -25, -29, -43, -45, -47, -49, -51, -55, -57, -61, and -71 series engines.

After issuing Amendment 39-1166, due to additional service experience, the Agency determined that the use of the engine chip detector authorized in paragraph (a)(2) was applicable only to the TPE331-1 and -2. Therefore, Amendment 39-1180 (36 F.R. 5673), was issued to restrict the use of the chip detector inspection to the TPE333-1 and -2 only. Subsequently, the manufacturer has developed an improved high speed pinion bearing and thrust washer and the Agency has determined that incorporation of this design is equivalent to the required inspection and procedures.

Therefore, Amendment 39-1166 (36 F.R. 4478), AD 71-5-7, as amended, is being further amended to provide termination of the required inspections and procedures.

Since this amendment provides an alternative means of compliance and imposes no additional burden on any person, notice and public procedure hereon are unnecessary and this amendment may be made effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 F.R. 13697), § 39.13 of Part 39 of the Federal Aviation

Regulations, Amendment 39-1166 (36 F.R. 4478), AD 71-5-7, as amended, is further amended by the addition of a new paragraph (c) as follows:

(c) The inspections of (a), above, may be discontinued, and the AFM revision required by (b), above, may be deleted when the affected engines are modified to incorporate an improved high speed pinion gear bearing and thrust washer in accordance with AiResearch Service Bulletin No. 632 dated July 23, 1971, or Service Bulletin No. 659 dated July 16, 1971, or later FAA approved revision, or an equivalent modification approved by the Chief, Aircraft Engineering Division, FAA Western Region.

The amendment becomes effective on September 2, 1971.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421, 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Los Angeles, Calif., on August 20, 1971.

ARVIN O. BASNIGHT,
Director, FAA Western Region.

[FR Doc.71-12566 Filed 8-26-71;8:45 am]

[Airworthiness Docket No. 69-WE-12-AD; Amdt. 39-1276]

PART 39—AIRWORTHINESS DIRECTIVES

Boeing Model 707/720 Series Aircraft

Amendment 39-1197 (36 F.R. 7841) AD 71-9-2, as amended by Amendment 39-1254 incorporated more precise inspection procedures and methods of accomplishment for the Rudder Actuator Support Fitting on the Boeing Model 707/720 Series aircraft in accordance with Revision 6 of Service Bulletin 2903. Amendment 39-1254 did not amend paragraph k(6) to reflect a deadline date for the replacement of the 7079-T6 fitting on or before January 1, 1972. This deadline date should have been incorporated in Amendment 39-1254. This deadline date was indicated in coordination with the Aircraft Transport Association and The Boeing Co. at the meeting held July 12, 1971 at the Western Regional Office and was duly considered in the amendment of paragraph (i) by Amendment 39-1254.

Since a situation exists that requires immediate adoption of this amendment, it is found that notice and public procedure, other than already taken hereon, are impracticable and good cause exists for making this amendment effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 F.R. 13697), § 39.13 of Part 39 of the Federal Aviation Regulations, Amendment 39-1197 (36 F.R. 7841), AD 71-9-2, as amended by Amendment 39-1225 and 39-1254, is further amended as follows:

Revise paragraph k(6) to read:

All 7079-T6 fittings must be replaced before further flight after January 1, 1972, in accordance with (1), above.

This amendment becomes effective September 2, 1971.

(Sec. 313(a), 601, 603, Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421, 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Los Angeles, Calif., on August 19, 1971.

ARVIN O. BASNIGHT,
Director, FAA Western Region.

[FR Doc.71-12567 Filed 8-26-71;8:45 am]

[Docket No. 71-CE-21-AD; Amdt. 39-1275]

PART 39—AIRWORTHINESS DIRECTIVES

Cessna 172 Series Aircraft

Cessna 172 series airplanes with two wing fuel tanks were certificated with a total fuel capacity of 42 gallons. Production changes in fabrication of the fuel tanks in certain of these series airplanes resulted in the reduction of fuel tank capacity up to 3 gallons of fuel. The agency and the manufacturer issued instructions to advise owners/operators of this condition and to revise applicable placards. In addition, aircraft type certificate data sheet 3A12 was revised April 15, 1968, to reflect the reduced fuel tank capacity. Despite these informative efforts it has been determined that a number of these series airplanes have not been properly placarded to reflect the true fuel tank capacity. Accordingly, in an effort to remedy this situation an Airworthiness Directive is being issued for the sole purpose of requiring revision of fuel tank capacity information by the installation of placards at the fuel selector valve and the fuel filler necks on Cessna 172 series airplanes which accurately reflect fuel tank capacity.

Since immediate adoption of this AD is required in the interest of safety, compliance with the notice and public procedure provisions of the Administrative Procedures Act is not practical and good cause exists for making this rule effective in less than thirty (30) days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator (31 F.R. 13697), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new AD.

CESSNA. Applies to 172 series airplanes (S/N 17248735 through 17256512).

To provide correct information concerning fuel tank capacities, within the next 50 hours' time in service after the effective date of this AD, unless already accomplished, perform the following:

(A) Remove the existing placard on the fuel selector valve and install in its place either applicable Cessna P/N 0511167-20 placard or Cessna P/N 0500246-11 placard in accordance with Cessna Service Letter SE 68-12 dated March 12, 1968, or later FAA-approved revision, or any FAA-approved equivalent placard which would show usable fuel capacity of 18 gallons left tank, 18 gallons right tank, 36 gallons both, and an off position.

(B) Revise the existing markings at the fuel filler necks to read: "FUEL 80/87 GRADE. TOTAL CAPACITY 19.5 GALLONS".

(The operator may make and install the above markings with painted markings, using a minimum of ⅛-inch high letters.)

This amendment becomes effective August 31, 1971.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421, 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Kansas City, Mo., on August 19, 1971.

JOHN M. CYROCKI,
Director, Central Region.

[FR Doc.71-12568 Filed 8-26-71;8:45 am]

Chapter II—Civil Aeronautics Board

SUBCHAPTER A—ECONOMIC REGULATIONS

[Reg. ER-693; Amdt. 1]

PART 207—CHARTER TRIPS AND SPECIAL SERVICES

Terms of Service

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 24th day of August 1971.

For the reasons and to the extent specified in ER-692 issued contemporaneously § 207.13(c) is being modified herein.

Since the rule is clarifying in character and relieves a restriction, it is found that notice and public procedure are unnecessary and the amendment will be made effective immediately.

Accordingly, the Civil Aeronautics Board hereby amends § 207.13(c) of Part 207 of its Economic Regulations (14 CFR Part 207) effective August 24, 1971, to read as follows:

§ 207.13 Terms of service.

* * * * *

(c) Where four or more round trip flights per calendar year are conducted on behalf of a chartering organization by a carrier or carriers, one-way passengers shall not be carried except that up to 5 percent of the charter group may be transported one way in each direction, there shall be no intermingling of passengers and each planeload group, or less than planeload group (see § 207.11 (c)), shall move as a unit in both directions, except as provided in § 207.14. This provision shall not be construed as permitting knowing participation in any plan whereby each leg of a round trip is chartered separately in order to avoid the 5-percent limitation aforesaid.

(Secs. 204(a) and 401 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 754 (as amended); 49 U.S.C. 1324, 1371)

By the Civil Aeronautics Board.

[SEAL] HARRY J. ZINK,
Secretary.

[FR Doc.71-12600 Filed 8-26-71;8:47 am]

[Reg. ER-692; Amdt. 1]

PART 208—TERMS, CONDITIONS, AND LIMITATIONS OF CERTIFICATES TO ENGAGE IN SUPPLEMENTAL AIR TRANSPORTATION

Tariffs and Terms of Service

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 24th day of August 1971.

Prior to April 6, 1971, the effective date of general revision and extension of the charter regulations, § 208.32(f) provided:

In the case of a round-trip passenger charter, one-way passengers shall not be carried except that up to 5 percent of the charter group may be transported one way in each direction * * *. In the case of a charter contract calling for two or more round trips, gers and each planeload group, or less than planeload group * * * shall move as a unit in both directions.

In ER-659, the Board, inter alia, found the rule unduly restrictive and amended it to permit intermingling on charter programs not exceeding three round trips per calendar year. Accordingly, the rule was revised to read:

In the case of a charter contract calling for four or more round trips per calendar year, one-way passengers shall not be carried, there shall be no intermingling of passengers, and each planeload group, or less than planeload group * * * shall move as a unit in both directions * * *.

Since the rule had not been proposed, the Board allowed petitions for reconsideration of the amendment to the section and its counterparts in Parts 207, 212, and 214.[1]

Petitions for reconsideration were filed and were acted on in ER-671. In their petition, the member carriers of the National Air Carrier Association (NACA) stated that notwithstanding that the Board's rules for years provided for a 5-percent one-way passenger allowance without regard to the number of round trips, § 208.32(f) eliminates this allowance involving contracts for four or more round trips. NACA asked the Board's "to reconsider its elimination of the 5-percent one-way passenger allowance in cases where four or more round trips are contracted for and, upon reconsideration, to reinstate the 5-percent allowance in all such cases."

In ER-671, the Board stated that it had determined to "reinstate" the one-way passenger allowance. Accordingly, the Board said, "since our intent was to expand not contract, intermingling authority, we shall restore the one-way passenger rule." The revised § 208.32(f) reads as follows:[2]

In the case of a round trip passenger charter, one-way passengers shall not be carried except that up to 5 percent of the charter group may be transported in each direction * * *. Where four or more round trip flights per calendar year are conducted on behalf of a chartering organization by a carrier or carriers, there shall be no intermingling of passengers and each planeload group, or less than planeload group (see § 208.6(c)) shall move as a unit in both directions, except as provided in § 208.36.

On April 5, the NACA carriers filed a petition for clarification and modification. Briefly stated, their position is that in ER-659 the Board set no limitation on one-way passengers for fewer than four round trips per calendar year; that in ER-671 it imposed a 5-percent limitation on one-way passengers for fewer than four round trips and that the change was not only made without explanatory discussion, but was in conflict with the expressed intent "to expand, not contract" intermingling authority. The NACA carriers assert that it is evident that clarification is required and, upon such clarification, the Board should impose the 5-percent limitation only where four or more round-trip flights are conducted on behalf of a chartering organization. No answer to the petition has been filed.

Upon consideration, the Board finds that clarification is in order. The rule is entirely consistent with the language in the preamble to "reinstate" or "restore" the 5-percent one-way passenger allowance. However, the rule does appear inconsistent with the expressed intent "to expand, not contract" intertermingling authority, since reinstatement of the one-way 5-percent passenger allowance for all round trips merely preserved the status quo as it existed prior to April 6.

The question remains whether the Board in clarifying the matter should reaffirm the rule as it presently reads, or modify it as suggested by the NACA carriers. On balance, we are persuaded to accede to the NACA carriers' request. In the first place, so long as the 5-percent limitation is imposed on four or more round trips, we believe possible abuse of removing the limitation on fewer round trips would be minimal and that as a practical matter, there would be self-imposed limitations on one-way passengers in the case of programs involving three round trips or less. In the second place, it does not appear that any objection has been raised to removing the 5-percent limitation in such cases. We shall, therefore, modify the rule in the respects indicated.[3]

Since the rule is clarifying in character and relieves a restriction, it is found that notice and public procedure are unnecessary and the amendment will be made effective immediately.

Accordingly, the Civil Aeronautics Board hereby amends § 208.32(f) of Part 208 of its Economic Regulations (14 CFR Part 208), effective August 24, 1971, to read as follows:

§ 208.32 Tariffs and terms of services.

* * * * *

(f) Where four or more round trip flights per calendar year are conducted on behalf of a chartering organization by a carrier or carriers, one-way passengers shall not be carried except that up to 5 percent of the charter group may be transported one way in each direction, there shall be no intermingling of passengers and each planeload group, or less than planeload group (see § 208.6(c)), shall move as a unit in both directions, except as provided in § 208.36. This provision shall not be construed as permitting knowing participation in any plan whereby each leg of a round trip is chartered separately in order to avoid the 5-percent limitation aforesaid.

(Secs. 204(a) and 401 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 754 (as amended); 49 U.S.C. 1324, 1371)

By the Civil Aeronautics Board.

[SEAL] HARRY J. ZINK,
Secretary.

[Reg. ER-694; Amdt. 1]

PART 212—CHARTER TRIPS BY FOREIGN AIR CARRIERS

Terms of Service

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 24th day of August 1971.

For the reasons and to the extent specified in ER-692 issued contemporaneously § 212.10(c) is being modified herein.

Since the rule is clarifying in character and relieves a restriction, it is found that notice and public procedure are unnecessary and the amendment will be made effective immediately.

Accordingly, the Civil Aeronautics Board hereby amends § 212.10(c) of Part 212 of its Economic Regulations (14 CFR Part 212) effective August 24, 1971, to read as follows:

§ 212.10 Terms of service.

* * * * *

(c) Where four or more round trip flights per calendar year are conducted on behalf of a chartering organization by a carrier or carriers, one-way passengers shall not be carried except that up to 5 percent of the charter group may be transported one way in each direction, there shall be no intermingling of passengers and each planeload group, or less than planeload group (see 212.8 (b)), shall move as a unit in both directions, except as provided in 212.11. This provision shall not be construed as permitting knowing participation in any plan whereby each leg of a round trip is chartered separately in order to avoid the 5-percent limitation aforesaid.

(Secs. 204(a) and 402 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 757 (as amended); 49 U.S.C. 1324, 1372)

By the Civil Aeronautics Board.

[SEAL] HARRY J. ZINK,
Secretary.

[FR Doc.71-12601 Filed 8-26-71;8:48 am]

[1] Sections 207.13(c), 212.10(c), and 214.14(c).

[2] In addition to the revision noted, it was also framed pursuant to a request of certain trunkline carriers in terms of "four or more round trip flights per calendar year" instead of "a charter contract calling for four or more round trip flights per calendar year."

[3] Modification of the corresponding rules in Parts 207, 212 and 214 is being made in ER-693, ER-694 and ER-695, issued contemporaneously.

[Reg. ER–695; Amdt. 1]

PART 214—TERMS, CONDITIONS, AND LIMITATIONS OF FOREIGN AIR CARRIER PERMITS AUTHORIZING CHARTER TRANSPORTATION ONLY

Terms of Service

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 24th day of August 1971.

For the reasons and to the extent specified in ER–692 issued contemporaneously § 214.14(c) is being modified herein.

Since the rule is clarifying in character and relieves a restriction, it is found that notice and public procedure are unnecessary and the amendment will be made effective immediately.

Accordingly, the Civil Aeronautics Board hereby amends § 214.14(c) of Part 214 of its Economic Regulations (14 CFR Part 214) effective August 24, 1971, to read as follows:

§ 214.14 Terms of service.

* * * * *

(c) Where four or more round trip flights per calendar year are conducted on behalf of a chartering organization by a carrier or carriers, one-way passengers shall not be carried except that up to 5 percent of the charter group may be transported one way in each direction, there shall be no intermingling of passengers and each planeload group, or less than planeload group (see § 214.7(b)), shall move as a unit in both directions, except as provided in § 214.9. This provision shall not be construed as permitting knowing participation in any plan whereby each leg of a round trip is chartered separately in order to avoid the 5-percent limitation aforesaid.

(Secs. 204(a) and 402 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 757 (as amended); 49 U.S.C. 1324, 1372)

By the Civil Aeronautics Board.

[SEAL] HARRY J. ZINK,
Secretary.

[FR Doc.71–12602 Filed 8–26–71;8:48 am]

[Reg. ER–691; Amdt. 12]

PART 221—CONSTRUCTION, PUBLICATION, FILING AND POSTING OF TARIFFS OF AIR CARRIERS AND FOREIGN AIR CARRIERS

Notice of Baggage Liability Limitations

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 24th day of August 1971.

In notice of proposed rule making EDR–182,[1] the Board proposed to amend Part 221 of the Economic Regulations (14 CFR Part 221) by requiring air carriers and foreign air carriers availing themselves of limitations on liability for loss of or damage to baggage to give passengers written notice of such limits in terms of U.S. dollars. Comments were filed by the following: Mr. Stanley E. Cohen; Caledonian Airways (Prestwick) Ltd.; Lufthansa German Airlines; International Insurance Services; The President's Committee on Consumer Interests;[2] and jointly by a number of member carriers of the Air Transport Association of America.[3]

Upon consideration of all comments presented, the Board has determined, for the reasons hereinafter set forth and those announced in EDR–182, to require that a uniform notice be added to the ticket which sets forth, in general terms, the liability limitations of the carriers for the loss, delay or damage to passenger baggage. We are also requiring the posting of a sign containing substantially the same information provided in the notice in a more condensed form. Except as modified herein, the tentative findings set forth in the explanatory statement of EDR–182 are incorporated by reference and made final.

Specifically, the rule we are adopting provides that each air carrier and foreign air carrier shall include on each ticket issued by it or by its authorized agent, the following notice to be printed in at least 10-point type:

NOTICE OF BAGGAGE LIABILITY LIMITATIONS

The carrier's liability for loss, delay or damage to baggage is limited as follows unless a higher value is declared in advance and additional charges are paid: (1) For most international travel, to approximately $7.50 per pound for checked baggage and $330 per passenger for unchecked baggage; (2) For domestic and other travel, to $500 per passenger on most carriers (a few have lower limits). Excess valuation may not be declared on certain types of valuable articles. Carriers assume no liability for fragile or perishable articles. Further information may be obtained from the carrier.

The rule requires each carrier to post at each desk, station, and position in the United States where tickets may be sold or baggage checked the following sign to be printed in bold faced type at least ¼-inch high.

NOTICE OF LIMITED LIABILITY FOR BAGGAGE

Liability for loss, delay or damage to baggage is limited as follows unless a higher value is declared and an extra charge is paid: (1) For most international travel, to approximately $7.50 per pound for checked baggage and $330 per passenger for unchecked baggage; (2) For domestic and other travel, to $500 per passenger on most carriers. Special rules may apply to valuables. Consult your carrier for details.

In addition, the rule requires air carriers which limit their baggage liability in domestic travel (including overseas air transportation) to less than the general limit of $500 per passenger to post in their sign and furnish to each passenger at the time of delivery of the ticket, the following notice:

The liability of [carrier's name] for loss, delay, or damage to baggage in domestic transportation is limited to [the carrier shall here insert its limit for domestic transportation].

To insure that the passenger receives adequate warning of the carrier's lower baggage liability limits, the rule also requires that this notice be printed in proportionately larger case letters than the notice set forth on the ticket and sign.

The comments of International Insurance Services, Lufthansa, and ATA raise the threshold question of whether additional notice of baggage liability limits to passengers is necessary or desirable at all. With regard to the notice of Warsaw Convention limits, the argument is made that the passenger already receives a number of other notices which inform him of the fact that liability for baggage is limited. In the case of domestic limitations, the carriers argue that they are presently informing the passenger of the limits of liability by a variety of means which the Board approved in the "Baggage Liability Rules Case".[4] The comments of Mr. Cohen, Caledonian, and the Committee on Consumer Interests, however, strongly support the Board's proposal to give effective notice of these baggage liability limits to the passenger. As we stated in EDR–182, inadequate knowledge by the traveling public of the limits on liability for loss of or damage to baggage has been a recurring source of consumer complaints and this continues to be the case. Thus, for the reasons set forth in EDR–182, the Board has determined that the traveling public is entitled to effective notice of both Warsaw Convention and other baggage liability limitations.

The public comments, however, have raised a number of problems regarding the specific form of notice. In our view, the most serious problem raised is that the type of written notice we proposed in EDR–182 is impractical because the exact wording of the notice would vary from carrier to carrier, since not all carriers have identical limitations on liability. This, it is contended, would create particular problems in cases where tickets are sold through travel agents, which commonly use a standard form of ticket for all carriers. In addition, it is argued that the requirement of the "nonuniform" notice would impede current efforts in instituting computerized ticketing. A second problem raised by the comments in connection with the proposed notice is that it was too lengthy and too complicated to be readily understood by the traveling public. Several notices of a more abbreviated nature were suggested as alternatives. The comments proposing such alternative notices suggested that the notice either be posted as a sign or printed on the ticket in conjunction with existing notices.

We believe that the rule we are adopting, requiring an abbreviated form of notice on the ticket and on a sign, is a satisfactory solution to the foregoing problems. While no form of notice assures that each and every passenger on each and every flight will be aware of the baggage limitations applicable to that particular flight, we believe that the notice we are adopting herein will make the public generally aware of what those limitations are and is sufficiently brief so as to be readily understood by the traveling public.

The carriers have also pointed out certain complexities involved in including the notice with the ticket; namely, (1) that a ticket "stuffer" is unreliable, (2) that there is a substantial supply of existing ticket stock which does not contain the notice, and (3) that the notice will not be read by unticketed passengers. Since, however, the ticket notice we are adopting is uniformly applicable to all but those few carriers which now have liability limitations of less than $500 for domestic travel, these objections will, for the most part, be rendered moot. Moreover, the ticket notice herein prescribed can be printed on one standard sheet, thus, in most instances, avoiding the problems raised in connection with interline travel and where the carriers' tickets are sold through travel agents. In addition, rather than burdening the carriers which subscribe to the general $500 limit on baggage liability, the rule requires carriers who do not conform to the general $500 domestic liability limitation to come forward with an appropriate supplementary statement to notify passengers of their lower dollar limitations.[5] However, we urge these few carriers to raise their limitations voluntarily to the $500 level now in general use. If they do not choose to do so, the Board intends to institute a proceeding looking towards imposition of the $500 limit as to all carriers. In any event, with only a few carriers involved, we believe that the requirement to furnish a supplementary statement is the most reliable and practical way of warning the traveling public of lower baggage liability limitations until such time as all the carriers achieve the desired level of uniformity.

We also believe that the sign, which the rule requires be posted at each point where baggage is accepted for checking, answers the objection of the parties who contend that the notice would not effectively reach passengers who check their baggage at curbside prior to purchasing the ticket, and charter passengers who do not receive individual tickets. In this connection, the comment submitted by the Committee on Consumer Interests notes that the sign required by section 221.175 is not always displayed by some carriers and is placed in obscure positions by others. Thus, we wish to emphasize to the carriers that we expect them to comply in good faith with the present posting requirements as well as those we are adopting herein, and that a failure to do so will result in enforcement action. We would also emphasize that the type size prescribed herein is only a minimum requirement, and that the carriers should pay close attention to the requirements that the sign should be clearly visible and clearly readable.

Finally, in order to permit the carriers to utilize their existing ticket stock and to provide sufficient leadtime to prepare tickets containing the notice prescribed herein, we will defer the effectiveness of the rule requiring the notice to be provided on the ticket until January 1, 1972. The remainder of the rule will become effective 60 days after publication in the FEDERAL REGISTER.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 221 of the Economic Regulations (14 CFR Part 221) effective October 26, 1971, as follows:

1. Amend the table of contents of Subpart N by adding new § 221.176, to read as follows:

Sec.
221.176 Notice of limited liability for baggage.

2. Amend Subpart N by adding new § 221.176 to read as follows:

§ 221.176 Notice of limited liability for baggage.

(a) Each air carrier and foreign air carrier which, to any extent, avails itself of limitations on liability for loss of, damage to, or delay in delivery of baggage shall cause to be displayed continuously in a conspicuous public place at each desk, station, and position in the United States which is in charge of a person employed exclusively by it or by it jointly with another person, or by any agent employed by such air carrier or foreign air carrier, to sell tickets to passengers or accept baggage for checking, a sign which shall have printed thereon the following statement:

NOTICE OF LIMITED LIABILITY FOR BAGGAGE

Liability for loss, delay, or damage to baggage is limited as follows unless a higher value is declared and an extra charge is paid: (1) For most international travel, to approximately $7.50 per pound for checked baggage and $330 per passenger for unchecked baggage; (2) For domestic and other travel, to $500 per passenger on most carriers. Special rules may apply to valuables. Consult your carrier for details.

Such statement shall be printed in bold faced type at least one-quarter of an inch high and shall be so located as to be clearly visible and clearly readable to the traveling public.

(b) Effective January 1, 1972, each air carrier and foreign air carrier which, to any extent, avails itself of limitations of liability for loss, delay or damage to baggage shall include on each ticket issued by it or by its authorized agent, the following notice printed in at least 10 point type:

NOTICE OF BAGGAGE LIABILITY LIMITATIONS

The carrier's liability for loss, delay, or damage to baggage is limited as follows unless a higher value is declared in advance and additional charges are paid: (1) For most international travel, to approximately $7.50 per pound for checked baggage and $330 per passenger for unchecked baggage; (2) For domestic and other travel, to $500 per passenger on most carriers (a few have lower limits). Excess valuation may not be declared on certain types of valuable articles. Carriers assume no liability for fragile or perishable articles. Further information may be obtained from the carrier.

(c) In addition to the requirements of paragraphs (a) and (b) of this section, each air carrier who limits its liability for loss, delay, or damage to baggage in interstate or overseas air transportation to less than $500 per passenger shall (1) furnish to each passenger at the time of the delivery of the ticket, and (2) cause to be displayed in its sign posted pursuant to the provisions of paragraph (a) of this section, the following notice:

The liability of [carrier's name] for loss, delay or damage to baggage in domestic transportation is limited to [the carrier shall here insert its limits for domesic transportation].

The foregoing ticket notice shall be printed in at least 12-point type in ink contrasting with the ticket stock on (1) a piece of paper either placed in the ticket envelope, with the ticket, or attached to the ticket, or (2) on the ticket envelope. The sign notice shall be printed in bold faced type at least one-half of an inch high: *Provided, however,* That where the sign required by paragraph (a) of this section is printed in type larger than one-fourth of an inch high, such sentence shall appear in proportionately larger type. Where interline travel is involved, such carrier shall furnish the notice required herein to the passenger at the time of check in for transportation on such carrier.

(d) It shall be the responsibility of each carrier to insure that travel agents authorized to sell air transportation for such carrier comply with the notice provisions of paragraphs (a), (b), and, where applicable, paragraph (c) of this section: *Provided,* That travel agents shall not be required to post a sign.

(Secs. 204, 401, 402, 403, 404, and 411 of the Federal Aviation Act of 1958 as amended, 72 Stat. 743, 754, 757, 758, 760, and 769, as amended; 49 U.S.C. 1324, 1371, 1372, 1373, 1374, and 1381)

[SEAL] HARRY J. ZINK,
Secretary.

[1] May 7, 1970, Docket 20853, 35 F.R. 7513.

[2] This comment was received after the time for submitting comments had expired. However, the comment included a request that it nevertheless be considered. We shall treat this request as a motion for leave to file an otherwise unauthorized document, and we shall grant the motion.

[3] Air West, Inc.; Alaska Airlines, Inc.; Allegheny Airlines, Inc.; American Airlines, Inc.; Braniff Airways, Inc.; Continental Air Lines, Inc.; Delta Air Lines, Inc.; Eastern Air Lines, Inc.; Frontier Airlines, Inc.; National Airlines, Inc.; New York Airways, Inc.; North Central Airlines, Inc.; Northwest Airlines, Inc.; Piedmont Aviation, Inc., Texas International Airlines, Inc.; Trans World Airlines, Inc.; United Air Lines, Inc.; Western Air Lines, Inc.; Wien Consolidated Airlines, Inc.; Aloha Airlines, Inc.; Mohawk Airlines, Inc.; and Pan American World Airways, Inc. This comment, which will hereafter be referred to as "ATA," purported to be filed jointly by ATA and IATA on behalf of a number of foreign air carriers as well. However, pursuant to Part 263 of the Economic Regulations (14 CFR Part 263), the Board will only accept the comment on behalf of the ATA carriers.

[4] Order E–24198, Sept. 19, 1966.

[5] As the rule indicates (§ 221.176(c)), the carrier may furnish the supplementary statement to the passenger by including a piece of paper with the ticket, in the ticket envelope, or attached to the ticket, or by printing the statement on the ticket envelope itself.

Title 15—COMMERCE AND FOREIGN TRADE

Chapter XII—United States Travel Service, Department of Commerce

PART 1200—ISSUANCE OF GRANTS TO PROMOTE TRAVEL TO STATES OR THEIR POLITICAL SUBDIVISIONS BY FOREIGN RESIDENTS

On June 5, 1971, there was published in the FEDERAL REGISTER (36 F.R. 10980), a notice of proposed rule making prescribing proposed regulation for the administration of the Federal Matching Grant program authorized by the amendments made by Public Law 91-477 to the International Travel Act of 1961, as amended (22 U.S.C. 2121 et seq.). Interested persons were given 20 days in which to submit written views and comments regarding the proposed regulations.

No objections have been received and the proposed regulations are hereby adopted without change and are set forth below.

Effective date. These regulations shall be effective 30 days after publication in the FEDERAL REGISTER.

Dated: August 23, 1971.

C. LANGHORNE WASHBURN,
Assistant Secretary of Commerce for Tourism, United States Travel Service, Department of Commerce.

Sec.

1200.1 Background and purpose.
1200.2 Definitions.
1200.3 Applications for Federal grant for travel promotional projects.
1200.4 Action on application.
1200.5 Grant accounting and records.
1200.6 Reports.
1200.7 Inspection and audit.
1200.8 Publications.
1200.9 Collection of information.
1200.10 Termination.
1200.11 Repayment.
1200.12 Federal coordination.

AUTHORITY: The provisions of this Part 1200 issued pursuant to Public Law 87-63, as amended by Public Law 88-426 and Public Law 91-477; Department of Commerce Organization Order 10-7 of November 12, 1970.

§ 1200.1 Background and purpose.

The regulations in this part are issued under the authority of the International Travel Act of 1961, as amended. The purpose of the Act is to strengthen the domestic and foreign commerce of the United States; promote friendly understanding and appreciation of the United States by encouraging foreign residents to visit the States, as defined in § 1200.2; and facilitate international travel in general. On October 21, 1970, the Act was amended by Public Law 91-477. One of the amendments made to the Act by Public Law 91-477 authorized the U.S. Travel Service to make matching Federal grants to States or their political subdivisions, or private or public nonprofit organizations, in an effort to encourage foreign residents to visit the United States and to upgrade and improve the tourist host and reception facilities in this country thereby furthering the stated purposes of the Act.

§ 1200.2 Definitions.

(a) "Act" means the International Travel Act of 1961, as amended (22 U.S.C. 2121 et seq.).

(b) "Assistant Secretary" means the Assistant Secretary of Commerce for Tourism or such official as may be designated to act in his behalf.

(c) "State" means one of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands.

(d) "Political subdivision" means a unit of local government, including specifically, a county, municipality, city, town, township, or other special district created by or pursuant to law.

(e) "Private or public non-profit organizations" means an institution, organization, or association, either private or public, which has tax exempt status as defined in section 501(a) of the Internal Revenue Code.

(f) "Applicant" means a State or political subdivision or combination thereof, or private or public nonprofit organization seeking a Federal grant for a travel promotional project.

(g) "Travel promotional project" means an activity or program designed to enhance a State or political subdivision as a desired travel destination of residents of foreign countries or to inform such residents and to encourage them to visit a State or political subdivision through such means as:

(1) Preparing and disseminating materials, including brochures, leaflets, booklets, posters, and displays featuring domestic regional and local attractions in appropriate foreign languages in foreign cities and countries that constitute a potential travel market to the States;

(2) Carrying out either singly or in conjunction with other States and/or other political subdivisions and/or with U.S. Travel Service, special promotions of facilities, attractions, events and services of an area by means of exhibits, shows, films, etc.;

(3) Planning, developing and sponsoring advertising campaigns in foreign countries to inform and encourage foreign residents to visit;

(4) Undertaking projects to upgrade and improve tourist facilities and services to better serve the foreign resident;

(5) Carrying out other projects that indicate a high probability of increasing foreign tourism;

(h) "Matching funds" means funds that are provided by the State or political subdivision or by a combination thereof, or from other non-Federal sources and may include fees, contributions, donations, gifts of money, and special user charges from persons and private profit or nonprofit firms, organizations, or institutions.

§ 1200.3 Applications for Federal grant for travel promotional projects.

(a) Each applicant seeking a Federal grant for a travel promotional project shall file an application, as further specified below, with the Assistant Secretary.

(b) Every application, exhibit, or enclosure, except where specifically waived by the Assistant Secretary, shall be in quadruplicate, duly authenticated and referenced, and addressed to the Assistant Secretary of Commerce for Tourism, U.S. Travel Service, U.S. Department of Commerce, Washington, D.C. 20230.

(c) Every application shall be on USTS Form, "Request for Travel Promotion Project Grant," which is available from the U.S. Travel Service. This application form incorporates assurances of compliance with the nondiscrimination requirements of title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d-1 et seq.) and implementing regulations (§ 8.1 et seq. of this title). Also, the form shall contain the date, address, and official title of the applicant and shall be signed by an authorized representative.

(d) Every application, except where specifically waived by the Assistant Secretary, shall be accompanied by the following exhibits:

(1) *Exhibit No. 1.* A statement setting forth in detail the current level of tourism in area in terms of (i) numbers of tourists in area, both foreign and domestic; (ii) impact of tourism on area economy (i.e., employment and income); and (iii) current efforts to develop and promote tourism in area.

(2) *Exhibit No. 2.* A project statement setting forth in detail the existing need for Federal assistance, the goals and objective thereof, in terms of tourism receipts and their effects on area jobs and income, the specific methods proposed for accomplishing these objectives in terms of personnel and funds and the procedures that will be used to evaluate the project.

(3) *Exhibit No. 3.* A statement setting forth in detail the budget proposed for the project, together with procedures for fiscal control, funding, accounting and auditing to assure proper disbursement of funds paid to the applicant.

(4) *Exhibit No. 4.* Documentation establishing that the applicant has coordinated the travel promotion project with other States (when regional cooperation is desirable) and with other publicly supported activities within the States or political subdivision, as appropriate, and the extent and manner in which such coordination has been carried out by identifying such projects and activities and indicating how any duplication of other travel promotion project in the area has been avoided.

(5) *Exhibit No. 5.* Certification by the Governor of the State or the chief political officer of the political subdivision or the president of the private or public nonprofit organization, as the case may be, that the applicant has—

(i) Established adequate standards and rules to insure that no officer or employee of the State or political subdivision or their designated agencies, or private or public organization, shall receive compensation from sources other than his employer for tourism development or promotional services for which funds are provided under the Act and that no such officer or employee shall otherwise maintain any private interest in conflict with his public responsibility. Each applicant will furnish a copy of the standards and rules which are established to avoid any conflict of interest in connection with the administration of a grant which may be made under the Act. Such rules shall clearly set forth the standards and procedures which officers, employees, and consultants can follow to avoid any conflict of interest.

(ii) Determined that matching funds will be available from States or other non-Federal sources. In addition, each applicant shall indicate the basis for the determination by identifying such sources.

(iii) Determined that such travel promotional project supported by a grant under the Act does not provide or arrange transportation for, or accommodations to, persons traveling between foreign countries and the States in competition with any private business engaged in providing or arranging for such transportation and accommodations.

(iv) Planned no services specially related to a particular firm or company, public work or other capital project except insofar as the services are of general concern to the industry and commerce of the State or political subdivision. If the applicant has planned services which are specially related to a particular firm or company, public work or other capital project, a statement shall be furnished by the applicant to the Assistant Secretary describing such services and the basis for the determination that such services are of general concern to the industry and commerce of the State or political subdivision.

§ 1200.4 Action on application.

(a) Upon receipt of an application, the Assistant Secretary shall designate an employee of the U.S. Travel Service who will investigate the application and accompanying exhibits for compliance with the provisions of § 1200.3 and report his findings with respect thereto to the Assistant Secretary.

(b) The Assistant Secretary, within a reasonable time after receipt of the report referred to in paragraph (a) of this section, may authorize a grant to the applicant provided he finds that (1) the travel promotional project is designed to carry out the purposes of the Act; (2) the project will facilitate and encourage travel to the State or political subdivision or combination thereof by foreign residents; and (3) matching funds will be available from State or other non-Federal sources.

(c) In no event shall the amount of any grant made under the regulations of this part for any travel promotion project exceed 50 percent of the total cost of the project.

§ 1200.5 Grant accounting and records.

(a) Accounting for grant funds shall consist of any generally accepted accounting system and internal control procedures, including provisions for audit, provided that they meet the following requirements:

(1) Separate ledger accounts are established for each grant or grant project which conforms to or permits ready identification with grant budget categories. Such accounts should provide separate and specific accountability of receipts, expenditures, and balances. Separate accounts may be maintained for each annual period, but are not required.

(2) Supporting records of project expenditures are maintained in sufficient detail and itemization to show the exact nature of each expenditure. Such records should clearly indicate to which major budget category and subitems within the category an expenditure is charged.

(3) Reimbursements of travel expenses are supported by vouchers containing the signature of the individual performing the travel and the person authorized by the applicant to approve such travel. Vouchers should show the starting point and destination of travel, dates of travel, itemization of amounts expended for transportation and a statement of the amounts expended for transportation and a statement of the amount of per diem due (not to exceed the per diem authorized by the State or political subdivision or the rate of $25 per day (whichever is less)).

(4) Each expenditure is referenced to a supporting purchase order, contract, voucher, invoice, or bill, properly approved. Special voucher forms are not necessary since ordinarily the documents used by a designated agency to support expenditures from its own funds will be sufficient. Whenever possible, separate orders should be issued for purchases charged to grant funds in order that bills or invoices will not contain items charged to other funds.

(5) Grant number, account number, date, and expense classification are identified on invoices or vouchers charged to other funds.

(6) Payroll authorizations are maintained to effect control on salaries and wages charged against grant funds. These authorizations shall be approved by the appropriate authority in the State or political subdivision.

(7) Some objective evidence of time devoted to the grant project is maintained. As a minimum, a statement should be prepared at the end of each pay period showing the names of employees, the percentage of time each devoted to grant projects, the gross amounts of salaries and approval by appropriate authority in the designated agency.

(8) Adequate records are maintained supporting charges for fringe benefits, such as pensions, retirement, social security tax (FICA), etc., when included in the project budgets.

(9) All canceled checks are filed and are readily accessible for examination. When cash disbursements are made, they must be supported by receipts approved by appropriate authority.

(10) The accounting system is adequate to permit immediate identification of project balances and funds in general accounts, or separate bank accounts may be established for project funds.

(11) Inventory records are maintained for all equipment purchased with grant funds.

(12) The applicant receiving Federal funds under the Act shall require all subcontractors to provide documentation covering receipt and expenditure of grant and matching funds for which the designated agency is held responsible.

(13) The grant accounting system provides for adequate internal audits and the use of written policies and instructions defining accounting policies, procedures and controls.

(14) All income from project activity (sale of publications, entrance fees, user charges, etc.) is accounted for and clearly identified in financial reports.

§ 1200.6 Reports.

Financial reports and descriptive reports will be required as the Assistant Secretary may specify. Each applicant is also required to submit to the Assistant Secretary within 90 days after the official termination date of the grant (a) a final financial report, and (b) a descriptive report describing and evaluating the project accomplishments.

§ 1200.7 Inspection and audit.

(a) The Assistant Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination, any books, documents, papers, and records of the designated agency that are pertinent to Federal assistance received under the Act.

(b) Financial records must be kept on file for a minimum of 3 years following the termination of the grant. The required retention period may be extended by written notification by the Assistant Secretary.

§ 1200.8 Publications.

(a) If the applicant desires to publish information resulting from the grant, the general provisions accompanying the grant will contain regulations regarding acknowledgment and disclaimer requirements.

(b) A determination as to responsibilities will be made on a case-by-case basis; however, the Government reserves a nonexclusive license to use and reproduce for Government purposes, without payment, any publishable matter or information collected, including copyrighted material, arising out of the applicant's activities.

§ 1200.9 Collection of information.

If the applicant collects information from the public on its own initiative in connection with a research or other general purpose project, it will not, without prior written approval of the Assistant Secretary, in any way represent that the

information is being collected by or for a Federal agency.

§ 1200.10 Termination.

(a) Grants may be terminated, in whole or in part, by the Assistant Secretary if he finds that any of the following conditions exist:

(1) The applicant, or those with whom such agency has contracted or subcontracted, is not complying with the provisions of the Act, with the regulations in this part, or with any of the provisions of the grant; or

(2) Any funds paid to the applicant under the provisions of the Act or the regulations in this part have been lost, misapplied, or otherwise diverted from or improperly used or expended for other than the purposes for which they were paid.

(b) The Assistant Secretary may, in his sole discretion, terminate the grant, in whole or in part, if he finds that any of the conditions described in paragraph (a) of this section exist. Such termination shall be effective 30 days after the mailing of a written notice of termination to the applicant.

§ 1200.11 Repayment.

In the event that the grant is terminated, any funds that have been paid to the applicant by the U.S. Travel Service which have not been expended or contracted for upon receipt of the notice of termination shall be repaid to the Assistant Secretary within 30 days of such notice.

§ 1200.12 Federal coordination.

The Assistant Secretary may, prior to approving any travel promotional project, take such steps as he deems appropriate, to coordinate such project with other Federal agencies or seek the advice of such committees as may be established for the purpose of reviewing tourist development or promotion plans and programs.

Title 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[Docket No. C-1945]

PART 13—PROHIBITED TRADE PRACTICES

Chemway Corp.

Correction

In F.R. Doc. 71-11924 appearing at page 15652 in the issue for Tuesday, August 17, 1971, in paragraph 2, line 3, following the second reference to the word "such" add "product containing any such".

Title 41—PUBLIC CONTRACTS AND PROPERTY MANAGEMENT

Chapter 114—Department of the Interior

EDITORIAL AMENDMENT

Pursuant to the authority of the Secretary of the Interior, contained in 5 U.S.C. 301, Chapter 114, Title 41 of the Code of Federal Regulations is amended as follows:

Wherever the title "Assistant Secretary for Administration" appears in the chapter, it is changed to read "Assistant Secretary-Management and Budget."

Public Law 92-22 established an additional Assistant Secretary of the Interior to replace the former position of Assistant Secretary of Interior for Administration effected by Public Law 88-426. The newly established position will be entitled "Assistant Secretary-Management and Budget."

It is the general policy of the Department of the Interior to allow time for interested parties to take part in the rulemaking process. However, this amendment is entirely administrative in nature. Therefore, the public rulemaking process is waived and this amendment will become effective upon publication in the FEDERAL REGISTER (8-27-71).

WARREN F. BRECHT,
Deputy Assistant Secretary, Management and Budget.

AUGUST 20, 1971.

Title 50—WILDLIFE AND FISHERIES

Chapter I—Bureau of Sport Fisheries and Wildlife, Fish and Wildlife Service, Department of the Interior

PART 32—HUNTING

Sequoyah National Wildlife Refuge, Okla.

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER (8-27-71).

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

OKLAHOMA

SEQUOYAH NATIONAL WILDLIFE REFUGE

Public hunting of mourning doves and teal ducks on the Sequoyah National Wildlife Refuge, Okla., is permitted only on the areas designated by signs as open to hunting. These open areas, comprising 9,760 acres, are delineated on maps available at refuge headquarters, Sallisaw, Okla., and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, NM 87103. Hunting seasons are as follows: Mourning doves, from September 1 through October 30, 1971, inclusive; teal ducks, from September 11 through September 19, 1971, inclusive. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of doves and teal ducks subject to the following special conditions:

(1) Hunting weapons of any kind are prohibited in areas not posted as open to public hunting, except the Kerr-McClellan Navigation Channel where weapons must be cased or broken down.

(2) Camping or possession of firearms on the refuge at night are prohibited.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through October 30, 1971.

W. O. NELSON, JR.,
Regional Director, Albuquerque, N. Mex.

AUGUST 23, 1971.

PART 32—HUNTING

Sequoyah National Wildlife Refuge, Okla.

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER (8-27-71).

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

OKLAHOMA

SEQUOYAH NATIONAL WILDLIFE REFUGE

Public hunting of quail, rabbit, squirrel, coyote, bobcat, and crow on the Sequoyah National Wildlife Refuge, Okla., is permitted on three areas designated by signs as open to hunting. These open areas, comprising a total of 9,760 acres, are delineated on maps available at refuge headquarters, Sallisaw, Okla., and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, NM 87103. Hunting seasons are as follows: Quail on Mondays, Thursdays, Saturdays, and legal holidays, November 20, 1971, through January 15, 1972, inclusive; rabbits, October 2, 1971 through January 15, 1972, inclusive; squirrel, September 1, 1971 through January 1, 1972, inclusive; coyote, bobcat, and crow, September 1, 1971 through January 15, 1972.

Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of quail, squirrel, rabbits, bobcat, coyote, and crows, subject to the following special conditions:

(1) Only shotguns without slug ammunition are permitted.

(2) Hunting weapons of any kind are prohibited in areas not posted as open to public hunting, except the Kerr-McClellan Navigation Channel where weapons must be cased or broken down.

(3) Dogs used for hunting must be under immediate control or supervision and restrained from pursuit of protected species.

(4) Camping or possession of firearms on the refuge at night is prohibited.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 31, 1972.

MORRIS C. LEFEVER,
Refuge Manager, Sequoyah National Wildlife Refuge, Sallisaw, Okla.

PART 33—SPORT FISHERIES

Sequoyah National Wildlife Refuge, Okla.

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER (8-27-71).

§ 33.5 Special regulations; sport fishing, for individual wildlife refuge areas.

OKLAHOMA

SEQUOYAH NATIONAL WILDLIFE REFUGE

Sport fishing on the Sequoyah National Wildlife Refuge, Okla., is permitted only on the areas designated by signs as open to fishing. These open areas, comprising 10,100 acres, are delineated on maps available at refuge headquarters, Sallisaw, Okla., and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, NM 87103. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The open season for sport fishing on the refuge extends from September 1, 1971 through August 31, 1972, inclusive, except for an area of approximately 2,220 acres south of Vian Creek as posted to be closed during the periods September 1, 1971 through March 31, 1972, inclusive.

(2) Some refuge roads leading to waters open to fishing may be closed during September 1, 1971 through March 31, 1972, inclusive, as posted.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective through August 31, 1972.

MORRIS C. LEFEVER,
Refuge, Manager, Sequoyah National Wildlife Refuge, Sallisaw, Okla.

Proposed Rule Making

DEPARTMENT OF AGRICULTURE

Consumer and Marketing Service

[7 CFR Part 1124]

[Docket No. AO-368-A4]

MILK IN OREGON-WASHINGTON MARKETING AREA

Notice of Recommended Decision and Opportunity To File Written Exceptions on Proposed Amendments to Tentative Marketing Agreement and to Order

Notice is hereby given of the filing with the Hearing Clerk of this recommended decision with respect to proposed amendments to the tentative marketing agreement and order regulating the handling of milk in the Oregon-Washington marketing area.

Interested parties may file written exceptions to this decision with the Hearing Clerk, U.S. Department of Agriculture, Washington, DC 20250, by the 20th day after publication of this decision in the FEDERAL REGISTER. The exceptions should be filed in quadruplicate. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The above notice of filing of the decision and of opportunity to file exceptions thereto is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

Preliminary statement. The hearing on the record of which the proposed amendments as hereinafter set forth, to the tentative marketing agreement and to the order as amended, were formulated, was conducted at Tualatin, Oreg., on March 30, 1971, pursuant to notice thereof which was issued March 3, 1971 (36 F.R. 4548).

The material issues on the record of the hearing relate to:

1. Pool plant qualifications.
2. Diversion of producer milk.
3. Location adjustments.
4. Class prices and classification.
5. Expansion of the marketing area.
6. Computation of producer bases.
7. Application of order to producer-handler operations.
8. Miscellaneous and conforming changes.

Findings and conclusions. The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *Pool plant qualifications*—(a) *Pool distributing plants.* The minimum in-area route disposition requirement for pooling a distributing plant should not be changed.

The order now qualifies as a pool plant any distributing plant which disposes of at least 15 percent of its monthly receipts of Grade A milk (except packaged fluid milk products from other Federally regulated plants) on routes in the marketing area and not less than 30 percent of such receipts on routes both inside and outside the marketing area.

The operator of a pool distributing plant in Weed, Calif., with route disposition in the marketing area of between 30 and 35 percent of his Grade A receipts, proposed that the minimum in-area route disposition percentage for pooling be increased from 15 percent to 35 percent of a plant's Grade A receipts. While such a modification in the in-area pooling requirements would necessitate some modification in the present 30 percent minimum overall route disposition requirement, proponent did not direct his attention to this matter.

The proponent handler receives milk regularly from seven producers and obtains supplemental supplies from a fully regulated handler under the order. His route disposition in the marketing area is in Klamath County, Oreg., and is a substantial part of the total sales in that county. His overall Class I utilization percentage is above the average for the market.

A spokesman for the seven producers testified in support of the handler's proposal, the purpose of which is to obtain nonpool status for the plant. He expected that the blend price now returned to producers at the Weed plant for their milk would not be reduced if the plant were unregulated since it would not be effected by the lower price applicable to the reserve supplies now associated with the market.

Two pool handlers whose plants are located in Klamath County as well as producers in that area opposed any increase in the in-area route disposition requirement for pooling. They held that nonpool status would afford the Weed handler an unwarranted advantage at the expense of other handlers and of producers generally and would reinstitute the kind of unstable marketing conditions that prevailed prior to the order and led to its inception.

The Weed handler claims that he is operating at a competitive disadvantage, because the major part of his sales are outside the marketing area and the California handlers with whom he competes, who are regulated under California State orders, obtain their Class I milk supplies at prices below the Federal order price which he is required to pay.

There is no indication that the Weed handler's Class I sales either inside or outside the marketing area have declined since the inception of the order. His principal competition outside the marketing area, in northern California, is from three California based handlers whose plants are 70, 245, and 300 miles, respectively, from Weed.

Minimum prices for Class I milk (3.5 percent butterfat) fixed by the State of California at the three plants located in Sacramento, Redding, and Oakland, were, at the time of the hearing, $5.72, $5.81, and $6, respectively. The State of California Class I price in Siskiyou County at that time was $6.19. While there are no handlers in Siskiyou County to which the $6.19 price was applicable, this is the price the Weed handled would have been required to pay if he were not subject to the Federal order.

Orders issued by the Bureau of Milk Stabilization of the California Department of Agriculture on April 21, 1971, increased the Class I price in various marketing areas throughout the State by 23 cents per hundredweight. Official notice is here taken of the State's action. Official notice is taken also that the Oregon-Washington order price applicable at the handler's plant in Weed is currently (July 1971) $6.56 per hundredweight.

Both the Weed handler and a Klamath Falls handler indicated that the problem in southern Oregon is related to the level of the Class I price rather than to pooling qualifications. The revised location adjustments hereinafter adopted in this decision will reduce the Class I price for milk received from producers at plants in southern Oregon and in California. In the case of the Weed handler the Class I price will be reduced by 19.5 cents. This adjustment should ameliorate the problem from which proponent seeks relief.

(b) *Pool supply plants.* The pooling requirements for supply plants should be changed.

A supply plant may now qualify for pooling in any month by shipping 30 percent of its dairy farmer receipts to pool distributing plants. In addition, a supply plant that was a pool plant in each month of August through February may qualify for pooling without further shipments in the following March through July.

Three supply plants, all operated by cooperative associations, have qualified as pool plants continuously since the inception of the order. Two are "close-in" plants and are among the largest manufacturing operations in the market. In addition to their pool milk receipts, both plants regularly receive substantial quantities of milk from ungraded farms for manufacture. The pool distributing plants to which they ship are in the vicinity of Portland, about 75 and 40 miles distant, respectively.

The third pool supply plant, which is is in Idaho, has facilities only for receiving milk from its producer members for shipment to other plants. The pool distributing plants to which it ships are principally in the Portland area, about 420 miles away.

Of the three supply plants, two have experienced no difficulty in any month in qualifying as pool plants, indicating that the present percentage shipping requirements for pooling have not been burdensome for them. The Idaho receiving plant shipped about 45 percent of its producer milk receipts to pool distributing plants in 1970. One of the two close-in plants shipped more than 50 percent of its producer milk receipts to pool distributing plants in the same period.

Although the third supply plant qualified as a pool plant in each month, a spokesman for the operating cooperative indicated difficulty in meeting the present pooling qualifications. In some months, it has been necessary for this cooperative to receive producer members' milk, that normally is shipped directly from producers' farms to pool distributing plants, first as its supply plant in order to qualify such plant for pooling. During 1970, about 35 percent of the producer milk receipts at this plant was shipped to pool distributing plants.

The hearing notice proposals submitted jointly by five cooperatives (including the two operating the close-in pool supply plants), which together represent a majority of the producers on the market, would (1) increase the monthly shipping requirements for pooling a supply plant from 30 percent to 50 percent in August through February and to 40 percent in March through July, (2) remove the provision whereby a supply plant that was a pool plant in August–February retains automatic pooling status in the following March–July without shipments, (3) enable cooperatives to qualify supply plants based on their performance in the preceding 12 months, and (4) provide a type of "system pooling" for cooperatives.

Under such proposed system pooling, a cooperative which operates a supply plant and one or more other cooperatives (which could include those which operate no plants) would have their producer member deliveries made directly from farms to all pool distributing plants considered as having been received at and shipped from a supply plant(s) to such pool distributing plants for the purpose of qualifying for pooling all supply plants included in the system.

As proposed, a supply plant would qualify as a pool plant for the month if 50 percent of the member producer milk of all cooperatives in the system was received during the immediately preceding 12-month period at pool distributing plants, either directly from member producers' farms or by transfer from supply plants in the system. Fluid milk products processed and packaged at all supply plants in the system and disposed of as Class I milk on routes in the marketing area also would be treated as though shipped from the supply plants to pool distributing plants for this purpose. In like manner, fluid milk products and cream used at a supply plant to produce Class II products would be considered as a shipment from the supply plant to a pool distributing plant and counted for determining pooling qualification.

Another hearing proposal, by a cooperative operating a supply plant, would leave unchanged the present requirement that a supply plant ship 30 percent of its receipts during the month to qualify as a pool plant, but would remove the provision that accords pool plant status in March through July to a supply plant that qualified as a pool plant in the preceding August through February.

The hearing notice proposals for revising the supply plant pooling qualifications were modified at the hearing by the various proponents as follows: (1) The minimum monthly shipping percentage requirement for pooling a supply plant would be set at 45 percent of its dairy farm receipts August through February and 35 percent March through July; (2) a supply plant of a cooperative would be qualified as a pool plant for the month if 40 percent of the milk of its producer members (and of those of other cooperatives in a system) had been received in the immediately preceding 12-month period at pool distributing plants either directly from the producers' farms or by transfer from the supply plant(s); and (3) the route disposition of fluid milk products in the marketing area from a supply plant in which they were processed and packaged would be counted as though a shipment from the supply plant to a pool distributing plant.

The stated goal of the proponents for revising the pooling qualifications for supply plants is to increase the percentage of receipts that a supply plant must ship to pool disrtibuting plants to qualify for pooling and thus insure participation in the pool of only those plants regularly and substantially supplying the market. However, the proposed standard for pooling the supply plant of a cooperative, by considering direct deliveries from the farms of producer members and those of members of other cooperatives as the equivalent of a supply plant shipment to a pool distributing plant, could qualify a supply plant for pooling without its being required to make even a token shipment to a pool distributing plant in any month. This procedure, proponents held, would enable the supply plant with manufacturing facilities to achieve greater operating efficiency and reduce uneconomic milk movements otherwise necessary to insure pooling eligibility.

The pooling standards for supply plants should be such as will insure that milk needed in the market for Class I use will be available at all times while at the same time not force milk to be shipped to the market center unnecessarily, particularly in the months of seasonally high production. It is also appropriate that the standard for pooling supply plants in this market be consonant with those in the other Federal order markets competing for supplies in the same region.

There is a significant overlapping of the milk production areas for the three Federal order markets in the northwest. Some supply plants pooled under the Puget Sound and Inland Empire orders are so located that they could become pool supply plants under the Oregon-Washington order. One or more Oregon-Washington order supply plants simularly could become pool plants under either of the other orders.

Under the Puget Sound order, the monthly percentage shipping requirements for pooling a supply plant located outside the marketing area are 50 percent in October through December and 20 percent in January through September. A plant that shipped at least 50 percent of its receipts in October through December qualifies as a pool plant in the following January through September without further shipments in the latter months. Similar provisions are provided in the Inland Empire order.

The percentage shipping requirements for pooling a supply plant under the Oregon-Washington order should follow closely those in the two nearby orders, except that the 50 percent rate should apply for September through February and the 20 percent rate for March through August. A plant that shipped at least 50 percent of its receipts in each month of September through February should qualify as a pool plant in the following March through August without further shipments in such period. Production relative to demand for the Oregon-Washington market is significantly higher in March through August than in the other months of the year.

Two or more supply plants should be permitted to have their combined receipts and disposition considered as a unit for the purpose of determining their qualification as pool plants to the extent that such plants are bona fide supply plants. Such an arrangement will serve the best interest of the market by providing for more efficient handling of the market's reserve supplies.

The route disposition in the marketing area of fluid milk products processed and packaged at a supply plant appropriately should be included in the plant's shipping percentage to determine its pool qualification. This was proposed by a cooperative operating a pool supply plant from which about 4 percent of its receipts is distributed on routes in the marketing area. The Class I sales represented by this route disposition represent supplies furnished to meet the Class I needs of the market to no less a degree than shipments in bulk from a supply plant to a pool distributing plant. Considering route disposition from a supply plant the equivalent of shipments to a pool distributing plant in qualifying it for pooling will improve equity in treatment among supply plants regularly supplying the market's Class I needs.

The milk of producer members of a cooperative delivered directly from their farms to pool distributing plants should, under certain conditions, be considered as a receipt at and a shipment from the

cooperative's supply plant in qualifying it as a pool plant. Substantial quantities of milk are moved directly from their farms to pool distributing plants by producer members of cooperatives operating supply plants. When milk is not needed at the pool distributing plant to which it is customarily delivered, it is received either at the cooperative's supply plant or diverted by the cooperative to another plant. Milk movements directly to pool distributing plants from the farms of producer members of a cooperative operating a supply plant are coordinated with the operation of the supply plant in filling the needs of those pool distributing plants served by the cooperative.

Although recognition should be given to the service to the market provided by a cooperative operating a supply plant that meets the needs of pool distributing plants both by interplant shipments and by the direct delivery of milk from the farms of its members, it is likewise necessary that appropriate safeguards be provided to insure that the cooperative's plant is a bona fide supply plant. Otherwise, cooperatives could obtain pool status for plants that were not servicing the market as supply plants but which were instead bringing into the order pool unneeded quantities of milk for manufacture at the expense of producers that regularly supply the market.

To count the direct deliveries from producers' farms to pool distributing plants as receipts at and shipments from a cooperative's supply plant for pooling purposes without requiring a reasonable performance by the supply plant in discharging its basis function would tend to make meaningless any shipping percentage requirement for pooling and would be inconsistent with the basic qualifications for supply plants, i.e., to provide a quantitative measure for determining whether the plant is sufficiently engaged in furnishing the needs of this fluid market to warrant a share in the pool for the dairy farmers at such plant.

In view of the above, it is concluded that shipments made directly to pool distributing plants from the farms of producer members of a cooperative operating a supply plant be counted as a receipt at the supply plant and a shipment therefrom to a pool distributing plant to the extent that such dairy farmer shipments to pool distributing plants do not exceed the total quantity of fluid milk products shipped from the cooperative's supply plant to pool distributing plants during the same month.

2. *Diversion of producer milk.* (a) The total quantity of milk diverted by a cooperative from a pool plant to a nonpool plant in any month should be limited to that quantity of milk not greater than the quantity of its producer members' milk physically received at all pool plants during the month. Likewise, the quantity of nonmember producer milk diverted by the proprietary operator of a pool plant should not exceed the quantity of nonmember producer milk physically received at his plant(s).

Cooperatives and proprietary operators of pool plants may now divert without limit in March through July the milk of any producer whose milk had previously been received at a pool plant. In August through February, a cooperative may divert milk of any member producer whose milk was received at a pool plant at least 3 days during the month, but the total quantity diverted may not exceed the aggregate quantity received from all member producers at pool distributing plants. A proprietary operator of a pool distributing plant may likewise divert in August through February the milk of nonmember producers whose milk was received at his pool distributing plant(s) at least 3 days during the month, but diverted milk may not exceed the aggregate quantity of milk received from all such producers at his pool distributing plant(s) during the month.

Two or more cooperatives may have their allowable diversions computed on the basis of the combined deliveries of their producer members. There was no proposal to change this order provision or the requirement that milk must be received from a producer at a pool plant on at least 3 days during any month in which the aggregate quantities that a cooperative, or a pool plant operator other than a cooperative, may divert is limited to the aggregate quantity of milk physically received at pool plants.

A group of cooperatives proposed that diversions in the months of March through July be established on the same basis as is now applicable in August through February. They also proposed that no diversions be allowed from pool supply plants.

Of the three pool supply plants in the market, two maintain substantial manufacturing operations and have no need to divert producer milk. The third pool supply plant, operated by a cooperative, has no manufacturing facilities. The cooperative operating the latter plant urged that the order provide for diversions from pool supply plants on the same basis as for pool distributing plants. It also opposed the proposal to limit diversions in the March through July period contending it would impede the efficient handling of producer milk not needed in the market for Class I use. That is, it would require much of the cooperative's member milk to move through the supply plant for transshipment to a manufacturing plant instead of moving directly from producers' farms to the manufacturing plant as diverted milk.

A proprietary handler opposed any change in the diversion provisions contending that the present provisions facilitate orderly marketing and are causing no problems. He also held that the more restrictive diversion provisions proposed by cooperative proponents would force upon him the additional expense of moving through his pool plant producer milk now moved directly from producers' farms to a nonpool plant as diverted milk when it is not needed for fluid use.

Because of variations in market needs and in production, the milk of all producers is not needed every day for processing as fluid milk. It is necessary that there be a reserve of qualified milk available to supply the fluctuating needs of the market. At times, therefore, when the milk of dairy farmers regularly supplying the market is not needed at the plants to which it is customarily delivered, it can be most economically handled by moving it directly as diverted milk from the farm to a nearby manufacturing plant, whether it be a pool plant or a nonpool plant.

Although the cooperatives that proposed changing the diversion provisions contend that the present provisions are inappropriate under current conditions, their testimony did not indicate the extent to which the diversion provisions were being used or how they might be adversely affecting the market. Instead, their testimony was directed on what could happen prospectively under the present diversion provisions, which allow unlimited diversions in March through July.

Three of the cooperatives (two of which operate pool supply plants) proposing more restrictive diversion provisions utilize a high proportion of their producer receipts for manufacture in their own pool plants, which are among the largest manufacturing facilities in the market. These plants have little need for diverting producer milk, especially in view of their proposal for qualifying supply plants on a system basis which is adopted in this decision. Thus, the proposals by these cooperatives relating to diversions apparently would affect primarily any pool supply plant that does not have manufacturing operations and thus may have need to divert milk to nonpool manufacturing plants.

To provide that no milk may be diverted from a supply plant would require the milk of producers who regularly ship to the one cooperative supply plant without manufacturing facilities to move through such plant for transshipment either to pool distributing plants or to nonpool manufacturing plants. The cooperative thus could not avail itself of the efficiencies associated with diversions directly from producers' farms to manufacturing plants.

Each supply plant now pooled has a substantial association with the fluid market in that it supplies significant volumes of milk for Class I use throughout the year. A supply plant whether it has manufacturing facilities or not may have need to divert reserve supplies of producer milk to other plants for manufacturing. Obviously, the operator of a pool supply plant without manufacturing facilities has greater need to divert milk than the operator of a pool supply plant with manufacturing facilities.

Requiring that each producer whose milk is diverted deliver to a pool plant at least 3 days during the month and limiting diversions of producer milk by cooperatives and proprietary handlers to the quantities delivered to pool plants in the same month are reasonable standards under current conditions in the Oregon-Washington market and will provide sufficient safeguard against the unwarranted association with the pool of milk intended for manufacturing use.

Moreover, in conjunction with the present pooling provisions for distributing plants and the pooling provisions for supply plants adopted herein, they will implement orderly marketing by facilitating the movement of reserve supplies of producer milk to the most practicable outlet.

(b) Without appropriate safeguards, it would be possible for any handler, also supplying milk for Class I use to an unregulated plant, to handle such milk as nonpool milk when so disposed of and have it delivered to his pool plant as producer milk when not needed for such Class I use. In such event, the pool would be carrying the balance supplies for such outside sales without sharing in the higher Class I values associated with such balancing supplies.

A handler having out-of-market bulk Class I sales could circumvent regulation of such outside sales in this manner. At least one supply plant by virtue of its location outside the regulated market could have a substantial potential to operate in this manner.

To insure against such an operation, the order should be modified to provide that milk of any dairy farmer which is purchased by a pool handler who during the month caused milk from the same farm to be delivered to a nonpool plant as other than producer milk may not acquire status as producer milk in such month. The dairy farmer should be designated a "dairy farmer for other markets" with respect to his deliveries to a pool plant.

Milk received at a pool plant as diverted milk from an other order plant should not be considered as milk from "dairy farmers for other markets" if such diverted milk is considered producer milk under the other order. Such milk would be classified and priced under the other order. The respective orders specifically prescribe the treatment of such milk by regulated plants.

Since the receipts from dairy farmers for other markets at a pool plant can be considered to represent surplus (Class III) production associated with the unregulated plant, such "other source" receipts should be allocated to the Class III classification at the pool plant.

Because the unregulated plant's requirements of the production of the dairy farmers supplying him will change throughout the week and seasonally as its Class I sales vary, a pool handler cannot depend on such dairy farmers as a regular supply for his Class I needs. Any such milk allocated to Class I at a pool plant would displace producer milk in such use, forcing it into the Class III classification. Accordingly, the milk of dairy farmers for other markets received at a pool plant should be assigned a Class III value in allocating the receipts from all sources at such plant against the overall utilization at the plant during the month.

(c) Producer milk diverted from a pool plant to another pool plant or another order plant and which is specifically designated for manufacture, should not be considered as a receipt at the transferee plant for the purpose of determining its qualification as a pool plant. Such diversions are now counted as a receipt at a supply plant, but not at a distributing plant, in determining the plant's pool status. There is no evident justification in this market at the present time to differentiate between distributing plants and supply plants in this regard.

A cooperative, whether or not it operates a pool plant, must market its members' milk that is in excess of handlers' needs and should be permitted to divert such milk from a pool plant to another pool plant if designated for Class III uses. Such diversions may now be made only by the operator of a pool plant.

Fully regulated plants with manufacturing facilities are often the most feasible and economical outlets for milk that is not needed for Class I purposes. Milk diverted from a pool plant at which it is customarily received to such a regulated plant where utilized in Class III is not a part of the transferee plant's regular supply and, therefore, should not be considered as a receipt at such plant in determining its qualification as a pool plant.

3. *Location adjustments.* Location adjustments (the amounts by which the Class I price and the uniform price for base milk are reduced for milk received at plants in specified geographic areas) should be based on a plant's distance from the major consumption centers in the market.

Except for a 20-cent adjustment in seven specified counties, no location adjustments are now applicable at plants in the marketing area. Of the six marketing area plants with location adjustments, five, in central Washington, are located 159 to 240 miles from Portland; and the sixth, in eastern Oregon, is 191 miles from Portland.

A 20-cent location adjustment is applicable also in one county in central Washington outside the marketing area. At all other plants outside the marketing area (except in California) and more than 100 miles from Portland, the location adjustment is 15 cents plus 1.5 cents for each additional 10 miles.

For a California-based plant, the location adjustment is 15 cents plus an additional 1.5 cents for each 10 miles that such plant is more than 110 miles from the nearer of Klamath Falls or Medford, Oreg.

The two pool plants outside the marketing area at which location adjustments now apply are a supply plant at Meridian, Idaho, and a distributing plant at Weed, Calif., which plants are 420 and 350 miles, respectively, from Portland. The location adjustment at Meridian is 63 cents and at Weed 15 cents.

The Meridian handler, a cooperative, proposed that Walla Walla (which is 240 miles from Portland) be added as a basing point. That is, no location adjustments would apply at plants within 100 miles of Portland or Walla Walla. At all other plants the location adjustment would be 15 cents within 100–110 miles of the nearer of the two cities, plus 1.5 cents for each additional 10 miles therefrom. The handler also proposed revising the provisions specifying the milk to which Class I location adjustments apply when milk is moved between plants. Priority in this regard is now given to the shipping plant at which no location adjustment is applicable and then, in sequence, beginning with the plant having the least location adjustment. As proposed, all shipping plants would be assigned a pro rata share of the Class I utilization at the transferee plant for the purpose of computing the location adjustment, applicable to the milk shipped.

Certain producers in the Yakima area held at the present 20-cent location adjustment applicable at the plants to which they deliver in central Washington is discriminatory and should be reduced or abolished. If location pricing is to be continued in the order, they proposed that the location adjustment provisions be based solely on the distance of a plant, wherever located, from the central market.

A cooperative operating six regulated plants under the order, two of which are subject to the 20-cent location adjustment, proposed elimination of the 20-cent location adjustment in central Washington and eastern Oregon.

In the Oregon-Washington market the matter of location pricing is essentially one of pricing milk to insure adequate supplies at the main population centers of the market where the great bulk of the supply is processed for Class I distribution.

Fluid milk products are bulky and perishable, and incur a relatively high transportation cost when they are moved a considerable distance. The location differential provisions should facilitate the movement of milk from supply plants to the points where processed for Class I uses. The applicable rates for such movement must be applied from appropriate basing points to accomplish this objective, and to promote uniformity in pricing among handlers. Such adjustment to prices should reflect the lesser value of milk at an outlying plant location, or when diverted to an outlying location.

Since location differentials apply only to outlying plant locations, no differential is applicable when the milk is received directly from the farm at a plant in the market center. The transportation or hauling cost on such milk is paid for by the individual producer. The hauling rate is not fixed by the order.

When milk is received at a supply plant located a considerable distance from the market, the handler rather than the producer incurs the additional cost of moving that milk from the outlying plant to the market for processing. Under these conditions, the value of producer milk delivered to a supply plant located some distance from the central market reduces in proportion to the distance and the cost of transporting such milk from the plant of first receipt to the distributing plant. Some distributing plants in this market also are located at various distances from the main centers of population. The prices at these plants will reflect values

equivalent to those of supply plants similarly located.

An important aspect in establishing basing points for computing location differentials is to identify the major consumption centers in the marketing area. It is to these plants that the bulk of the milk supply must be channeled. Of the 2.44 million population (1970 census) in the 35 counties of the marketing area, 40 percent is in the four-county Portland metropolitan area. These four counties, together with Lane and Marion Counties, in which Eugene and Salem are located, account for 55 percent of the marketing area population. Portland, Eugene, and Salem, with populations of 375,000, 77,000, and 68,000, are the three largest cities in the marketing area.

The Portland area and the area in or near the various cities extending south to Eugene (110 miles from Portland) are the principal points at which milk is processed and packaged for distribution in the marketing area. The present location adjustment provisions do not currently reflect the actual market situation in that they do not adjust on a uniform basis for the cost of moving milk to plants in the central market from the more distant parts of the production area.

For milk received at a plant located 100–110 miles from the nearer of the county court house in Portland or the city hall in Eugene, the Class I and uniform prices (except for excess milk) should be reduced 15 cents per hundredweight. The rate of 1.5 cents for each 10 miles or fraction thereof beyond 110 miles, which is now used in the order, should be retained. This rate reasonably represents the cost of transporting milk in bulk over longer distances.

The principal distributing plant of the major cooperative in the market, which is in Portland, receives milk from both nearby and distant producers. Some other plants operated by the same cooperative are at distant locations from Portland. Milk from producer members' farms in the same geographic areas is received by direct delivery at both the Portland plant and one or more of the cooperative's other plants. The hauling charges paid by this cooperative's producers range from 29 to 61.5 cents per hundredweight, indicating the wide range in producers' hauling costs that results in moving milk directly from farms to nearby plants compared to shipping milk over long distance to the market center.

Yakima County is one of the principal production areas for the market. Plants in the Portland area and local distributing plants receive milk directly from farms in Yakima County. The prevailing hauling rates for such milk delivered to local plants range from 19 to 26 cents per hundredweight. The hauling charges for milk delivered directly to Portland plants from Yakima County farms range from 45 to 50 cents.

Presently, the same location adjustment, 20 cents, is applicable at a Walla Walla plant, 240 miles from Portland, and at a plant in Toppenish in Yakima County, 159 miles from Portland. As provided by this decision, the location adjustments would be 34.5 cents at Walla Walla and 22.5 cents at Toppenish.

Of the 54 plants regulated by the order in December 1970, location adjustments would be applicable to 12 of them at which no location adjustments presently apply. All 12 plants are in southern Oregon at distances of 128 to 172 miles from Eugene. The location adjustments that would be applicable at these plants range from 18 cents at Coos Bay to 25.5 cents at Klamath Falls.

The location adjustment of the Weed, Calif., handler, earlier discussed in this decision, whose marketing area route disposition is in southern Oregon, would be increased from 15 cents to 34.5 cents. Thus, his Class I milk cost would be decreased by 19.5 cents per hundredweight. Weed is 240 miles from Eugene.

The present 63-cent location differential at the Meridian, Idaho, plant, which is farther from the central market than any other pool plant, would be unchanged by this decision.

Of the six plants in central Washington and eastern Oregon at which location adjustments now apply, the applicable location adjustment rates would be increased an average of 6 cents, ranging from increases of 2.5 cents at the Toppenish plant to 14.5 cents at the Walla Walla plant.

If the location adjustment provisions herein adopted had been effective in 1970, it is estimated that the total value of the pool would have been reduced by the equivalent of three cents per hundredweight of Class I milk. To maintain the same level of return in the aggregate to producers, the order Class I price differential would have to be increased by three cents.

A proposal that all shipping plants be assigned a pro rata share of the Class I utilization at the transferee plant for the purpose of computing the location adjustment applicable to milk shipped is denied. The assignment of available Class I utilization at the transferee plant is now made first to receipts from plants at which no location adjustment is applicable and then in sequence beginning with receipts from the plant with the lowest location adjustment. This sequential assignment, which is commonly provided in Federal orders, discourages the unnecessary movement of milk between pool plants at the expense of producers.

The proposals to use Walla Walla as a basing point for determining location adjustments and to eliminate location adjustments in central Washington and eastern Oregon are denied. To provide f.o.b. central market pricing at these locations, or pricing on a basis different from that provided at similar locations in relation to the central market, would tend to defeat the purpose for which location differentials are provided.

4. *Class prices and classification*—(a) *Class I price.* The Class I price should be the basic formula price (Minnesota-Wisconsin manufacturing milk price) for the preceding month plus $1.98.

The present Class I price is the basic formula price for the preceding month plus $1.95. The 3-cent increase in the Class I differential will result in the same return to producers for milk in Class I sales that they now receive, after giving consideration to the effect of the revised location adjustment provisions adopted in this decision.

Certain producer associations in the market proposed that the present Class I price be retained in the order. A handler proposed reducing the Class I price differential 10 cents, to $1.85, to achieve the same Class I price as in the Puget Sound order.

The Oregon-Washington market draws supplies from an area overlapping the supply areas of the Puget Sound and Inland Empire markets. The evidence at the hearing did not indicate conditions in regard to competition for supplies or sales with these other Federal order markets significantly different from those that prevailed at the inception of the Oregon-Washington order. Accordingly, the proposal for a reduction of 10 cents in the Class I price is denied.

(b) *Class II price.* No change should be made in the Class II price on the basis of this record.

A handler proposed that the Class II price (which is the Class III price plus 25 cents) be reduced 15 cents. Such a reduction is justified, it was claimed, because (1) production for the market is more than adequate to meet its Class I and Class II needs, and (2) the Class II price in some other Federal orders is less than in the Oregon-Washington order. Producer spokesmen opposed a decrease in the Class II price.

The principal Class II products (fluid cream and cottage cheese) are handled by milk dealers in conjunction with their fluid milk plant operations and move through the same retail and wholesale outlets as their Class I business. Order handlers demand a regular supply of producer milk for their Class II uses. The proponent for a lower Class II price did not show or claim that alternative supplies of milk or milk products for Class II uses are obtainable at less than the present Class II price. Neither did he establish that a reduction in the Class II price is otherwise warranted. Accordingly, the proposal is denied.

(c) *Class II products.* No action should be taken on the basis of this record on proposals to (1) classify half and half (now Class I) in Class II; and (2) classify ice cream, ice cream mix, frozen desserts, sour cream mixtures, and aerated cream products (all now Class II) in Class III.

A handler requested that the proposed classification changes be adopted because (1) a number of Federal orders now so classify these products and (2) including these products in the lower-price classifications would assist in halting the loss of sales of such products to nondairy substitutes. Producers opposed the classification changes, contending that they would result in a reduction in the payments they receive for their milk.

At the inception of the order, half and half was classified in Class I and cream in Class II. Because of its lower butterfat content, half and half has been in a much better competitive position with nondairy substitutes than fluid cream has been. Moreover, there has been no apparent significant decline in half and half sales in the market since the inception of the order. It is not evident that including it in a lower priced class will result in increased sales of the product.

The above Class II products for which the handler proposed a Class III classification constitute a substantial and continuing outlet for reserve supplies of producer milk. Handlers require a supply of high quality milk to produce these products. Although there is no general requirement throughout the area that Grade A milk must be used in the manufacture of these products, handlers use Grade A milk for the production of such Class II products.

It cannot be concluded that producers would realize any gain at the present time by incorporating the proposed classification changes in the order or that the order market would otherwise be benefited. Alternative supplies to produce the various Class II products for which a Class III classification is proposed are not readily available at less than the Class II price in the order. The classification of these products under the Puget Sound order, for example, where handlers compete for sales outlets with local handlers for such products, is the same as under the Oregon-Washington order.

(d) *Cream in inventory.* Cream on hand at a plant at the end of the month should be classified in Class II when in packaged form and in Class III when in bulk. This parallels the basis for classifying a handler's month-end inventory of fluid milk products, which are Class I when in packaged form and Class III in bulk.

When cream is held in packaged form, it is reasonable to presume that it is intended for distribution as a Class II product, its normal utilization in such form. In the following month, inventory on hand at the beginning of the month, should be allocated directly to a handler's Class II utilization.

The order does not now make provision for classifying cream in inventory. The change herein adopted will specify a more complete accounting of the total receipts and disposition of the skim milk and butterfat in all cream handled at their plants, which accounting is necessary in order to determine the utilization of producer milk handled at their plants. This is because the cream handled in a plant derives from, and is intermingled with, the Class I operations of the handler.

As in the case of bulk milk products, the final use of cream being held in bulk inventory is not necessarily apparent. The cream must be followed to its ultimate use, which may be in any class. Accordingly, it is reasonable to classify bulk cream in inventory in Class III and then apply a reclassification charge should the cream eventually be used in another class.

(e) *Interplant transfers.* If cream is transferred to another plant in packaged form, the skim milk and butterfat contained therein should be classified as Class II milk since it is moved in final form. The classification of cream when disposed of in bulk form however, is determinable only by following the movement of the cream to its final use. Thus, it is necessary that cream transferred in bulk form from a pool plant to another plant be classified in a manner similar to that used in classifying transfers of bulk fluid milk products. This is effectuated by the attached order language of this decision.

Transfers of both fluid milk products and cream in bulk from a pool plant to a nonpool plant, which transfers are not assigned to Class I, should be assigned first to the available Class III utilization at the nonpool plant and then to Class II. Such assignment of bulk fluid milk products is now made first to the nonpool plant's Class II utilization.

A cooperative proposed, with respect to fluid milk products, the change herein adopted. A nonpool plant which is an outlet for much of the cooperative's surplus producer milk produces substantial quantities of Class II and Class III products. The shipments to the manufacturing plant by the cooperative are intermingled at the manufacturing plant with milk received from its regular sources of supply. The manufactured products produced at the plant are not required to be made from milk from Grade A sources.

The change herein provided will facilitate the marketing of the reserve supplies of producer milk by enabling the disposal of such milk by regulated handlers to manufacturing outlets for Class III use even though there may be some Class II products manufactured at the plant. As a safeguard, however, the order should provide that the Class III classification of such transfers should be limited to the Class III utilization at the transferee plant.

To attempt to specify a priority to the Class II utilization in a nonpool manufacturing plant for fluid milk products and cream transferred to such a plant from a pool plant would be impractical. This is because such a nonpool plant's major supply would be ungraded milk, the price for which would tend to approximate the order Class III price.

It cannot be expected that the irregular supplies that a nonpool manufacturing plant might receive as surplus milk from Oregon-Washington handlers would be worth more to it than the milk received from its regular suppliers. To provide a priority in the Class II utilization to receipts of order milk transferred to such plant would tend to disadvantage the regulated handler, since he would be obligated to the pool at the Class II price while receiving a manufacturing milk price (which would more nearly approximate the Class III price) for his surplus milk. Orderly marketing will be facilitated by this change.

The requirement that each container of cream for Class III uses transferred from a pool plant to a nonpool plant be "tagged" should be removed from the order. This provision accomplishes no purpose since the verification of the cream disposition must otherwise be established. Producers proposed the removal of the tagging requirement and there was no opposition to the proposal.

(f) *Evaporated milk.* As proposed, a Class III classification should be specified for producer milk used to produce evaporated milk. This will permit such use to remain as a competitive outlet for milk surplus to the needs of the Class I market. Evaporated milk made from milk priced under the order must compete in a national market with evaporated milk processed from other graded milk or from ungraded milk priced at a level comparable to the Class III price. The present order requires interpretation in this regard since it does not now specifically classify evaporated milk as a use in any class. There was no proposal to include it in a classification other than Class III.

5. *Expansion of the marketing area.* Lake County, Oreg., should not be added to the marketing area.

Sparsely populated Lake County (population 6,000) is in southern Oregon and is contiguous to Klamath County, which is in the marketing area.

The total Class I distribution in Lake County is from the plants of two producer-handlers, the Klamath County handler who proposed adding Lake County to the marketing area, and one other regulated handler.

The proponent stated that the proposal to add Lake County to the marketing area was not made to correct any existing marketing problem or in anticipation of resolving one that is likely to arise in the immediate future. He contended that adding Lake County to the marketing area would insure that any presently unregulated handler who extended his distribution into Lake County would have no advantage over presently regulated handlers.

The quantities of milk distributed by regulated handlers in Lake County are not a substantial portion of their total sales. Since there is no existing or apparent potential market disorder in unregulated Lake County which is affecting regulated handlers or their producers adversely, or is adversely affecting administration of the order, there is no basis for adding Lake County to the marketing area at this time. Accordingly, the proposal for extension of this area is denied.

6. *Computation of producer bases.* The 4 months in the preceding January–December period in which the average daily receipts of total producer milk were lowest (instead of the presently designated 5 months of August through December), should be used for determining the bases on which producers will be paid for their deliveries in the 12 months beginning February 1 of each year. As a corollary change, to accommodate the reduction in the base-making period from 5 months to 4 months, the minimum number of days of a producer's produc-

tion that must be received at a pool plant or diverted as producer milk in the base-making period should be reduced from 120 days to 90 days.

The change in the base-making period herein adopted was proposed by a producer and was supported by various producer groups at the hearing. They contended that designating specific consecutive months as the base-making period encourages an unduly accelerated rate of production in such months relative to other months; and that using the 4 lowest months of total production as a base-making period is desirable in this market, since a large proportion of the producers on the market have historically been accustomed to such a base-making period.

In recent years the 4 lowest months of production fell within the months of October through February. August and September, which months are now included in the base-making period, have not apparently been among the 4 lowest months of production.

It can reasonably be expected that there will be some variation from year to year in the four months of the year in which the average daily producer deliveries will be lowest. Utilizing such 4 lowest months of production in determining producer bases will provide a more suitable period for such purpose than the specifically designated 5-month period of August through December now contained in the order.

Producer deliveries in January through December 1972 would be those first used in determining producer bases on deliveries during the four lowest months of producer deliveries. Producers would have bases assigned to them based on their deliveries during 1972 to be effective for the 12 months beginning February 1, 1973. It would be impractical to provide for an earlier effective date. To provide producers reasonable notice, any order amendment resulting from this decision could not appropriately be effected before the 12-month period within which bases currently being determined will have expired.

Some producers urged that the base-making period for each individual producer be the average of his daily deliveries during his four lowest months of production. There is no basis for concluding that incorporating such provision in the order would tend to encourage even production throughout the year, a principal purpose for which a base plan was instituted in the market. On the basis of past market experience, it can be expected that the 4 months of the lowest production for the market will almost certainly fall within the 5-month period when milk is shortest relative to the market's needs. To enable a producer to establish a base on the basis of his deliveries in other months would serve no practical purpose and would tend to defeat, rather than effectuate, the intent of the base-excess plan in the order. The proposal, therefore, is denied.

7. *Application of the order to producer-handlers.* No change should be made at this time in the order provisions relating to producer-handlers.

The order designates as a producer-handler any person who operates a dairy farm and a milk processing plant from which fluid milk products are distributed on routes in the marketing area. In addition to the production of his own farm, such person may receive from pool plants packaged fluid milk products, other than whole milk, in an amount not in excess of an average of 100 pounds per day. He must also provide proof satisfactory to the market administrator that care and management of the dairy animals and other resources necessary to produce the entire volume of fluid milk products (excluding receipts from pool plants) and the operation of the processing and distribution business is his personal enterprise and is operated at his sole risk.

Producers proposed that the producer-handler definition be rewritten in a more detailed form as a means of further assuring that exemption from the pricing and pooling provisions of the order would be accorded only those persons who are bona fide producer-handlers. Except as it relates to transactions between producer-handlers and vendors, the proposed definition does not purport to change basically the requirements to qualify as a producer-handler.

Prior to and since the inception of the order in January 1970. Class I sales of producer-handlers have been a significant part of the total Class I sales in the market. About 7 percent of the total Class I sales in the market is made by approximately 75 producer-handlers. In February 1971, the latest month for which data were available at the hearing, producer-handler Class I sales were 3.7 million pounds. The total producer milk pooled in Class I that month was 48.7 million pounds. There has been no significant change in the number of producer-handlers under the order since its inception.

The principal change in the application of the order to milk of producer-handlers proposed by producers would require that payment be made to the producer-settlement fund at the difference between the Class I and Class III prices on a producer-handler's sales of fluid milk products to a vendor who also obtains packaged fluid milk products from a pool plant in the same month. The vendor would be responsible for making any payment thus incurred to the producer-settlement fund. A vendor would be defined as any person who does not operate a plant but who engages in the business of receiving fluid milk products from a plant for resale to retail or wholesale consumers via a mobile delivery vehicle.

The proposal to require a vendor to make payment to the producer-settlement fund on his purchases from a producer-handler was opposed by a major handler in the market. He contended that requiring such a payment in this market would unwarrantedly discriminate against vendors and their suppliers. A principal vendor in the market supplied by the handler has over an extended period of time relied on both the handler and a producer-handler for his needs on a regular basis.

The basis for the producer's proposal to require a payment to the producer-settlement fund on producer-handler's sales to a vendor is that producer-handlers could use vendors as outlets for the milk which is surplus to a producer-handler's Class I needs. Producers contended that this results in a producer-handler's surplus displacing Class I sales of pool milk. The record evidence did not establish, however, that this was happening to any disruptive extent in the market at the present time.

Although the apparent purpose of the producers' proposal is to provide more definitive requirements in the order for obtaining exemption as a producer-handler under the order than is now provided, their testimony was directed at what might develop under certain conditions instead of under existing conditions in the market. It was not shown that the present provisions for obtaining exemption from the order as a producer-handler are inadequate under current conditions in the market. Producer-handlers under the order have been relying basically on their own production for their Class I needs and have been marketing their own surplus. There is no indication that the activities of the producer-handlers are causing instability in the market or that they, as a group, are engaging in disruptive marketing practices.

The proposal to require a vendor supplied by both a producer-handler and a pool plant to pay the producer-settlement fund the difference between the Class I and Class III prices on his purchases from a producer-handler should not be adopted. Although producers stated that a vendor receiving milk from both a producer-handler and a pool plant in the same month affords producer-handlers an unwarranted advantage at the expense of the pool, the testimony failed to indicate to what extent, if any, such advantage was currently being realized by producer-handlers in the market.

The proposal to incorporate a vendor definition in the order and to designate a vendor as a handler therefore is denied. The proposal to this effect was made in connection with the proposal to require payments by a vendor on his purchases from a producer-handler. Since the proposal to provide for such a payment is not adopted by this decision, no purpose would be served by defining a vendor in the order and designating him as a handler.

8. *Miscellaneous changes*—(a) *Handler operating two or more pool plants.* Under certain conditions, the operation of each plant of a handler operating two or more pool plants should be considered separately in determining the classification of his producer milk receipts during the month.

At the present time, such a handler's classification of producer milk, and his net pool obligation, are calculated on the basis of the combined operation of his pool plants.

A handler operating two pool distributing plants proposed that each plant be considered as a separate unit for purposes of determining his net pool obligation. The handler, a corporation which operates two plants as separate entities, claims that combining the operations in the filing of monthly reports to the market administrator, as presently required, unnecessarily complicates the ascertainment of the obligation for producer milk allocable to each plant.

If a handler operating two or more pool plants receives during the month fluid milk products from either an unregulated supply plant or another order plant that is allocated to Class I, the handler's net pool obligation should continue to be computed on the basis of combining the operations of his plants. Otherwise, such a multiple plant operator could exploit the pool by allocating receipts from unregulated supply plants and other order plants to his plant with the highest Class I utilization, and thereby reduce the Class I that would be allocated to his producer milk.

Unless fluid milk products are received by a multiple plant handler from unregulated supply plants and/or other order plants, there is no need to require him to consider his total operation as a unit in determining his obligation for producer milk. If a multiple plant handler receives no fluid milk products during the month from unregulated supply plants or other order plants, the integrity of the classification plan will not be impaired by his computing his obligation for producer milk separately for each pool plant.

(b) *Receipts of fluid milk products priced by an order at a pool plant from an unregulated supply plant.* As proposed by producers, no pool charge should be made on fluid milk products received at a pool plant from an unregulated supply plant when it is determined that such fluid milk products have been priced as Class I under this or any other Federal order. When an unregulated supply plant makes Class I purchases from a regulated plant under any order, the obligation to the order pool at the Class I price has been met, and there is no justification for any additional charge. On any unpriced milk received from an unregulated supply plant, the Oregon-Washington order will continue to provide for payment to the producer-settlement fund at the difference between the Class I and uniform prices.

(c) *Offsetting payments due from against payments due to the producer-settlement fund.* The payments due from handlers for milk priced under the order are paid to the market administrator for deposit into the producer-settlement fund. The monies thus received are paid out of such fund for distribution to producers according to their deliveries. In some instances, handlers to whom the market administrator is required to make payment from the producer-settlement fund for distribution to producers may owe money to the producer-settlement fund, usually as a result of an audit adjustment. Under such circumstance, the market administrator should offset the payment due a handler, or any other person, from the producer-settlement fund against payments due from such person. It would be impractical to do otherwise. Accordingly, the order should specify that the market administrator shall offset the payment due to any person from the producer-settlement fund against payments due from such person.

Rulings on proposed findings and conclusions. Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

Evidence on a proposal to make certain changes in the order provision relating to the computation of producer bases was excluded from the record by the presiding officer. Offer of proof made by the party submitting the proposal has been reviewed. The action taken by the presiding officer on it is hereby reaffirmed on the basis that it was not within the scope of the hearing.

General findings. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Recommended marketing agreement and order amending the order. The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be the same as those contained in the order, as hereby proposed to be amended. The following order amending the order, as amended, regulating the handling of milk in the Oregon-Washington marketing area is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out:

1. A new § 1124.2 is added as follows:

§ 1124.2 Dairy farmer for other markets.

"Dairy farmer for other markets" means any person who produces milk in compliance with the inspection requirements of a duly constituted health authority and from whose farm milk is received by a pool handler, if such handler caused milk from the same farm to be delivered during the month to a nonpool plant (except an other order plant) as other than producer milk.

2. Section 1124.7 is revised as follows:

§ 1124.7 Handler.

"Handler" means:

(a) Any person in his capacity as the operator of one or more pool plants;

(b) Any person in his capacity as the operator of a partially regulated distributing plant;

(c) A cooperative association with respect to milk of its member producers which is diverted from a pool plant for the account of such cooperative association;

(d) A cooperative association with respect to milk of its member producers which is received from the farm for delivery to the pool plant of another handler in a tank truck owned and operated by or under contract to such cooperative association;

(e) A producer-handler; or

(f) Any person who operates another order plant described in § 1124.61.

3. Section 1124.9 is revised as follows:

§ 1124.9 Pool plant.

"Pool plant" means any plant meeting the conditions of paragraph (a) or (b) of this section except the plant of a handler exempt pursuant to § 1124.60 or § 1124.61: *Provided*, That if a portion of a plant is physically separated from the Grade A portion of such plant, is operated separately and is not approved by any health authority for the receiving, processing, or packaging of any fluid milk product for Grade A disposition, it shall not be considered as part of a pool plant pursuant to this section:

(a) A distributing plant which during the month:

(1) Has route disposition (except filled milk) in the marketing area of 15 percent or more of its total receipts of Grade A milk (except packaged fluid milk products from other plants qualified under this paragraph, filled milk, and milk received at such plant as diverted milk from another plant, which milk is clas-

sified in Class III under this order and is subject to the pricing and pooling provisions of this or another order issued pursuant to the Act); and

(2) Has total route disposition, except as filled milk, both inside and outside the marketing area, of 30 percent or more of such receipts: *Provided*, That all distributing plants operated by a handler may be considered as one plant for the purpose of meeting the percentage requirements of this subparagraph if the handler submits a written request to the market administrator prior to the delivery period for which such consideration is requested.

(b) Any supply plant from which not less than 50 percent in any month of September through February and not less than 20 percent in any month of March through August of its dairy farm supply of Grade A milk (excluding milk received at such plant as diverted milk from another plant, which milk is classified in Class III under this order and is subject to the pricing and pooling provisions of this or another order issued pursuant to the Act) is shipped in the form of a fluid milk product (except as filled milk) to a pool distributing plant or is a route disposition in the marketing area of fluid milk products (except filled milk) processed and packaged at such plant: *Provided*, That:

(1) With respect to a supply plant operated by a cooperative association, the producer milk of its members which it caused to be delivered directly from their farms to pool distributing plants shall, for the purpose of this paragraph, be considered as a receipt at the cooperative's supply plant and a shipment from the supply plant to pool distributing plants to the extent that the total quantity of the producer milk received at pool distributing plants directly from such producers' farms does not exceed the total quantity of milk shipped during the same month from the cooperative's supply plant to pool distributing plants;

(2) A plant which qualified as a pool plant pursuant to this paragraph in each month of September through February shall be a pool plant in each of the following months of March through August unless a written application is filed with the market administrator prior to the first day of any such month requesting that the plant be designated a nonpool plant for such month and each subsequent month through August during which it would not otherwise qualify as a pool plant; and

(3) For the purpose of this paragraph, the operations of two or more supply plants may be combined and considered as the operation of one plant if so requested in writing to the market administrator by the handler(s) operating such plants prior to the first day of the month for which such consideration is requested.

4. Section 1124.11 is revised as follows:

§ 1124.11 Producer.

"Producer" means any person, except a dairy farmer for other markets or a producer-handler as defined in any order (including this part) issued pursuant to the Act, who produces milk approved by a duly constituted health authority for fluid consumption, which milk is received at a pool plant or diverted therefrom within the limits set forth in paragraphs (a) and (b) of this section and subject to paragraphs (c), (d), (e) and (f) of this section. The term shall not include such person with respect to milk received at a pool plant from another order plant by diversion if both buyer and seller have requested Class III milk classification in the reports of receipts and utilization filed with the respective market administrators:

(a) A cooperative association may divert for its account to a nonpool plant the milk of any producer whose milk has been received previously at a pool plant and from whom at least three deliveries are received at a pool plant during the month, except that the aggregate quantity diverted may not exceed the aggregate quantity received during the month from all such producers at pool plants. Two or more cooperative associations may have their allowable diversions computed on the basis of the combined deliveries of milk by their member producers if each association has filed such a request in writing with the market administrator on or before the first day of the month such agreement is effective. This request shall specify the basis for assigning any over-diverted milk to the producer members of each cooperative association according to a method approved by the market administrator;

(b) A handler in his capacity as the operator of a pool plant may divert for his account to a nonpool plant the milk of any producer whose milk has been received previously at a pool plant and from whom at least three deliveries are received during the month at his pool plant(s) and who is not a member of a cooperative association which is diverting milk pursuant to paragraph (a) of this section during the month, except that the aggregate quantity diverted may not exceed the aggregate quantity received during the month from all producers at his pool plant(s);

(c) In the event milk receipts from dairy farmers are diverted in excess of the applicable percentages pursuant to paragraphs (a) and (b) of this section, the diverting handler shall designate the dairy farmers whose milk was overdiverted and such overdiversions shall not be considered producer milk. If the handler fails to make such designation, only the milk of the dairy farmers which is physically received at a pool plant(s) by the diverting handler shall be producer milk for such month;

(d) For the purposes of the requirements of § 1124.9, milk diverted for the account of the operator of a pool distributing plant, except an operator which is also a cooperative association diverting milk in the same month pursuant to paragraph (a) of this section, shall be included in the receipts of the pool plant from which diverted;

(e) For the purposes of location adjustments pursuant to §§ 1124.52 and 1124.83, any milk diverted shall be considered to have been received at the location of the plant to which diverted; and

(f) Milk moved from producers' farms to a nonpool plant may be diverted producer milk only if it is not fully subject to the pricing and pooling provisions of the other order and if both the diverting handler and the operator of the other order plant request Class IIII (or Class II) classification.

5. Section 1124.13(a)(3) is revised as follows:

§ 1124.13 Producer milk.

* * * * *

(a) * * *

(3) Diverted by the operator of such pool plant or by a cooperative association pursuant to § 1124.7(c) to a pool plant if both the diverting handler and the operator of the plant to which the milk is diverted have requested Class III classification on such diverted milk in their reports filed pursuant to § 1124.30;

* * * * *

6. Section 1124.14 is revised as follows:

§ 1124.14 Other source milk.

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Fluid milk products and cream from any source except:

(1) Producer milk; and

(2) Fluid milk products and cream from pool plants;

(b) Products other than fluid milk products and cream from any source (including those produced at the plant) which are reprocessed, converted into, or combined with another product in the plant during the month; and

(c) Any disappearance of any product other than a fluid milk product or cream that is in a form in which it may be converted into a Class I or Class II product and which is not otherwise accounted for under the order.

7. In § 1124.22 paragraphs (l), (m), and (n) are revised as follows:

§ 1124.22 Duties.

* * * * *

(l) Whenever required for the purpose of allocating receipts from other order plants pursuant to § 1124.46(a)(10) and the corresponding step of § 1124.46(b), estimate and publicly announce the utilization (to the nearest whole percentage) in each class during the month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose;

(m) Report to the market administrator of the other order, as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products or cream from an other order plant, the classification to which such receipts are allocated pursuant to § 1124.46 pursuant to such report, and thereafter any change in such allocation required to correct errors disclosed in verification of such report; and

(n) Furnish to each handler operating a pool plant who has shipped fluid milk products or cream to an other order plant the classification to which such shipments were allocated by the market administrator of the other order on the basis of the report of the receiving handler, and, as necessary, any changes in such classification arising from the verification of such report.

8. Section 1124.30(a)(4) is revised as follows:

§ 1124.30 Reports of receipts and utilization.

* * * * *

(a) * * *

(4) The pounds of skim milk and butterfat contained in all fluid milk products and cream on hand, separately in bulk and in packages, at the beginning and at the end of the month;

* * * * *

9. Section 1124.41 is revised as follows:

§ 1124.41 Classes of utilization.

* * * * *

(b) * * *

(4) In packaged cream in inventory at the end of the month; and

(c) *Class III milk.* Class III milk shall be all skim milk and butterfat:

(1) Used to produce butter, butteroil, anhydrous butterfat, evaporated milk, condensed milk, or condensed skim milk (either plain or flavored) used to produce another Class III product in a pool plant or in a nonpool plant located within the marketing area, condensed buttermilk, cheese, except cottage cheese, sterilized products in hermetically sealed all-metal containers, nonfat dry milk, dried whole milk, livestock feed and blends of dried milk products;

(2) Contained in products which contain 6 percent or more of nonmilk fat or oil;

(3) In fluid milk products and cream dumped after prior notification to and opportunity for verification by the market administrator;

(4) Represented by the nonfat solids added to a fluid milk product which is in excess of an equivalent volume of such product prior to the addition;

(5) In inventory of bulk fluid milk products and bulk cream on hand at the end of the month;

* * * * *

10. Section 1124.44 is revised as follows:

§ 1124.44 Transfers.

Skim milk or butterfat shall be classified:

(a) At the utilization indicated by the operators of both plants, otherwise as Class I milk if transferred in the form of a fluid milk product or cream from a pool plant to the pool plant of another handler (or any pool plant if allocations pursuant to § 1124.46 are on an individual plant basis) subject to the following conditions:

(1) The skim milk or butterfat so assigned to each class shall be limited to the amount thereof remaining in such class in the transferee plant after computations pursuant to § 1124.46(a)(10) and the corresponding step of § 1124.46(b);

(2) If the transferor plant received during the month other source milk to be allocated pursuant to § 1124.46(a)(5) and the corresponding step of § 1124.46(b), the skim milk and butterfat so transferred shall be classified so as to allocate the least possible Class I milk utilization to such other source milk; and

(3) If the transferor handler received during the month other source milk to be allocated pursuant to § 1124.46(a)(9) or (10) and the corresponding steps of § 1124.46(b), the skim milk and butterfat so transferred shall be classified so as to assign to producer milk the greatest possible Class I utilization at both plants;

(b) As Class I milk if transferred as a fluid milk product in packaged form to a nonpool plant which is not an other order plant;

(c) As Class I milk if transferred or diverted in bulk in the form of a fluid milk product or cream to a nonpool plant that is not an other order plant, a producer handler plant or an exempt plant unless the requirements of subparagraphs (1) and (2) of this paragraph are met, in which case the skim milk and butterfat so transferred or diverted shall be classified in accordance with the assignment resulting from subparagarph (3) of this paragraph:

(1) The transferring or diverting handler claims classification in Class II or Class III in his report submitted pursuant to § 1124.30;

(2) The operator of such nonpool plant maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available if requested by the market administrator for the purpose of verification, and

(3) The skim milk and butterfat so transferred or diverted shall be classified on the basis of the following assignment of utilization from such nonpool plant in excess of receipts of packaged fluid milk products from pool plants and other order plants;

(i) Any Class I milk utilization disposed in the marketing area on routes shall be first assigned to the skim milk and butterfat in the fluid milk products so transferred or diverted from pool plants, next pro rata to receipts from dairy farmers who the market administrator determines constitute regular sources of Grade A milk for such nonpool plant;

(ii) Any Class I milk utilization disposed of in the marketing area of another order on routes issued pursuant to the Act shall be first assigned to receipts from plants fully regulated by such order, next pro rata to receipts from pool plants and other order plants not regulated by such order, and thereafter to receipts from dairy farmers who the market administrator determines constitute regular sources of supply for such nonpool plant;

(iii) Class I milk utilization in excess of that assigned pursuant to subdivisions (i) and (ii) of this subparagraph shall be assigned first to remaining receipts from dairy farmers who the market administrator determines constitute the regular source of supply for such nonpool plant and Class I milk utilization in excess of such receipts shall be assigned pro rata to unassigned receipts at such nonpool plant from all pool and other order plants;

(iv) To the extent that Class I milk utilization is not so assigned to it, the skim milk and butterfat so transferred or diverted shall be classified as Class III milk to the extent of such uses at the plant and then as Class II milk;

(v) To the extent that Class I or Class III utilization is not assigned to it, the skim milk and butterfat in cream so transferred shall be classified as Class II milk; and

(vi) If any skim milk or butterfat is transferred to a second plant under this paragraph, the same conditions of audit, classification, and allocation shall apply;

(d) As follows, if transferred or diverted in the form of a fluid milk product or cream to an other order plant in excess of receipts from such plant in the same category as described in subparagraph (1), (2), or (3) of this paragraph;

(1) If transferred in packaged form, classification shall be in the classes to which allocated under the other order;

(2) If transferred or diverted in bulk form, classification shall be in Class I milk, if allocated as a fluid milk product under the other order to Class I milk; in Class II milk, if allocated to Class II milk under an order which provides three classes; or in Class III milk, if allocated to Class III milk under the other order or if allocated to Class II milk under an order which provides only two classes (including allocation under the conditions set forth in subparagraph (3) of this paragraph);

(3) If the operators of both the transferor and transferee plants so request in the reports of receipts and utilization filed with their respective market administrators, transfers or diversions in bulk form shall be classified as Class III milk to the extent of the Class III milk utilization (or comparable utilization under such other order) available for such assignment pursuant to the allocation provisions of the transferee order;

(4) If information concerning the classification to which allocated under the other order is not available to the market administrator for purposes of establishing classification pursuant to this paragraph, classification shall be as Class I milk subject to adjustment when such information is available;

(5) If the form in which any fluid milk product is transferred to any other order plant is not defined as a fluid milk product under such other order, classification shall be in accordance with the provisions of § 1124.41; and

(e) As Class I, if transferred as a fluid milk product to a producer-handler or to an exempt plant under § 1124.60 (a) or (b).

11. Section 1124.45 is revised as follows:

§ 1124.45 Computation of skim milk and butterfat.

For each month the market administrator shall correct for mathematical and other obvious errors reports of receipts and utilization submitted pursuant to § 1124.30 and shall compute the skim milk and butterfat in each class at all pool plants of such handler and the pounds of skim milk and butterfat in each class which was received from producers by a cooperative association handler pursuant to § 1124.7(d) and was not received at a pool plant.

(a) For the purpose of this section, producer milk for which a cooperative association is the responsible handler pursuant to § 1124.7(d) shall be treated separately from the operations of any pool plant(s) operated by such cooperative association for the purpose of allocation pursuant to § 1124.46 and computation of obligation pursuant to § 1124.70; and

(b) If no fluid milk products to be allocated pursuant to § 1124.46(a) (9) or (10) were received at any pool plant of a handler, the total pounds of skim milk and butterfat, respectively, in each class shall be computed for each pool plant of such handler and allocation pursuant to § 1124.46 and computation of obligation pursuant to § 1124.70 shall be made separately for each pool plant of the handler.

12. Section 1124.46 is revised as follows:

§ 1124.46 Allocation of skim milk and butterfat classified.

After making the computations pursuant to § 1124.45, the market administrator shall determine each month the classification of producer milk for each handler as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class III the pounds of skim milk classified as Class III pursuant to § 1124.41(c)(6);

(2) Subtract from the total pounds of skim milk in Class I the pounds of skim milk in receipts of packaged fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk disposed of to such plant by handlers fully regulated under any Federal milk order is classified and priced as Class I milk and is not used as an offset for any other payment obligation under any order;

(3) Subtract from the remaining pounds of skim milk in each class the pounds of skim milk in fluid products received in packaged form from other order plants as follows:

(i) From Class III milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(4) With respect to a plant that was fully regulated in the preceding month under this or any other Federal milk order providing for a similar allocation of beginning inventories of packaged fluid milk products:

(i) Subtract from the remaining pounds of skim milk in Class I the pounds of skim milk in packaged fluid milk products in inventory at the beginning of the month; and

(ii) Subtract from the pounds of skim milk in Class II the pounds of skim milk in packaged cream in inventory at the beginning of the month;

(5) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class III, the pounds of skim milk in each of the following:

(i) Other source milk in a form other than that of a fluid milk product or cream;

(ii) Receipts of fluid milk products (except filled milk) and cream for which Grade A certification is not established, or which are from unidentified sources;

(iii) Fluid milk products received or acquired for distribution from a producer-handler as defined under this or any other Federal order;

(iv) Receipts of milk from dairy farmers for other markets;

(v) Receipts of fluid milk products from an exempt plant; and

(vi) Receipts of reconstituted skim milk in filled milk from unregulated supply plants;

(6) Subtract, in sequence beginning with Class III milk in the order specified below, from the pounds of skim milk remaining in Class III milk and Class II milk:

(i) The pounds of skim milk in receipts of fluid milk products and cream from unregulated supply plants for which the handler requests Class III utilization, but not in excess of the skim milk remaining in Class III and Class II; and

(ii) The pounds of skim milk remaining in receipts of fluid milk products from unregulated supply plants which were not subtracted pursuant to subparagraph (5)(vi) of this paragraph, which are in excess of the pounds of skim milk determined as follows:

(*a*) Multiply the pounds of skim milk remaining in Class I milk by 1.25; and

(*b*) Subtract from the result the sum of the pounds of skim milk in producer milk in receipts from pool plants of other handlers (or any pool plant if allocation is on an individual plant basis) and in receipts in bulk from other order plants;

(iii) The pounds of skim milk in receipts of fluid milk products in bulk from another order plant in excess of similar transfers or diversions to such plant, but not in excess of the pounds of skim milk remaining in Class III milk (and Class II milk), if Class III utilization was requested by the transferee handler and the operator of the transferor plant requests the lowest class utilization under the order;

(7) Subtract from the pounds of skim milk remaining in each class in series beginning with Class III milk the pounds of skim milk in inventory of bulk fluid milk products and bulk cream (and for the first month in which a plant becomes a pool plant, the pounds of fluid milk products and cream in packaged form) on hand at the beginning of the month;

(8) Add to the remaining pounds of skim milk in Class III milk the pounds subtracted pursuant to subparagraph (1) of this paragraph;

(9) Subtract from the pounds of skim milk remaining in each class, pro rata to the total pounds of skim milk remaining in each class, the pounds of skim milk in receipts of fluid milk products from unregulated supply plants that were not subtracted pursuant to subparagraphs (5)(vi) or (6) (i) or (ii) of this paragraph;

(10) Subtract, beginning with Class III milk, from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products in bulk from an other order plant, in excess in each case, of similar transfers to the same plant, that were not subtracted pursuant to subparagraph (6)(iii) of this paragraph pursuant to the following procedure:

(i) Such subtraction shall be pro rata to whichever of the following represents the higher proportion of Class III milk and Class II milk combined;

(*a*) The estimated utilization of skim milk in each class, by all handlers, as announced for the month pursuant to § 1124.22(1); or

(*b*) The pounds of skim milk remaining in each class at a pool plant(s) of the handler;

(11) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk received from pool plants of other handlers (or any pool plant if allocation is on an individual plant basis) by transfer or diversion according to the classification assigned pursuant to § 1124.44(a); and

(12) If the remaining pounds of skim milk in all classes exceed the pounds of skim milk contained in milk received from producers, and from cooperative associations pursuant to § 1124.7(d), subtract such excess from the remaining pounds of skim milk in series beginning with Class III milk. Any amount so subtracted shall be known as overage:

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) Combine the amounts of skim milk and butterfat determined pursuant to paragraphs (a) and (b) of this section into one total for each class and determine the weighted average butterfat content of producer milk in each class.

13. Section 1124.51(a) is revised as follows:

§ 1124.51 Class prices.

* * * * * *

(a) *Class I milk.* The Class I price shall be the basic formula price for the preceding month plus $1.78 and plus 20 cents;

* * * * * *

14. Section 1124.52 is revised as follows:

§ 1124.52 Location adjustment to handlers.

(a) The Class I price for producer milk and other source milk (for which a location adjustment is applicable) at a plant 100 miles or more from the nearer of the Multnomah County Court House in Portland, Oreg., or the city hall in Eugene, Oreg., by the shortest hard-surfaced highway distance as determined by the market administrator, shall be reduced 15 cents and an additional 1.5 cents for each 10 miles or fraction thereof that such distance exceeds 110 miles; and

(b) For the purpose of calculating location adjustments, receipts of fluid milk products from pool plants shall be assigned any remainder of Class I milk at the transferee plant that is in excess of the sum of receipts of milk from producers and handlers pursuant to § 1124.7(d) at such plant and that assigned as Class I to receipts from other order plants and unregulated supply plants. Such assignment shall be made first to receipts from plants at which no location adjustment is applicable pursuant to this section and then in sequence beginning with the plant with the lowest applicable location adjustment.

15. Section 1124.62(b)(2) is revised as follows:

§ 1124.62 Obligations of handler operating a partially regulated distributing plant.

* * * * * *

(b) * * *

(2) Deduct the respective amounts of skim milk and butterfat received at the partially regulated distributing plant:

(i) As Class I milk from pool plants and other order plants, except that deducted under a similar provision of another order issued pursuant to the Act; and

(ii) From a nonpool plant that is not an other order plant to the extent that an equivalent amount of skim milk or butterfat disposed of to such nonpool plant by handlers under this or any other order issued pursuant to the Act is classified and priced as Class I milk and is not used as an offset on any other payment obligation under this or any other order;

* * * * * *

16. Section 1124.65 is revised as follows:

§ 1124.65 Computation of producer bases.

Subject to the rules set forth in § 1124.66, the market administrator shall determine bases for producers in the manner provided in paragraphs (a) and (b) of this section:

(a) The daily base of each producer whose milk was received at a pool plant(s) or diverted as producer milk from a pool plant on not less than 120 days in August through December in 1971 and, in all subsequent years, on not less than 90 days in the 4 months in each January-December period in which the average daily receipts of total producer milk are lowest shall be an amount computed by dividing such producer's total pounds of milk delivered in such base-earning period by the number of days of production represented by his deliveries. The base so computed shall be recomputed each year, shall become effective on the first day of February next following, and shall remain in effect through January of the next succeeding year: *Provided*, That for any dairy farmer:

(1) For whom information concerning deliveries during the base-earning period is available to the market administrator and who becomes a producer as a result of the plant to which his milk was delivered during the base-earning period subsequently being qualified as a pool plant, a daily base shall be computed pursuant to this paragraph; and

(2) Who was a producer-handler during the base-earning period, his base shall be the daily average of his own production of milk for 120 days or more during the base-earning period in 1971 and 90 days or more in each subsequent base-earning period; and

(b) Any producer who is not eligible to receive a base computed pursuant to paragraph (a) of this section, shall have a monthly base computed by multiplying his deliveries to a pool plant(s) during the month by the appropriate monthly percentage in the following table:

January	70	July	55
February	70	August	60
March	65	September	60
April	55	October	65
May	45	November	70
June	50	December	70

17. Section 1124.66(a)(2) is revised as follows:

§ 1124.66 Base rules.

(a) * * *

(2) If such conveyance takes place after August 1 in 1971 (and after Jan. 1 in subsequent years), all milk delivered to pool plant(s) between August 1 in 1971 (and Jan. 1 in subsequent years) and the last day of the base-earning period specified in § 1124.65(a), inclusive, from the same herd (whether by the transferor or transferee producer) shall be utilized in computing the base of the transferee producer pursuant to § 1124.65(a);

* * * * * *

18. Section 1124.70 is amended as follows:

§ 1124.70 Computation of the net pool obligation of each pool handler.

* * * * * *

(c) Add the amount obtained from multiplying the Class III price for the preceding month and the Class I price for the current month by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1124.46(a)(7) and the corresponding step of § 1124.46(b) for the current month.

(d) Add the amount obtained by multiplying the difference between the Class I price for the preceding month and the Class I price for the current month by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1124.46(a)(4) and the corresponding step of § 1124.46(b). If the Class I price for the current month is less than the Class I price for the preceding month, the result shall be a minus amount;

(e) Add an amount equal to the difference between the Class I and Class III price values at the pool plant of the skim milk and butterfat subtracted from Class I pursuant to § 1124.46(a)(5) and the corresponding step of § 1124.46(b), except that for receipts of fluid milk products assigned to Class I pursuant to § 1124.46(a)(5)(vi) and the corresponding step of § 1124.46(b) the Class I price shall be adjusted to the location of the transferor plant (but the adjusted price not to be less than the Class III price); and

(f) Add the value at the Class I price, adjusted for the location of the nearest nonpool plant(s) from which an equivalent volume was received (but the adjusted price not to be less than the Class III price) of the skim milk and butterfat subtracted from Class I pursuant to § 1124.46(a)(9) and the corresponding step of § 1124.46(b), excluding such skim milk or butterfat in bulk receipts of fluid milk products from an unregulated supply plant to the extent that an equivalent amount of skim milk and butterfat disposed of to such plant by handlers under this or any other order issued pursuant to the Act is classified and priced as Class I milk and is not used as an offset on any other payment obligation under this or any other order.

19. Section 1124.80 is revised as follows:

§ 1124.80 Producer-settlement fund.

The market administrator shall maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all payments into such fund pursuant to §§ 1124.62 and 1124.81 and out of which he shall make all payments from such fund pursuant to § 1124.82: *Provided*, That the market administrator shall offset the payment due to a person from such fund against payments due from such person.

20. Section 1124.87(b) is revised as follows:

§ 1124.87 Expense of administration.

* * * * * *

(b) Other source milk allocated to Class I milk pursuant to § 1124.46(a)(5) and (9) and the corresponding steps of § 1124.46(b); and

* * * * * *

Signed at Washington, D.C., on August 24, 1971.

SPECIAL VFR WEATHER MINIMUMS

Notice of Proposed Rule Making

The Federal Aviation Administration is considering amending Part 91 of the Federal Aviation Regulations to limit the use of Special VFR by pilots of fixed wing aircraft to daylight hours except where the pilot is instrument rated and currently qualified, and his aircraft is equipped for IFR flight.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the Federal Aviation Administration, Office of the General Counsel: Attention Rules Docket GC-24, 800 Independence Avenue SW., Washington, DC 20591. All communications received on or before November 26, 1971, will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

As the Special VFR rule is presently worded, a pilot who has received an appropriate ATC clearance, may operate within a control zone so long as he has at least 1 mile visibility and can operate clear of clouds.

Because in recent years there has been a substantial number of accidents involving general aviation aircraft operating on Special VFR clearances, the FAA began a study of the Special VFR situation to determine what, if anything, should be done. A review of pertinent accident reports revealed that from the beginning of 1968 through the end of 1970, of the accidents involving general aviation aircraft operating on Special VFR clearances, 23 of those accidents were fatal. A further study of the figures revealed that a majority of the fatal accidents occurred at night and involved noninstrument rated pilots. Of greater significance are the figures for 1970 through March of 1971. In that period, noninstrument rated private pilots had been involved in eight Special VFR-related accidents. Of those eight accidents, seven have occurred at night and all seven proved fatal to the pilot.

On January 26, 1971, and June 2, 1971, the FAA held meetings with general aviation representatives to discuss, among other things, the Special VFR situation. The question was raised as to whether or not Special VFR should be eliminated in the interests of air safety. While no one endorsed complete abolition of Special VFR, there was considerable support for a proposal to restrict Special VFR operations to daylight hours on the basis that the potential hazards associated with Special VFR increase markedly at night. There was also a suggestion that Special VFR be retained for both daylight and nighttime operations, but that the pilot be required to be instrument qualified as a prerequisite for nighttime Special VFR flight. It would appear that this latter suggestion can be amply justified in the interests of increased air safety. First, instrument qualification generally indicates a somewhat higher level of proficiency and awareness of adverse weather conditions than would be true in the case of pilots with minimal instrument training. Secondly, if the pilot is instrument qualified, he could always change his clearance from Special VFR to IFR should the need arise.

Finally, the FAA is of the opinion that if it is desirable to require that a pilot be instrument qualified as a prerequisite to nighttime Special VFR flight, then it is also desirable to require that his aircraft be properly equipped for IFR flight. Therefore, the FAA is of the opinion that as a further prerequisite for nighttime Special VFR, the aircraft should be equipped as required in § 91.33(d).

In consideration of the foregoing, it is proposed to amend Part 91 of the Federal Aviation Regulations as follows:

1. By adding a new paragraph (e) to § 91.107 to read as follows:

§ 91.107 Special VFR weather minimums.

* * * * *

(e) No person may operate an aircraft (other than a helicopter) in a control zone under the special weather minimums of this section, between sunset and sunrise, unless:

(1) That person meets the applicable requirements for instrument flight under Part 61 of this chapter; and

(2) The aircraft is equipped as required in § 91.33(d).

This amendment is proposed under the authority of sections 307(c) and 313(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(c) and 1354(a)), and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on August 23, 1971.

WILLIAM M. FLENER,
Director, Air Traffic Service.

[14 CFR Part 91]

[Docket No. 11350; Notice 71-24]

VFR WEATHER MINIMUMS

Advance Notice of Proposed Rule Making

The Federal Aviation Administration is considering rule making to change basic VFR weather minimums. This action would involve amending Part 91 of the Federal Aviation Regulations, and is being taken as a result of FAA study and the interest of the aviation community concerning the necessity for review of existing VFR weather minimums.

This advance notice of proposed rule making is being issued in accordance with the FAA's policy for early institution of public proceedings in actions related to rule making. An "advance" notice is issued when it is found that the resources of the FAA and reasonable inquiry outside the FAA do not yield a sufficient basis to identify and select tentative or alternate courses of action upon which a rule making procedure might be undertaken, or when it would otherwise be helpful to invite early public participation in the identification and selection of a course or alternate courses of action. The subject matter of this advance notice has been found to involve the situation contemplated by this policy.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the notice or docket number, and be submitted in duplicate to the Federal Aviation Administration, Office of the General Counsel, Attention: Rules Docket, GC-24, 800 Independence Avenue SW., Washington, DC 20591. Communications should be received on or before November 26, 1971, to assure proper consideration. All comments submitted will be available in the Rules Docket, both before and after the closing date for comment, for examination by interested persons. If it is determined to proceed further, after consideration of the available data and the comments received in response to this notice, a notice of proposed rule making will be issued.

The present basic VFR minimums, below 10,000 feet MSL, have been in effect with few exceptions for more than 30 years. During this time the number of aircraft operations and the average speed of aircraft have increased greatly.

The relationship between increasing aircraft speed and a need for increased VFR minimums has long been recognized. In 1957, the VFR minimums were increased to require flight visibility of at least 5 miles and cloud clearance of 1,000 feet vertically and 1 mile horizontally for operations above 24,000 feet MSL. A few years later these minimums were imposed on all operations above 14,500 feet MSL. In 1968 these minimums were established for operations at or above 10,000 feet MSL. The rapid increase in numbers of high speed aircraft and their use of the strata below 10,000 feet MSL have caused the FAA to again examine the adequacy of existing VFR minimums below 10,000 feet MSL.

Numerous pilot opinions indicate that the present visibility minimums may be inadequate. In addition, a report by Rowland and Co. of Haddonfield, N.J., under contract to the FAA contained a mathematical analysis of time required for avoidance in a see-and-avoid environment which indicated that both the vertical and horizontal cloud distances may be inadequate. Both the report and pilot opinions indicate that aircraft should avoid clouds by a greater distance then the rules now require. Some pilots suggested increasing the VFR minimums to 5 miles flight visibility, and 1,000 feet vertical and 1 mile horizontal distance from clouds.

On the other hand, some pilots have indicated to FAA that they consider the existing VFR minimums to be satisfactory from the safety standpoint. The experience level of the pilot and the type of activity he normally conducts influence greatly his opinion concerning the adequacy of present minimums, and FAA is interested in obtaining additional data which give some insight into the operational needs and qualifications of pilots as well as their views concerning the adequacy of present VFR minimums.

Directly related to the quantitative values for VFR minimums is the unit used for measuring them. Some years ago, the FAA made a serious effort to make a complete changeover to the knot-nautical mile system. The attempt was not endorsed by all segments of aviation and on October 1, 1954, a policy was adopted which provided for the joint use of the nautical mile and the statute mile as units of measurement in aviation. The policy stated that visibility values and the narrative descriptions of airspace would remain in statute miles. This plan has received full cooperation from the aviation community; however, disadvantages in the use of dual standards have become apparent. For example, in a weather report, wind velocity is reported in knots while the visibility is reported in statute miles. In all instrument approach procedures, measurements are based on nautical miles while the visibility value associated with the use of the procedure is based on statute miles. The dual standard often creates ambiguities.

While valuable information has been gathered from various sources, the FAA believes that additional information may be available from other interested persons, and desires to review the entire situation before considering the changes discussed above. To this end, the FAA will welcome the participation of all interested persons and organizations, and, by means of this advance notice of proposed rule making, solicits the views of all interested persons.

In view of the importance of these matters to the aviation community as a whole, the FAA would anticipate comments in depth on the following items:

1. *Basic VFR Minimums.*—a. *Controlled airspace.* (1) Adequacy of the vertical distances from clouds (500 feet below and 1,000 feet above).

(2) Adequacy of the 2,000 feet horizontal distance from clouds.

(3) Adequacy of the 3-mile visibility minimum.

(4) Adequacy of the ceiling and visibility minimums in a control zone (1,000 feet ceiling and 3 miles visibility).

b. *Uncontrolled airspace.* (1) Adequacy of the 1-mile visibility minimum.

(2) Adequacy of the "clear of clouds" minimum when operating less than 1,200 feet above the surface.

(3) Adequacy of the cloud distances when operating more than 1,200 feet above the surface (500 feet below, 1,000 feet above and 2,000 feet horizontally).

2. *General.* Changing the flight visibility and reported visibility from statute miles to nautical miles.

This advance notice of proposed rule making is issued under the authority of section 307 and 313(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348, 1354(a)), and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on August 23, 1971.

RAYMOND G. BELANGER,
Acting Director,
Air Traffic Service.

[FR Doc.71-12570 Filed 8-26-71;8:46 am]

ATOMIC ENERGY COMMISSION

[10 CFR Part 50]

LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

Reactor Containment Leakage Testing for Water Cooled Power Reactors

The Atomic Energy Commission has under consideration amendments of its regulations in 10 CFR Part 50, "Licensing of Production and Utilization Facilities," which would add a new appendix entitled "Reactor Containment Leakage Testing for Water Cooled Power Reactors." The purpose of the proposed amendments is to specify minimum requirements for periodic verification by tests of the leaktight integrity of the primary reactor containment and associated systems of water cooled power reactors and to establish the acceptance criteria for such tests.

Containment systems are provided for water cooled power reactors to prevent uncontrolled releases of radioactive materials to the environment if the barriers provided by the fuel cladding and the reactor coolant pressure boundary should be breached. Periodic testing is needed to assure that the containment will continue to perform its function throughout the life of the plant.

The proposed amendments would specify the minimum containment leakage requirements for water cooled power reactors. The purpose of the tests would be to assure (a) that leakage of the primary reactor containment and associated systems is held within allowable leakage rate limits as specified in the technical specifications of the license and (b) that periodic surveillance is performed to assure proper maintenance and leak repair during the service life of the containment.

Containment leakage testing requirements are presently specified on an individual case basis in the technical specifications for each power reactor. The adoption of the proposed amendments would provide uniform requirements for containment leakage testing.

Pursuant to the Atomic Energy Act of 1954, as amended, and section 553 of title 5 of the United States Code, notice is hereby given that adoption of the following amendments to 10 CFR Part 50 is contemplated. All interested persons who desire to submit written comments or suggestions for consideration in connection with the proposed amendments should send them to the Secretary of the Commission, U.S. Atomic Energy Commission, Washington, D.C. 20545. Attention: Chief, Public Proceedings Branch, within 60 days after publication of this notice in the FEDERAL REGISTER. Comments received after that period will be considered if it is practicable to do so, but assurance of consideration cannot be given except as to comments filed within the period specified. Copies of comments received may be examined at the Commission's Public Document Room, 1717 H Street NW., Washington, DC.

1. A new paragraph (o) is added to § 50.54 to read as follows:

§ 50.54 Conditions of licenses.

* * * * *

(o) Primary reactor containments for water cooled power reactors shall be subject to the leakage rate testing set forth in Appendix J.

2. A new Appendix J is added to read as follows:

APPENDIX J

REACTOR CONTAINMENT LEAKAGE TESTING FOR WATER COOLED POWER REACTORS

I. Introduction.
II. Explanation of terms.
III. Leaking testing requirements.
A. Type A test.
B. Type B test.
C. Type C test.
D. Containment periodic retest schedule.
IV. Specific testing requirements.
A. Containment modifications.
B. Multiple vessel containments.
C. Multiple leakage-barrier containments.
D. Containment leakage monitoring system.
E. Component leak surveillance system.
V. Inspection and reporting of tests.
A. Containment inspection.
B. Report of test results.

I. INTRODUCTION

One of the conditions of all licenses for water cooled power reactors as specified in § 50.54(o) is that primary reactor containments shall meet the containment leakage testing requirements set forth in this appendix. These test requirements provide for periodic verification by tests of the leaktight integrity of the primary reactor containment and associated systems of water cooled power reactors and establish the acceptance criteria for such tests. The purpose of the tests is to assure (a) that leakage of the primary reactor containment and associated sytsems is held within allowable leakage rate limits as specified in the technical specifications of the license and (b) that periodic surveillance is performed to assure proper maintenance and leak repair during the service life of the containment. The test requirements may be used for guidance in establishing appropriate containment leakage test requirements in technical specifications for other types of nuclear power reactors.

II. Explanation of Terms

A. "Primary reactor containment" means the structure or vessel that encloses the components of the reactor coolant pressure boundary as defined in § 50.55a and serves as a leakage limiting barrier to the release of radioactive materials from the reactor coolant pressure boundary.

B. "Containment isolation valve" means any valve which is relied upon to perform a containment function, as part of primary reactor containment.

C. "Reactor containment leakage testing program" includes the performance of Type A tests, Type B tests, and Type C tests described in sections II.D, II.E, and II.F.

D. "Type A Tests" are intended to measure the primary reactor containment overall integrated leakage rate (1) when the containment has been constructed, and (2) at periodic intervals thereafter.

E. "Type B Tests" are intended to detect local leaks or to measure leakage of primary reactor containment components which seal or penetrate the pressure-containing boundary of the primary reactor containment and associated systems. Such components include:

1. Containment penetrations whose design incorporates resilient seals, gaskets, or sealant compounds; piping penetrations fitted with expansion bellows.

2. Air lock door seals, including operating mechanism and penetrations with resilient seals which are part of the containment pressure boundary in the air lock structures.

3. Equipment and access doors with resilient seals or gaskets (seal-welded doors are excluded).

4. Components other than those listed in items 1, 2, or 3 which develop leaks in service and require repairs to meet the acceptance criterion of Type A tests.

F. "Type C Tests" are intended to measure containment isolation valve leakage rate. The valves included are:

1. Containment isolation valves which provide a direct connection with the inside atmosphere of the primary reactor containment (including vacuum relief valves and instrument valves).

2. Containment isolation valves which, in the event of valve leakage or valve malfunction upon containment isolation signal, may extend (outside of containment) the boundary of the leakage-limiting barrier of the reactor primary containment beyond that included during the conduct of Type A tests (includes instrument valves in lines connected to the reactor coolant pressure boundary).

3. Containment isolation valves in engineered safety systems penetrating containment which, under post-accident conditions, are required to close following the termination of the safety function.

4. Containment isolation valves in main steam and feedwater piping of direct-cycle boiling water power reactors.

G. Nomenclature relating to pressure terms:

1. P_p (p.s.i.g.) means the calculated peak containment internal pressure defined in the basis of the technical specification of the license as related to the design pressurization accident following a postulated loss of reactor coolant from the reactor coolant pressure boundary.

2. P_t (p.s.i.g.) means the containment vessel reduced test pressure selected to measure the integrated leakage rate during periodic Type A tests.

H. Nomenclature relating to leakage-rate terms:

1. L_a (percent/24 hrs.) means the design basis accident leakage rate at pressure P_p defined in the basis of the technical specification of the license as related to the maximum containment leakage under design basis pressurization accident conditions.

2. L_t (percent/24 hrs.) means the maximum allowable containment test leakage rate at pressure P_t.

3. L_{po}, L_{to} (percent/24 hrs.) means the allowable containment operational leakage rate at pressures P_p and P_t, respectively, at the outset of containment service following any periodic Type A test.

4. L_{pm}, L_{tm} (percent/24 hrs.) means the preoperational measured containment leakage rates at pressure P_p and P_t, respectively.

III. Leakage Testing Requirements

A reactor containment leakage testing program is required for the primary reactor containment. The testing program shall include the following Type A, B, and C tests:

A. *Type A test*—1. *Test program.* The test program shall include the performance of either of the following tests:

(a) *Reduced pressure test program.* Two preoperational leakage rate tests are specified under section III.A.4.(a), and one periodic leakage rate test in accordance with section III.A.7.(a) performed at intervals as specified under section III.D.1., or

(b) *Peak pressure test program.* One preoperational leakage rate test as specified under section III.A.4.(b), and one periodic leakage rate test in accordance with section III.A.7.(b) performed at intervals as specified under section III.D.1.

2. *Pretest requirements.* (a) All Type A tests, other than the initial preoperational tests, shall be performed without any preliminary leak detection surveys and repairs except as necessary to meet the requirements of section V.A. If leak repairs of testable components are performed prior to the conduct of the Type A test, the reduction in leakage shall be measured and added to the Type A test result. If this measured reduction in leakage exceeds the acceptance criteria of section III.A.7., this information shall be included in the report submitted to the Commission as required by section V.B.

(b) Closure of containment isolation valves shall be accomplished by normal mode of actuation and without any preliminary exercises or adjustments. If valve closure malfunction is detected which requires corrective action before the test, this information shall be included in the report submitted to the Commission as required under section V.B.

(c) The containment test pressure shall be allowed to stabilize for a period of not less than 4 hours prior to the start of the leakage rate test.

(d) The reactor coolant pressure boundary shall be vented (at the highest point) to the containment atmosphere prior to the test and remain open during the test. The system need not be drained. Other fluid systems which connect directly with the containment atmosphere under post-accident conditions and become an extension of the boundary of the containment leakage limiting barrier outside of containment shall be opened to the containment atmosphere prior to the test, and remain open during the test. Portions of such systems that would be flooded under post-accident conditions need not be drained.

3. *Test methods.* (a) The test shall employ either the absolute pressure-temperature method or the reference vessel method (or other methods of demonstrated equivalency) and shall be conducted in accordance with the provisions of the ANS 7.60[1] Standard except as modified by these test criteria. The method chosen for the initial test shall be used for the periodic tests.

(b) An error analysis shall be performed for the leakage rate test instrumentation selected for the conduct of a Type A test. The most adverse combination of errors of all instrument readings shall be such that the error inherent in the measured leakage rate will be substantially less than the magnitude of the specified leakage rate to be measured.

(c) The test duration shall not be less than 24 hours unless test experience from at least two earlier Type A tests provide evidence of the adequacy of a shorter test duration. Measurements shall be recorded hourly, and the leakage rate determined each hour with respect to the initial set of containment test measurements. In addition, the leakage rate shall be computed based on a linear least-squares fit of all hourly test measurements to demonstrate a 95 percent confidence that the containment calculated leakage is less than the acceptance criterion.

(d) The test accuracy of any Type A test shall be verified by a supplemental means to demonstrate the validity of the measurements. An acceptable means is described in Appendix C of the ANS 7.60 Standard. Results of this supplemental test shall be acceptable provided the correlation between the supplemental test data and the Type A test data demonstrate an agreement within plus or minus 25 percent.

4. *Initial leakage rate tests.* After completion of construction of primary reactor containment and the installation of all mechanical fluid, electrical, and instrumentation systems penetrating the containment pressure boundary, preoperational leakage rate Type A tests shall be conducted in accordance with either test program (a) or (b).

(a) *For a reduced pressure test program.* (i) An initial test shall be performed at a pressure P_t, not less than 50 percent of pressure P_p, to measure a leakage rate L_{tm}.

(ii) A second test shall be performed at pressure P_p to measure a leakage rate L_{pm}.

(iii) The leakage characteristics yielded by measurements L_{pm} and L_{tm} shall establish the maximum allowable test leakage rate L_t of not less than L_a (L_{tm}/L_{pm}) where L_a is as defined in the technical specification of the license. In the event L_{tm}/L_{pm} is greater than 0.7, L_t shall be equal to L_a $(P_t/P_a)^{1/2}$. If L_{tm}/L_{pm} is less than 0.3, the test results shall be subject to review by the Commission to establish an acceptable value of L_t.

(b) *For a peak pressure test program.* A single test shall be performed at pressure P_p to measure the leakage rate L_{pm}.

The test program selected for the initial leakage rate tests shall be applied to the periodic leakage rate test.

5. *Acceptance criteria—Initial tests.* (a) *For a reduced pressure test program.* The leakage rate L_{tm} shall not exceed 75 percent of the leakage rate L_t as determined pursuant to section III.A.4(a).

(b) *For a peak pressure test program.* The leakage rate L_{pm} shall not exceed 75 percent of the leakage rate L_a as defined in the technical specification of the license.

[1] ANS 7.60 Standard for Leakage Rate Testing of Containment Structures for Nuclear Reactors (dated Apr. 29, 1970). Copies may be obtained from the American Nuclear Society, 244 East Odgen Avenue, Hinsdale, IL 60521. A copy is available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC.

6. *Periodic leakage rate tests.* Periodic Type A tests shall be conducted at test pressure P_t for the reduced pressure test program, and at test pressure P_p for the peak pressure test program. The acceptance criteria of section III.A.7. shall be met for such periodic leakage rate tests.

7. *Acceptance criteria—Periodic tests.* (a) For a reduced pressure test program: The test is acceptable if the leakage rate L_{tm} does not exceed the value of leakage rate L_t as determined pursuant to section III.A.4(a). If local leakage measurements are taken to effect repairs in order to meet the acceptance criterion, these measurements shall be taken at a test pressure P_t.

(b) For a peak pressure test program: The test is acceptable if the leakage rate L_{pm} does not exceed the leakage rate L_a as defined in the technical specification of the license. If local leakage measurements are taken to effect repairs in order to meet the acceptance criterion, these measurements shall be taken at a test pressure P_p.

(c) To provide a margin for possible deterioration of the containment leakage integrity during the service interval extending to the subsequently scheduled Type A test, the measured leakage rate L_{tm} (or L_{pm}) shall be reduced, if necessary, to a value L_{to} (or L_{po}) not in excess of 75 percent of the leakage rate L_t (or L_a). This leakage reduction shall be accomplished prior to resumption of plant operation.

(d) If any Type A test fails to meet the applicable acceptance criteria of sections III.A.7(a) and III.A.7(b), the test schedule applicable to subsequent Type A tests shall be subject to review and approval by the Commission.

(e) If two consecutive periodic Type A tests fail to meet the applicable acceptance criterion of sections III.A.7(a) and III.A.7 (b), notwithstanding the periodic retest schedule of section III.D., a Type A test shall be performed at each plant shutdown for refueling until two consecutive Type A tests meet the acceptance criteria of section III.A.5., at which time the retest schedule specified in section III.D. may be resumed.

(f) If repairs are necessary to meet the acceptance criteria of section III.A.7., the Type A test need not be repeated provided local measured leakage reductions achieved by repairs of individual leaks reduce the containment's overall measured leakage rate sufficiently to meet the acceptance criteria.

B. *Type B tests*—1. *Test methods.* Type B tests shall be performed to detect and measure local leakage of containment components. Acceptable means of performing Type B tests include:

(a) Examination by halide leak-detection method (or by other equivalent test methods), of a pneumatically pressurized test chamber constructed as part of individual containment components.

(b) Measurement of the rate of pressure loss of the pneumatically pressurized test chamber of the containment component.

(c) Leakage surveillance by means of a permanently installed system with provisions for individual or group pressurization of containment penetrations or seals, and measurement of pressure loss or air flow rate through the leak paths.

2. *Test pressure.* All Type B tests shall be performed by local pneumatic pressurization of the containment components, either individually or in groups, at a pressure not less than P_p.

3. *Acceptance criterion.* The combined leakage rate of all components subject to Type B and C tests shall not exceed 60 percent of L_a with the exception noted for the valves specified in section III.C.2. (a) and (b).

C. *Type C tests*—1. *Test method.* Type C tests shall be performed by local pressurization (or other equivalent means) by employing any of the test methods applicable to Type B tests. Where containment isolation valve seal-water systems are provided, a system operability test which demonstrates that a pressure not less than P_p can be maintained between closed isolation valves, may be substituted for a Type C test.

2. *Test pressure.* (a) Containment isolation valves less than 12-inches nominal pipe size shall be tested with air at a pressure not less than P_p either individually or by pressurization between the two valves.

(b) Containment isolation valves equal to or greater than 12-inches nominal pipe size shall be tested individually with air at a pressure not less than P_p.

3. *Acceptance criterion.* The combined leakage rate for all components subject to Type B and C tests shall not exceed 60 percent of L_a, except that, for containment isolation valves in the following systems, the leakage rate shall not exceed the limits specified in the technical specifications:

(a) Steam and feedwater systems in direct cycle boiling water type reactors.

(b) Systems whose lines penetrate and extend beyond the boundary of both primary and secondary containment leakage limiting barriers.

D. *Containment periodic retest schedule*—1. *Type A retest schedule.* After the initial preoperational leakage rate tests, a set of three Type A tests shall be performed, at approximately equal intervals during each 10-year service period, with the third test of each set coinciding with the end of each 10-year service period. Type A test periods may coincide with the plant inservice inspection[2] shutdown periods. If containment vessels are not fitted with component test provisions, Type A tests shall be performed at intervals not greater than 2 years throughout the containment service lifetime (or until such time when modifications are made to permit Type B tests to be performed).

2. *Type B retest schedule.* Type B tests (except for air locks) shall be performed during each reactor shutdown for major fuel reloading but in no case at intervals greater than 2 years. Air locks shall be tested at 4-month intervals except when air locks are not opened during this interval, in which case tests shall be performed after each opening but no interval may be longer than 1 year. For primary reactor containments employing a continuous leakage monitoring system, the Type B test (air locks not included) may, notwithstanding the test schedule specified under section III.D.2, be performed every other reactor shutdown for major refueling but in no case at intervals greater than 3 years.

3. *Type C retest schedule.* Type C tests shall be performed during each reactor shutdown for major refueling.

4. *Permissible periods for testing.* The performance of Type A tests shall be limited to periods when the plant facility is nonoperational and secured in the shutdown condition under the administrative control and safety procedures defined in the license.

IV. Specific Testing Requirements

A. *Containment modifications.* Any major modification or replacement of components of the primary reactor containment performed after the initial preoperational leakage rate test shall be followed by either a Type A test or a Type B test of the area affected by the modification and shall meet the acceptance criteria of sections III.A.7. and III.B.3., respectively. Modifications or replacements performed directly prior to the conduct of a scheduled Type A test shall not require a separate test.

B. *Multiple vessel containments.* Multiple interconnected containment vessels shall be considered as a single containment in the performance of Type A tests.

C. *Multiple leakage barrier containments.* Primary reactor containment with multiple leakage-limiting barriers shall be subjected to Type A tests to verify separately that the measured leakage rate of each barrier is not in excess of the allowable test leakage rate specified in the technical specifications for the respective barriers. Secondary containment buildings which enclose the entire primary reactor containment or portions thereof shall be subject to individual tests in accordance with the procedures specified in the technical specifications.

D. *Containment leakage monitoring system.* A leakage monitoring system (e.g., continuously pressurized containment during normal reactor operation), which detects changes in containment leakage during service may be used (but not in lieu of Type A tests) to reduce the test frequency of Type B tests, as provided in section III.D.2. The acceptance criterion pertaining to the operation of this system shall conform with the requirements stated in the technical specifications.

E. *Component leak surveillance system.* A leak surveillance system (e.g., continuous pressurization of individual containment components) that maintains a pressure not less than P_p at individual test chambers of containment penetrations and seals during normal reactor operation shall be acceptable in lieu of Type B tests for the components under such leak surveillance.

V. Inspection and Reporting of Tests

A. *Containment inspection.* A detailed visual examination of critical areas and general inspection of the accessible interior and exterior surfaces of the containment structures and components shall be performed at each reactor shutdown for a major refueling and prior to any Type A test to uncover any evidence of structural deterioration which may affect either the containment's structural integrity or leaktightness. If there is evidence of significant structural deterioration, Type A tests shall not be performed until corrective action is taken in accordance with repair procedures, nondestructive examinations, and tests as specified in the construction code under which rules the containment was built. Such structural deterioration and corrective actions taken shall be reported as part of the Type A test report.

B. *Report of test results.* The initial Type A test shall be the subject of a summary technical report submitted to the Commission approximately 3 months after the conduct of the test. This report shall include a schematic arrangement of the leakage rate measurement system, the instrumentation used, the supplemental test method, and the test program selected as applicable to the initial test, and all subsequent periodic tests. The report shall contain an analysis and interpretation of the leakage rate test data to the extent necessary to demonstrate the acceptability of the containment's leakage rate in meeting the acceptance criteria.

For periodic tests, leakage rate results of Type A, B, and C tests that meet the acceptance criteria of sections III.A.7, III.B.3, and III.C.3 respectively, shall be reported in the licensee's operating report. Leakage test results of Type A, B, and C tests that fail to meet the acceptance criteria of sections III.A.7, III.B.3, and III.C.3 respectively shall be reported in a separate summary that includes an analysis and interpretation of the test data, the least-squares fit analysis of the test data, the instrumentation error analysis,

[2] These inservice inspections relate to the examination requirements of the components of the reactor coolant pressure boundary, as required by § 50.55a of 10 CFR Part 50.

and the structural conditions of the containment or components, if any, which contributed to the failure in meeting the acceptance criteria. Results and analyses of the supplemental verification test employed to demonstrate the validity of the leakage rate test measurements shall also be included.

(Secs. 103, 104, 161(i), 183, 68 Stat. 936, 937, 948, 954, as amended; 42 U.S.C. 2133, 2134, 2201(i), 2233)

Dated at Germantown, Md., this 9th day of August 1971.

For the Atomic Energy Commission.

W. B. McCool,
Secretary of the Commission.

CIVIL AERONAUTICS BOARD

[14 CFR Part 241]

[Docket No. 23641; EDR-209A]

UNIFORM SYSTEM OF ACCOUNTS AND REPORTS FOR CERTIFICATED AIR CARRIERS

Depreciation Costs for Regulatory and Accounting Purposes; Extension of Time for Submitting Comments

August 20, 1971.

The Board, by circulation of Notice of Proposed Rule Making EDR-209 dated July 22, 1971, and publication at 36 F.R. 13930, gave notice that it had under consideration proposed amendments to Part 241 of its Economic Regulations (14 CFR Part 241), which would require all certificated air carriers to set forth in Form 41 reports filed with the Board the depreciation costs established for regulatory purposes, depreciation costs accrued by carrier management for accounting purposes, and the numerical differences between them. Interested persons were invited to participate by submission of twelve (12) copies of written data, views, or arguments pertaining thereto to the Docket Section of the Board on or before August 27, 1971.

By letter dated August 17, 1971, the Airline Finance and Accounting Conference of the Air Transport Association of America on behalf of carrier members requested an extension of time for filing comments to September 27, 1971. According to ATA, this additional time is required to incorporate into the industry comments it intends to file certain recommendations acceptable to the carrier members.

The undersigned finds that good cause has been shown for the extension of time requested.

Accordingly, pursuant to the authority delegated in § 385.20(d) of the Board's Organization Regulations, the undersigned hereby extends the time for submitting comments to September 27, 1971.

(Sec. 204(a) of the Federal Aviation Act of 1958, as amended, 72 Stat. 743; 49 U.S.C. 1324)

[SEAL] Arthur H. Simms,
Associate General Counsel,
Rules and Rates.

DEPARTMENT OF THE TREASURY

Fiscal Service

HEADS OF DIVISIONS ET AL., BUREAU OF ACCOUNTS

Order of Succession and Delegation of Authority

By virtue of the authority vested in me by Treasury Department Order No. 129, Revision No. 2, dated April 22, 1955 (20 F.R. 2875), it is hereby ordered that the following officials of the Bureau of Accounts, in the order of succession enumerated herein, shall have the authority to act as Commissioner of Accounts and to perform all the functions of that office, during the absence or disability of the Commissioner of Accounts or when there is a vacancy in such office:

1. Heads of Divisions, in the order of incumbency.

2. Deputy Heads of Divisions, in the order of incumbency.

3. Directors, Disbursing Centers (GS-15), in the order of incumbency.

In the event of an enemy attack on the continental United States, the Chief Disbursing Officer, each officer in charge of a Bureau of Accounts regional office, or in their absence, such officers as are authorized to act in their place, are authorized to make such provisions as are necessary to insure continuous performance of all functions of the Bureau of Accounts now or hereafter assigned to such regional offices. This authority, under the conditions specified, will authorize the Chief Disbursing Officer, each regional office head, or in their absence the officers authorized to act for them, to take any action with respect to the functions performed in their offices that the Secretary of the Treasury, the Commissioner of Accounts, or any of their subordinate officers would be authorized to take.

This order supersedes the previous order of this Bureau, dated April 12, 1971 (36 F.R. 7262).

Dated: August 23, 1971.

[SEAL] David Mosso,
Commissioner of Accounts.

Office of the Secretary

[Treasury Dept. Additional Duty Order 2]

TARIFF SCHEDULES OF THE UNITED STATES

Certain Articles Exempt From Additional Duty

Pursuant to the authority vested in the Secretary of the Treasury by headnote 4(a) subpart C of part 2 of the Appendix to the Tariff Schedules of the United States, I hereby determine that it is consistent with safeguarding the balance of payments position of the United States to establish exemptions from the additional duty provided for in subpart C as set forth in headnote 5 thereof which I hereby amend to add the following:

(c) Articles provided for in items 106.10 and 106.20, Tariff Schedules of the United States;

(d) Articles provided for in part 3 of the Appendix to the Tariff Schedules of the United States;

(e) Articles subject to quantitative limitations imposed under or pursuant to the Sugar Act of 1948, as amended and extended (7 U.S.C. 1100 et seq.);

(f) Articles as to which quantitative limitations have been imposed pursuant to section 232 of the Trade Expansion Act of 1962 (19 U.S.C. 1862), whether or not produced in a country the products of which are subject to such quantitative limitations;

(g) Articles irrespective of country of origin described in the categories set forth in the Federal Register notice of January 17, 1968 (33 F.R. 582), as amended, established for the administration of the Long-Term International Cotton Textile Arrangement.

This modification of headnote 5 is published in the Federal Register pursuant to headnote 4(b) to subpart C.

Dated: August 23, 1971.

[SEAL] John B. Connally,
Secretary of the Treasury.

DEPARTMENT OF THE INTERIOR

Bonneville Power Administration

DRAFT ENVIRONMENTAL STATEMENT

Notice of Availability

Pursuant to the National Environmental Policy Act of 1969, notice is hereby given that the Bonneville Power Administration has prepared a draft statement which discusses environmental considerations relating to BPA's projected program for fiscal year 1973.

Copies of the BPA Draft Environmental Statement have been sent to Federal, State, and local agencies as outlined in the Council on Environmental Quality guidelines of April 23, 1971. The Draft Environmental Statement is also available for review in the library of the headquarters office of BPA, 1002 Northeast Holladay Street, Portland, OR 97208, the Washington, D.C., Office in the Interior Building, Room 5600, or in the following Area and District Offices: Idaho Falls, Idaho; Portland, Oreg.; Seattle, Wash.; Spokane, Wash.; Walla Walla, Wash.; Eugene, Oreg.; Kalispell, Mont.; and Wenatchee, Wash.

A public meeting will be held September 29, 1971, in the auditorium of the Bonneville Power Administration headquarters building. It will be preceded by a number of preliminary meetings at selected locations throughout the Pacific Northwest area served by BPA. The purpose of the meetings is twofold: To present to the public BPA's projected fiscal year 1973 program, and to elicit comments from the public with respect to the environmental impact of BPA's projected program.

Dated: August 19, 1971.

H. R. Richmond,
Administrator.

Bureau of Land Management

[Utah 15498]

UTAH

Notice of Proposed Withdrawal and Reservation of Lands

The U.S. Forest Service, Department of Agriculture, has filed application for the withdrawal of the land described below from location and entry under the mining laws, subject to valid existing claims.

The applicant desires the land for the protection of the Little Brush Creek Cave, which it states is one of the largest and most outstanding cave systems presently known to exist west of the Mississippi River. It is important that this area be protected from entry under the mining laws, for scientific study and public enjoyment.

For a period of 30 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management, Department of the Interior, Post Office Box 11505, Salt Lake City, UT 84111.

If circumstances warrant, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the Federal Register. A separate notice will be sent to each interested party of record.

The land involved in the application is:

Salt Lake Meridian

Little Brush Creek Cave

Fish and Wildlife Service

CHASSAHOWITZKA NATIONAL WILDLIFE REFUGE, FLA.

Notice of Public Hearing Regarding Wilderness Study

Notice is hereby given in accordance with provisions of the Wilderness Act of September 3, 1964 (Public Law 88–577; 78 Stat. 890–896; 16 U.S.C. 1131–1136), that a public hearing will be held beginning at 9 a.m. on October 29, 1971, at the Crystal River Middle School Auditorium, Crystal River, Fla., to consider the results of a study leading to a recommendation to be made to the President of the United States by the Secretary of the Interior, regarding the desirability of including a portion of the Chassahowitzka National Wildlife Refuge within the National Wilderness Preservation System. The refuge, which consists of approximately 30,514 acres, is located in Citrus and Hernando Counties, State of Florida.

A brochure containing a map and information about the Chassahowitzka Wilderness study may be obtained from the Refuge Manager, Chassahowitzka National Wildlife Refuge, Route 1, Box 153, Homosassa, FL 32646, or the Regional Director, Bureau of Sport Fisheries and Wildlife, Peachtree-Seventh Building, Atlanta, Ga. 30323.

Individuals or organizations may express their oral or written views by appearing at this hearing, or they may submit written comments for inclusion in the official record of the hearing to the Regional Director at the above address by November 29, 1971.

J. P. LINDUSKA,
Associate Director, Bureau of Sport Fisheries and Wildlife.

FEDERAL COMMUNICATIONS COMMISSION

[Report No. 558]

COMMON CARRIER SERVICES INFORMATION [1]

Domestic Public Radio Services Applications Accepted for Filing [2]

AUGUST 23, 1971.

Pursuant to §§ 1.227(b)(3) and 21.30 (b) of the Commission's rules, an application, in order to be considered with any domestic public radio services application appearing on the attached list, must be substantially complete and tendered for filing by whichever date is earlier: (a) The close of business 1 business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which subsequent applications are in conflict) as having been accepted for filing. An application which is subsequently amended by a major change will be considered to be a newly filed application. It is to be noted that the cut-off dates are set forth in the alternative—applications will be entitled to consideration with those listed in the appendix if filed by the end of the 60-day period, only if the Commission has not acted upon the application by that time pursuant to the first alternative earlier date. The mutual exclusivity rights of a new application are governed by the earliest action with respect to any one of the earlier filed conflicting applications.

The attention of any party in interest desiring to file pleadings pursuant to section 309 of the Communications Act of 1934, as amended, concerning any domestic public radio services application accepted for filing, is directed to § 21.27 of the Commission's rules for provisions governing the time for filing and other requirements relating to such pleadings.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Secretary.

[1] All applications listed in the appendix are subject to further consideration and review and may be returned and/or dismissed if not found to be in accordance with the Commission's rules, regulations and other requirements.

[2] The above alternative cut-off rules apply to those applications listed in the appendix as having been accepted in Domestic Public Land Mobile Radio, Rural Radio, Point-to-Point Microwave Radio, and Local Television Transmission Services (Part 21 of the rules).

APPLICATIONS ACCEPTED FOR FILING

DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE

File No., applicant, call sign, nature of application

783–C2–P–(2)72—Page A Fone Corp. (KKG562), C.P. to replace transmitter, change the antenna system and relocate facilities operating on 152.21 and 454.30 MHz to 4905 Bridge Street, Fort Worth, TX.

786–C2–P–72—William P. Smith (New), C.P. for a new 2-way station to be located at 5996 Overseas Highway, Marathon, FL, to operate on frequency 152.12 MHz.

787–C2–P–72—McLean County Telephone Answering Service, Inc. (KSA746), C.P. for additional facilities to operate on frequency 454.05 MHz at station located at 2 miles west of Union Depot and 0.25 mile south of Bloomington, Ill.

788–C2–P–(4)72—South Central Bell Telephone Co. (KIC344), C.P. to change the antenna system and change the transmission lines on 152.51, 152.60, 152.63, and 152.72 MHz located at 201 Court Avenue, Memphis, TN.

793–C2–P–72—Colgon Communications, doing business as Mobilfone of Boston (KCA240), C.P. to change the antenna system for the standby facilities operating on 152.03 MHz at location No. 2, 99 Highland Avenue, Somerville, MA.

794–C2–P–72—Able Paging Service (KFL947), C.P. for additional facilities to operate on frequency 152.18 MHz at a new site described as location No. 2, 605 Mason Road, Columbia, SC.

795–C2–P–72—Able Paging Service (New), C.P. for a new 1-way station to be located at 1520 Senate Street, Columbia, SC, to operate on frequency 158.70 MHz.

810–C2–AL–72—Apex Communications, Consent to assignment of license from Stanley F. Wylie, doing business as Apex Communications, assignor, to Paresco, Inc., assignee, Station KLF653, Montgomery, Ala.

811–C2–P–72—Alabaster Carphone Co. (New), C.P. for a new 2-way station to be located near Helena, Ala., to operate on frequency 152.12 MHz.

825–C2–P–72—Tel-Page Corp. (New), C.P. for a new 1-way station to be located at 821 Brighton Avenue, East Jamesville, NY, to operate on frequency 35.22 MHz.

829–C2–AL–(2)72—Fire Safety Corp., Consent to assignment of license from Fire Safety Corp., assignor, to Answer Iowa, Inc., assignee, Stations KRH672 Rochester, Minn., KFQ931 Rochester, Minn.

842–C2–P–72—Robert E. Minton (New), C.P. for a new 1-way station to be located at Bailey Hill, 2.6 miles west-southwest of Phenix City, Ala., to operate on frequency 152.240 MHz.

Correction

3396–C1–P–69—Interdata Communications, Inc. (New), Correct coordinates of station located at 11 Broadway, New York, NY to latitude 40°42'20" N., longitude 74°00'53" W. All other particulars same as reported on public notices dated December 18, 1968 and August 2, 1971.

Major Amendment

1743–C1–P–71—New England Telephone & Telegraph Co. (KCL59), Change frequencies 5997.1, 6056.4 MHz to 6028.7, 6088.0 MHz toward Acushnet, Mass. Station location: Pocasset Avenue, Tiverton, R.I.

1744–C1–P–71—New England Telephone & Telegraph Co. (KCL60), Change frequencies 6249.1, 6308.4 MHz to 6278.8, 6338.1 MHz toward Tiverton, R.I. Station location: Mendall Road, Acushnet, Mass.

1745–C1–P–71—New England Telephone & Telegraph Co. (KCL61), Change frequency 6028.7 MHz to 6056.4 MHz toward Hyannis, Mass. Station location: Blacksmith Shop Road, Falmouth, Mass.

1746–C1–P–71—New England Telephone & Telegraph Co. (KCL62), Change frequency 6278.8 MHz to 6308.4 MHz toward Falmouth, Mass. Station location: 50 Ocean Street, Hyannis, MA. (All other particulars same as reported on public notice dated October 5, 1970.)

3869–C1–P–71—Bell Telephone Company of Pennsylvania (KYJ36), Change frequencies 11,365, 11,605 MHz to 11,285, 11,525 MHz toward Manada, Pa. Station location: 210 Pine Street, Harrisburg, PA.

3870–C1–P–71—Bell Telephone Company of Pennsylvania (KYJ37), Change frequencies 10,915, 11,155 MHz to 10,835, 11,075 MHz toward Harrisburg, Pa. Station location: Manada, 2.7 miles northwest of Grantville, Pa. (All other particulars same as reported on public notice dated February 1, 1971.)

POINT-TO-POINT MICROWAVE RADIO SERVICE (NONTELEPHONE)

The following Applicants propose to establish omnidirectional facilities for the provision of common carrier "Subscriber-Programed" television service.

826–C1–P–72—World Ventures, Inc. (New), C.P. for a new station to be located at Chromalloy Building, 7700 Bonhomme Avenue, Clayton, MO. Frequencies: 2152.325 (visual) and 2150.20 MHz (aural) toward various receiving points of system, and frequencies 2158.50 (visual) and 2154.00 MHz (aural) toward various receiving points of system.

827–C1–P–72—World Ventures, Inc. (New), C.P. for a new station to be located at 3500 One Oliver Plaza, Pittsburgh, PA. Frequencies: 2152.325 MHz (visual) and 2150.20 MHz (aural) toward various receiving points of system and 2158.50 (visual) and 2154.00 MHz (aural), toward various receiving points of system.

Correction

417–C1–P–72—Microwave Relay Services, Inc. (New), Corrected to read as entry was erroneously left off: Frequency 10.755 MHz on azimuth 54°14'. Frequency 10.835 MHz on azimuth 269°05'. Frequency 10.915 MHz on azimuth 242°19'. (All the rest same as reported on public notice dated August 9, 1971.)

Major Amendment

7430–C1–P–71—Midwestern Relay Co. (New), Application amended to change frequency to 11,305 MHz toward Foshay Tower passive repeater (latitude 44°58'28" N., longitude 93°16'17" W.) on azimuth 116°30', and therefrom to New Brighton, Minn., on azimuth 47°15'. Station location: Studio of WCCO–TV, 50 South Ninth Street, Minneapolis, MN.

3681–C1–P–71—Midwestern Relay Co. (New), Application amended to delete all frequencies and radio paths except frequency 11,625 MHz toward New Brighton, Minn., on new azimuth of 47°15'. Station location: Foshay Tower, South 9th Street, Minneapolis, MN.

7431–C1–P–71—Midwestern Relay Co. (New), Application amended to change azimuth from 33°30' to 27°15' toward New Brighton, Minn. Studio of KSTP–TV, 3415 University Avenue, St. Paul, MN.

3680–C1–P–71—Midwestern Relay Co. (New), Application amended (a) to delete all frequencies and radio paths except radio path toward Isanti, Minn.; and (b) to change frequencies to 6256.5, 6286.2, 6375.2, and 6404.8 MHz toward Isanti on azimuth 353°25'. Station location: 2.5 miles east of New Brighton, Minn.

Major Amendment:

4315–C2–P–(2)71—General Telephone of the Southwest (KLF875), Amended to change frequency from 454.650 MHz to 152.60 MHz. See public notice dated February 22, 1971, Report No. 532.

RURAL RADIO SERVICE

820–C1–P–72—The Mountain States Telephone & Telegraph Co. (KLP90), C.P. to replace transmitter operating on frequency 459.60 MHz located at 120 Fourth Street NW., Albuquerque, NM.

821–C1–P–72—The Mountain States Telephone & Telegraph Co. (KLP91), C.P. to replace transmitters operating on frequencies 454.50 and 454.60 MHz located at 4.5 miles northwest of Manzano, N. Mex.

822–C2–P–72—The Mountain States Telephone & Telegraph Co. (KLP92), C.P. to replace transmitter operating on frequency 459.50 MHz located at 12.4 miles southwest of Mountainair, N. Mex.

POINT-TO-POINT MICROWAVE RADIO SERVICE (TELEPHONE CARRIER)

784–C1–P–72—Golden West Telephone Co. (KNK51), C.P. to replace transmitter with Farinon SS–6000YC–01 and correct coordinates to read 33°36'27" latitude and longitude 114°35'30" W. Station location: 400 East Rice Street, Blythe, CA.

785–C1–P–72—Golden West Telephone Co. (KNK52), C.P. to replace transmitter to read: Farinon–SS–6000YC–01. Frequencies 5960.0 and 6078.8 MHz toward Blythe, Calif. Station location: Big Maria Mountain, 10.5 miles northeast of Blythe, Calif.

789–C1–P–72—Illinois Bell Telephone Co. (KVU31), C.P. to add frequencies 10,855 and 11,015 MHz toward St. Louis, Mo. Station location: 203 Goethe Avenue, Collinsville, IL.

790–C1–P–72—Illinois Bell Telephone Co. (KSN55), C.P. to add frequencies 6390.0 and 6271.4 MHz toward Monroe Center, Il. Station location: 211 North Church Street, Rockford, IL.

791–C1–P–72—Illinois Bell Telephone Co. (KSN56), C.P. to add frequencies 5989.7 and 6108.3 frequencies 6167.8 and 6049.0 MHz and change 6071.2 MHz to 6078.6 MHz toward De Kalb, Ill. Station location: 0.8 mile northeast of Monroe Center, Ill.

792–C1–P–72—Illinois Bell Telephone Co. (KSN57), C.P. to add frequencies 6241.7 and 6360.3 MHz toward Monroe Center, Ill. Station location: 1500 South 7th Street, De Kalb, IL.

American Telephone & Telegraph Co. Seven (7) C.P. applications to construct the initial type TD–2 radio relay channels on a new two-link radio relay route between Waleska and Dahlonega, Ga., and additional radio relay channels between Dahlonega and Rockdale, Ga.

812–C1–P–72—American Telephone & Telegraph Co. (KIT26), Delete Ball Ground as a point of communication. Frequencies: 3710, 3790, 3950, 4030, 4110 MHz toward Nelson, Ga., a new point of communication. Station location: 4 miles northwest of Waleska, Ga.

813–C1–P–72—American Telephone & Telegraph Co. (New), C.P. for a new station to be located 5.5 miles east of Nelson, Ga. Frequencies: 3750, 3830, 3990, 4070, 4150 MHz toward Waleska and Dahlonega, Ga.

814–C1–P–72—American Telephone & Telegraph Co. (KRS93), Add frequencies 3710, 3790, 3950, 4030, 4110 MHz toward Nelson, Ga., and 3950, 4030, 4110 MHz toward Gainesville, Ga. Station location: 5 miles east-southeast of Dahlonega, Ga.

815–C1–P–72—American Telephone & Telegraph Co. (KRS97), Add frequencies 3990, 4070, 4150 MHz toward Dahlonega and Statham, Ga. Station location: 2 miles southeast of Gainesville, Ga.

816–C1–P–72—American Telephone & Telegraph Co. (KRT22), Add frequencies 3950, 4030, 4110 MHz toward Gainesville and Jersey, Ga. Station location: 1.2 miles north of Statham, Ga.

817–C1–P–72—American Telephone & Telegraph Co. (KRS98), Add frequencies 3990, 4070, 4150 MHz toward Statham and Rockdale, Ga. Station location: 2.2 miles northeast of Jersey, Ga.

818–C1–P–72—American Telephone & Telegraph Co. (KIT29), Add frequencies 3950, 4030, and 4110 MHz toward Jersey, Ga. Station location: 3 miles southeast of Conyers, Ga.

830–C1–MP–72—American Telephone & Telegraph Co. (KAY83), Modification of C.P. to change frequency 3990 MHz to 3890 MHz toward West Creek, Colo. Station location: Critchell, 4.1 miles north-northwest of South Platte, Colo.

Major Amendment—Continued

3682–C1–P–71—Midwestern Relay Co. (New). Application amended (a) to change frequencies to 6004.5, 6034.2, 6123.1, and 6152.8 MHz toward Hinckley, Minn., on azimuth 11°52'; and (b) to change frequency to 6034.2 MHz toward New Brighton on azimuth 173°25'. Station location: 3.90 miles northeast of Isanti, Minn.

3683–C1–P–71—Midwestern Relay Co. (New). Application amended (a) to change frequencies to 6226.9, 6286.2, 6345.5 and 6404.8 MHz toward Duquette, Minn., on azimuth 49°49'; and (b) to change frequency to 6256.2 MHz toward Isanti on azimuth 191°52'. Station location: 3.8 miles west of Hinckley, Minn.

3684–C1–P–71—Midwestern Relay Co. (New). Application amended (a) to change station coordinates to latitude 46°22'53" N., longitude 92°32'38" W.; (b) to change frequencies to 5945.2, 6049.0, 6108.3, and 6167.6 MHz toward Duluth, Minn., on azimuth 36°15'; (c) to add frequencies 5945.2 and 6049.0 MHz, via path intercept, toward WDIO-TV, Duluth, on azimuth 36°15'; and (d) to change frequency to 5974.8 MHz toward Hinckley, Minn., on azimuth 229°49'. Station location: 1 mile northeast of Duquette, Minn.

3685–C1–P–71—Midwestern Relay Co. (New). Application amended (a) to delete radio path toward WDIO–TV, Duluth, Minn.; and (b) to change frequency to 6375.2 MHz toward Duquette, Minn., on azimuth 216°15'. Station location: Fifth Avenue West and 10th Street, Duluth, MN.

FEDERAL POWER COMMISSION

NATURAL GAS SUPPLY PROBLEMS ANTICIPATED DURING 1971–72 HEATING SEASON

Notice of Scheduled Conferences With Staff

The Commission's staff wishes to meet with the senior officials of the major gas pipelines to discuss the capability of these companies to serve their anticipated requirements during the coming heating season. Although last year's meetings were held with individual companies, we believe that joint meetings with several companies to consider the special problems of specific geographical areas will be more beneficial both to identify the special circumstances that may exist in such areas and to discuss possible solutions to any common problems that may emerge.

The purpose of the meetings is to anticipate, if possible, emergency situations in the coming winter. Although the conferences are not intended to affect the resolutions of issues pending in curtailment, rate or certificate proceedings, we nevertheless will make the conferences public and will encourage the attendance of interested persons and State Commissions. To this end, notice will be placed in the Commission's calendar of events, and in the FEDERAL REGISTER.

At these meetings we would like to discuss, both on an individual company and on a regional basis, such subjects as current supply availability, present and projected levels of storage, anticipated supply additions—both of a short-term and long-term nature, anticipated requirements, and other related matters. Of particular concern will be any indication of unusual curtailment projections or other extreme operational adjustments that may become necessary.

Our discussions would be faciliated if you had available information on monthly requirements, supply and storage data relevant to your operations for the period of April 1, 1971 through March 31, 1972, including a complete gas balance such as is indicated on the attached format.[1] It would be helpful if we had such information prior to the meeting date, for agenda planning purposes. Please feel free to bring any additional information that you think might be helpful in these discussions.

These meetings will be held in the offices of FPC at 10 a.m. on the days indicated in the attached schedule. I hope that this timing will not cause any great inconvenience to you and your staff.

SCHEDULE OF PIPELINE COMPANY MEETINGS ON 1971–72 OPERATIONS TO BE HELD AT 10 A.M. ON DATE INDICATED

Group 1—August 31, 1971
- Transwestern Pipeline Co.
- El Paso Natural Gas Co.
- Pacific Gas Transmission Co.

Group 2—September 7
- Arkansas Louisiana Gas Co.
- Cities Service Gas Co.
- Northern Natural Gas Co.
- Colorado Interstate Gas Co.

Group 3—September 10
- Midwestern Gas Transmission Co.
- Michigan Wisconsin Pipe Line Co.
- Panhandle Eastern Pipe Line Co.
- Trunkline Gas Co.
- Natural Gas Pipeline Co. of America

Group 4—September 14
- Southern Natural Gas Co.
- Mississippi River Transmission Corp.
- United Gas Pipe Line Co.
- Texas Gas Transmission Corp.

Group 5—September 17
- Texas Eastern Transmission Corp.
- Algonquin Gas Transmission Co.
- Tennessee Gas Pipeline Co.
- Transcontinental Gas Pipe Line Corp.
- Columbia Gas Transmission Corp.
- Consolidated Gas Supply Corp.

Dated: August 23, 1971.

THOMAS J. JOYCE,
Chief, Bureau of Natural Gas.

OFFICE OF EMERGENCY PREPAREDNESS

MARYLAND

Notice of Major Disaster and Related Determinations

Pursuant to the authority vested in me by the President under Executive Order 11575 of December 31, 1970; and by virtue of the Act of December 31, 1970, entitled "Disaster Relief Act of 1970" (84 Stat. 1744); notice is hereby given that on August 17, 1971, the President declared a major disaster as follows:

I have determined that the damages in certain areas of the State of Maryland from severe storms and flooding, beginning about August 1, 1971, are of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 91–606. I therefore declare that such a major disaster exists in the State of Maryland. You are to determine the specific areas within the State eligible for Federal assistance under this declaration.

Notice is hereby given that pursuant to the authority vested in me by the President under Executive Order 11575 to administer the Disaster Relief Act of 1970 (Public Law 91–606), I hereby appoint Mr. Robert C. Stevens, Regional Director, OEP Region 2, to act as the Federal Coordinating Officer to perform the duties specified by section 201 of that Act for this disaster.

I do hereby determine the following areas in the State of Maryland to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of August 17, 1971: The city of Baltimore and the counties of:

Baltimore.	Howard.
Frederick.	Montgomery.
Harford.	Prince Georges.

Dated: August 24, 1971.

G. A. LINCOLN,
Director,
Office of Emergency Preparedness.

INTERSTATE COMMERCE COMMISSION

ASSIGNMENT OF HEARINGS

AUGUST 24, 1971.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 133574 Sub 6, Terrill Trucking Co., assigned October 1, 1971, in Room 2404, Federal Building, 106 South 15th Street, Omaha, NE.

M–1249 Sub 1, Brownville Development Co., assigned October 4, 1971, at the Omaha Hilton Hotel, Omaha, Nebr.

MC 200 Sub 236, Riss International Corp., assigned September 27, 1971, in Room 2404, Federal Building, 106 South 15th Street, Omaha, NE.

MC 56679 Sub 48, Brown Transport Corp., assigned October 18, 1971, in Room 305, 1252 West Peachtree Street NW., Atlanta, GA.

MC 51146 Sub 158, Schneider Transport & Storage, MC 51146 Sub 161 Schneider Transport & Storage, MC 87720 Sub 100, Bass Transportation Co., Inc., MC 108452 Sub 33, G & A Truck Line, Inc., MC 114457 Sub 83, Dart Transit Co., MC 114457 Sub 110, Dart Transit Co., MC 118989 Sub 42, Container Transit, Inc., MC 118989 Sub 62, Container Transit, Inc., MC 119531 Sub 141, Dieckbrader Express, Inc., MC 119531 Sub 146, Dieckbrader Express, Inc., MC 119632 Sub 38, Reed Lines, Inc., MC 119670 Sub 17, The Victor Transit Corp., MC 123255 Sub 6, now being assigned for continued hearing on October 19, 1971, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 116886 Sub 41, Howell's Motor Freight, Inc., now being assigned September 22, 1971, in Room 545, Post Office Building, 601 West Broadway, Louisville, KY.

MC 27356 Sub 4, M-F Express, Inc., now assigned September 13, 1971, at Jackson, Miss., postponed indefinitely.

MC 107515 Sub 745, MC 107515 Sub 741, now assigned September 13, 1971 at Atlanta, Ga., postponed indefinitely. (Refrigerated Transport, Inc.)

MC 124211 Sub 170, Hilt Truck Line, Inc., now assigned September 16, 1971, hearing canceled, application dismissed.

MC 133014 Sub 2, Woodcrest L & S Co., now assigned September 20, 1971, postponed indefinitely. (Chicago, Ill.)

[SEAL] ROBERT L. OSWALD,
Secretary.

Minimum Wages for Federal and Federally Assisted Construction

Regions VIII and X

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

Area Wage Determination Decisions for Specified Localities in Certain States

There are set forth below general Area Wage Determination Decisions Nos. AM–2405 through AM–2410, AM–2412, AM–2413, AM–2460, AM–2461, AM–2462, AM–2475, AM–2476, AM–2477, AM–2479 through AM–2491, AM–2503 through AM–2523 and AM–3630 through AM–3632 of the Secretary of Labor. These decisions specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein. The decisions are applicable to Federal and federally assisted construction in described localities situated within the States of Alaska, Colorado, Idaho, Montana, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming. No general area wage determinations are currently applicable to localities within such States other than those described in these decisions; only determinations for specific projects are made in such other localities.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 F.R. 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determinations by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of the Code of Federal Regulations, Procedure for Predetermination of Wage Rates, and of Secretary of Labor's Orders 13–71 and 15–71 (36 F.R. 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal or federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 533, and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determinations frequently and in large volume causes such procedures to be impractical and contrary to the public interest. These wage determination decisions shall, accordingly, be effective on publication in the FEDERAL REGISTER, except as otherwise provided hereinafter.

The wage determinations in these decisions replace all prior general or area wage determinations for localities in the above States, the expiration dates of which were extended by the notice of variation published in the FEDERAL REGISTER on April 3, 1971 (36 F.R. 6467). The replaced determinations are hereby canceled: *Provided, however*, That where bids have been opened or will be opened within 10 days from the date of publication of this document in the FEDERAL REGISTER, the expiration date of the prior wage determination decision provided for preparation of such bids may be extended by the contracting agency for an additional 30-day period to permit orderly contracting procedures.

These wage determinations are effective for a period of 120 days from the date of publication in the FEDERAL REGISTER and are to be used in accordance with the provisions of 29 CFR Part 5. Accordingly, the applicable determination together with any modification issued subsequent to this date during this 120-day period, shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates contained herein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Area wage determination decisions for specific localities in the balance of the States, and insular possessions will be published on September 3, 1971. Changes in published area decisions will be made as necessary and will appear in Friday issues of the FEDERAL REGISTER.

Any person, organization, or governmental agency having an interest in the wages determined or to be determined as prevailing in any locality is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, Washington, D.C. 20210.

The area wage determination decisions for localities within the above States are set forth below.

Dated at Washington, D.C., this 20th day of August 1971.

HORACE E. MENASCO,
Administrator,
Wage and Hour Division.

HEAVY & HIGHWAY & SITE PREPARATION	Basic Hourly Rate	FRINGE BENEFITS PAYMENTS H & W	Pensions	Vacation	App Tr	Other
LABORERS:						
GROUP I						
Minimum Labor, including caissons to 8', carrying reinforcing rods; work on cross culverts, connections and side drains in connection with highway work, whether corrugated metal or concrete pipe; fence erectors; metal mesh; dowel bars; tie bars and chairs in concrete paving; nursery man including seeding, mulching and planting of trees, shrubs and flowers; stake chaser; Gabion baskets and Reno mattresses	$4.05	.25	.30		.03	
GROUP II						
Chuck tenders; nippers, core and diamond drill helpers, powderman helpers	4.10	.25	.30		.03	
GROUP III						
Hot asphalt labor, rakers, boxtenders, asphalt curb machines, potmen (not mechanical)	4.18	.25	.30		.03	
GROUP IV						
Multi-plate culvert pipe; air, gas and electric tool operators; Barco hammers; spaders; electric hammers; air tampers; cutting torches on demolition work; caissons 8' to 12'; cofferdams; power operated concrete buggies; operators of concrete saws on pavement (other than gang saws); timber and chain saws; stresser or stretcherman on post tension or prestressed concrete on or off jobsite; tool room man and checkers; cement finisher helper; sand blaster helper; concrete processing material monitor; spotters; signalmen; dumpmen; transverse concrete convevor operator, mechanical grouters; boring machines (air hydraulic); automatic concrete power curbing machine; jack hammers; vibrators; paving breakers; frostproofing	4.20	.25	.30		.03	
GROUP V						
Any laborers performing bridge work over 40' above the ground or above a floor and working from a bos'n chair; swinging stage, life belt or block and tackle.	4.22	.25	.30		.03	

HEAVY & HIGHWAY & SITE PREPARATION	Basic Hourly Rate	FRINGE BENEFITS PAYMENTS H & W	Pensions	Vacation	App Tr	Other
LABORERS: (Cont'd)						
GROUP VI						
Gunniting and shotcrete helpers, wagon drills and air tracks, caissons over 12'; cofferdams; scalers; timbermen; under-pinning and shoring; formsetters and/or stringmen on roads, highways, streets and airport runways; distribution, placing and hooking of landing mats; bull float (hand operated) and center expansion machines; sand blasterers; grade checkers if required by Employer	$4.33	.25	.30		.03	
GROUP VII						
Powdermen and blasters; gunnite nozzlemen; shotcrete operator	4.43	.25	.30		.03	
GROUP VIII						
Pipe layer on trunk pipe lines in connection with highway work	4.50	.25	.30		.03	
GROUP IX						
Jackhammer operators in caissons over 12'; bellers and stemmen; licensed powdermen; diamond and core drills powered by air	4.63	.25	.30		.03	
GROUP X						
Any work, other than on bridges, performed by laborers working from a bos'n chair, swinging stage, life belt or block and tackle	4.68	.25	.30		.03	
(PIPELINE)						
All mainline sewers; Water mains; Gas, Oil or any product pipelines; Penstocks; Siphons or drainage lines; Pipe plants and yards not in connection with highway construction.						
GROUP I						
Pipe plants and yards, stringing of pipe or skids, handling and signaling on pipe line work	4.05	.25	.30		.03	
GROUP II						
Potman (not mechanical), pipe wrappers, dopers, Jeep Holiday Dectector Men, Bandage makers, Powderman Helper	4.10	.25	.30		.03	
GROUP III						
Laborers working in trenches on all pipelines; sewer, water, gas, oil, telephone conduit, penstock, siphons, drainage lines. Caulkers, Yarners, Fine graders, air, gas, electric and hydraulic tools, boring machines, hydraulic jacks drills, tampers and similar operated tools.	4.27	.25	.30		.03

UTAH
AREA DEFINITIONS
for
Truck Drivers & Operating Engineers (1-3)

**AREA 2: All areas not included within Area 1 as defined below.

*Area 1: All areas included in the description defined below which is based upon township and range-lines as referenced to the Salt Lake City Base and Meridian:

Commencing at the intersection of the Utah-Nevada border and the Northerly line of Township 36S, thence easterly along the northerly lines of Township 36S to the Northeast corner of Township 36S, Range 17W.

Thence Northerly to the N.W. corner of township 35S, range 16W;
Thence Easterly to the N.E. corner of township 35S, range 16 W;
Thence Northerly to the N.W. corner of township 31S, range 15 W;
Thence Easterly to the N.E. corner of township 31S, range 15 W;
Thence Northerly to the N.W. corner of township 26S, range 14 W;
Thence Easterly to the N.E. corner of township 26S, range 14 W;
Thence Northerly to the N.W. corner of township 25S, range 13 W;
Thence Easterly to the N.E. corner of township 25S, range 13 W;
Thence Northerly to the N.W. corner of township 24S, range 12 W;
Thence Easterly to the N.E. corner of township 24 S, range 12 W;
Thence Northerly to the N.W. corner of township 19 S, range 11 W;
Thence Easterly to the N.E. corner of township 19 S, range 11 W;
Thence Northerly to the N.W. corner of township 17 S, range 10 W;
Thence Easterly to the N.E. corner of township 17 S, range 10 W;
Thence Northerly to the N.W. corner of township 16 S, range 9 W;
Thence Easterly to the N.E. corner of township 16 S, range 9 W;
Thence Northerly to the N.W. corner of township 15 S, range 8 W;
Thence Easterly to the N.E. corner of township 15 S, range 8 W;
Thence Northerly to the S.W. corner of township 7 S, range 7 W;
Thence Westerly to the S.W. corner of township 7 S, range 10 W;

Order from Superintendent of Documents, U.S. Government Printing Office Washington, D.C. 20402

FEDERAL REGISTER

Area Code 202 Phone 962–8626

Published daily, Tuesday through Saturday (no publication on Sundays, Mondays, or on the day after an official Federal holiday), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U.S.C., Ch. 15), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $2.50 per month or $25 per year, payable in advance. The charge for individual copies is 20 cents for each issue, or 20 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended (44 U.S.C. 1510). The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER or the CODE OF FEDERAL REGULATIONS.

FLOOD INSURANCE—HUD additions to hazard areas and insurance eligibility lists (2 documents) 17334, 17335

COAL MINE HEALTH AND SAFETY—
Interior Dept. amendments relating to certain explosive gases; effective 8–28–71 17336
Interior Dept. revision of procedural rules (2 documents); effective 9–1–71 ..... 17336, 17337

OIL IMPORTS—Interior Dept. regulations increasing current allocations to refiners in specified districts 17346

MOTOR VEHICLE SAFETY—DoT amendment of lighting standard; effective 1–1–73 17343

AVAILABILITY OF INFORMATION—EPA proposed procedures; comments within 30 days 17360

TAXES—
IRS proposal on property seizure for tax collection; comments by 9–27–71 17349
IRS proposals on tax-exempt organizations and on liens and levies (2 documents); comments by 9–27–71 ..... 17348, 17355

WHEAT/RYE—USDA additions to Monthly Sales List 17367

COTTON TEXTILES—Interagency Textile Admin. Comm. notice of restraint renewal on imports from Haiti 17386

TREASURY NOTES—Treasury Dept. notice of offering; tenders by 8–31–71 17365

ECONOMIC STABILIZATION—OEP issuance of supplementary guidelines 17345

Title 3—The President

EXECUTIVE ORDER 11616

Amending Executive Order No. 11491, Relating To Labor-Management Relations in the Federal Service

By virtue of the authority vested in me by the Constitution and statutes of the United States, including sections 3301 and 7301 of title 5 of the United States Code, and as President of the United States, Executive Order No. 11491[1] of October 29, 1969, relating to labor-management relations in the Federal service, is amended as follows:

1. Section 2(b) is amended by deleting the words "formal or".

2. Paragraph (2) of section 2(c) is amended to read as follows:

"(2) assists or participates in a strike against the Government of the United States or any agency thereof, or imposes a duty or obligation to conduct, assist, or participate in such a strike;"

3. Section 4(a) is amended to read as follows:

"(a) There is hereby established the Federal Labor Relations Council, which consists of the Chairman of the Civil Service Commission, who shall be chairman of the Council, the Secretary of Labor, the Director of the Office of Management and Budget, and such other officials of the executive branch as the President may designate from time to time. The Civil Service Commission shall provide administrative support and services to the Council to the extent authorized by law."

4. Section 6(a) is amended—

(a) by deleting the word "and" at the end of paragraph (3).

(b) by substituting for paragraph (4) the following:

"(4) decide unfair labor practice complaints and alleged violations of the standards of conduct for labor organizations; and"

(c) by adding at the end thereof the following:

"(5) decide questions as to whether a grievance is subject to a negotiated grievance procedure or subject to arbitration under an agreement."

5. Section 7(d) is amended to read as follows:

"(d) Recognition of a labor organization does not—

"(1) preclude an employee, regardless of whether he is in a unit of exclusive recognition, from exercising grievance or appellate rights established by law or regulations; or from choosing his own representative in a grievance or appellate action, except when presenting a grievance under a negotiated procedure as provided in section 13;

[1] 3 CFR 1969 Comp., p. 191; 34 F.R. 17605.

"(2) preclude or restrict consultations and dealings between an agency and a veterans organization with respect to matters of particular interest to employees with veterans preference; or

"(3) preclude an agency from consulting or dealing with a religious, social, fraternal, professional or other lawful association, not qualified as a labor organization, with respect to matters or policies which involve individual members of the association or are of particular applicability to it or its members.

"Consultations and dealings under subparagraph (3) of this paragraph shall be so limited that they do not assume the character of formal consultation on matters of general employee-management policy, except as provided in paragraph (e) of this section, or extend to areas where recognition of the interests of one employee group may result in discrimination against or injury to the interests of other employees."

6. Section 7(f) is amended to read as follows:

"(f) Informal recognition or formal recognition shall not be accorded."

7. Section 8 is revoked.

8. Section 13 is amended to read as follows:

"SEC. 13. *Grievance and arbitration procedures.*

"(a) An agreement between an agency and a labor organization shall provide a procedure, applicable only to the unit, for the consideration of grievances over the interpretation or application of the agreement. A negotiated grievance procedure may not cover any other matters, including matters for which statutory appeals procedures exist, and shall be the exclusive procedure available to the parties and the employees in the unit for resolving such grievances. However, any employee or group of employees in the unit may present such grievances to the agency and have them adjusted, without the intervention of the exclusive representative, as long as the adjustment is not inconsistent with the terms of the agreement and the exclusive representative has been given opportunity to be present at the adjustment.

"(b) A negotiated procedure may provide for the arbitration of grievances over the interpretation or application of the agreement, but not over any other matters. Arbitration may be invoked only by the agency or the exclusive representative. Either party may file exceptions to an arbitrator's award with the Council, under regulations prescribed by the Council.

"(c) Grievances initiated by an employee or group of employees in the unit on matters other than the interpretation or application of an existing agreement may be presented under any procedure available for the purpose.

"(d) Questions that cannot be resolved by the parties as to whether or not a grievance is on a matter subject to the grievance procedure in an existing agreement, or is subject to arbitration under that agreement, may be referred to the Assistant Secretary for decision.

"(e) No agreement may be established, extended, or renewed after the effective date of this Order which does not conform to this section. However, this section is not applicable to agreements entered into before the effective date of this Order."

9. Section 14 is revoked.

10. Section 19(d) is amended to read as follows:

"(d) Issues which can properly be raised under an appeals procedure may not be raised under this section. Issues which can be raised under a grievance procedure may, in the discretion of the aggrieved party, be raised under that procedure or the complaint procedure under this section, but not under both procedures. Appeals or grievance decisions shall not be construed as unfair labor practice decisions under this Order nor as precedent for such decisions. All complaints under this section that cannot be resolved by the parties shall be filed with the Assistant Secretary."

11. Section 20 is amended to read as follows:

"SEC. 20. *Use of official time.* Solicitation of membership or dues, and other internal business of a labor organization, shall be conducted during the non-duty hours of the employees concerned. Employees who represent a recognized labor organization shall not be on official time when negotiating an agreement with agency management, except to the extent that the negotiating parties agree to other arrangements which may provide that the agency will either authorize official time for up to 40 hours or authorize up to one-half the time spent in negotiations during regular working hours, for a reasonable number of employees, which number normally shall not exceed the number of management representatives."

12. Section 21 is amended to read as follows:

"SEC. 21. *Allotment of dues.* (a) When a labor organization holds exclusive recognition, and the agency and the organization agree in writing to this course of action, an agency may deduct the regular and periodic dues of the organization from the pay of members of the organization in the unit of recognition who make a voluntary allotment for that purpose. Such an allotment is subject to the regulations of the Civil Service Commission, which shall include provision for the employee to revoke his authorization at stated six-month intervals. Such an allotment terminates when—

"(1) the dues withholding agreement between the agency and the labor organization is terminated or ceases to be applicable to the employee; or

"(2) the employee has been suspended or expelled from the labor organization.

"(b) An agency may deduct the regular and periodic dues of an association of management officials or supervisors from the pay of members of the association who make a voluntary allotment for that purpose, when the agency and the association agree in writing to this course of action. Such an allotment is subject to the regulations of the Civil Service Commission."

13. Section 24 is amended by deleting "(a)" after the section heading; and by deleting subsections (b), (c), and (d).

14. Section 25(a) is amended to read as follows:

"(a) The Civil Service Commission, in conjunction with the Office of Management and Budget, shall establish and maintain a program for the policy guidance of agencies on labor-management relations in the Federal service and periodically review the implementation of these policies. The Civil Service Commission shall continuously review the operation of the Federal labor-management relations program to assist in assuring adherence to its provisions and merit system requirements; implement technical advice and information programs for the agencies; assist in the development of programs for training agency personnel and management officials in labor-management relations; and, from time to time, report to the Council on the state of the program with any recommendations for its improvement."

The amendments made by this Order shall become effective ninety days from this date. Each agency shall issue appropriate policies and regulations consistent with this Order for its implementation.

Richard Nixon

THE WHITE HOUSE,
August 26, 1971.

[FR Doc.71-12734 Filed 8-27-71; 9:11 am]

Rules and Regulations

Title 7—AGRICULTURE

Chapter IX—Consumer and Marketing Service (Marketing Agreements and Orders; Fruits, Vegetables, Nuts), Department of Agriculture

[Lemon Reg. 495]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

§ 910.795 Lemon Regulation 495.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910; 36 F.R. 9061), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such lemons, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for lemons and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on August 24, 1971.

(b) *Order.* (1) The quantity of lemons grown in California and Arizona which may be handled during the period August 29 through September 4, 1971, is hereby fixed at 200,000 cartons.

(2) As used in this section, "handled", and "carton(s)" have the same meaning as when used in the said amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: August 26, 1971.

PAUL A. NICHOLSON,
Deputy Director, Fruit and Vegetable Division, Consumer and Marketing Service.

[FR Doc.71-12688 Filed 8-27-71; 8:53 am]

PART 925—FRESH PRUNES GROWN IN DESIGNATED COUNTIES IN IDAHO AND IN MALHEUR COUNTY, OREG.

Expenses and Rate of Assessment and Carryover of Unexpended Funds

On August 3, 1971, notice of rule making was published in the FEDERAL REGISTER (36 F.R. 14269) regarding proposed expenses, the related rate of assessment for the fiscal period July 1, 1971, through June 30, 1972, and carryover of unexpended funds from the fiscal period ended June 30, 1971, pursuant to the marketing agreement and Order No. 925 (7 CFR Part 925) regulating the handling of fresh prunes grown in designated counties in Idaho and in Malheur County, Oreg. This notice allowed interested persons 10 days during which they could submit data, views, or arguments pertaining to these proposals. None were submitted. This regulatory program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). After consideration of all relevant matters presented, including the proposals set forth in such notice which were submitted by the Idaho-Malheur County, Oreg., Fresh Prune Marketing Committee (established pursuant to said marketing agreement and order), it is hereby found and determined that:

§ 925.211 Expenses and rate of assessment.

(a) *Expenses.* Expenses that are reasonable and likely to be incurred by the Idaho-Malheur County, Oreg., Fresh Prune Marketing Committee during the fiscal period July 1, 1971, through June 30, 1972, will amount to $5,870.

(b) *Rate of assessment.* The rate of assessment for said period, payable by each handler in accordance with § 925.41, is fixed at $0.01 per one-half bushel (30-pound) containers or equivalent quantity of fresh prunes.

(c) *Reserve.* Unexpended assessment funds, in excess of expenses incurred during the fiscal period ended June 30, 1971, shall be carried over as a reserve in accordance with the applicable provisions of §§ 925.42 and 925.203.

It is hereby further found that good cause exists for not postponing the effective date hereof until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) shipments of the current crop of fresh prunes grown in the designated production area are now being made; (2) the relevant provisions of said marketing agreement and this part require that the rate of assessment herein fixed shall be applicable to all assessable prunes handled during the aforesaid period; and (3) such period began on July 1, 1971, and said rate of assessment will automatically apply to all such prunes beginning with such date.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: August 25, 1971.

PAUL A. NICHOLSON,
Deputy Director, Fruit and Vegetable Division, Consumer and Marketing Service.

[FR Doc.71-12679 Filed 8-27-71; 8:51 am]

PART 926—TOKAY GRAPES GROWN IN SAN JOAQUIN COUNTY, CALIFORNIA

Expenses and Rate of Assessment

On August 13, 1971, notice of proposed rule making was published in the FEDERAL REGISTER (36 F.R. 15125) regarding proposed expenses and the related rate of assessment for the period April 1, 1971, through March 31, 1972, pursuant to the marketing agreement, as amended, and Order No. 926, as amended (7 CFR Part 926), regulating the handling of Tokay grapes grown in San Joaquin County, California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601674). After consideration of all relevant matters presented, including the

proposals set forth in such notice which were submitted by the Industry Committee (established pursuant to said amended marketing agreement and order) it is hereby found and determined that:

§ 926.211 Expenses and rate of assessment.

(a) Expenses: Expenses that are reasonable and likely to be incurred by the Industry Committee during the period April 1, 1971, through March 31, 1972, will amount to $29,720.

(b) Rate of assessment: The rate of assessment for said period, payable by each handler in accordance with § 926.46, is fixed at two cents ($0.02) per standard package or equivalent quantity of grapes.

(c) Terms used in the amended marketing agreement and this part shall, when used herein, have the same meaning as is given to the respective term in said amended marketing agreement and this part.

It is hereby further found that good cause exists for not postponing the effective date hereof until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) shipments of Tokay grapes are now being made; (2) the relevant provisions of said marketing agreement and this part require that the rate of assessment fixed for a particular fiscal period shall be applicable to all assessable Tokay grapes from the beginning of such period; and (3) such period began on April 1, 1971, and the rate of assessment herein fixed will automatically apply to all assessable grapes beginning with such date.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: August 24, 1971.

FLOYD F. HEDLUND,
Director, Fruit and Vegetable Division, Consumer and Marketing Service.

Chapter X—Consumer and Marketing Service (Marketing Agreements and Orders; Milk), Department of Agriculture

[Docket No. AO–361–A2–RO2; Milk Order 30]

PART 1030—MILK IN THE CHICAGO REGIONAL MARKETING AREA

FINDINGS AND DETERMINATIONS

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings.* A public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Chicago Regional marketing area. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure (7 CFR Part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(b) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in section 8c(9) of the Act) or more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order as hereby amended; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area.

ORDER RELATIVE TO HANDLING

It is therefore ordered, That on and after the effective date hereof, the handling of milk in the Chicago regional marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, as follows:

1. In § 1030.10 paragraph (c) is revised to read as follows:

§ 1030.10 Plant.

* * * * *

(c) "Supply plant" means a plant from which a Grade A fluid milk product is shipped or transshipped during the month to another plant. Such supply plant shall be equipped with storage capacity sufficient to hold the largest quantity of fluid milk product either received in the plant or shipped from the plant as a single load during the month, except no storage capacity shall be maintained in a plant at which only milk moved from the farm in a tank truck which is transferred and commingled in another tank truck with other milk for transshipment.

2. In § 1030.11 paragraph (b) the text through subparagraph (1)(i) plus subparagraph (5) is revised as follows:

§ 1030.11 Pool plant.

* * * * *

(b) A supply plant from which the quantity of fluid milk products (except filled milk) and condensed skim milk shipped or transshipped during the months in accordance with subparagraphs (1) and (2) of this paragraph is not less than the percentages specified in subparagraph (4) of this paragraph subject to subparagraphs (5), (6), (7), and (8) of this paragraph of the volume of Grade A milk received from dairy farmers and cooperative associations pursuant to § 1030.13(e), including producer milk diverted under § 1030.16. Such receipts shall be reduced by the disposition of packaged fluid milk products described in subparagraph (3) of this paragraph.

(1) Shipped or transshipped as fluid milk products to and physically unloaded into:

(i) Pool plants pursuant to paragraph (a) of this section to the extent of the quantity determined pursuant to subparagraph (5) of this paragraph;

* * * * *

(5) For the purpose of determining the percentage specified in subparagraph (4) of this paragraph the quantity of fluid milk products moved pursuant to subparagraph (1)(i) of this paragraph shall be a net quantity assignable at pool distributing plants computed by subtracting from the quantity of fluid milk products received from a supply plant, but not to exceed such quantity, the amounts described in subdivisions (i) and (ii) of this subparagraph. If fluid milk products are received from more than one supply plant such net quantity assignable shall be prorated among such supply plants in accordance with the total receipts from such plants.

(i) The quantity of fluid milk products in the form of bulk milk and skim milk transferred from the distributing plant to pool supply plants plus any such bulk shipments to nonpool plants as Class II milk, other than pursuant to § 1030.41(b)(4), on the day of the receipt from the supply plant.

(ii) If milk is diverted from the distributing plant on the date of the receipt from the supply plant, the quantity so diverted, except any diversion of milk (not to exceed 3 days' production of any individual producer) made because of an emergency situation such as a breakdown of trucking equipment or hazardous road conditions shall not be subtracted if such emergency is reported to the market administrator.

* * * * *

3. Section 1030.15 is revised as follows:

§ 1030.15 Producer.

"Producer" means any person who produces milk in compliance with the Grade A inspection requirements of a duly constituted health authority and whose milk is received at a pool plant or diverted pursuant to § 1030.16 except:

(a) A dairy farmer who is a government and has nonproducer status for the month pursuant to § 1030.9;

(b) A producer handler as defined in any order (including this part) issued pursuant to the Act; and

(c) A dairy farmer who is defined as a producer under the terms of another order issued pursuant to the Act whose milk is received at a pool plant as a diversion from an other order plant and is assigned pursuant to § 1030.46(a)(4)(ii) and the corresponding step of § 1030.46(b).

4. Section 1030.16 is revised as follows:

§ 1030.16 Producer milk.

"Producer milk" means milk produced by producers which is:

(a) Received at a pool plant directly from producers, by being physically unloaded into processing facilities or a storage tank (including another tank truck in the case of a reload facility), and the shrinkage of skim milk and butterfat in milk received from producers' farms which was not unloaded in a pool plant. Such direct receipts from producers shall include the portion of a tank truck load of milk unloaded in a pool plant in the case where a portion of such load was first unloaded at another pool plant or diverted to a nonpool plant. The quantity of milk so received at each such plant shall be prorated over the total quantity of milk picked up at each producer's farm.

(b) Received by a handler pursuant to § 1030.13(h).

(c) Received at a pool plant from a cooperative association handler pursuant to § 1030.13(e). The utilization value of such milk at class prices shall be included in the receiving handler's net pool obligation pursuant to § 1030.70;

(d) Received by a cooperative association as a handler pursuant to § 1030.13(e) to the extent of the shrinkage of skim milk and butterfat received from producers' farms which was not received in a pool plant under paragraph (c) of this section. In applying §§ 1030.53 and 1030.82 such skim milk and butterfat shall be deemed to be received at the location of the pool plant to which delivery is normally made.

(e) Diverted from a pool plant to a nonpool plant subject to the conditions specified in this paragraph. Milk shall be eligible for diversion as producer milk only if the person producing such milk had delivered milk as producer milk to a pool plant prior to the diversion, and until the end of the first full month after his milk is first received in a pool plant the quantity of such producer's milk diverted shall not exceed the quantity received in a pool plant. Milk picked up at a producer's farm in a tank truck, to the extent it is unloaded at a nonpool plant, shall be subject to the conditions specified in this paragraph and if the tank truck contains milk from more than one producer the quantity subject to the conditions specified in this paragraph shall be prorated over the total quantity of milk picked up at each producer's farm. Milk so diverted shall be considered as received at the pool plant from which diverted in calculating the percentages specified in § 1030.11. The location price differentials pursuant to § 1030.82 shall be based on the zone location of the nonpool plant(s) where such milk is physically received, except in the case of a distributing plant, diverted milk of a producer shall be priced at the location of such plant if during the month not more than 4 days' production of such producer is diverted, or if the diverted milk is part of a tank truckload of milk that exceeds the milk storage capacity in such distributing plant. Diverted milk shall be limited as follows:

(1) Milk of a producer diverted for the account of the operator of the plant from which such milk is diverted in any of the months August through December which does not exceed the quantity of such producer's milk received in the pool plant;

(2) Milk of a producer diverted by a cooperative as a handler pursuant to § 1030.13(d) may not in any of the months August through December exceed the quantity of such producer's milk received in the pool plant from which it was diverted. To the extent that milk diverted by a cooperative as a handler during any month would result in the plant failing to qualify as a pool plant under § 1030.11 such diverted milk shall not be producer milk;

(3) Milk diverted to an other order plant shall be producer milk pursuant to this section only if it is not producer milk under such other order; and

(4) Milk of a producer diverted by a handler who fails to report the information required pursuant to § 1030.31(b)(4) shall not be considered producer milk pursuant to this paragraph.

5. In § 1030.30 subparagraph (3) of paragraph (a) is revised to read as follows:

§ 1030.30 Reports of receipts and utilization.

* * *

(a) * * *

(3) Fluid milk products received from pool plants of other handlers (or other pool plants, as applicable), including a separate statement of the net receipts from each supply plant computed pursuant to § 1030.11(b)(5), except during the months of January through July no such separate statement need be made if receipts from supply plants are from only plants that were pool plants during the prior months of August through December;

* * * * *

6. The cross references to paragraphs (a–1), (b), (c), and (d) of § 1030.16 are changed to paragraphs (b), (c), (d), and (e), respectively, wherever they appear throughout the order (namely in §§ 1030.31(b)(3), 1030.41(b), 1030.45(c), 1030.70, and 1030.88).

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: October 1, 1971.

Signed at Washington, D.C., on August 25, 1971.

RICHARD E. LYNG,
Assistant Secretary.

Chapter XIV—Commodity Credit Corporation, Department of Agriculture

SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

PART 1427—COTTON

Subpart—Seed Cotton Loan Program Regulations

This subpart issued by the Commodity Credit Corporation contains the terms and conditions under which loans on seed cotton will be made available. It is impracticable to follow the notice of proposed rule making procedure with respect to this subpart because 1971-crop cotton is being harvested and it is essential that the program provided in this subpart be put into effect with respect to such cotton at the earliest possible time. Therefore, this subpart is being issued without following such proposed rule making procedure and shall be effective upon publication in the FEDERAL REGISTER (8–28–71).

AUTHORITY: The provisions of this subpart issued under secs. 4, 5, 62 Stat. 1070, as amended; 15 U.S.C. 714b and c.

§ 1427.160 General statement.

The regulations in this subpart, including any amendments hereto, set forth the requirements with respect to recourse loans on eligible upland and American-Pima seed cotton of the 1971 crop. Recourse loans will be made available by CCC through county offices to eligible cotton producers and approved cotton cooperative marketing associations at approved locations.

§ 1427.161 Administration.

(a) *Responsibility.* The Commodity Loan and Service Division Agricultural Stabilization and Conservation Service, will administer the provisions of this subpart under the general supervision and direction of the Deputy Administrator, State and County Operations, Agricultural Stabilization and Conservation Service, in accordance with program provisions and policy determined by the CCC Board of Directors and the President or Executive Vice President, CCC. In the field, the program in this subpart will be administered by the Agricultural Stabilization and Conservation State and county committees, and the New Orleans office.

(b) *Limitation of authority.* County executive directors, State and county committees, the New Orleans office, and employees thereof, do not have authority to waive or modify any of the provisions of the regulations in this subpart.

(c) *State committee.* The State commitee may take any action authorized or required by the regulations in this subpart to be taken by the county committee which has not been taken by such committee. The State committee may also (1) correct or require a county committee to correct any action taken by such county committee which is not in accordance with the regulations in this subpart, or (2) require a county committee to withhold taking any action which is not in accordance with the applicable regulations in this subpart.

(d) *Executive Vice President, CCC.* No delegation herein to a State or county committee or the New Orleans office shall preclude the President or Executive Vice President, CCC, or his designee, from determining any question arising under the regulations in this subpart or from reversing or modifying any determination made by a State or county committee or the New Orleans office.

§ 1427.162 Availability of loans.

(a) *Locations.* Loans on eligible cotton shall be available only at locations where past experience and conditions make it feasible, subject to the approval of the President or Executive Vice President, CCC. A ginner who desires approval and desires to participate in the program shall submit an application for a determination of eligibility. An application form related questionnaire, and copies of these regulations shall be obtained from the Commodity Loan and Service Division, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture. Such applications must be filed not later than October 1, 1971, or by such later date as the President or Executive Vice President, CCC, may authorize to alleviate hardship.

(b) *Period of availability.* Loans will be available from the beginning of harvest through March 31, 1972.

§ 1427.163 Disbursement of loans.

(a) *Where to request loans.* Producers shall request loans at the local county office for the county where the cotton is stored.

(b) *Disbursement of loans.* Disbursement of each loan will be made by the county office of the county in which the cotton is stored by means of drafts drawn on CCC by the county office. Service charges shall be deducted from the loan proceeds. The producer or his agent shall not present the loan documents for disbursement unless the cotton is in existence and in good condition: If the cotton is not in existence and in good condition at the time of disbursement, the producer shall immediately return the draft issued in payment of the loan or, if the draft has been negotiated, shall promptly return the proceeds.

§ 1427.164 Eligible producer.

(a) *Producer.* An eligible producer is any individual, partnership, corporation, association, trust, estate, or other legal entity, a State or political subdivision thereof, or an agency of such State or political subdivision producing eligible upland or eligible American-Pima seed cotton in the capacity of landowner, landlord, tenant, or sharecropper. If eligible seed cotton is produced on a farm by a landlord and his share tenant or sharecropper, a loan may be obtained only as follows:

(1) If the seed cotton is divided among the producers entitled to share in such cotton, each landlord, tenant, or sharecropper may obtain a loan on his separate share.

(2) If the seed cotton is not divided, all producers having a share in the seed cotton may obtain a joint loan on such cotton.

(b) *Estates and trusts.* A receiver of an insolvent debtor's estate, an executor or an administrator of a deceased person's estate, a guardian of an estate of a ward or an incompetent person, and trustees of a trust estate shall be considered to represent the insolvent debtor, the deceased person, the ward or incompetent person, and the beneficiaries of a trust, respectively, and the production of the receiver, executor, administrator, guardian, or trustee shall be considered to be the production of the person he represents. Loan documents executed by any such person will be accepted by CCC only if they are legally valid and such person has the authority to sign the applicable documents.

(c) *Eligibility of minors.* A minor who is otherwise an eligible producer shall be eligible for a loan only if he meets one of the following requirements: (1) The right of majority has been conferred on him by court proceedings or by statute; (2) a guardian has been appointed to manage his property and the applicable loan documents are signed by the guardian; (3) any note signed by the minor is cosigned by a financially responsible person; or (4) a bond is furnished under which a surety guarantees to protect CCC from any loss incurred for which the minor would be liable had he been an adult.

(d) *Approved cooperative.* A cooperative marketing association which is approved by the Executive Vice President, CCC, pursuant to Part 1425 of this chapter, to obtain loan(s) on a crop of cotton, may obtain loans on eligible production of such crop on behalf of its members. The term "producer" as used in this subpart and on applicable forms shall refer both to an eligible producer as defined in paragraphs (a), (b), and (c) of this section and to an approved cooperative marketing association unless the content otherwise requires.

§ 1427.165 Eligible seed cotton.

Upland and American-Pima seed cotton produced by eligible producers is eligible cotton if it meets the following requirements:

(a) Such cotton must be tendered for a loan within the availability period of § 1427.162 and must be cotton of the 1971 crop.

(b) Upland cotton must have been produced by a "cooperator" as defined in section 408(b) of the Agricultural Act of 1949, as amended, on a farm determined to be in compliance with the set aside payment requirements of the Upland Cotton Program as prescribed in Parts 718, 722, and 791 of this title and any amendments thereto. American-Pima cotton must have been produced by a "cooperator" as defined in section 408(b) of the Agricultural Act of 1949, as amended on a farm determined to be in compliance with price support payment requirements of the Extra Long Staple Cotton Program as prescribed in Parts 718, 722, and 791 of this title and any amendments thereto.

(c) Such cotton must be in existence and in good condition.

(d) The producer tendering the cotton for loan must have the legal right to pledge it as security for a loan.

(e) If such cotton was produced on land owned by the Federal Government pursuant to a lease, permit, or other right of possession, it must not have been produced in violation of the provisions thereof. Such cotton must not have been produced on land owned by the Federal Government which is being occupied without lease, permit, or right of possession.

(f) The producer tendering such cotton must not have previously sold and repurchased such cotton or placed it under CCC loan and redeemed it.

(g) The beneficial interest in the cotton must be in the producer tendering the cotton for a loan and must have always been in him or in him and a former producer whom he succeeded before it was harvested. To meet the requirements of succession to a former producer, the right, responsibilities, and interest of the former producer with respect to the farming unit on which the cotton was produced shall have been substantially assumed by the person claiming succession. Mere purchase of the crop prior to harvest without acquisition of any additional interest in the farming unit shall not constitute succession. The county committee shall determine whether the requirements with respect to succession have been met. A producer shall not be considered to have divested himself of the beneficial interest in the cotton if he enters into a contract to sell, or gives an option to buy his cotton, if, under the contract or option, he retains control and risk of loss of and title to the cotton, and retains control of its production. If price support is made available through an approved cooperative marketing association, the beneficial interest in the cotton must always have been in the producer members who delivered the cotton to the approved cooperative or its member cooperatives or must always have been in them and former producers whom they succeeded before the cotton was harvested. Cotton so delivered to a cooperative marketing association shall not be eligible for price support if the producer members who delivered the cotton to the cooperative or its member cooperatives do not retain the right to share in the proceeds from the cotton as provided in Part 1425 of this chapter.

(h) If the person tendering the cotton for a loan is a landowner, landlord, tenant, or sharecropper, the cotton must be his separate share of the crop and must not have been acquired by him directly or indirectly from a landowner, landlord, tenant or sharecropper, or have been received in payment of fixed or standing rent.

(i) The cotton must be stored in identity preserved lots in approved storage meeting requirements of § 1427.171.

§ 1427.166 Insurance.

The cotton must be insured at the full market value against loss or damage by fire, lightning, windstorm, cyclone, and tornado.

§ 1427.167 Liens.

If there are any liens or encumbrances on the cotton, waivers that will fully protect the interest of CCC must be obtained even though the liens or encumbrances are to be satisfied from the loan proceeds, except in the case of approved cooperatives who agree to hold CCC harmless from liability to prior lienholders. In lieu of waiving his prior lien on the cotton tendered as security for a loan, a lienholder may execute a Lienholder's Subordination Agreement (Form CCC-864) with CCC in which he subordinates his security interest to the rights of CCC in the cotton. A fraudulent representation as to prior liens or otherwise will render the producer liable under the civil frauds statutes and subject him and any other person who causes the fraudulent representation to be made to criminal prosecution under the provisions of the Commodity Credit Corporation Charter Act.

§ 1427.168 Forms, authorizations and other documents.

The documents to be delivered by producers in connection with each loan shall be as follows: A Note, Chattel Mortgage and Security Agreement, any required lien waiver or subordination agreement, and such other documents as required by CCC.

§ 1427.169 Loan rate and quality.

(a) *Loan rate.* The loan rate applicable to each quality of seed cotton placed under loan shall be the loan rate as specified in the applicable crop supplement to this Part 1427, Cotton Loan Program Regulations for that quality of cotton in the county where stored.

(b) *Quality.* The quality to be used in determining the loan rate shall be the estimated quality of lint cotton in each lot of seed cotton as determined by the county office, except that if a control sample of the lot of cotton is classed by a USDA Board of Cotton Examiners the quality for the lot shall be the quality shown on the Form 1 or Form 3 classification card issued for the control sample.

§ 1427.170 Quantity for loan.

(a) *Quantity.* The quantity of lint cotton in each lot of seed cotton tendered for loan shall be determined by the county office by multiplying the weight or estimated weight of the seed cotton by the lint turnout factor determined in accordance with paragraph (b) of this section.

(b) *Lint turnout factor.* The lint turnout factor for any lot of seed cotton shall be the percentage determined by the county committee representative during the initial inspection of the lot. If a control portion of the lot is weighed and ginned, the lint turnout factor determined for the portion of cotton ginned will be used for the lot. If a control portion is not weighed and ginned, the lint turnout factor shall not exceed 32 percent for machine picked cotton and 22 percent for machine stripped cotton.

(c) *Maximum quantity for loan.* Loans shall not be made on more than a percentage established by the county committee or the quantity of lint cotton determined as provided in this section. If the seed cotton is weighed, the percentage to be used shall not be more than 95 percent. If the quantity is determined by measurement, the percentage to be used shall not be more than 90 percent. The percentage to be used in determining the maximum quantity for any loan may be reduced below such percentages by the county committee when determined necessary to protect the interests of CCC on the basis of one or more of the following risk factors: (1) Condition or suitability of the storage site or structure, (2) condition of the cotton, (3) location of the storage site or structure, and (4) other factors peculiar to individual farms or producers which relate to the preservation or safety of the loan collateral. Loans may be made on a lower percentage basis at the producer's request.

§ 1427.171 Approved storage.

Approved storage shall consist of storage located on or off the producer's farm (excluding public warehouses) which is determined by a county committee representative to afford adequate protection against loss or damage and which is located within a reasonable distance, as determined by CCC, of an approved gin. If the cotton is stored off the producer's farm, the producer must furnish satisfactory evidence that he has the authority to store the cotton on such property and that the owner of such property has no lien for such storage against the cotton.

§ 1427.172 Loan service fee.

A producer shall pay a loan service of $8 for each loan disbursed. This fee is not refundable.

§ 1427.173 Interest rate.

Loans shall bear interest at the same rate as that announced for form A cotton loans in a separate notice published in the FEDERAL REGISTER.

§ 1427.174 Restrictions in use of agents.

A producer shall not delegate to any person (or his representative) who has any interest in storing, processing, or merchandising any seed cotton eligible for loans under these regulations, authority to exercise on behalf of the producer any of the producer's rights or privileges under this program or any note, chattel mortgage and security agreement or other instrument executed in obtaining loans under such program, unless the person (or his representative) to whom authority is delegated is serving in the capacity of a farm manager for the producer. Any delegation of authority given in violation of this paragraph shall be without force and effect and shall not be recognized by CCC.

§ 1427.175 Setoffs.

(a) *Facility and drying equipment loans.* If any installment or installments on any loan made by CCC on farm storage facilities or drying equipment are due and payable under the provisions of the note evidencing such loan out of any amount due the producer under the regulations in this subpart, the amount due the producer, after deduction of applicable fees and charges and amounts due prior lienholders, shall be applied to satisfy the amounts due and payable on such installment(s).

(b) *Producers listed on county claim control record.* If the producer is indebted to CCC or to any other agency of the United States and such indebtedness is listed on the county claim control record, amounts due the producer under the regulations in this subpart, after deduction of amounts due and payable on farm storage facilities or drying equipment and other amounts provided in paragraph (a) of this section, shall be applied as provided in the Secretary's Setoff Regulations, Part 13 of this title, to such indebtedness.

(c) *Producer's right.* Compliance with the provisions of this section shall not deprive the producer of any right he would otherwise have to contest the justness of the indebtedness involved in the setoff action, either by administrative appeal or by legal action.

§ 1427.176 Loss or damage to the cotton.

The producer is responsible for any loss in quantity or quality of the cotton under loan.

§ 1427.177 Maturity.

Loans on seed cotton are due and payable on May 31, 1972, or upon such

earlier date as CCC may make written demand for payment in order to be in a position to conform to State or local quarantine regulations or for other reasons.

§ 1427.178 Settlement.

(a) *Release of chattel mortgage.* The chattel mortgage shall not be released until the loan has been satisfied in full. After satisfaction of a loan, the county executive director shall release the chattel mortgage.

(b) *Repayment of loan.* A producer may, at any time prior to May 31, 1972, obtain release of all or any part of the loan cotton by paying the amount of the loan thereon, plus interest and charges, to CCC.

(c) *Removal of loan cotton.* A producer shall not remove from storage any cotton covered by a chattel mortgage until he has received prior written approval from the county committee for removal of such cotton. Any such approval shall be subject to the terms and conditions set out in the approval form. If a producer obtains such approval, he may remove such cotton from storage, have it ginned, and sell the seed cotton or the lint cotton and cottonseed obtained therefrom. If the seed cotton is removed from storage, the loan, interest, and charges thereon must be satisfied not later than 30 days after the date the county office authorizes the removal action or the loan maturity, whichever is earlier. If the seed cotton or lint cotton is sold, the loan, interest, and charges must be satisfied immediately. A producer (except a cooperative) may obtain a form A loan on the lint cotton, but the loan, interest, and charges on the seed cotton must be satisfied out of the proceeds of the form A loan. An approved cooperative must repay the seed cotton loan, interests, and charges before pledging the cotton for a form G loan. Any such removal from storage shall not be deemed to constitute a release of CCC's security interest in the cotton or to release the producer from liability for the loan, interest, and charges if full payment of such amount is not received by the county office.

(d) *Cotton going out of condition.* If, either before or after maturity the producer discovers that the cotton is going out of condition or is in danger of going out of condition, the producer shall immediately so notify the county office and confirm such notice in writing. If the county committee determines that the cotton is going out of condition or is in danger of going out of condition, the county committee will call for repayment of the loan on or before a specified date. If the producer does not repay the loan or have the cotton ginned and obtain a form A loan on the lint cotton produced therefrom within the period as specified by the county committee, the cotton shall be considered abandoned.

(e) *Need for removal from storage.* If the producer has control of the storage site and if he subsequently loses control of the storage site or there is danger of flood or damage to the cotton or storage structure making continued storage of the cotton unsafe, the producer shall immediately either repay the loan or move the cotton to the nearest approved gin for ginning and shall, at the same time, inform the county office. If the producer does not do so, the cotton shall be considered abandoned.

§ 1427.179 Fraud and unlawful disposition.

The making of any fraudulent representation by a producer in the loan documents, in obtaining a loan, or in connection with settlement, or the unlawful disposition of any portion of the cotton by him, shall render the producer subject to criminal prosecution or action under civil frauds statutes under Federal law.

§ 1427.180 Foreclosure.

Any seed cotton pledged to CCC as security for loan which is abandoned or which has not been removed from storage by loan maturity may be removed from storage by CCC and ginned and the resulting lint cotton warehoused for the account of CCC. The lint cotton and cottonseed may be sold, at such time, in such matter, and upon terms as CCC may determine at public or private sale. CCC may become the purchaser of the whole or any part of such cotton and cottonseed. If the proceeds are less than the amount due on the loan (including interest, ginning charges, and any other charges incurred by CCC), the producer shall be liable for such difference. Any overplus remaining from the proceeds received therefrom, after deducting from such proceeds the amount of the loan, interest, ginning charges, and any other charges, shall be paid to the producer or his personal representative without right of assignment to or substitution of any other person.

§ 1427.181 Definitions.

As used in the regulations in this subpart, and in all instructions, forms, and documents in connection therewith, the words and phrases listed in this section shall have the meaning assigned to them herein unless the content or subject matter otherwise requires:

(a) *General.* The following words or phrases: "Person", "State committee", "State executive director", "county committee", "county executive director", and "farm", respectively, shall each have the same meaning as the definitions of such term in the Regulations Governing Reconstitution of Farms, Allotments, and Bases, Part 719 of this title and any amendments thereto.

(b) *CCC.* The term "CCC" shall mean Commodity Credit Corporation.

(c) *New Orleans office.* The term "New Orleans office" shall mean the New Orleans Agricultural Stabilization and Conservation Service Commodity Office, 120 Marais Street, New Orleans, LA 70112.

(d) *County committee.* The term "county committee" shall mean only the county committee and not its representative.

(e) *County office.* The term "county office" shall mean the Agricultural Stabilization and Conservation county office.

(f) *Chattel mortgage.* The term "chattel mortgage" means any security instrument which secures a loan under this subpart.

(g) *Charges.* The term "charges" means all fees, costs, and expenses incident to insuring, carrying, handling, storing, ginning, conditioning, and marketing the cotton and cottonseed and otherwise protecting the interest in the loan collateral of CCC or the producer.

(h) *Representative of the county committee and county committee representative.* The terms "representative of the county committee" and "county committee representative" means a member of the county committee, the county executive director, or a person designated by the county executive director to act in his behalf.

(i) *Seed cotton.* The term "seed cotton" shall mean cotton which has not passed through the ginning process.

(j) *Lint cotton.* The term "lint cotton" shall mean cotton which has passed through the ginning process.

Effective date: Upon publication in the FEDERAL REGISTER (8-28-71).

Signed at Washington, D.C., on August 23, 1971.

KENNETH E. FRICK,
Executive Vice President,
Commodity Credit Corporation.

Title 12—BANKS AND BANKING

Chapter II—Federal Reserve System

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Reg. Y]

SIMPLIFICATION OF PROCEDURES

The Board of Governors has under continuing review its procedures for the discharge of its supervisory responsibilities. This is imperative in the area of bank holding companies, where the number of applications for the Board's approval of the formation of bank holding companies has increased substantially following the 1970 amendments to the Bank Holding Company Act. The Board is also experiencing an increase in the number of requests for its approval of nonbanking activities pursuant to section 4(c)(8) of the Act.

In the Board's judgment, one-bank holding company formations normally present no significant issues. The Board believes that the questions that arise can generally be handled by the Reserve Bank of the district in which the holding company's bank is located, and that, because of the absence of significant issues, publication of a formal order and statement in one-bank holding company formation cases generally serves no useful purpose. Accordingly, the Board has delegated the bulk of its authority to approve the formation of one-bank holding companies to the Reserve Banks and has dispensed with the publication of an order and statement in cases approved by a Reserve Bank.

In May, the Board adopted procedures under which holding companies may engage in activities that the Board has determined, on the basis of a rulemaking proceeding under section 4(c)(8) of the act, are closely related to banking. Those procedures differ depending on whether the activity is to be engaged in de novo or through acquisition of a going concern. The former requires a holding company to publish notice of its proposal in a local newspaper; the latter requires a formal application, in addition to such a notice.

The Board has reexamined those procedures in the light of suggestions made during the course of its recent rulemaking proceedings to implement section 4(c)(8). It has concluded that the procedures adopted in May are unnecessary when the balance of the public interest factors the Board is required to consider in approving holding company activities or acquisitions on the basis of section 4(c)(8) will usually be favorable. Consistently with that view, the Board has exempted from those procedures the following activities, subject to certain conditions:

(1) Operating a finance company with assets of less than $10 million.

(2) Engaging in activities the Board has determined are closely related to banking that are shifted from within the structure of a bank in the holding company system to the holding company or a nonbanking subsidiary.

(3) Engaging de novo in all kinds of insurance agency activities the Board has recently determined to be closely related to banking, except in cases where the holding company must demonstrate that the community in which the insurance is to be sold has inadequate insurance agency facilities.

These exemptions are set forth in § 222.4(b)(3) below and become effective September 1, 1971. For supervisory reasons and to assure that there is no misunderstanding with respect to the scope of activities that may be engaged in without complying with the procedures of § 222.4(b)(1) and (2), a holding company is required to notify its Reserve Bank 45 days before shifting assets from a bank or engaging in insurance agency activities.

The Board's action with respect to insurance agency activities is based on its experience under the provisions of section 4(c)(8) before the 1970 amendments, its conclusion that the Congress by the 1970 amendments did not place into question the propriety of the Board's earlier determinations, its view of its authority with respect to the public interest factors of the present law as indicated above, the fact that the approach of its recent determination relating to insurance agency activities as closely related to banking is similar to its approach under the former section 4(c)(8), and its evaluation of the record of the recent rulemaking proceeding relating to insurance agency activities.

To accomplish the actions described above, the Board has amended its regulations as follows:

PART 222—BANK HOLDING COMPANIES

1. Section 222.3(b) of Regulation Y is amended to read as follows:

§ 222.3 Acquisition of bank shares or assets.

* * * * *

(b) *Action on applications.* Applications under this section are processed in accordance with the procedures specified in the Act and in § 262.3 of the Board's rules of procedure (Part 262 of this chapter). Any application for the Board's approval of the formation of a company that controls only one bank may be consummated 45 days after the company has been informed by its Reserve Bank that its application has been accepted, unless the company is notified to the contrary within that time or is permitted to consummate the transaction at an earlier date.

* * * * *

2. Section 222.4(b) is amended by adding subparagraph (3) to read as follows:

§ 222.4 Nonbanking activities.

* * * * *

(b) * * *

(3) *Simplified procedures.* (i) The procedures of subparagraphs (1) and (2) of this paragraph shall not apply with respect to a holding company or a subsidiary thereof engaging in the following:

(*a*) Making, acquiring, or servicing loans or other extensions of credit for personal, family, or household purposes if the commencement or expansion of such activity does not involve an acquisition of assets of $10 million or more (or the acquisition of shares of a company having such assets) except that (*1*) no holding company may acquire more than $50 million in assets in any calendar year under the provisions of this clause, (2) within 30 days after consummation of such an acquisition, the holding company informs its Reserve Bank of the acquisition (in substantially the same form as F.R. Y-4B), and (3) whenever necessary to effectuate the purposes of the Act, the Board may require suspension or discontinuation of any action taken, or divestiture of any acquisition made, on authority of this provision and may withdraw such authority with respect to any particular holding company;

(b) Engaging in activities described in paragraph (a) of this section that are shifted from a bank in the holding company system and were engaged in by the bank either de novo or as a result of a merger transaction described in and approved by a Federal supervisory agency pursuant to section 18(c) of the Federal Deposit Insurance Act (12 U.S.C. 1828(c)), 45 days after the holding company has informed its Reserve Bank of its proposal to shift such activity (in substantially the same form as F.R. Y-4B), unless the company is notified to the contrary within that time or is permitted to consummate the transaction at an earlier date.

(ii) The procedures of subparagraph (1) of this paragraph shall not apply with respect to a holding company or a subsidiary thereof engaging de novo as insurance agent or broker with respect to the types of insurance listed in subdivisions (i), (ii), and (iii)(*a*) of paragraph (a)(9) of this section, 45 days after the holding company has informed its Reserve Bank of its proposal to engage in such activity (in substantially the same form as F.R. Y-4B), unless the company is notified to the contrary within that time or is permitted to consummate the transaction at an earlier date.

* * * * *

PART 262—RULES OF PROCEDURE

3. Section 262.3(f)(1) and (4) of the rules of procedure is amended to read as follows:

§ 262.3 Applications.

* * * * *

(f) *Bank holding company and merger applications.* * * *

(1) The Board issues each week a list that identifies holding company and merger applications received during the preceding week. Notice of receipt of each holding company application is published in the FEDERAL REGISTER.

* * * * *

(4) Except with respect to actions taken pursuant to delegated authority, the Board's action on an application is embodied in an order that indicates the votes of members of the Board and (i) states the reasons for the Board's action or (ii) is accompanied by a separate Statement of the reasons for the Board's action. Both the order and any accompanying statement are released to the press. Normally, the statement is issued at the time of issuance of the order. Where that is practicable, the statement is issued as promptly as possible. Each such order is published in the FEDERAL REGISTER, and each order and statement are published in the Federal Reserve Bulletin.

* * * * *

PART 265—RULES REGARDING DELEGATION OF AUTHORITY

4. Section 265.2 of the Rules Regarding Delegation of Authority is amended by adding paragraph (f)(22) to read as follows:

§ 265.2 Specific functions delegated to Board employees and Federal Reserve Banks.

* * * * *

(f) Each Federal Reserve Bank is authorized, as to member banks or other indicated organizations headquartered in its district:

* * * * *

(22) Under the provisions of section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842), to approve the

acquisition by a company of a controlling interest in the voting shares of one bank, if (i) no objection to the proposed acquisition has been made by the bank's supervisory authority, (ii) no significant policy issue is raised by the proposal as to which the Board apparently has not had an opportunity to express its views, and (iii) neither the holding company nor any of its subsidiaries or affiliates is engaged in any activities other than those specifically permissible for bank holding companies by either the Act or Part 222 of this chapter (Regulation Y).

The provisions of section 553 of title 5, United States Code, relating to notice and public participation and to deferred effective dates, were not followed in connection with the adoption of these amendments. The Board found that the issues presented were adequately explored in conjunction with its notice of proposed rule making published in the FEDERAL REGISTER on January 29, 1971 (36 F.R. 1430) and concluded that further proceedings relating to this matter would serve no useful purpose.

Effective date. These amendments are effective as to applications filed with the Reserve Banks on or after September 1, 1971.

By order of the Board of Governors, August 19, 1971.

[SEAL] NORMAND BERNARD, *Assistant Secretary.*

Chapter V—Federal Home Loan Bank Board

SUBCHAPTER B—FEDERAL HOME LOAN BANK SYSTEM

[No. 71-841]

PART 526—LIMITATIONS ON RATE OF RETURN

PART 531—STATEMENTS OF POLICY

Certificate Accounts

AUGUST 20, 1971.

Resolved, that the Federal Home Loan Bank Board considers it advisable to amend Parts 526 and 531 of the regulations for the Federal Home Loan Bank System (12 CFR Parts 526, 531) for the purpose of (1) removing the percentage-of-savings limitations on certificate accounts of less than $100,000, and (2) adding a statement of policy concerning distribution of certificate account maturities. Accordingly, on the basis of such consideration and for such purposes, the Federal Home Loan Bank Board hereby amends said Parts 526 and 531 as follows, effective August 28, 1971:

1. Part 526 is amended by revoking paragraph (b) of § 526.5 and by revising subparagraphs (2) and (3) of paragraph (a) to read as follows:

§ 526.5 Maximum rate of return payable on certificate accounts of less than $100,000.

(a) *Maximum rates.* • • •

(2) *Maximum rate of 5.75 percent.* Except as is otherwise provided in this section or § 526.5–1, a member institution may pay a return at a rate not in excess of 5.75 percent per annum on any certificate account of $1,000 or more having a fixed or minimum term or qualifying period of not less than 1 year.

(3) *Maximum rate of 6 percent.* Except as is otherwise provided in this section or § 526.5–1, a member institution may pay a return at a rate not in excess of 6 percent per annum on any certificate account of $5,000 or more having a fixed or minimum term or qualifying period of not less than 2 years.

• • • • • •

(b) [Revoked]

2. Part 531 is amended by adding a new § 531.7, immediately after § 531.6 thereof, to read as follows:

§ 531.7 Distribution of certificate account maturities.

(a) This is a statement of the Federal Home Loan Bank Board's policy concerning distribution of certificate account maturities. Section 526.5 of this subchapter no longer contains any percentage-of-savings limitations on certificate accounts of less than $100,000. Such limitations were removed by the Board, effective August 28, 1971, to provide for greater flexibility in the management of savings by member institutions. However, member institutions should continue to avoid having substantial amounts of certificate accounts maturing within a relatively short period of time.

(b) In conducting examinations of member institutions whose accounts are insured by the Federal Savings and Loan Insurance Corp., the Board's examiners will review the maturity structure of each institution's certificate accounts. Supervisory action may be taken if the institution has an undue "bunching" of certificate account maturities in any month. Generally, there will be no supervisory objection if the amount of certificate accounts maturing in any month does not exceed 5 percent of the institution's total savings accounts outstanding at the end of its most recent distribution period for regular accounts.

(c) Since a substantial amount of certificate accounts will mature during the first quarter of 1972, member institutions should consider the advisability of entering into agreements with holders of such certificate accounts, prior to maturity thereof, to extend such accounts for varying time periods. However, member institutions should bear in mind that the time period from the date of any such extension to the extended maturity date must equal or exceed the minimum terms or qualifying periods specified for such accounts in § 526.5(a) of this subchapter.

(Sec. 5B, 47 Stat. 727, as added by sec. 4, 80 Stat. 824, as amended; sec. 17, 47 Stat. 736, as amended; 12 U.S.C. 1425b, 1437. Reorg. Plan No. 3 of 1947, 12 F.R. 4981, 3 CFR, 1943–48 Comp., p. 1071)

Resolved further that, since affording notice and public procedure on the above amendment would delay it from becoming effective for a period of time and since it is in the public interest that the amendment become effective as soon as possible, the Board hereby finds that notice and public procedure thereon are contrary to the public interest under the provisions of 12 CFR 508.11 and 5 U.S.C. 553(b); and, since the amendment relieves restriction, publication of such amendment for the 30-day period specified in 12 CFR 508.14 and 5 U.S.C. 553(d) prior to the effective date thereof is not required; and the Board hereby provides that such amendment shall become effective as hereinbefore set forth.

By the Federal Home Loan Bank Board.

[SEAL] EUGENE M. HERRIN, *Assistant Secretary.*

[FR Doc.71-12635 Filed 8-27-71;8:49 am]

Title 14—AERONAUTICS AND SPACE

Chapter I—Federal Aviation Administration, Department of Transportation

[Docket No. 10465; Amdt. 39-1281]

PART 39—AIRWORTHINESS DIRECTIVES

S.N.I.A.S. Sud Model S.E. 210, MK. VI–R "Caravelle" Airplanes

A proposal to amend Part 39 of the Federal Aviation regulations to include an airworthiness directive requiring installation of a fluid overheat detection system in the Green and Blue hydraulic system on S.N.I.A.S. Sud Model SE.210 MK. VI–R "Caravelle" airplanes was published in the FEDERAL REGISTER 35 F.R. 12213.

Interested persons have been afforded an opportunity to participate in the making of the amendment. The one comment received in response to the notice of proposed rule making has been fully considered. The commentator questioned the necessity for the issuance of an AD in view of its satisfactory service experience with its airplane, and stated that nuisance warnings have been experienced on some airplanes in which the proposed detection systems have been installed. Notwithstanding the satisfactory service experience of the commentator, an undetected overheat condition can occur and the FAA has determined that the AD is necessary. With respect to the nuisance warnings, this problem has been corrected by raising the setting of the overheat sensor to 90° C. This setting is incorporated in Revision 10 to Sud-Caravelle Service Bulletin No. 29–70, and the Service Bulletin reference in the AD has been changed accordingly.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (14 CFR 11.89), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

SOCIETE NATIONAL INDUSTRIELLE AEROSPATIALE (S.N.I.A.S.). Applies Sud Model SE.210, MK. VI–R "Caravelle" airplanes.

To prevent a possible fire due to unnoticed overheating of a hydraulic system, within the next 500 hours' time in service after the effective date of this AD, unless already accomplished, incorporate S.A. Modification 1262 by installing a Green and Blue Hydraulic System Fluid Overheat Detection System in accordance with Sud Service-Caravelle Bulletin No. 29–70, Revision 10, dated October 12, 1970, or later SGAC-approved issue or an FAA-approved equivalent.

This amendment becomes effective September 27, 1971.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421, 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C., on August 23, 1971.

R. S. SLIFF, *Acting Director, Flight Standards Service.*

[FR Doc.71-12622 Filed 8-27-71;8:48 am]

Title 17—COMMODITY AND SECURITIES EXCHANGES

Chapter I—Commodity Exchange Authority (Including Commodity Exchange Commission), Department of Agriculture

PART 140—ORGANIZATION, FUNCTIONS, AND PROCEDURES OF THE COMMODITY EXCHANGE AUTHORITY

Headquarters Office and Commodity Exchange Act

The statement of organization, functions, and procedures of the Commodity Exchange Authority, published at 32 F.R 9648 and amended at 34 F.R. 321 and 34 F.R. 8107, is hereby amended as follows:

1. Section 140.1 is revised to read as follows:

§ 140.1 Headquarters office.

(a) *General.* The headquarters office of the Commodity Exchange Authority is located in the Administration Building, U.S. Department of Agriculture, 14th Street and Independence Avenue SW., Washington, DC 20250.

(b) *Office of the Administrator.* Under the supervision of the Secretary of Agriculture and the general direction of the Assistant Secretary of Agriculture for Marketing and Consumer Services, the Administrator formulates, directs, and supervises the execution of the policies governing the activities of the Commodity Exchange Authority; administers and is responsible for the enforcement of the Commodity Exchange Act, the orders of the Commodity Exchange Commission, and the orders and regulations of the Secretary of Agriculture promulgated under the Commodity Exchange Act. The Administrator has final authority to issue calls and requests for information in connection with the administration of the Commodity Exchange Act, as provided in regulations promulgated thereunder (Parts 1–21 of this chapter). The Administrator is assisted by the Associate Administrator, who participates in the policy formation and general administration of the Agency and has primary responsibility for directing the operations of the regional offices, the Assistant Administrator, who aids in the overall operations of the Agency, and by three division directors, each of whom has nationwide responsibility to the Administrator for the overall development, guidance and review of programs in his area of jurisdiction, registration and audit, compliance or trading.

(c) *Registration and Audit Division.* The division reviews and evaluates new applications for registration as futures commission merchant and floor broker; determines eligibility for registration through fitness checks; analyzes financial reports of futures commission merchants, who are not members of exchanges with approved financial requirements programs to determine whether they meet minimum financial standards; and approves or recommends disapproval of applications for initial registration. It provides technical leadership, guidance, and review to a national program of minimum financial requirements for futures commission merchants; and reviews and recommends approval or disapproval of minimum financial standards established by contract markets. It provides technical leadership, guidance, and review to a national program of audits of the books and records of futures commission merchants to assure proper segregation of customers' margins and equities and to determine compliance with minimum financial standards, recordkeeping and other requirements of the Act and regulations. It provides technical leadership, guidance and review to the supervision of contract markets' enforcement of their own rules pertaining to minimum financial standards and related reporting requirements approved by the Secretary of Agriculture. It provides technical leadership, guidance, and review to the conduct of periodic audits of clearing associations of contract markets to assure proper segregation of customers' margins, proper investment of customers' funds, and compliance with recordkeeping requirements. It develops and recommends program policies, procedures and standards for registration and audit programs and prepares regulations to effect them. It reviews results of fitness checks of established registrants and their key personnel and in cases where derogatory information has been developed, makes recommendations on disposition.

(d) *Compliance Division.* The division provides technical leadership, guidance, and review to a national program of compliance investigations of alleged or apparent violations of the Act and regulations. It provides technical leadership, guidance, and review to a national program of supervision of contract markets' enforcement of their own rules relating to contract terms and other trading requirements. It reviews regions' reports of investigations of alleged or apparent violations of the Act and regulations which have been submitted to the Headquarters office with recommendations for action and submits findings and recommendations to the Administrator for appropriate action. It reviews rules and proposed rules submitted by commodity exchanges with their applications for designation as contract markets to determine whether they meet the requirements of the Act and regulations and recommends to the Administrator acceptance or rejection of applications. It provides technical assistance to the Office of the General Counsel in the preparation of administrative complaints and in the review and analysis of evidence for presentation at administrative hearings. It provides assistance to the Department of Justice in the preparation of criminal information or indictments and in the review and analysis of evidence for presentation to grand juries and in criminal proceedings. It prepares regulations to eliminate abusive practices or practices which interfere with the efficiency of the futures trading system.

(e) *Trading Division.* The division conducts economic analyses of future trading to develop and support enforcement policies and procedures. It develops and coordinates economic research projects on regulated commodities conducted by colleges. It provides technical guidance and coordinates economic analyses conducted by the regions. It conducts studies of commodity markets and futures trading to determine the need for new or revised speculative limits. It provides technical leadership, guidance, and review to a national program of enforcement of speculative limits. It provides technical leadership, guidance, and review to the operation of a national reporting system on commodity futures trading; and develops and prepares reporting system regulations, instructions, and procedures. It provides technical leadership, guidance, and review to a national program of surveillance and analysis of the market operations of large traders, commodity brokers, and others, including marketwide position and trading surveys. It prepares economic and statistical reports on futures market developments for administrative use and publications. It maintains a reference file of permanent historical records on trading activities including statistical information on trading, open contracts futures prices, deliveries, cost of delivery, and carrying charges. It conducts analyses of price, price variability, and price relationships in cash and futures markets. It analyzes applications of processors and manufacturers who desire to qualify under the anticipatory hedging provisions of the Act.

2. Section 140.2 is revised to read as follows:

§ 140.2 Regional offices.

The Central Region office is located at Room A–1, Board of Trade Building, 141 West Jackson Boulevard, Chicago, IL 60604, and is responsible for enforcement of the Commodity Exchange Act and administration of the programs of the

Agency in the States of Illinois, Indiana, Michigan, Ohio, and Wisconsin. The office is responsible for the supervision of trading on the Chicago Board of Trade, the Chicago Mercantile Exchange, the Chicago Open Board of Trade, the Memphis Board of Trade Clearing Association, and the Milwaukee Grain Exchange. The Western Region office is located at Room 356, Board of Trade Building, 4800 Main Street, Kansas City, MO 64112, with a suboffice at Room 510, Grain Exchange Building, Fourth Street and Fourth Avenue South, Minneapolis, MN 55415, and is responsible for enforcement of the Commodity Exchange Act and administration of the programs of the Agency in the States of Alaska, Arizona, Arkansas, California, Colorado, Hawaii, Idaho, Iowa, Kansas, Louisiana, Minnesota, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, and Wyoming. The office is responsible for the supervision of trading on the Duluth Board of Trade, the Kansas City Board of Trade, the Merchants' Exchange of St. Louis, the Minneapolis Grain Exchange, the New Orleans Cotton Exchange, the Northern California Grain Exchange, the Portland Grain Exchange, and the Seattle Grain Exchange. The Eastern Region office is located at Room 2101, 61 Broadway, New York, NY 10006, and is responsible for enforcement of the Commodity Exchange Act and administration of the programs of the Agency in the States of Alabama, Connecticut, Delaware, Florida, Georgia, Kentucky, Maine, Maryland, Massachusetts, Mississippi, New Hamphire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, and West Virginia. The office is responsible for the supervision of trading on the Citrus Associates of the New York Cotton Exchange, Inc., the Commodity Exchange, Inc., the International Commercial Exchange, the New York Cotton Exchange, the New York Mercantile Exchange, the New York Produce Exchange, and the Wool Associates of the New York Cotton Exchange, Inc.

3. Section 140.10 (a), (b), and (e) is revised to read as follows:

§ 140.10 Commodity Exchange Act.

(a) The basic objective of the Commodity Exchange Act (42 Stat. 998, as amended, 7 U.S.C. 1 et seq.), is to protect and facilitate commerce in commodities designated by the Act that are the subject of transactions involving the sale thereof on boards of trade (commodity exchanges) for future delivery and known as "futures." These commodities are: Wheat, cotton, rice, corn, oats, barley, rye, flaxseed, grain sorghums, millfeeds, butter, eggs (including shell eggs, frozen whole eggs, frozen plain egg whites, and frozen plain egg yolks), Irish potatoes, wool, wool tops, fats and oils (including lard, tallow, cottonseed oil, peanut oil, soybean oil, and all other fats and oils), cottonseed meal, cottonseed, peanuts, soybeans, soybean meal, livestock (including live cattle and live hogs), livestock products (including frozen boneless beef, frozen pork bellies, frozen skinned hams, steer carcass beef, and hides), and frozen concentrated orange juice.

(b) The functions and procedures of the Commodity Exchange Authority under this statute are designed to prevent price manipulation and corners; prevent dissemination of false and misleading crop and market information to influence prices; protect hedgers and other users of the commodity futures markets against cheating and fraud; insure the benefits of membership privileges on contract markets to cooperative associations of producers; insure trust-fund treatment of margin moneys and equities of hedgers and other traders and prevent the misuse of such funds by futures commission merchants; establish minimum financial standards for futures commission merchants; establish fitness requirements for futures commission merchants and floor brokers; require contract markets to enforce their trading rules and contract terms; and provide general information to the public regarding trading operations on contract markets.

• • • • • •

(e) The Commodity Exchange Authority enforces limits on speculative transactions and positions established by the Commodity Exchange Commission; reviews crop and market news and reports; analyzes cash-commodity transactions; cooperates with control committees of contract markets; observes floor trading; investigates alleged and apparent violations of the Act; conducts special market surveys; investigates contract market delivery practices and procedures; audits books and records of futures commission merchants; analyzes futures commission merchants' financial statements; conducts analyses and appraisals of futures trading, cash-futures relationships, and price movements; and compiles and publishes reports and other informational material relating to operations on commodity exchanges. Reporting forms required of clearing members of contract markets, futures commission merchants and foreign brokers, traders, and merchants, processors, and dealers may be procured from any regional office.

• • • • • •

(Public Law 89-554, Sept. 6, 1966, 80 Stat. 383, Public Law 90-23, sec. 1, June 5, 1967, 81 Stat. 54, 5 U.S.C. 552; 25 F.R. 3926, 29 F.R. 339, 7 CFR 1.201; 29 F.R. 16210, sec. 40; 29 F.R. 16210, sec. 125, as amended at 33 F.R. 17856)

This amendment shall become effective upon publication in the FEDERAL REGISTER (8-28-71).

Issued: August 24, 1971.

ALEX C. CALDWELL,
Administrator,
Commodity Exchange Authority.

[FR Doc.71-12627 Filed 8-27-71;8:48 am]

Title 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

PART 17—BAKERY PRODUCTS

Bread and Rolls, or Buns; Standard of Identity

In the matter of amending the standard of identity for bread to permit sodium stearoyl-2-lactylate to be listed as an optional ingredient:

A notice of proposed rule making in the above-identified matter was based on a petition submitted by C. J. Patterson Co., Kansas City, Mo., and was published in the FEDERAL REGISTER of April 20, 1971 (36 F.R. 7466). One comment was received in response to the notice, and this comment favored the proposal.

Having considered the comment received and other relevant information, the Commissioner concludes that it would promote honesty and fair dealing in the interest of consumers to adopt the proposal as set forth below. Accordingly, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sections 401, 701, 52 Stat. 1046, 1055, as amended by 70 Stat. 919 and 72 Stat. 948; 21 U.S.C. 341, 371), and under authority delegated to the Commissioner (21 CFR 2.120): *It is ordered*, That § 17.1(a)(15) be revised to read as follows:

§ 17.1 **Bread, white bread, and rolls, white rolls, or buns, white buns; identity; label statement of optional ingredients.**

(a) • • •

(15) Polysorbate 60, calcium stearoyl-2-lactylate, lactylic stearate, sodium stearyl fumarate, succinylated monoglycerides, sodium stearoyl-2-lactylate, ethoxylated mono- and diglycerides, alone or in combination, complying with the provisions of §§ 121.1030, 121.1047, 121.1048, 121.1183, 121.1195, 121.1211, and 121.1221, respectively, of this chapter; but the total quantity of such ingredient or combination is not more than 0.5 part for each 100 parts by weight of flour used.

• • • • • •

Due to cross references, the above amendment to the standard for bread and rolls, or buns (§ 17.1), upon becoming effective, will have the effect of providing for optional use of sodium stearoyl-2-lactylate in enriched bread and enriched rolls or enriched buns (§ 17.2), in milk bread and milk rolls or milk buns (§ 17.3), in raisin bread and raisin rolls or raisin buns (§ 17.4), and in whole wheat bread, graham bread, entire wheat bread, and whole wheat rolls, graham rolls, entire wheat rolls, or whole wheat buns, graham buns, entire wheat buns (§ 17.5).

Any person who will be adversely affected by the foregoing order may at any time within 30 days after its date of publication in the FEDERAL REGISTER file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-62, 5600 Fishers Lane, Rockville, Md. 20852, written objections thereto. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested; the objections must state the issues for the hearing and such objections must be supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof. All documents shall be filed in six copies.

Effective date. This order shall become effective 60 days after its date of publication in the FEDERAL REGISTER, except as to any provisions that may be stayed by the filing of proper objections. Notice of the filing of objections or lack thereof will be given by publication in the FEDERAL REGISTER.

(Secs. 401, 701, 52 Stat. 1046, 1055, as amended, 70 Stat. 919, 72 Stat. 948; 21 U.S.C. 341, 371)

Dated: August 23, 1971.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.71-12638 Filed 8-27-71;8:52 am]

PART 25—DRESSINGS FOR FOOD

French Dressing Identity Standard; Confirmation of Effective Date of Order Listing Xanthan Gum as an Optional Ingredient

In the matter of amending the identity standard for french dressing (21 CFR 25.2) by listing xanthan gum complying with the requirements of 21 CFR 121.1224 as an optional emulsifying ingredient:

No objections were filed in response to the order concerning the above-identified amendment which was published in the FEDERAL REGISTER of May 18, 1971 (36 F.R. 9010).

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 701, 52 Stat. 1046, 1055-56 as amended by 70 Stat. 919 and 72 Stat. 948; 21 U.S.C. 341, 371) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120), notice is given that the amendment promulgated by the subject order (§ 25.2(c)(1)) became effective July 17, 1971.

Dated: August 18, 1971.

SAM D. FINE,
Associate Commissioner for Compliance.

SUBCHAPTER C—DRUGS

PART 135e—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Diethylstilbestrol

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (42 162V) filed by Elanco Products Co. providing for the safe and effective use of a liquid diethylstilbestrol premix in the manufacture of finished dry feeds for cattle at the currently approved levels. The supplemental application is approved.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), § 135e.18 is amended by revising paragraph (c) to read as follows:

§ 135e.18 **Diethylstilbestrol.**

• • • • • •

(c) *Approvals.* In dry premix, levels of 2 grams (0.44 percent) and 10 grams (2.2 percent) of diethylstilbestrol per pound have been granted, and, in liquid premix, levels of 20 grams (4.4 percent) and 40 grams (8.8 percent) of diethylstilbestrol per pound have been granted for use in manufacturing finished feeds within the currently approved use levels of 5-20 milligrams per head per day; for sponsor see code No. 014 in § 135.501(c) of this chapter.

• • • • • •

Effective date. This order shall be effective upon publication in the FEDERAL REGISTER (8-28-71).

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i))

Dated: August 17, 1971.

C. D. VAN HOUWELING,
Director, Bureau of Veterinary Medicine.

Title 50—WILDLIFE AND FISHERIES

Chapter I—Bureau of Sport Fisheries and Wildlife, Fish and Wildlife Service, Department of the Interior

PART 32—HUNTING

Erie National Wildlife Refuge, Pa.

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER (8-28-71).

§ 32.22 **Special regulations; upland game; for individual wildlife refuge areas.**

PENNSYLVANIA

ERIE NATIONAL WILDLIFE REFUGE

Public hunting of hares, rabbits, woodchucks, raccoons, squirrels, grouse, quail, pheasants, skunks, opossums, foxes, and crows is permitted on portions of the Erie National Wildlife Refuge, Pa. Copies of a map delineating the open hunting areas are available at refuge headquarters, Guys Mills, Pa., and from the Regional Director, Bureau of Sport Fisheries and Wildlife, U.S. Post Office and Courthouse, Boston, Mass. 02109.

Hunting shall be in accordance with all applicable State regulations governing hunting of small game, furbearers, foxes, and crows, during the period September 1, 1971 through March 15, 1972, subject to the following special condition:

(1) That portion of the refuge situated between Pennsylvania Routes 27 and 173 is closed to hunting with firearms from September 1, 1971 through November 25, 1971.

The provisions of this special regulation supplement the regulations governing hunting of wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through March 15, 1972.

RICHARD E. GRIFFITH,
Regional Director, Bureau of Sport Fisheries and Wildlife.

AUGUST 24, 1971.

[FR Doc.71-12611 Filed 8-27-71;8:47 am]

PART 32—HUNTING

J. Clark Salyer National Wildlife Refuge, N. Dak.

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER (8-28-71).

§ 32.32 **Special regulations; big game; for individual wildlife refuge areas.**

NORTH DAKOTA

J. CLARK SALYER NATIONAL WILDLIFE REFUGE

Public hunting of deer with bow and arrow on the J. Clark Salyer National Wildlife Refuge, N. Dak., is permitted from August 27 through November 7 and December 3 through December 31, 1971, only on the area designated by signs as open to hunting. This open area, comprising 31,542 acres, is delineated on a map available at the refuge headquarters, Upham, N. Dak., and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Federal Building, Fort Snelling, Twin Cities, Minn. 55111. Hunting shall be in accordance with all applicable State regulations covering the hunting of deer with bow and arrow, subject to the following conditions:

Hunters are requested to obtain a registration card which will be issued by asking for them, either in person or by mail, from the Refuge Headquarters, Upham, N. Dak. 58789.

Hunting is by foot only. Vehicles are to remain on established refuge roads only.

All hunters must exhibit their hunting licenses, game and vehicle contents to Federal and State officers upon request.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 31, 1971.

CHARLES S. PECK,
Acting Refuge Manager, J. Clark Salyer National Wildlife Refuge, Upham, N. Dak.

Title 30—MINERAL RESOURCES

Chapter I—Bureau of Mines, Department of the Interior

SUBCHAPTER O—COAL MINE HEALTH AND SAFETY

PART 75—MANDATORY SAFETY STANDARDS, UNDERGROUND COAL MINES

Standards for Preventing Explosions From Explosive Gases Other Than Methane and Procedures for Testing Accumulations of Such Gases

Pursuant to the authority vested in the Secretary of the Interior under section 101(a) of the Federal Coal Mine Health and Safety Act of 1969 (Public Law 91-173; 30 U.S.C. 801), and in accordance with section 317(t) of the Act which requires that the Secretary propose standards for preventing explosions from explosive gases other than methane and for testing accumulations of such gases, there was published in the FEDERAL REGISTER for March 9, 1971 (36 F.R. 4548), a notice of proposed rulemaking setting forth proposed amendments to Part 75, Subchapter O, Chapter I, Title 30, Code of Federal Regulations, which prescribed maximum allowable concentrations for explosive gases other than methane and specified the air sampling procedures to be followed by the Secretary and each operator of an underground coal mine in testing for the accumulation of such gases.

Interested persons were afforded a period of 30 days from the date of publication of the notice in which to submit written comments, suggestions, or objections to the proposed amendments. No written comments, suggestions, or objections were submitted. Therefore, the proposed amendments are hereby adopted without change and are set forth as follows:

§ 75.301-5 Explosive gases other than methane; maximum allowable concentrations.

Notwithstanding the provisions of § 75.301-2, for the purpose of preventing explosions from gases other than methane, the following gases shall not be allowed to accumulate in excess of the concentrations listed below:

(a) Carbon monoxide (CO)—2.5 volume per centum.

(b) Hydrogen (H_2)—.80 volume per centum.

(c) Hydrogen sulfide (H_2S)—.80 volume per centum.

(d) Acetylene (C_2H_2)—.40 volume per centum.

(e) Propane (C_3H_8)—.40 volume per centum.

(f) MAPP (methyl acetylene-propylene-propodiene)—.30 volume per centum.

§ 75.301-6 Explosive gases other than methane; air sampling by the Secretary; general.

Air samples shall be taken periodically by an authorized representative of the Secretary in each underground coal mine, and such samples shall be analyzed to determine the concentration of explosive gases other than methane which may be present.

§ 75.301-7 Explosive gases other than methane; analysis of air samples; notice of violation; control measures and additional samplings requirements.

(a) Where the analysis of air samples taken pursuant to § 75.301-6 shows that the accumulation of any explosive gas is in excess of the limit prescribed for such gas, the Secretary shall issue a written notice to the operator that he is in violation of § 75.301-5, and each such notice of violation shall specify the accumulation of explosive gas which exceeds the maximum allowable concentrations prescribed.

(b) Upon receipt of a notice of violation issued pursuant to paragraph (a) of this section, the operator shall immediately institute ventilation or other control measures in the mine so that the air shall contain less than the maximum allowable concentration of explosive gas prescribed in § 75.301-5.

(c) (1) During the first calendar month following receipt of a notice of violation, and during each calendar month thereafter, until otherwise advised in writing by the Coal Mine Health and Safety District Manager for the district in which the mine is located, the operator shall take one air sample in each area of the mine in which excessive concentrations of explosive gas were shown to be present after analyses conducted in accordance with this section.

(2) Air samples taken in accordance with subparagraph (1) of this paragraph shall be promptly transmitted for analysis to:

Gas Analysis Services, Health and Safety Technical Support Center, Bureau of Mines, 4800 Forbes Avenue, Pittsburgh, PA 15213.

(3) Air samples transmitted in accordance with the provisions of this section shall be clearly marked for identification and include a specific description of the location in the mine from which they were taken.

§ 75.301-8 Potential explosion hazards; control measures; air sampling by the operator; requirements.

(a) Where explosive gases other than methane have been (1) accidentally or inadvertently released in excessive amounts, or (2) where other potential explosion hazards are known by the operator to exist in the mine due to the liberation or presence of an excessive amount of explosive gas other than methane, the operator shall immediately notify the Coal Mine Health and Safety District Manager for the district in which the mine is located of the potential explosion hazard which is present in the mine, and promptly institute ventilation or other control measures to reduce the accumulation of such gases.

(b) Where potential explosion hazards exist due to the presence of excessive amounts of explosive gas other than methane, the operator shall promptly institute an air sampling program which includes frequent periodic samples to determine the concentration of explosive gas in any area of the mine where such gases are known to be present, and he shall continue to take such samples for the entire period during which such potential explosion hazard exists.

(c) (1) Air samples taken in accordance with the provisions of paragraph (b) of this section shall be promptly transmitted for analysis to:

Gas Analysis Services, Health and Safety Technical Support Center, Bureau of Mines, 4800 Forbes Avenue, Pittsburgh, PA 15213.

(2) Air samples transmitted in accordance with the provisions of this section shall be clearly marked for identification and include a specific description of the location in the mine from which they were taken.

Effective date. These amendments shall become effective upon date of publication in the FEDERAL REGISTER (8-28-71).

MITCHELL MELICH,
Acting Secretary of the Interior.

AUGUST 9, 1971.

Chapter III—Board of Mine Operations Appeals, Department of the Interior

PART 301—PROCEDURES UNDER FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969

Hearings and Appeals Procedures

The purpose of these amendments is to note the applicability of the Department Hearings and Appeals Procedures in 43 CFR Part 4 to hearings, appeals and other review procedures under the Federal Code Mine Health and Safety Act of 1969.

1. The table of contents, the cross reference immediately preceding the text of 30 CFR Part 301, and the regulations formerly contained in 30 CFR Part 301, are deleted, and a new § 301.1, reading as follows, is added:

§ 301.1 Cross reference.

For special rules applicable to hearings, appeals and other review procedures relating to mine health and safety, within the jurisdiction of the Board of Mine Operations Appeals, Office of Hearings and Appeals, see Subpart F of Part 4 of Subtitle A—Office of the Secretary of the Interior, of title 43 of the Code of Federal Regulations. Subpart A of Part 4 and all of the general rules in Subpart B of Part 4 not inconsistent with the special rules in Subpart F of Part 4 are also applicable to such hearings, appeals, and other review procedures.

(Sec. 508, Public Law 91-173, 83 Stat. 803, 30 U.S.C. section 957)

These amendments are effectuated as final rule making, having been previously proposed in notice of rule making published in the FEDERAL REGISTER on March 27, 1971 (36 F.R. 5795-800). They shall be effective as of September 1, 1971.

Dated: August 24, 1971.

W. T. PECORA,
Acting Secretary of the Interior.

[FR Doc.71-12631 Filed 8-27-71;8:48 am]

Title 43—PUBLIC LANDS: INTERIOR

Subtitle A—Office of the Secretary of the Interior

PART 4—DEPARTMENT HEARINGS AND APPEALS PROCEDURES

Subpart F—Special Rules Applicable to Mine Health and Safety Hearings and Appeals

PROCEDURES UNDER FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969

There was published in the FEDERAL REGISTER on March 27, 1971 (36 F.R. 5795-5800), a proposed revision of procedural rules governing hearings, appeals and other review procedures under the Federal Coal Mine Health and Safety Act of 1969. The regulations in the proposed rulemaking were numbered to conform with the present numbering of special rules applicable to hearings, appeals and other review procedures relating to mine health and safety within the jurisdiction of the Board of Mine Operations Appeals of the Office of Hearings and Appeals, contained in subpart F of 43 CFR Part 4, and the notice of rulemaking stated that the final rulemaking would be placed within that subpart of 43 CFR Part 4.

Interested persons were given 45 days in which to participate in the rulemaking through submission of written comments, suggestions, or objections. Comments have been received and studied, and appropriate changes have been made. The Department expresses its sincere appreciation to those who took the time to make suggestions and comments.

Certain commentors requested greater time be allowed for filing pleadings. Where practicable, the time has been lengthened from that previously proposed. Parties are reminded that extensions are available on an individual case basis.

The rules have been modified to clarify the procedures for an interlocutory appeal. Under these procedures a party must first seek certification by the examiner and then seek permission of the Board of Mine Operations Appeals. However, the grant or denial of certification by the examiner is in no way binding upon the Board.

The provisions applicable to burden of proof have been amended to clearly set forth the Government's burden in proving the violation of a mandatory health or safety standard.

The proposed revision is adopted, as modified herein, and the regulations are recodified into subpart F of Department Hearings and Appeals Procedures in 43 CFR Part 4, with appropriate renumbering and editorial changes as necessary.

These procedural rules have been revised in accordance with experience gained to date under the Act. The rules provide for expeditious treatment where needed and offer summary procedures which enable operators and others to receive a decision on the merits without a protracted and possibly expensive hearing. New changes will be proposed as new experience dictates.

In order to permit parties and counsel to familiarize themselves with the new rules, they will not become effective until September 1, 1971.

Dated: August 24, 1971.

W. T. PECORA,
Acting Secretary of the Interior.

1. The statement of authority pertaining to regulations in subpart F—Special Rules Applicable to Mine Health and Safety Hearings and Appeals, which appears immediately below the heading to subpart F, is amended to include a reference to the United States Code citation pertaining to authority of the Secretary of the Interior to issue regulations under the Federal Coal Mine Health and Safety Act of 1969. As amended, the statement reads:

AUTHORITY: The provisions of this subpart F issued pursuant to sec. 508, Public Law 91-173, 83 Stat. 803, 30 U.S.C. sec. 957; and sec. 9, Public Law 89-577, 80 Stat. 777, 30 U.S.C. sec. 728.

2. The table of contents and the regulations under the center heading "Procedures Under Federal Coal Mine Health and Safety Act of 1969," within subpart F—Special Rules Applicable to Mine Health and Safety Hearings and Appeals, are revised to read as hereinafter set forth:

4.603 Remand.
4.604 Reconsideration.
4.605 Final decisions.

PROCEDURES UNDER FEDERAL COAL MINE HEALTH AND SAFETY ACT OF 1969

GENERAL

§ 4.505 Scope and construction.

(a) The procedures and rules of practice set forth herein shall govern investigation pursuant to section 104(h) of the Act, applications for review under section 105 of the Act, assessment of civil penalties under section 109 of the Act, applications under section 110 of the Act, and petitions for modification of the application of mandatory safety standards under section 310(c) of the Act.

(b) These rules shall be liberally construed to secure the just, prompt and inexpensive determination of all proceedings consistent with adequate consideration of the issues involved.

§ 4.506 Definitions.

As used in these rules:

(a) The term "Act" means the Federal Coal Mine Health and Safety Act of 1969, 83 Stat. 742, 30 U.S.C., secs. 801-960.

(b) The terms "Secretary," "operator," "person," "agent," "miner," "coal mine," "imminent danger," and "mandatory health or safety standard," have the meanings set forth in section 3 of the Act.

(c) The term "notice of violation" means a notice issued under sections

104 (b), (c), or (i) of the Act or any modification thereof.

(d) The term "withdrawal order" means an order issued under section 104 of the Act.

(e) The term "Bureau" means Bureau of Mines of the Department of the Interior.

(f) The term "Office of Hearings and Appeals" means the Office of Hearings and Appeals of the Department of the Interior.

(g) The term "Board" means the Board of Mine Operations Appeals within the Office of Hearings and Appeals.

(h) The term "Examiner" means a hearing examiner in the Office of Hearings and Appeals appointed under Section 3105 of Title 5 of the United States Code.

(i) The term "Associate Solicitor" means the Associate Solicitor, Division of Mine Health and Safety, Department of the Interior, or his delegate.

(j) The term "representative of miners" means a person or organization designated by a group of miners to act as their representative for purposes of the Act.

§ 4.507 Parties.

(a) All persons indicated in the Act as parties to administrative review proceedings under the Act shall be considered statutory parties. Such statutory parties include:

(1) In all but penalty, compensation or discrimination proceedings, the Bureau of Mines as represented by the Solicitor, the operator of the mine, any representative of miners;

(2) In a penalty proceeding under section 109 of the Act, the Bureau and the party against whom the penalty is sought to be assessed;

(3) In a compensation action under section 110 of the Act, the miners and operator affected; and

(4) In a discrimination action under section 110 of the Act, the miner, miners, or representative of miners who claim discrimination and the operator affected.

(b) Any other person claiming a right of participation as an interested party or otherwise seeking to intervene in a proceeding may become a party upon petition to the Examiner or the Board and the granting of such petition.

(c) Where a person who is a statutory party, as described above, has not filed a pleading on or before the time permitted for the filing of an initial responsive pleading, except in a penalty proceeding that person shall no longer be considered a party to the proceeding unless otherwise ordered by the Examiner or the Board. Such person shall not thereafter be entitled to participate as a party in such proceedings and shall not thereafter be entitled to service of further pleadings or documents in the proceeding, unless the Examiner or the Board for good cause shown permits such person to intervene in the proceeding.

§ 4.508 Filing and form of documents.

(a) *Where to file.* All initial pleadings or documents in a proceeding described in these rules shall be filed with the Office of Hearings and Appeals, 4015 Wilson Boulevard, Arlington, VA 22203. Where a proceeding has been assigned to an Examiner, the parties will be notified of the name and address of the Examiner assigned to the case and thereafter all further documents shall be filed with the Examiner, Office of Hearings and Appeals, at the address designated. Any person not notified of the Examiner's address should file pleadings at the address of the Office of Hearings and Appeals. If the case is before the Board, all further pleadings should be filed with the Board of Mine Operations Appeals, 4015 Wilson Boulevard, Arlington, VA 22203.

(b) *Number of copies.* Except as otherwise provided in these rules, a party shall furnish an original and two copies of all pleadings, briefs, petitions, applications and other documents required or permitted to be filed.

(c) *Caption, title and signature.* (1) The documents filed in any proceeding brought under the Federal Coal Mine Health and Safety Act of 1969 shall be captioned in the name of the operator of the mine to which the proceeding relates and in the name of the mine. After a docket number has been assigned to the proceeding by the Office of Hearings and Appeals, the caption shall contain such docket number. The caption may include other information appropriate for identification of the proceeding, including any Bureau identification number.

(2) After the caption each such document shall contain a title which shall be descriptive of the document and which shall identify the party by whom the document is submitted.

(3) The original of all documents filed shall be signed at the end by the party submitting the document or, if the party is represented by an attorney, by such attorney. The address of the party or the attorney shall appear beneath the signature.

§ 4.509 Service.

(a) Copies of all documents filed in any proceeding described in these rules and copies of all notices pertinent to such proceeding shall be served on all other persons made parties to the proceeding under § 4.507. Interested parties are given notice of proceedings under §§ 4.520 and 4.550 by posting such document on the bulletin board at the office of the mine affected and by publication in the FEDERAL REGISTER.

(b) Documents by which any proceeding is initiated shall be served on each other party personally or by registered or certified mail, return receipt requested. All subsequent documents may be served personally or by first-class mail. Service by mail is complete upon mailing.

(c) Whenever a party is represented by an attorney who has signed any document filed on behalf of such party or otherwise entered an appearance on behalf of such party, service thereafter shall be made upon the attorney.

(d) Any party initiating a proceeding under these rules shall file proof of service in the form of a return receipt where service is by registered or certified mail, or an acknowledgment by the party served or a verified return where service is made personally. A certificate of service shall accompany all other documents filed by a party in any proceeding.

§ 4.510 Motions.

Each motion filed with the Examiner or the Board during the pendency of any proceeding shall be in writing and shall contain a short and plain statement of the grounds upon which it is based. A statement in opposition to the motion may be filed by any party within 10 days after the date of service. Unless ordered or permitted by the Examiner or the Board, oral argument on motions will not be heard. The examiner or the Board may permit oral motions during the course of proceedings.

§ 4.511 Consolidation of proceedings.

The Examiner or the Board may at any time order a proceeding described in these rules consolidated with any other such proceeding then pending before the Office of Hearings and Appeals which involves the same applicant or similar issues of law or fact.

§ 4.512 Withdrawal of pleading.

A party may withdraw a pleading at any stage of a proceeding without prejudice.

§ 4.513 Intervention.

A petition for leave to intervene may be filed at any stage of a proceeding. In the discretion of the Examiner or the Board a person may be denied intervention in a matter in which he could have participated as a party but failed to avail himself of the opportunity to do so. The petition must set forth the interest of the petitioner in the proceeding and show that the petitioner's participation will assist in the determination of the issues in question. The Examiner or the Board may grant or deny petitions for intervention or may permit intervention limited to a particular stage of the proceeding.

§ 4.514 Expedition of proceedings.

(a) Before the Examiner: At any time after the commencement of a proceeding a party may move the Examiner to expedite the hearing and decision of the case. Such motion shall be in writing and accompanied by supporting documents that establish the party's claim of exigent circumstances warranting expedition. Service of such motions, where possible, shall be by personal delivery to all parties; otherwise, service shall be by telegraphic communication followed by registered or certified mail. All parties to the proceeding in which the application is filed shall have 3 days from the date of receipt of the application to file an answer. Upon filing of a motion to expedite, the Office of Hearings and Appeals shall promptly present the motion to the Examiner assigned to the proceeding, or where no assignment has been made, shall promptly assign the proceeding to an Examiner and present the motion to him. The Examiner shall promptly review the motion and may advance the matter on his calendar and order such expedition of the proceeding, including expedited schedules for pleadings, prehearing conference and a hearing, as he deems appropriate: *Provided*, A hearing on the merits of the case shall not be scheduled with less than 5 days' notice to the parties unless all parties to the proceeding consent to an earlier hearing.

(b) Before the Board: A party taking an appeal to the Board may move the Board to expedite the appeal. Such motion shall be in writing and specifically state the grounds for requesting expedited proceedings. All parties to the proceeding in which the application is filed shall have 3 days from the date of receipt of the application to file an answer. The Board shall promptly review such motion, including any opposing papers, and may, if it deems such action to be appropriate, advance the appeal on its calendar and order such other expedition as may be appropriate, including an abbreviated schedule for briefing or oral argument.

(c) Where time is of the essence and expedited proceedings are requested under this section periods of time for filing applications, answers or responses, as provided elsewhere in these rules, may be waived to the extent required to fulfill the overall objectives of the Act and when the ends of justice would be served.

§ 4.515 Waiver of right to hearing and initial decision; decision by Board.

(a) Any person entitled to a hearing and initial decision by an Examiner under the Act may waive such right in writing. Such waiver may be included in a pleading or may be separately filed. Where parties are directed by any rule in these regulations to file a responsive pleading on or before a specified time, any party who fails to file such responsive pleading by the time specified, shall be deemed to have waived his right to a hearing and initial decision. Unless all parties to a proceeding who are entitled to a hearing and initial decision unequivocally waive, or are deemed to have waived, such right, a hearing will be instituted.

(b) Where all the parties entitled to a hearing and initial decision under the Act waive such right, or are deemed to have done so, the case shall be promptly referred to the Board for decision. However, where the Board determines that factual issues remain which are not resolved by stipulation of the parties and which require certain findings of fact for proper decision, the case shall be referred to the Hearings Division for hearing on such issues and findings as the Board may designate or the Board may remand the case in its entirety for hearing and initial decision.

INVESTIGATIONS PURSUANT TO SECTION 104(h) OF THE ACT

§ 4.520 How initiated.

Investigation pursuant to section 104 (h) of the Act shall be initiated whenever the Bureau files with the Office of Hearings and Appeals the notice provided in section 104(h)(1) of the Act. Such notice and findings shall be served by the Bureau on the operator of the affected mine and on any representative of miners at such mine.

§ 4.521 Participation by interested parties.

(a) The operator of the mine affected and the authorized representative of miners shall have 30 days from service to answer the 104(h) notice and present any information relating to that notice and request a public hearing.

(b) Any interested person desiring to request a public hearing or otherwise participate in the 104(h) proceeding shall within 30 days of posting of the 104(h) notice in accordance with section 107(a) of the Act, file with the Office of Hearings and Appeals a petition to intervene and serve a copy of the petition on the Bureau, the operator and any representative of miners at the affected mine.

(c) The petition to intervene shall comply with the applicable requirements and shall contain a short and plain statement of: (1) The petitioner's claimed interest in the matter; (2) the petitioner's position with respect to each of the findings set forth in the notice; (3) a request for public hearing where desired; and (4) the action which petitioner contends should be taken as a result of the notice.

(d) Participation in the investigation by interested parties, including the operator of the mine affected and any authorized representative of miners, may be denied or limited for failure to file an answer or petition to intervene within the time herein provided.

§ 4.522 Application for hearing on abatement.

(a) Where pursuant to section 104(h)(2) of the Act an order has been issued requiring an operator to withdraw persons from any part of a mine, any interested person (whether or not such person has previously participated in the investigation) may file an application for a hearing on the issue of whether the conditions upon which such order was based have been abated.

(b) The applicant shall serve the application on all parties who participated in the investigation which resulted in the order, and if the applicant is not the operator of the mine affected by the order, on such operator. On the day of service and for a period of 10 days thereafter, the operator shall post the petition on the bulletin board of the office of the mine in accordance with section 107(a) of the Act.

(c) Interested persons desiring to participate in the hearing, shall within 10 days of first posting of the application, file with the Office of Hearings and Appeals a petition to intervene. The petition shall comply with the applicable general requirements and shall contain a short and plain statement of: (1) The petitioner's claimed interest in the matter; and (2) the action which petitioner contends should be taken with respect to the application and the reasons therefor. Failure to file such petition within 10 days may be grounds for limiting or denying such person's participation in the hearing.

REVIEW OF ORDERS AND NOTICES

§ 4.530 Initiation of proceedings.

(a) *How initiated.* Proceedings for the review of a withdrawal order, a modification or termination thereof, a notice of violation, or a modification or termination thereof, shall be initiated by filing an application for review.

(b) *Who may file.* An application for review may be filed by the operator of the mine affected by the order or notice sought to be reviewed or by a representative of miners employed at such mine.

(c) *Time for filing.* An application for review shall be filed within 30 days of receipt by the applicant of the order or notice sought to be reviewed or within 30 days of receipt of any modification or termination of an order where review is sought of the modification or termination. A copy of the application for review shall be served upon the representative of the miners (or the operator, as the case may be), and the Associate Solicitor.

(d) *Effect of failure to file.* An operator's failure to file an application for review of a withdrawal order or notice of violation shall not preclude the operator from challenging the fact of violation or raising any other pertinent matter in a proceeding under section 109 of the Act.

§ 4.531 Answer.

The Bureau and any party desiring to participate in the proceeding in opposition to the application for review shall file an answer within 15 days of service of such application for review.

§ 4.532 Contents of application and answer.

(a) An application for review and an answer shall comply with applicable general requirements and shall contain:

(1) A short and plain statement of (i) such party's position with respect to each issue of law or fact which the party contends is pertinent to the legality or correctness of the order or notice; (ii) and the relief requested by such party;

(2) A statement of whether the party submitting the document requests a public hearing or waives it either as provided in § 4.515 or § 4.588. Where an answer does not include an unequivocal waiver, a party shall be deemed to have requested a hearing and initial decision.

(b) A copy of the order or notice sought to be reviewed shall be attached to each application for review.

§ 4.533 Review of subsequent order or notice.

(a) An applicant in a proceeding under these rules shall file, within 15 days of receipt thereof, any subsequent order or notice which modifies or extends the order or notice sought to be reviewed and any subsequent order or notice which relates to the violation charged in the or-

der or notice sought to be reviewed. The application for review, unless withdrawn by the applicant, shall be deemed to challenge any such subsequent order or notice. Where clarification of the applicant's position is deemed desirable, the Examiner or the Board may require the applicant to file a new or amended application.

(b) An operator or a representative of miners, when not the applicant in a pending proceeding for review of a withdrawal order or notice of violation, may apply for review of a notice or order which modifies or extends the notice or order then being reviewed or of a notice or order which relates to the violation charged in the notice or order then being reviewed by filing an application for review in such pending proceeding within the time prescribed by § 4.530(c).

ASSESSMENT OF CIVIL PENALTIES

§ 4.540 How initiated.

(a) Where an operator, a miner or a director, officer or agent of a corporate operator has requested formal adjudication of a civil penalty assessment pursuant to § 100.4(i) of title 30, proceedings for the assessment of a civil penalty shall be initiated by the Bureau by filing a petition to assess penalty with the Office of Hearings and Appeals.

(b) Any notice or order previously issued pursuant to the Act with respect to the violation for which the penalty is sought to be assessed shall accompany the petition.

(c) Where appropriate, the Examiner or the Board shall consolidate penalty proceedings with other proceedings described herein.

§ 4.541 Contest of penalty.

A party against whom a penalty is sought shall file an answer within 20 days of service of the petition.

§ 4.542 Content of answer to penalty assessment.

An answer shall contain a short and plain statement of the party's position with respect to each issue of law or fact which the party contends is pertinent to the question of whether a penalty should be assessed against such party, including whether a violation occurred, and the amount of such penalty.

§ 4.543 Failure to answer.

Where a party fails to answer the petition for an assessment of penalty within 20 days, it will be deemed a waiver of evidentiary hearing and the Examiner may find facts and assess the penalty based upon the written record of the case. The Examiner may assume for purposes of the assessment of an uncontested penalty: (a) The truth of each allegation contained in any petition to assess penalty served on such party, (b) the legal validity of any withdrawal order or notice of violation on which the penalty against such party is sought to be based, and (c) the truth of any fact alleged in such order or notice.

§ 4.544 Assessment of penalty.

(a) Where, after opportunity for hearing and consideration of the record as a whole including the operator's history of violation, the size of the business of the operator charged, whether the operator was negligent, the effect on the operator's ability to continue in business, the gravity of the violation and the demonstrated good faith of the operator charged in attempting to achieve rapid compliance after notification of violation, the Examiner or the Board finds that a violation of a mandatory health or safety standard or any other provision in the Act has occurred, he or they shall determine the amount of penalty which is warranted and incorporate in the decision concerning the violation an order requiring that the penalty be paid.

(b) Where the Board, upon review of the record and decision of an Examiner in a penalty proceeding, modifies the amount of penalty, it shall issue an order requiring the modified amount to be paid.

PETITIONS FOR MODIFICATION OF APPLICATION OF MANDATORY SAFETY STANDARDS

§ 4.550 Who may file.

A petition under section 301(c) of the Act for modification of the application of a mandatory safety standard may be filed by the operator of the affected mine or any representative of the miners at such mine.

§ 4.551 Form of petition.

(a) A petition for modification shall comply with the applicable general requirements and shall contain a detailed statement showing the following:

(1) The mandatory standard to which the petition is directed.

(2) The alternate method the petitioner proposes to establish in lieu of the mandatory standard.

(3) That the alternate method will at all times guarantee no less than the same measure of protection afforded the miners at the affected mine by the mandatory standard or that the application of the mandatory standard will result in diminution of safety to miners in the affected mine (or specific area thereof).

(b) A petition for modification shall not include a request for modification of the application of more than one safety standard, and shall not include a request for any relief other than modification of the application of a safety standard. However, a petition for modification may be filed pertaining to more than one mine.

§ 4.552 Procedure.

(a) Promptly upon receipt of such petition for modification, the Office of Hearings and Appeals will give notice of the petition to each known representative of miners or the operator of the affected mine as appropriate and shall publish notice of the petition in the FEDERAL REGISTER. All interested parties including a representative of miners or an operator shall have 30 days from the date of publication of notice in the FEDERAL REGISTER to answer the petition or otherwise comment or provide information.

(b) Such notice shall contain a statement that the petition has been filed, shall identify the petitioner and the mine or mines to which the petition relates, shall cite the section of the Act for which modification of application is sought, shall summarize the facts claimed by petitioner to warrant a modification and shall provide an opportunity for all interested parties to request a hearing and to present commentary or information relating to the proposed modification within 30 days of the date of publication of the notice.

APPLICATION FOR COMPENSATION OR FOR REVIEW OF DISCHARGE OR ACTS OF DISCRIMINATION UNDER SECTION 110 OF THE ACT

§ 4.560 Who may file.

(a) An application for compensation may be initiated by a miner who has been idled by an order of withdrawal or by a miner, who claims that he was not withdrawn because the operator failed or refused to comply with an order issued pursuant to section 104 of the Act.

(b) An application for review of an alleged discharge or act of discrimination may be initiated by a miner who believes that he has been discharged or otherwise discriminated against by reason of invoking his rights, testifying, or awaiting to testify under the Act, or by a representative of miners who believes that he has been discharged or otherwise discriminated against by reason of invoking his rights or the rights of the miners he is authorized to represent, testifying or awaiting to testify under the Act.

(c) Such applications may be initiated on behalf of a miner or miners by an authorized representative of miners.

§ 4.561 When to file.

An application to review a discharge or act of discrimination shall be filed within 30 days after such discharge or act of discrimination occurs. An application for compensation shall be filed within 45 days after the date of issuance of the withdrawal order which gives rise to the claim.

§ 4.562 Contents of application.

(a) An application for compensation shall comply with the applicable general requirements and shall state or include:

(1) A statement of the period for which compensation is claimed;

(2) The total amount of the compensation claimed to be due;

(3) An allegation that a demand for compensation has been made on the operator and that such demand has not been satisfied; and

(4) A copy of any pertinent order of withdrawal, or information to sufficiently identify any such order.

(b) An application for review of discharge or acts of discrimination shall be supported by an affidavit of a person with knowledge of the facts surrounding the alleged discharge or acts of discrimination and a statement of the relief requested.

§ 4.563 Answer.

Within 20 days after the date of service of such application, the operator shall file an answer which shall respond to each allegation of the application.

APPLICATION FOR TEMPORARY RELIEF

§ 4.570 Procedure.

(a) An application for temporary relief may be filed at any time prior to decision by an Examiner or the Board in the matter to which the application relates. The application shall be addressed to the Examiner if the proceeding is then pending before an Examiner, and shall be made to the Board if the proceeding is then pending before the Board.

(b) All parties to the proceeding in which the application is filed shall have 3 days from the date of receipt of the application to file a written response.

(c) Where the application is before the Board, it may order a special hearing to be held before an Examiner on any issues raised by the application.

§ 4.571 Contents of application.

(a) An application for temporary relief shall comply with the applicable general requirements and shall contain: (1) A statement of the specific relief requested, (2) a showing of substantial likelihood that the findings and decision of the Examiner or the Board in the matters to which the application relates will be favorable to the applicant; and (3) a showing that such relief will not adversely affect the health and safety of miners in the affected mine.

(b) An application for temporary relief may be supported by affidavits or other evidentiary matter.

§ 4.572 Limitations.

Temporary relief shall not be granted with respect to any order issued under section 104(a) of the Act or with respect to any notice of violation issued under sections 104 (b) or (i) of the Act.

HEARINGS

§ 4.580 Hearings to be conducted by Examiners.

All hearings shall be presided over by a hearing examiner in the Office of Hearings and Appeals, appointed under Section 3105 of Title 5 of the United States Code.

§ 4.581 Assignment of Examiners.

In any proceeding under the Act which requires an initial or recommended decision by an Examiner or where the Board remands a matter for hearing, an Examiner will be assigned. All subsequent motions, applications, and other papers thereafter filed in the proceeding shall be filed with the Examiner assigned to the proceeding at the address specified until his jurisdiction terminates.

§ 4.582 Powers of Hearing Examiners.

(a) Subject to the regulations of this subpart, an Examiner may:

(1) Administer oaths and affirmations;

(2) Issue subpenas authorized by law;

(3) Rule on offers of proof and receive relevant evidence;

(4) Take depositions or have depositions taken when the ends of justice would be served;

(5) Regulate the course of the hearing;

(6) Hold conferences for the settlement or simplification of the issues;

(7) Dispose of procedural requests or similar matters;

(8) Make or recommend decisions in accordance with Section 557 of Title 5 of the United States Code;

(9) Take other action authorized by this part, by Section 556 of Title 5 of the United States Code, or by the Act.

(b) The Examiner may direct the parties to appear for a prehearing conference to consider:

(1) The simplification of the issues;

(2) The possibility of obtaining stipulations, admissions of fact, and of producing documents which will avoid unnecessary proof;

(3) The possibility of agreement disposing of all or any of the issues in dispute;

(4) Such other matters as may aid in the disposition of the case.

(c) The Examiner's authority in each case shall terminate upon the filing of an appeal from an initial decision or other order dispositive of the proceeding or upon the expiration of the period within which an appeal to the Board may be filed or upon an order of the Board directing that the proceeding be be reviewed by the Board.

§ 4.583 Notice of hearing; appearances.

(a) Written notice of time, place, nature of hearing, the legal authority, and jurisdiction under which the hearing is to be held, and the matters of fact and law asserted shall be given, at least 5 days prior to the date set for hearing, to all persons made parties to the proceeding by § 4.507.

(b) In accordance with the provisions of Section 554 of Title 5 of the United States Code, a party may move for a transfer of place of hearing on the basis of convenience to parties and witnesses. Such motion should be filed with the Examiner assigned to the case in accordance with § 4.510.

§ 4.584 Depositions.

(a) *When permitted.* The Examiner may, for good cause shown, order the taking of testimony of any person by deposition upon oral examination or written interrogatories for use as evidence or for the purpose of discovery.

(b) *Orders on depositions.* Unless otherwise stipulated by the parties, the time, place, and manner of taking depositions shall be governed by the order of the Examiner.

§ 4.585 Interrogatories and production of documents.

Any party may serve written interrogatories or a request for admission of facts upon another party to a proceeding brought under these rules. A party served with written interrogatories or a request for admissions shall answer such interrogatories within 15 days of service unless the proponent of the interrogatories agrees to a longer time or unless the Examiner by order specifies a different time or excuses the party from answering on good cause shown. For good cause shown, the Examiner may order a party to produce and permit inspection and copying or photographing of designated documents relevant to the proceeding.

§ 4.586 Subpoenas; witness fees.

(a) On written application of a party or on his own motion, the Examiner may issue subpoenas requiring the attendance of witnesses and the production of relevant papers, books, and documents in their possession and under their control. A subpoena may be served by any person who is not a party and is not less than 18 years of age, and the original subpoena bearing a certificate of service shall be filed with the Examiner. A witness may be required to attend a deposition or hearing at a place not more than 100 miles from the place of service.

(b) Witnesses subpoenaed by any party shall be paid the same fees and mileage as are paid for like attendance in the District Courts of the United States. The witness fees and mileage shall be paid by the party at whose instance the witness appears.

§ 4.587 Burden of proof.

In proceedings brought under the Act, the applicant, petitioner, or other party initiating the proceeding shall have the burden of proving his case by a preponderance of the evidence, except that the Bureau shall have the burden of proving violation of any mandatory health or safety standard by a preponderance of the evidence wherever violation of a mandatory health or safety standard is in issue.

§ 4.588 Waiver of evidentiary presentation.

(a) Any party who desires to submit written pleadings, comments or information in lieu of an evidentiary presentation may submit such documents for the Examiner's consideration in the matter.

(b) Parties entitled to an evidentiary hearing may waive such right in writing, but unless all entitled parties file timely waivers, a hearing will be conducted. Such waivers must be unequivocal and request the Examiner to decide the matter at issue on the pleadings and written record of the case including any stipulation the parties might enter.

§ 4.589 Evidence.

(a) Any relevant evidence may be received at the discretion of the Examiner. The Examiner may exclude evidence which is unreliable or unduly repetitious.

(b) A party shall have the right to present his case or defense by oral or documentary evidence, to submit rebuttal evidence, and to conduct such

cross-examination as may be required for a full disclosure of the facts.

§ 4.590 Summary decision of Examiner.

(a) *Filing.* At any time after commencement of a proceeding and before the scheduling of a hearing on the merits, a party to the proceeding may move the Examiner to render summary decision disposing of all or part of the proceeding.

(b) *Grounds.* A motion for summary decision shall be granted only if the entire record, including, the pleadings depositions, answers to interrogatories, admissions and affidavits, shows (1) that there is no genuine issue as to any material fact and (2) that the moving party is entitled to summary decision as a matter of law.

(c) *Form of motion and affidavits.* The motion may be supported by affidavits or other verified documents, and shall specify the grounds showing the party's right to the relief sought. Supporting and opposing affidavits shall be made on personal knowledge, shall show affirmatively that the affiant is competent to testify to the matters stated therein. Sworn or certified copies of all papers or parts thereof referred to in an affidavit shall be attached thereto or be incorporated if not otherwise a matter of record. The Examiner may permit affidavits to be supplemented or opposed by testimony, depositions, answers to interrogatories, admissions or further affidavits. When a motion for summary decision is made and supported as provided in this rule, an adverse party may not rest upon the mere allegations or denials of his pleadings, but his response, by affidavits or as otherwise provided in this rule, must set forth specific facts showing that there is a genuine issue for hearing. If he does not so respond, summary decision, if appropriate, shall be entered against him.

(d) *Case not fully adjudicated on motion.* If a motion for summary decision is denied in whole or in part, and the Examiner determines that an evidentiary hearing of the case is necessary, he shall, if practicable, and upon examination of all relevant documents and evidence before him, and upon interrogating counsel or the parties, ascertain what material facts are actually and in good faith controverted. He shall thereupon make an order specifying the facts that appear without substantial controversy, and direct such further proceedings as deemed appropriate.

§ 4.591 Certification of interlocutory ruling.

In making a ruling which does not finally dispose of a proceeding, the Examiner shall at the request of a party or may on his own motion certify his ruling to the Board of Mine Operations Appeals if he determines that such ruling involves a controlling question of law and that an immediate appeal therefrom may materially advance the ultimate disposition of the matter before him.

§ 4.592 Proposed findings, conclusions and orders.

The Examiner may require the submission of proposed findings of fact, conclusions of law, and orders, together with a supporting brief. Such proposals shall be served upon all parties, and shall contain adequate references to the record and authorities relied upon.

§ 4.593 Initial decision.

As soon as practicable after conclusion of the hearing, the Examiner shall render an initial decision. The initial decision shall be in writing and shall include a statement of (a) findings and conclusions and the reasons or basis therefor on the material issues of fact, law or discretion presented on the record and (b) the appropriate ruling, or order, or denial of relief, with the effective date. All initial or recommended decisions of the Examiner shall be served on all parties to the proceeding and the Board promptly upon issuance.

§ 4.594 Effect of initial decision.

An initial decision shall become final upon the expiration of 30 days of its issuance unless an appeal to the Board is filed within the time allowed or the Board determines within 30 days of the decision to review such decision on its own initiative. The timely filing of an appeal or a review by the Board on its own motion with notice to the parties shall stay the effect of the initial decision. However, when the public interest requires, the Board may modify the effective decision date of an initial decision.

§ 4.595 Certification of record.

Within 5 days after an initial decision has been rendered, the Examiner shall certify the official record of the proceedings including all exhibits and order the official record filed in the Office of Hearings and Appeals.

APPEALS TO THE BOARD

§ 4.600 Notice of appeal.

Any party may appeal from an Examiner's order or from the initial decision by filing with the Board a notice of appeal within 20 days after service of the order or initial decision. Two or more parties may join in the same appeal; the Board may consolidate related appeals. Copies of a notice of appeal shall be served on all parties to the proceeding in accordance with § 4.510.

§ 4.601 Briefs.

(a) *Appellant's brief.* Within 20 days after filing the notice of Appeal, appellant shall file his brief and serve copies on all other parties to the proceeding. When a party who has filed a notice of appeal fails to file a timely brief, or if the notice of appeal and the brief are not served upon all parties to the proceeding within the time required, the appeal shall be subject to summary dismissal. Appellant's brief shall set forth in detail the objections to the initial decision, the reasons for such objections and the relief requested. Any error contained in the initial decision that is not objected to may be deemed by the Board to have been waived. Where any objection is based upon evidence of record, such objection need not be considered by the Board if specific record citations to the pertinent evidence are not contained in appellant's brief.

(b) *Appellee's brief.* Within 20 days after service of appellant's brief, any other party to the proceeding may file a brief in opposition thereto as an appellee.

(c) *Number of copies.* Five copies of each brief shall be filed with the Board and two copies served on each party. Copies of briefs shall be typewritten (double-spaced), printed or duplicated.

(d) *Length of brief.* Except by permission of the Board, appellant's brief may not exceed 50 pages and appellee's brief may not exceed 25 pages.

§ 4.602 Interlocutory appeals.

(a) *Requests for permission.* Interlocutory appeals from rulings and orders of an Examiner may be filed only after permission is granted by the Board. The Board shall not entertain a request unless a party has first sought certification of the ruling by the Examiner pursuant to § 4.591. Any request for permission from the Board shall be in writing, not to exceed 10 pages in length, and shall be granted only in such cases where the issue presented is a controlling question of law which will materially advance the final disposition of the case.

(b) *Briefs.* Unless the Board directs otherwise, a brief shall be filed by each party permitted by the Board to take an interlocutory appeal within 5 days after notice of such permission. Within 5 days after service of any appellant's brief, any other party to the proceeding may file a brief as appellee.

(c) *Effect.* An interlocutory appeal shall not operate to suspend the hearing unless otherwise ordered by the Board or the Examiner.

(d) *Jurisdiction.* If an interlocutory appeal is permitted, the Board's jurisdiction shall be confined to review of the ruling or order of the Examiner on the legal issue raised by the appeal, and shall not extend to any other issues.

(e) *Decision and remand.* Upon affirmance, reversal or modification of the Examiner's interlocutory ruling or order, the jurisdiction of the Board shall terminate, and the case will be remanded promptly to the Examiner for further proceedings.

§ 4.603 Remand.

Where any matter is before the Board, the Board may issue an order remanding the proceeding for further hearing in accordance with such order.

§ 4.604 Reconsideration.

Unless the Board orders otherwise, the filing of a petition for reconsideration shall not stay the effect of any decision or order and shall not affect the finality of any decision or order for purposes of judicial review.

§ 4.605 Final decisions.

Final decisions of the Board shall be rendered as promptly as practicable consistent with adequate consideration of the issues involved. The Board may adopt, modify or set aside any finding, conclusion or order of the Examiner.

Title 49—TRANSPORTATION

Chapter I—Hazardous Materials Regulations Board, Department of Transportation

[Docket No. HM-60; Amdt. Nos. 171-11, 173-53, 178-20]

PART 173—SHIPPERS

PART 178—SHIPPING CONTAINER SPECIFICATIONS

Cylinder Specifications

Correction

In F.R. Doc. 71-12211, appearing at page 16579 in the issue of Tuesday, August 24, 1971, the following changes should be made:

1. The figure "3N" in the first line of § 173.304(a)(1), should read "3BN".
2. The word "pressure" in the eighth line of § 178.65-3, should read "pressures".
3. The figure "200" in the second line of § 178.65-11(b)(1), should read "2.0".
4. The reference to "§ 713.24(c)(1)(ii)" in the third line of § 178.65-14(a), should read "§ 173.24(c)(1)(ii)".
5. The word "market" in the 10th line of the Inspection Report Form in § 178.-65-15(b), should read "marked".

Chapter V—National Highway Traffic Safety Administration, Department of Transportation

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

Lamps, Reflective Devices, and Associated Equipment

The purpose of this notice is to amend Motor Vehicle Safety Standard No. 108 to delete sampling and failure-rate provisions from the tests of turn signal and hazard warning signal flashers, and to modify performance requirements for these items of motor vehicle equipment.

The notice of proposed rulemaking upon which this amendment is based was published in the FEDERAL REGISTER on February 3, 1971 (36 F.R. 1913). Standard No. 108 incorporates by reference SAE Standard J590b, "Automotive Turn Signal Flasher," October 1965, and SAE Recommended Practice J945, "Vehicular Hazard Warning Signal Flasher," February 1966. Both standards specify a test sample size and a permissible failure rate for the items tested, viz, that 50 items shall be "submitted for test," that 20 items shall be chosen from the 50, and that "at least 17 out of 20 samples" shall meet the requirements. These are the provisions whose deletion was proposed.

Careful consideration has been given to the comments received in response to the notice. Many industry comments opposed the proposal, alleging that substantially total compliance would necessitate an increase in unit cost, and arguing that the cost increase is not justified by the safety benefits to be gained. Concern was also expressed as to possible penalties that might arise from the occasional failures that are claimed by the industry to be unavoidable in items of this type.

As stated in the February 3 notice of proposed rulemaking, the NHTSA considers permissible failure rates to be contrary to both the letter and the intent of the National Traffic and Motor Vehicle Safety Act. Manufacturers are required to use due care to insure that all their products meet the requirements of the standards. The assessment of penalties for test failures is not automatic, however, but is made after a review of all the facts, with a view to determining whether due care was used in accordance with sound engineering and manufacturing principles. The sampling and failure-rate provisions are accordingly hereby deleted from the requirements in Standard No. 108 for turn signal and hazard warning signal flashers.

The NHTSA has determined that the design and production problems associated with the manufacture of thermal flashers are such that total compliance with current performance and durability test requirements is not practicable. Therefore, modifications have been made in starting time, voltage drop, flash rate, and percent current "on" time for performance tests, and in the duration and cycle of operation for durability tests. For example, the previous required performance range of 60 to 120 flashes per minute is broadened to 40 to 140 flashes per minute, and the percentage of time during a flash cycle that flasher contacts are required to be engaged, previously a range of 30 percent to 75 percent, is now 25 percent to 80 percent. The durability test for turn signal flashers will be continuous for 25 hours, rather than consisting of an on-off cycle for 200 hours. The durability test for hazard warning signal flashers is reduced to 12 hours from 36 hours. This agency has concluded that the net effect of these modifications is not a lessening of motor vehicle safety, since the minimum performance of flashers is substantially upgraded by requiring compliance of every flasher manufactured, rather than of only 17 of every 20 tested.

To implement the deletion of sampling and failure-rate provisions and the modification of the previous requirements, the NHTSA is amending Standard No. 108 to delete existing references to SAE Standard J590b and SAE Recommended Practice J945, and to adopt a new paragraph S4.6, *Turn signal flashers; hazard warning signal flashers*, that incorporates the new requirements.

In consideration of the foregoing, 49 CFR 571.21, Motor Vehicle Safety Standard No. 108, *Lamps, Reflective Devices, and Associated Equipment*, is amended as follows:

1. In the first sentence of paragraph S4.1.1, the reference to "S4.1.1.15" is changed to "S4.1.1.16".

2. A new section S4.1.1.16 is added to read: "In addition to the equipment required by Table I or Table III, each passenger car, multipurpose passenger vehicle, truck, and bus shall be equipped with a turn signal flasher and a hazard warning signal flasher, and each motorcycle shall be equipped with a turn signal flasher, that meets the requirements of paragraph S4.6 of this standard."

3. In Tables I and III, "Turn signal flasher" and "Vehicular hazard warning signal flashers" are deleted as items of equipment under Column 1. Corresponding deletions are made under Columns 2, 3, and 4 of Table I, and Columns 2, 3, 4, and 5 of Table III.

4. Paragraph S4.4.2 is deleted.

5. Paragraph "S4.6" is renumbered "S4.5.8."

6. A new paragraph S4.6 is adopted to read as follows:

S4.6 *Turn signal flashers; hazard warning signal flashers.* Each turn signal flasher and hazard warning signal flasher shall meet the following performance and durability requirements when tested in accordance with SAE Standard J823b, Flasher Test Equipment," April 1968. The design load used in testing each flasher used as original motor vehicle equipment shall be the design current of the motor vehicle on which the flasher is installed. The design load used in testing each fixed-load flasher used as replacement motor vehicle equipment shall be stated by the flasher manufacturer as a single design load. The design load used in testing each variable-load flasher used as replacement motor vehicle equipment shall be stated by the flasher manufacturer as minimum and maximum design loads. The maximum design load shall be used to determine voltage drop (S4.6.1.2) and conformance to durability requirements (S4.6.2). The minimum and maximum design loads shall both be used to determine starting time (S4.6.1.1) and percent current "on" time (S4.6.1.3).

S4.6.1 *Performance requirements.*

S4.6.1.1 *Starting time.* When tested under the following conditions, the time required for closed contacts to open (on a flasher with normally closed contacts) or for open contacts to close and open again (on a flasher with normally open contacts) shall not exceed 2 seconds for a turn signal flasher, and 3 seconds for a hazard warning signal flasher.

(a) Ambient temperature is 75° F.

(b) Measurement of time starts when the voltage is initially applied.

(c) The design load is connected in the standard test circuit with the power source adjusted as specified in SAE Standard J823b.

(d) The test is run three times, each of which is separated by a cooling interval of 5 minutes, and the results are averaged to determine starting time.

S4.6.1.2 *Voltage drop.* When tested under the following conditions, the lowest voltage drop across a flasher shall not exceed 0.8 volt.

(a) Ambient temperature is 75° F.

(b) The design load is connected in the standard test circuit with the power source adjusted as specified in SAE Standard J823b.

(c) The voltage drop is measured between the input and the load terminals at the flasher and during the "on" period after the flasher has completed at least five consecutive cycles.

S4.6.1.3 *Flash rate and percent current "on" time.* The flash rate and the percent current "on" time of normally closed type flashers shall be within the unshaded portion of Figure 1 and those for normally open type flashers shall be within the entire rectangle of Figure 1, including the shaded areas.

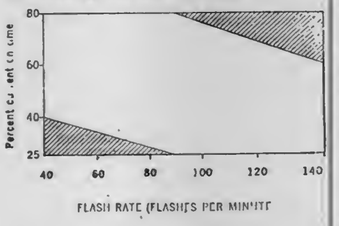

Figure 1

Each flasher shall meet these requirements under the following conditions:

(a) The flash rate and percent current "on" time are measured after the flasher has been operating for five consecutive cycles, and is calculated upon an average of not less than three consecutive cycles.

(b) For turn signal flashers, the operating tolerances apply over the combinations of bulb voltages and temperatures listed below as applicable:

(i) 12.8 or 6.4 volts; 75° F.
(ii) 11.0 or 5.5 volts; 0° F.
(iii) 15.0 or 7.5 volts; 0° F.
(iv) 11.0 or 5.5 volts; 125° F.
(v) 14.0 or 7.0 volts; 125° F.

(c) For hazard warning signal flashers, the operating tolerances apply over the combinations of bulb voltages and ambient temperatures listed below as applicable:

(i) 12.8 or 6.4 volts; 75° F.
(ii) 12.0 or 6.0 volts; 0° F.
(iii) 13.0 or 6.5 volts; 0° F.
(iv) 11.00 or 5.5 volts; 125° F.
(v) 13.0 or 6.5 volts; 125° F.

S4.6.2 *Durability requirements.*

S4.6.2.1 *Turn signal flashers.* Each turn signal flasher shall operate continuously for not less than 25 hours with the design load connected in the standard test circuit with the power source adjusted to apply 14 volts or 7.0 volts to the input terminals of the circuit. Each flasher shall then meet the requirements of paragraphs S4.6.1.1, S4.6.1.2, and S4.6.1.3 under the conditions of S4.6.1.3 (a) and (b)(i). The ambient temperature for the durability test is 75° F.

S4.6.2.2 *Hazard warning signal flashers.* Each hazard warning signal flasher shall operate continuously for not less than 12 hours with the design load connected in the standard test circuit with the power source adjusted to apply 13 volts or 6.5 volts to the input terminals of the circuit. Each flasher shall then meet the requirements of paragraphs S4.6.1.1, S4.6.1.2, and S4.6.1.3 under the conditions of S4.6.1.3 (a) and (c)(i). The ambient temperature for the durability test is 75° F.

S4.6.3 *Combination flashers.* Each combination turn signal and hazard warning signal flasher shall meet the requirements of paragraph S4.6.1 and S4.6.2 when tested in the following sequence:

(a) For performance as a turn signal flasher pursuant to paragraph S4.6.1;

(b) For performance as a hazard warning signal flasher pursuant to paragraph S4.6.1;

(c) For durability as a turn signal flasher pursuant to paragraph S4.6.2.1; and

(d) For durability as a hazard warning signal flasher pursuant to paragraph S4.6.2.2.

Effective date. January 1, 1973. Manufacturers commented that the proposed effective date of January 1, 1972, was impracticable in view of the necessity to evaluate and adopt new flasher and switch designs meeting the requirements. In light of the time needed for changes in design and preparation for production, the Administrator has found, for good cause shown, that an effective date later than 1 year from the date of issuance is in the public interest.

(Sec. 103, 119, National Traffic and Motor Vehicle Safety Act of 1966, 15 U.S.C. 1392, 1407, delegation of authority from Secretary of Transportation to National Highway Traffic Safety Administrator, 49 CFR 1.51)

Issued on August 20, 1971.

CHARLES H. HARTMAN,
Acting Administrator.

Chapter X—Interstate Commerce Commission

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S.O. 1077, Amdt. 1]

PART 1033—CAR SERVICE

Kansas City Southern Railway Co. Authorized To Operate Over Certain Trackage of Southern Pacific Transportation Co.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 23d day of August 1971.

Upon further consideration of Service Order No. 1077 (36 F.R. 13927), and good cause appearing therefor:

It is ordered, That § 1033.1077 *Service Order No. 1077* (The Kansas City Southern Railway Co. authorized to operate over certain trackage of Southern Pacific Transportation Co.) be, and it is hereby, amended by substituting the following paragraph (e) for paragraph (e) thereof:

(e) *Expiration date.* This order shall expire at 11:59 p.m., November 30, 1971, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., August 31, 1971.

(Secs. 1, 12, 15 and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10–17), 15(4), and 17(2))

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD,
Secretary.

Title 32A—NATIONAL DEFENSE, APPENDIX

Chapter I—Office of Emergency Preparedness

[OEP Economic Stabilization Reg. 1; Circular No. 3]

SUPPLEMENTARY GUIDANCE FOR APPLICATION

Economic Stabilization Circular No. 3

This circular is designed for general information only. The statements herein are intended solely as general guides drawn from OEP Economic Stabilization Regulation No. 1 and from specific determinations by the Cost of Living Council and do not constitute legal rulings applicable to cases which do not conform to the situations clearly intended to be covered by such guides.

NOTE: Provisions of this and subsequent circulars are subject to clarification, revision, or revocation.

This third circular covers determinations by the Council from August 25, 1971, through August 26, 1971.

APPENDIX I

ECONOMIC STABILIZATION CIRCULAR NO. 3

100. *Purpose.* (a) On August 15, 1971, President Nixon issued Executive Order No. 11615 providing for stabilization of prices, rents, wages, and salaries and establishing the Cost of Living Council, a Federal agency. The Order delegated to the Council all of the powers conferred on the President by the Economic Stabilization Act of 1970, as amended.

(b) By its Order No. 1 the Council delegated to the Director of the Office of Emergency Preparedness authority to administer the programs for the stabilization of prices, rents, wages, and salaries as directed by Section 1 of Executive Order No. 11615.

(c) The purpose of this circular, the third in a series to be issued, is to furnish further guidance to Federal officials and the public in order to promote maximum understanding and cooperation in the application of the program.

200. *Authority.* Relevant legal authority for the program includes the following:

The Constitution. Economic Stabilization Act of 1970, Public Law 91-379, 84 Stat. 799; Public Law 92-15, 85 Stat. 38.
Executive Order No. 11615, 36 F.R. 15127, August 17, 1971.
Cost of Living Council Order No. 1 (36 F.R. 16215, Aug. 20, 1971).
OEP Economic Stabilization Regulation No. 1, as amended (36 F.R. 16515, Aug. 21, 1971).

300. *General Guidelines.* (a) The guidance provided in this circular is in the nature of additions to or clarifications of previous determinations of the Cost of Living Council covered in previous OEP Economic Stabilization Circulars.

(b) The numbering system used in this circular corresponds to that used in OEP Economic Stabilization Circular No. 1.

400. *Price guidelines.*

401. *General guidelines.* (a) A travel agent cannot raise prices on that part of a tour package relating to services in the United States nor can he raise his markup for overhead and profit above that prevailing during the base period.

Exemption. A travel agent can, however, raise prices on tours to the extent that the costs of foreign services offered in the tour package are increased, i.e., foreign hotel rates, restaurant meals, transportation costs, etc. His records must clearly establish that each increase meets this test, and if he cannot so demonstrate, this exemption will not apply to his increase.

(b) School and college room and board rates are not exempt from the freeze. Such payments are handled just like tuition. If there were substantial transactions during the base period (confirmed by deposits), the increase may be charged. If this requirement of substantiality is not satisfied, the increase is not allowed.

(c) If quantity discounts are offered, customers who purchase large volumes eligible for the discount can be charged the applicable higher price if they reduce the amount of their purchases and thus fall into a lower quantity (higher price) bracket. During the 90-day freeze, customers may be charged in accordance with rate or price schedules established in accordance with the freeze requirements in the base period prior to August 15, 1971. However, charges applicable to various categories of rates or prices set out in effective schedules may not be increased.

(d) Exceptions from price ceiling regulations will not be granted to companies which did not raise their prices prior to August 15, even though they began paying higher wages under new labor contracts before that date.

(e) If retailers bought merchandise for higher prices during the base period, but had not increased their own prices prior to the freeze, they cannot now do so.

(f) Commodity futures markets are covered by the freeze, except for raw agricultural products.

(g) The ceiling price for all commodity futures prices which mature during the period is based on "spot" prices during the 30-day period ending August 14. Where spot prices are not available, the ceiling would be the price at which a substantial volume of the most recent futures contract was traded during the base period.

NOTE: Section 202 of the Economic Stabilization Act of 1970 prohibits the establishment of any ceiling below the price prevailing on May 25, 1970.

(h) "Deposits" for rentals of property or articles cannot be raised during the freeze.

403. *Prices on imports.* (a) Many businesses have a serious inventory problem due to the import surcharge. Where possible, surcharge and nonsurcharge items should be stored separately. Where this cannot be done, the wholesaler may elect to charge the base period ceiling price for each item that was in effect prior to August 15, 1971, until a quantity has been sold for each item equal to the quantity on hand prior to the arrival of items with a surcharge added. He may then charge at the old rate plus the exact surcharge.

405. *Government-regulated industries.* (a) The special incentive per diem charges on railroad freight cars which are authorized by the Interstate Commerce Commission will be permitted during the freeze.

406. *Commodities and services.* (a) A broker, when he buys from many different mills at different prices and sells to several different customers, essentially provides a service since he legally never takes title to the product. Therefore, his fee for this service is frozen. If his fee is determined on the basis of a percentage of the value of the product shipment, this percentage is frozen at the same level as during the month prior to August 15, 1971.

500. *Wage and salary guidelines.*

501. *General guidelines.* (a) As used in Executive Order No. 11615, the term "wages and salaries" includes all forms of remuneration or inducement to employees by their employers, including but not limited to: Vacation and holiday payments; bonuses; layoff, and supplemental unemployment insurance benefits; night shift, overtime, and other premiums; employer contributions to insurance, savings, or other welfare benefits; employer contributions to pension or annuity funds; payments in kind, job prerequisites, cost-of-living allowances, expense accounts, commissions, discounts, stock options, payments for deferred compensation, and all other fringe benefits. In addition, there may be no changes in working conditions which result in more pay per hour worked (for example, a schedule which shortens the workweek without a proportionate decrease in pay).

NOTE: The above redefinition of the term "wages and salaries" as used in Executive Order 11615 in effect clarifies and amplifies the definition as stated in section 6(b) of OEP Economic Stabilization Regulation No. 1 and section 501(b) of OEP Stabilization Circular No. 1.

(b) Profits from family owned businesses are not subject to the freeze. However, the amount of income to family members active in the management of the business, if paid as a salary under an agreed formula during the base period, is frozen at the formula rate.

NOTE: It is important to point out that ceilings have been established for prices and wages and the President has asked that dividends be voluntarily frozen.

502. *Specific guidelines.* (a) Employees who are U.S. citizens working abroad for companies which are incorporated in the United States are subject to the freeze.

NOTE: The above clarifies section 502(q) of OEP Economic Stabilization Circular No. 1.

(b) State payments to people disabled in job-related accidents under workmen's compensation laws are not subject to the

freeze since such payments are not prices, wages, or rents.

(c) An employer cannot reduce the official work day from 8 hours to 7 hours and pay overtime beginning after the 7 hours. Wages and salaries include all forms of compensation, including overtime. Indirect means to increase compensation above ceiling rates are not permitted.

(d) An employer cannot increase the number of days allowed off for purposes such as funerals, etc., since this constitutes an increase in fringe benefits.

(e) An increase in an employer's contribution can be made to a pension fund to finance a benefit increase which was granted and became effective before August 15.

(f) New stock options cannot be issued during the freeze.

(g) Professional athletes who had not entered into new contracts prior to the freeze, cannot negotiate contracts during the 90 day period which call for increases in salary to cover their services during the freeze.

(h) The freeze cannot be used to continue wage prices which are illegal under statutes prohibiting descrimination on the basis of age, sex, or race, e.g., lower pay for equal work by women.

(i) Newly hired reporters progress from year to year at a higher rate of pay until they reach "journeyman" stage. If the conditions specified below apply to any occupation, including reporters, the employee is eligible for scheduled wage increases under the program. If these conditions do not exist, these increases are considered longevity increases which may not be granted. A bona fide apprentice or learners program must be demonstrated by the existence of a formal program of on-the-job or classroom training whereby the apprentice or learner assumes greater responsibilities or additional functions as he progresses through each step of the program. These must be established programs which were in existence prior to the freeze.

NOTE: The above amplifies section 502 (j)(2) of OEP Economic Stabilization Circular No. 1.

(j) Veterans returning to their premilitary service employment are normally entitled to receive all the increases they would have received if they had not served in the military. They can receive these increases when rehired during the freeze if the wage is not above the ceiling wage established in the base period.

600. *Rent guidelines.*

602. *Specific guidelines.* (a) A landlord would be in violation of the freeze if he attempted to evict a tenant for refusing to pay rent in excess of the ceiling rent applicable to his rental apartment or house. Section 10(a) of OEP Economic Stabilization Regulation No. 1 prohibits any practice which constitutes a means to obtain a higher rent than that permitted under the freeze. Therefore, such an eviction would constitute a violation of the freeze.

(b) The rental rate for property which was not used for rental purposes prior to the freeze is based on comparable units in the immediate area during the base period.

(c) Prior to August 15, 1971, an owner of a multifamily project subject to control of rents by a Federal or local regulatory agency applied for an increase in rents. Prior to August 15, 1971, the regulatory agency authorized the increase, which was to become effective after August 15, 1971. The owner cannot charge the new rents as the rents in existence during the base period are the maximum rents that may be charged.

(d) A city has approved a new occupancy tax on all rental dwellings, to become effective after August 15, 1971. A property owner cannot increase rents to compensate for this increase in expenses.

(e) A property owner (such as a public housing authority) has established a rental schedule based on charging 20 percent of the tenants' income for rent. Prior to August 15, 1971, the owner announced to all tenants that starting after August 15, 1971, the percentage of income paid for rent would be increased to 25 percent. The owner cannot collect the increased rents since he is restricted to that percentage of income charged for rents which prevailed during the base period.

(f) A property owner has a rent schedule in existence prior to August 15, 1971, which establishes rents for each individual dwelling. On that earlier date, he announces that he is changing to a system of establishing rents as a percentage of tenants' income after August 15, 1971. He can charge such percentage-of-income rents after August 15, 1971, but the rent may be no higher than the dollar amount in the base period for any individual unit.

(g) The property owner of a vacation residence rents the residence for the season November 1 to May 1 each year at a season rental of $1,000. He wishes to rent the property after August 15, 1971, for the term of 1 year. He may charge the rent generally prevailing for comparable units in the immediate area for year-round use during the base period.

(h) If a rental unit becomes vacant during the freeze period, a higher rate cannot be charged when it is rented again.

1001. *Effective date.* This circular, unless modified, superseded, or revoked, is effective on the date of publication for a period terminating on November 12, 1971.

Dated: August 27, 1971.

G. A. LINCOLN,
Director, Office of Emergency Preparedness.

Chapter X—Oil Import Administration, Department of the Interior

[Oil Import Reg. 1 (Rev. 5) Amdt. 35]

OI REG. 1—OIL IMPORT REGULATION

Additional Allocations of Crude Oil Districts I–IV

There appeared in the FEDERAL REGISTER for July 31, 1971 (36 F.R. 14220), a proposal to make additional allocations of imports of crude and unfinished oils to holders of allocations under section 10 of Oil Import Regulation 1 (Revision 5), as amended, and to holders of allocations under section 23 of such regulation. Following careful consideration of the comments received, it was decided that additional allocations should be made only to holders of allocations and licenses under sections 10 and 23, and to holders of refinery allocations under section 25 of Oil Import Regulation 1 (Revision 5), as amended, and that all licenses issued under this Amendment shall expire December 31, 1971.

Accordingly, sections 10, 23, and 25 of Oil Import Regulation 1 (Revision 5), as amended, are hereby amended in the following respects:

To section 10, there is added a new paragraph, designated (e) reading as follows:

Sec. 10 Allocations—crude and unfinished oils—refiners—Districts I–IV.

* * * * *

(e) The holder of an allocation made under this section (for the current allocation period) shall receive an additional allocation equal to approximately 8.3954 percent of the amount of the allocation issued pursuant to paragraph (b) of this section. Unfinished oils may be imported under licenses issued pursuant to this paragraph (e), but imports of such oil shall not exceed 15 percent of the additional allocation made under this paragraph (e).

To section 23 of Oil Import Regulation 1 (Revision 5), as amended, there is added a new paragraph, designated (p), reading as follows:

Sec. 23 Canadian overland imports—Districts I–IV.

* * * * *

(p) The holder of an allocation of Canadian imports made under this section for the current allocation period and who has not relinquished the same may receive an additional allocation equal to approximately the amount of his qualified inputs multiplied by 0.955 percent. Paragraph (h) of this section 23 will apply to additional allocations made pursuant to this paragraph (p); however, the date for relinquishment of imports made under such additional allocation shall be October 15, 1971.

To section 25 of Oil Import Regulation 1 (Revision 5), as amended, there is added a new paragraph, designated (k), reading as follows:

Sec. 25 Allocation of crude and unfinished oils—Districts I–IV, District V—new or reactivated refinery capacity and petrochemical plants—based upon estimated inputs.

* * * * *

(k) The holder of an allocation and of license or licenses made and issued, respectively, under this section, covering imports into Districts I–IV during the current allocation period for new or reactivated refinery capacity, may receive an additional allocation which shall be equal approximately to that part of his original allocation with respect to which a license or licenses has or have been issued multiplied by 8.3954 percent. Unfinished oils may be imported under licenses issued pursuant to this paragraph (k), but imports of such oil shall not exceed 15 percent of the additional allocation made under this paragraph (k).

W. T. PECORA,
Acting Secretary of the Interior.

I concur: August 25, 1971.

G. A. LINCOLN,
Director, Office of Emergency Preparedness.

[FR Doc.71-12686 Filed 8-26-71;12:35 p.m.]

Proposed Rule Making

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[26 CFR Part 1]

INCOME TAX

Certain Tax-Exempt Membership Organizations

Notice is hereby given that the regulations set forth in tentative form in the attached appendix are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury or his delegate. Prior to the final adoption of such regulations, consideration will be given to any comments or suggestions pertaining thereto which are submitted in writing, preferably in quintuplicate, to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224, by September 27, 1971. Any written comments or suggestions not specifically designated as confidential in accordance with 26 CFR 601.601(b) may be inspected by any person upon written request. Any person submitting written comments or suggestions who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit his request, in writing, to the Commissioner by September 27, 1971. In such case, a public hearing will be held, and notice of the time, place, and date will be published in a subsequent issue of the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

[SEAL] JOHNNIE M. WALTERS,
Commissioner of Internal Revenue.

In order to conform the Income Tax Regulations (26 CFR Part 1) under sections 501(c) (10) and (18), 801, and 810 of the Internal Revenue Code of 1954 to sections 121(b) (5) and (6) of the Tax Reform Act of 1969 (83 Stat. 541), such regulations are amended as follows:

PARAGRAPH 1. Section 1.501(c)(10) is amended to read as follows:

§ 1.501(c)(10) Statutory provisions; exemption from tax on corporations, certain trusts, etc.; certain fraternal beneficiary societies.

Sec. 501. *Exemption from tax on corporations, certain trusts, etc.*

* * * * *

(c) *List of exempt organizations.* The following organizations are referred to in subsection (a):

* * * * *

(10) Domestic fraternal societies, orders, or associations, operating under the lodge system—

(A) The net earnings of which are devoted exclusively to religious, charitable, scientific, literary, educational, and fraternal purposes, and

(B) Which do not provide for the payment of life, sick, accident, or other benefits.

[Sec. 501(c) (10) as amended by section 121, Tax Reform Act, 1969 (83 Stat. 541)]

PAR. 2. There is added immediately after § 1.501(c) (10) the following new section:

§ 1.501(c)(10)–1 Certain fraternal beneficiary societies.

(a) For taxable years beginning after December 31, 1969, an organization will qualify for exemption under section 501(c) (10) if it—

(1) Is a domestic fraternal beneficiary society order, or association, described in section 501(c) (8) and the regulations thereunder except that it does not provide for the payment of life, sick, accident, or other benefits to its members, and

(2) Devotes its net earnings exclusively to religious, charitable, scientific, literary, educational, and fraternal purposes.

Any organization described in section 501(c) (7), such as, for example, a national college fraternity, is not described in section 501(c) (10) and this section.

PAR. 3. There is added immediately § 1.501(c) (17)–3 the following new sections:

§ 1.501(c)(18) Statutory provisions; exemption from tax on corporations, certain trusts, etc.; certain funded pension trusts.

Sec. 501. *Exemption from tax on corporations, certain trusts, etc.*

* * * * *

(c) *List of exempt organizations.* The following organizations are referred to in subsection (a):

* * * * *

(18) A trust or trusts created before June 25, 1959, forming part of a plan providing for the payment of benefits under a pension plan funded only by contributions of employees, if—

(A) Under the plan, it is impossible, at any time prior to the satisfaction of all liabilities with respect to employees under the plan, for any part of the corpus or income to be (within the taxable year or thereafter) used for, or diverted to, any purpose other than the providing of benefits under the plan,

(B) Such benefits are payable to employees under a classification which is set forth in the plan and which is found by the Secretary or his delegate not to be discriminatory in favor of employees who are officers, shareholders, persons whose principal duties consist of supervising the work of other employees, or highly compensated employees, and

(C) Such benefits do not discriminate in favor of employees who are officers, shareholders, persons whose principal duties consist of supervising the work of other employees, or highly compensated employees.

A plan shall not be considered discriminatory within the meaning of this subparagraph merely because the benefits received under the plan bear a uniform relationship to the total compensation, or the basic or regular rate of compensation, of the employees covered by the plan.

[Sec. 501(c)(18) as added by section 121, Tax Reform Act, 1969 (83 Stat. 541)]

§ 1.501(c)(18)–1 Certain funded pension trusts.

(a) *In general.* Organizations described in section 501(c)(18) are trusts created before June 25, 1959, forming part of a plan for the payment of benefits under a pension plan funded only by contributions of employees. In order to be exempt, such trusts must also meet the requirements set forth in section 501 (c)(18) (A), (B), and (C), and in paragraph (b) of this section.

(b) *Requirements for qualification.* A trust described in section 501(c)(18) must meet the following requirements—

(1) *Local law.* The trust must be a valid, existing trust under local law, and must be evidenced by an executed written document.

(2) *Funding.* The trust must be funded solely from contributions of employees who are members of the plan. For purposes of this section, the term "contributions of employees" shall include earnings on, and gains derived from, the assets of the trust which were contributed by employees.

(3) *Creation before June 25, 1959*—(i) *In general.* The trust must have been created before June 25, 1959. A trust created before June 25, 1959 is described in section 501(c)(18) and this section even though changes in the makeup of the trust have occurred since that time so long as these are not fundamental changes in the character of the trust or in the character of the beneficiaries of the trust. Increases in the beneficiaries of the trust by the addition of employees in the same or related industries, whether such additions are of individuals or of units (such as local units of a union) will generally not be considered a fundamental change in the character of the trust. A merger of a trust created after June 25, 1959 into a trust created before such date is not in itself a fundamental change in the character of the latter trust if the two trusts are for the benefit of employees of the same or related industries.

(ii) *Examples.* The provisions of this subparagraph may be illustrated by the following examples:

Example (1). Assume that trust C, for the benefit of members of participating locals of National Union X, was established in 1950 and adopted by 29 locals before June 25, 1959. The subsequent adoption of trust C by additional locals of National Union X in 1962 will not constitute a fundamental change in the character of trust C, since such subsequent adoption is by employees in a related industry.

Example (2). Assume the facts as stated in example (1), except that in 1965 National Union X merged with National Union Y, whose members are engaged in trades related to those engaged in by X's members. Assume further that trust D, the employee funded pension plan and fund for employees of Y, was subsequently merged into trust C. The merger of trust D into trust C would not in itself constitute a fundamental change in the character of trust C, since both C and D are for the benefit of employees of related industries.

(4) *Payment of benefits.* The trust must provide solely for the payment of pension or retirement benefits to its beneficiaries. For purposes of this section, the term "retirement benefits" is intended to include customary and incidental benefits, such as death benefits within the limits permissible under section 401.

(5) *Diversion.* The trust must be part of a plan which provides that, before the satisfaction of all liabilities to employees covered by the plan, the corpus and income of the trust cannot (within the taxable year and at any time thereafter) be used for, or diverted to, any purpose other than the providing of pension or retirement benefits. Payment of expenses in connection with the administration of a plan providing pension or retirement benefits shall be considered a payment to provide such benefits and shall not affect the qualification of the trust.

(6) *Discrimination.* The trust must be part of a plan whose eligibility conditions and benefits do not discriminate in favor of employees who are officers, shareholders, persons whose principal duties consist of supervising the work of other employees, or highly compensated employees. See sections 401(a) (3) (B) and 401(a) (4) and §§ 1.401–3 and 1.401–4. However, a plan is not discriminatory within the meaning of section 501(c) (18) merely because the benefits received under the plan bear a uniform relationship to the total compensation, or the basic or regular rate of compensation, of the employees covered by the plan. Accordingly, the benefits provided for highly paid employees may be greater than the benefits provided for lower paid employees if the benefits are determined by reference to their compensation; but, in such a case, the plan will not qualify if the benefits paid to the higher paid employees are a larger portion of compensation than the benefits paid to lower paid employees.

(7) *Objective standards.* The trust must be part of a plan which requires that benefits be determined according to objective standards. Thus, while a plan may provide similarly situated employees with benefits which differ in kind and amount, these benefits may not be determined solely in the discretion of the trustees.

(c) *Effective date.* The provisions of section 501(c) (18) and this section shall apply with respect to taxable years beginning after December 31, 1969.

PAR. 4. Section 1.801 is amended by amending section 801(b) (2) and by revising the historical note. These amended and revised provisions read as follows:

§ 1.801 Statutory provisions; life insurance companies; definition of life insurance company.

Sec. 801. *Definition of life insurance company.*

* * * * *

(b) *Life insurance reserves defined.*

* * * * *

(2) *Reserves must be required by law.* Except—

(A) In the case of policies covering life, health, and accident insurance combined in one policy issued on the weekly premium payment plan, continuing for life and not subject to cancellation, and

(B) As provided in paragraph (3), in addition to the requirements set forth in paragraph (1), life insurance reserves must be required by law.

[Sec. 801 as amended by sec. 2, Life Insurance Company Tax Act 1955 (70 Stat. 36); sec. 2, Life Insurance Company Tax Act 1959 (73 Stat. 112); sec. 3, Act of October 23, 1962 (P.L. 87–858, 76 Stat. 1134); sec. 121, Tax Reform Act of 1969 (83 Stat. 541)]

PAR. 5. Paragraph (a) (2) of § 1.801–3 is amended to read as follows:

§ 1.801–3 Definitions.

(a) *Insurance company.*

* * * * *

(2) Insurance companies include both stock and mutual companies, as well as mutual benefit insurance companies. For taxable years beginning before January 1, 1970, a voluntary unincorporated association of employees, including an association fulfilling the requirements of section 801(b) (2) (B) (as in effect for such years), formed for the purpose of relieving sick and aged members and the dependents of deceased members, is an insurance company, whether the fund for such purpose is created wholly by membership dues or partly by contributions from the employer. A corporation which merely sets aside a fund for the insurance of its employees is not an insurance company, and the income from such fund shall be included in the return of the corporation.

PAR. 6. Paragraph (b) (2) of § 1.801–4 is amended to read as follows:

§ 1.801–4 Life insurance reserves.

* * * * *

(b) *Certain reserves which need not be required by law.*

* * * * *

(2) For taxable years beginning before January 1, 1970, in the case of policies issued by an organization which met the requirements of section 501(c) (9) (as it existed prior to amendment by the Tax Reform Act of 1969) other than the requirement of subparagraph (B) thereof.

* * * * *

PAR. 7. Section 1.810 is amended by repealing subsection (e) and by revising the historical note. Such provisions read as follows:

§ 1.810 Statutory provisions; life insurance companies; rules for certain reserves.

Sec. 810. *Rules for certain reserves.*

* * * * *

(e) [repealed]

[Sec. 810 as added by sec. 2, Life Insurance Company Tax Act 1959 (73 Stat. 125); amended by sec. 121, Tax Reform Act 1969 (83 Stat. 541)]

PAR. 8. Paragraph (c) (4) of § 1.810–2 is amended to read as follows:

§ 1.810–2 Rules for certain reserves.

* * * * *

(c) *Special rules.*

* * * * *

(4) *Cross references.* For taxable years beginning before January 1, 1970, see section 810(e) (as in effect for such years) and § 1.810–4 for special rules for determining the net increase or decrease in the sum of the items described in section 810(c) and paragraph (b) of this section in the case of certain voluntary employees' beneficiary associations. For similar special rules in the case of life insurance companies issuing variable annuity contracts, see section 801(g) (4) and the regulations thereunder.

PAR. 9. Section 1.810–4 is amended by adding thereto a new paragraph (e). Such added paragraph reads as follows:

§ 1.810–4 Certain decreases in reserves of voluntary employees' beneficiary associations.

* * * * *

(e) *Effective date; cross reference.* The provisions of section 810(e) (as in effect for such years) and this section apply only with respect to taxable years beginning before January 1, 1970. For provisions relating to certain funded pension trusts applicable to taxable years beginning after December 31, 1969, see section 501(c)(18) and the regulations thereunder.

[26 CFR Part 301]

SEIZURE OF PROPERTY FOR COLLECTION OF TAXES

Notice of Proposed Rule Making

Notice is hereby given that the regulations set forth in tentative form in the attached appendix are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury or his delegate. Prior to the final adoption of such regulations, consideration will be given to any comments or suggestions pertaining thereto which are submitted in writing, preferably in quintuplicate, to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224, by September 27, 1971. Any written comments or suggestions not specifically designated as confidential in accordance with 26 CFR 601.601(b) may be inspected by any person upon written request. Any person submitting written comments or suggestions who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit his request, in writing, to the Commissioner by September 27, 1971. In such case, a public hearing will be held, and notice of the time, place, and

date will be published in a subsequent issue of the Federal Register. The proposed regulations are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

[SEAL] RANDOLPH W. THROWER,
Commissioner of Internal Revenue.

In order to conform the Regulations on Procedure and Administration (26 CFR Part 301) under sections 6331, 6332, 6334, 6335, 6337, 6338, 6339, 6342, and 6343 of the Internal Revenue Code of 1954 to section 104 of the Federal Tax Lien Act of 1966 (80 Stat. 1135), such regulations are amended as set forth hereinafter. Section 301.6332-2 of the regulations hereby adopted supersedes those provisions of § 400.3 of this chapter relating to section 104(b) of such Act which were prescribed by T.D. 6944, approved January 17, 1968 (33 F.R. 733).

PARAGRAPH 1. Section 301.6331 is amended by revising section 6331(b) and by adding a historical note. These revised and added provisions read as follows:

§ 301.6331 Statutory provisions; levy and distraint.

Sec. 6331. *Levy and distraint.* • • •

(b) *Seizure and sale of property.* The term "levy" as used in this title includes the power of distraint and seizure by any means. A levy shall extend only to property possessed and obligations existing at the time thereof. In any case in which the Secretary or his delegate may levy upon property or rights to property, he may seize and sell such property or rights to property (whether real or personal, tangible or intangible).

• • • • • •

[Sec. 6331 as amended by sec. 104(a), Federal Tax Lien Act of 1966 (80 Stat. 1135)]

PAR. 2. Paragraph (a)(1) of § 301.6331-1 is amended to read as follows:

§ 301.6331-1 Levy and distraint.

(a) *Authority to levy*—(1) *In general.* If any person liable to pay any tax neglects or refuses to pay such tax within 10 days after notice and demand, the district director to whom the assessment is charged or, upon his request, any other district director, may proceed to collect the tax by levy upon any property, or rights to property, whether real or person, tangible or intangible, either belonging to such person or with respect to which there is a lien provided by section 6321 or 6324 (or the corresponding provision of prior law) for the payment of such tax. As used in section 6331 and this section, the term "tax" includes any interest, additional amount, addition to tax, or assessable penalty, together with any costs and expenses that may accrue in addition thereto. For exemption of certain property from levy, see section 6334 and the regulations thereunder. Property subject to a Federal tax lien which has been sold or otherwise transferred by the taxpayer may be seized while in the hands of the transferee or of any subsequent transferee. However, see provisions under sections 6323 and 6324 (a)(2) and (b) for protection of certain transferees against a Federal tax lien. Levy may be made by serving a notice of levy on any person in possession of, or obligated with respect to, property or rights to property subject to levy including receivables, bank accounts, evidences of debt, securities, and accrued salaries, wages, commissions, and other compensation. A levy extends only to property possessed and obligations which exist at the time of the levy. Obligations exist when the liability of the obligor is fixed and determinable although the right to receive payment thereof may be deferred until a later date. For example, if a wage earner is paid on the Wednesday following the close of each workweek, a levy made upon his employer on Monday would reach his wages due for the prior workweek, although the employer need not satisfy the levy by paying over such amount to the district director until Wednesday. Similarly, a levy only reaches property subject to levy in the possession of the person levied upon at the time the levy is made. If, for example, a levy is made on a bank with respect to the account of a delinquent taxpayer and the bank surrenders to the district director the amount of the taxpayer's balance at the time the levy is made, the levy is satisfied. The levy has no effect upon any subsequent deposit made in the bank by the taxpayer. Subsequent deposits may be reached only by a subsequent levy on the bank.

• • • • • •

PAR. 3. Section 301.6332 is amended by revising subsections (a) and (b) of section 6332, by redesignating subsection (c) of section 6332 as subsection (e), by adding new subsections (c) and (d) to section 6332, and by adding a historical note. These amended and added provisions read as follows:

§ 301.6332 Statutory provisions; surrender of property subject to levy.

Sec. 6332. *Surrender of property subject to levy*—(a) *Requirement.* Except as otherwise provided in subsection (b), any person in possession of (or obligated with respect to) property or rights to property subject to levy upon which a levy has been made shall, upon demand of the Secretary or his delegate, surrender such property or rights (or discharge such obligation) to the Secretary or his delegate, except such part of the property or rights as is, at the time of such demand, subject to an attachment or execution under any judicial process.

(b) *Special rule for life insurance and endowment contracts*—(1) *In general.* A levy on an organization with respect to a life insurance or endowment contract issued by such organization shall, without necessity for the surrender of the contract document, constitute a demand by the Secretary or his delegate for payment of the amount described in paragraph (2) and the exercise of the right of the person against whom the tax is assessed to the advance of such amount. Such organization shall pay over such amount 90 days after service of notice of levy. Such notice shall include a certification by the Secretary or his delegate that a copy of such notice has been mailed to the person against whom the tax is assessed at his last known address.

(2) *Satisfaction of levy.* Such levy shall be deemed to be satisfied if such organization pays over to the Secreary or his delegate the amount which the person against whom the tax is assessed could have had advanced to him by such organization on the date prescribed in paragraph (1) for the satisfaction of such levy, increased by the amount of any advance (including contractual interest thereon) made to such person on or after the date such organization had actual notice or knowledge (within the meaning of section 6323(i)(1)) of the existence of the lien with respect to which such levy is made, other than an advance (including contractual interest thereon) made automatically to maintain such contract in force under an agreement entered into before such organization had such notice or knowledge.

(3) *Enforcement proceedings.* The satisfaction of a levy under paragraph (2) shall be without prejudice to any civil action for the enforcement of any lien imposed by this title with respect to such contract.

(c) *Enforcement of levy*—(1) *Extent of personal liability.* Any person who fails or refuses to surrender any property or rights to property, subject to levy, upon demand by the Secretary or his delegate, shall be liable in his own person and estate to the United States in a sum equal to the value of the property or rights not so surrendered, but not exceeding the amount of taxes for the collection of which such levy has been made, together with costs and interest on such sum at the rate of 6 percent per annum from the date of such levy. Any amount (other than costs) recovered under this paragraph shall be credited against the tax liability for the collection of which such levy was made.

(2) *Penalty for violation.* In addition to the personal liability imposed by paragraph (1), if any person required to surrender property or rights to property fails or refuses to surrender such property or rights to property without reasonable cause, such person shall be liable for a penalty equal to 50 percent of the amount recoverable under paragraph (1). No part of such penalty shall be credited against the tax liability for the collection of which such levy was made.

(d) *Effect of honoring levy.* Any person in possession of (or obligated with respect to) property or rights to property subject to levy upon which a levy has been made who, upon demand by the Secretary or his delegate, surrenders such property or rights to property (or discharges such obligation) to the Secretary or his delegate (or who pays a liability under subsection (c)(1)) shall be discharged from any obligation or liability to the delinquent taxpayer with respect to such property or rights to property arising from such surrender or payment. In the case of a levy which is satisfied pursuant to subsection (b), such organization shall also be discharged from any obligation or liability to any beneficiary arising from such surrender or payment.

(e) *Person defined.* The term "person," as used in subsection (a), includes an officer or employee of a corporation or a member or employee of a partnership, who as such officer, employee, or member is under a duty to surrender the property or rights to property, or to discharge the obligation.

[Sec. 6332 as amended by sec. 104 (b), Federal Tax Lien Act of 1966 (80 Stat. 1135)]

PAR. 4. Section 301.6332-1 is amended by revising paragraphs (a)(1), (b), and (c) and by adding a new paragraph (d). These revised and added provisions read as follows:

§ 301.6332-1 Surrender of property subject to levy.

(a) *Requirement*—(1) *In general.* Except as otherwise provided in § 301.6332-2, relating to levy in the case of life insurance and endowment contracts, any person in possession of (or obligated with respect to) property or rights to property subject to levy and upon which a levy has been made shall, upon demand of the district director, surrender the property or rights (or discharge the obligation) to the district director, except that part of the property or rights (or obligation) which, at the time of the demand, is actually or constructively under the jurisdiction of a court because of an attachment or execution under any judicial process.

• • • • • •

(b) *Enforcement of levy*—(1) *Extent of personal liability.* Any person who, upon demand of the district director, fails or refuses to surrender any property or right to property subject to levy is liable under the provisions of section 6332(c)(1) in his own person and estate to the United States in a sum equal to the value of the property or rights not so surrendered, but not exceeding the amount of the taxes for the collection of which the levy has been made, together with costs and interest on such sum at the rate of 6 percent per annum from the date of the levy. Any amount, other than costs, recovered under section 6332(c)(1) shall be credited against the tax liability for the collection of which the levy was made.

(2) *Penalty for violation.* In addition to the personal liability described in subparagraph (1) of this paragraph, any person who is required to surrender property or rights to property and who fails or refuses to surrender them without reasonable cause is liable for a penalty equal to 50 percent of the amount recoverable under section 6332(c)(1). No part of the penalty described in this subparagraph shall be credited against the tax liability for the collection of which the levy was made. The penalty described in this subparagraph is not applicable in cases where bona fide dispute exists concerning the amount of the property to be surrendered pursuant to a levy or concerning the legal effectiveness of the levy. However, if a court in a later enforcement suit sustains the levy, then reasonable cause would usually not exist to refuse to honor a later levy made under similar circumstances.

(c) *Effect of honoring levy.* Any person in possession of, or obligated with respect to, property or rights to property subject to levy and upon which a levy has been made who, upon demand by the district director, surrenders the property or rights to property, or discharges the obligation, to the district director, or who pays a liability described in paragraph (b)(1) of this section, is discharged from any obligation or liability to the delinquent taxpayer with respect to the property or rights to property arising from the surrender or payment. If an insuring organization satisfies a levy with respect to a life insurance or endowment contract in accordance with § 301.6332-2, the insuring organization is discharged from any obligation or liability to any beneficiaries of the contract arising from the surrender or payment. Also, it is discharged from any obligation or liability to the insured or other owner. Any person who mistakenly surrenders to the United States property or rights to property not properly subject to levy is not relieved from liability to a third party who owns the property. The owners of mistakenly surrendered property may, however, secure from the United States the administrative relief provided for in section 6343(b) or may bring suit to recover the property under section 7426.

(d) *Person defined.* The term "person," as used in section 6332(a) and this section, includes an officer or employee of a corporation or a member or employee of a partnership, who is under a duty to surrender the property or rights to property or to discharge the obligation. In the case of a levy upon the salary or wages of an officer, employee, or elected or appointed official of the United States, the District of Columbia, or any agency or instrumentality of either, the term "person" includes the officer or employee of the United States, of the District of Columbia, or of such agency or instrumentality who is under a duty to discharge the obligation. As to the officer or employee who is under such duty, see paragraph (a)(4)(i) of § 301.6331-1.

PAR. 5. The following new section is inserted immediately following § 301.6332-1.

§ 301.6332-2 Surrender of property subject to levy in the case of life insurance and endowment contracts.

(a) *In general.* This section provides special rules relating to the surrender of property subject to levy in the case of life insurance and endowment contracts. The provisions of § 301.6332-1 which relate generally to the surrender of property subject to levy apply, to the extent not inconsistent with the special rules set forth in this section, to a levy in the case of life insurance and endowment contracts.

(b) *Effect of service of notice of levy*—(1) *In general.* A notice of levy served by a district director on an insuring organization with respect to a life insurance or endowment contract issued by the organization shall constitute—

(i) A demand by the district director for the payment of the cash loan value of the contract adjusted in accordance with paragraph (c) of this section, and

(ii) The exercise of the right of the person against whom the tax is assessed to the advance of such cash loan value.

It is unnecessary for the district director to surrender the contract document to the insuring organization upon which the levy is made. However, the notice of levy will include a certification by the district director that a copy of the notice of levy has been mailed to the person against whom the tax is assessed at his last known address. At the time of service of the notice of levy, the levy is effective with respect to the cash loan value of the insurance contract, subject to the condition that if the levy is not satisfied or released before the 90th day after the date of service, the levy can be satisfied only by payment of the amount described in paragraph (c) of this section. Other than satisfaction or release of the levy, no event during the 90-day period subsequent to the date of service of the notice of levy shall release the cash loan value from the effect of the levy. For example, the termination of the policy by the taxpayer or by the death of the insured during such 90-day period shall not release the levy. For the rules relating to the time when the insuring organization is to pay over the required amount, see paragraph (c) of this section.

(2) *Notification of amount subject to levy*—(i) *Full payment before the 90th day.* In the event that the unpaid liability to which the levy relates is satisfied at any time during the 90-day period subsequent to the date of service of the notice of levy, the district director will promptly give the insuring organization written notification that the levy is released.

(ii) *Notification after the 90th day.* In the event that notification is not given under subdivision (i) of this subparagraph, the district director will, promptly following the 90th day after service of the notice of levy, give the insuring organization written notification of the current status of all accounts listed on the notice of levy, and of the total payments received since service of the notice of levy. This notification will be given to the insuring organization whether or not there has been any change in the status of the accounts.

(c) *Satisfaction of levy*—(1) *In general.* The levy described in paragraph (b) of this section with respect to a life insurance or endowment contract shall be deemed to be satisfied if the insuring organization pays over to the district director the amount which the person against whom the tax is assessed could have had advanced to him by the organization on the 90th day after service of the notice of levy on the organization. However, this amount is increased by the amount of any advance (including contractual interest thereon), generally called a policy loan, made to the person on or after the date the organization has actual notice or knowledge, within the meaning of section 6323(i)(1), of the existence of the tax lien with respect to which the levy is made. The insuring organization may, nevertheless, make an advance (including contractual interest thereon), generally called an automatic premium loan, made automatically to maintain the contract in force under an agreement entered into before the organization has such actual notice or knowledge. In any event, the amount paid to the district director by the insuring organization is not to exceed the amount of the unpaid liability shown on the notification described in paragraph (b)(2) of this section. The amount, determined in

accordance with the provisions of this section, subject to the levy shall be paid to the district director by the insuring organization promptly after receipt of the notification described in paragraph (b)(2). The satisfaction of a levy with respect to a life insurance or endowment contract will not discharge the contract from the tax lien. However, see section 6323(b)(9)(C) and the regulations thereunder concerning the liability of an insurance company after satisfaction of a levy with respect to a life insurance or endowment contract. If the person against whom the tax is assessed so directs, the insuring organization, on a date before the 90th day after service of the notice of levy, may satisfy the levy by paying over an amount computed in accordance with the provisions of this subparagraph substituting such date for the 90th day. In the event of termination of the policy by the taxpayer or by the death of the insured on a date before the 90th day after service of the notice of levy, the amount to be paid over to the district director by the insuring organization in satisfaction of the levy shall be an amount computed in accordance with the provisions of this subparagraph substituting the date of termination of the policy or the date of death for the 90th day.

(2) *Examples.* The provisions of this section may be illustrated by the following examples:

Example (1). On March 5, 1968, a notice of levy for an unpaid income tax assessment due from A in the amount of $3,000 is served on the X Insurance Company with respect to A's life insurance policy. On March 5, 1968, the cash loan value of the policy is $1,500. On April 9, 1968, A does not pay a premium due on the policy in the amount of $200. Under an automatic premium advance provision contained in the policy originally issued in 1960, X advances the premium out of the cash value of the policy. As of June 3, 1968 (the 90th day after service of the notice of levy), pursuant to the provisions of the policy, the amount of accrued charges upon the automatic premium advance in the amount of $200 for the period April 9, 1968, through June 3, 1968, is $2. On June 5, 1968, the district director gives written notification to X indicating that A's unpaid tax assessment is $2,500. Under this section, X is required to pay to the district director, promptly after receipt of the June 5, 1968, notification, the sum of $1,298 ($1,500 less $200 less $2), which is the amount A could have had advanced to him by X on June 3, 1968.

Example (2). Assume the same facts as in example (1) except that on May 10, 1968, A requests and X grants an advance in the amount of $1,000. X has actual notice of the existence of the lien by reason of the service of the notice of levy on March 5, 1968. This advance is not required to be made automatically under the policy and reduces the amount of the cash value of the policy. For the use of the $1,000 advance during the period May 10, 1968, through June 3, 1968, X charges A the sum of $3. Under this section, X is required to pay to the district director, promptly after receipt of the June 5, 1968, notification, the sum of $1,298. This $1,298 amount is composed of the $295 amount ($1,500 less $200 less $2 less $1,000 less $3) A could have had advanced to him by X on June 3, 1968, plus the $1,000 advance plus the charges in the amount of $3 with respect thereto.

Example (3). Assume the same facts as in example (1) except that the insurance contract does not contain an automatic premium advance provision. The contract does provide that, upon default in the payment of premiums, the policy shall automatically be converted to paid-up term insurance with no cash or loan value. A fails to make the premium payment of $200 due on April 9, 1968. After expiration of a grace period to make the premium payment, the X Insurance Company applies the cash loan value of $1,500 to effect the conversion. Since the service of the notice of levy constitutes the exercise of A's right to receive the cash loan value and the amount applied to effect the conversion is not an automatic advance to A to maintain the policy in force, the conversion of the policy is not an event which will release the cash loan value from the effect of the levy. Therefore, X Insurance Company is required to pay to the district director, promptly after receipt of the June 5, 1968 notification, the sum of $1,500.

(d) *Other enforcement proceedings.* The satisfaction of the levy described in paragraph (b) of this section by an insuring organization shall be without prejudice to any civil action for the enforcement of any Federal tax lien with respect to a life insurance or endowment contract. Thus, this levy procedure is not the exclusive means of subjecting the life insurance and endowment contracts of the person against whom a tax is assessed to the collection of his unpaid assessment. The United States may choose to foreclose the tax lien in any case where it is appropriate, as, for example, to reach the cash surrender value (as distinguished from cash loan value) of a life insurance or endowment contract.

(e) *Cross references.* (1) For provisions relating to priority of certain advances with respect to a life insurance or endowment contract after satisfaction of a levy pursuant to section 6332(b), see section 6323(b)(9) and the regulations thereunder.

(2) For provisions relating to the issuance of a certificate of discharge of a life insurance or endowment contract subject to a tax lien, see section 6325(b) and the regulations thereunder.

PAR. 6. Section 301.6334 is amended by revising section 6334(a)(4), by adding new paragraphs (6) and (7) to section 6334(a), by revising the historical note to section 6334, and by deleting all statutory material and historical notes following the historical note to section 6334. The amended and added provisions read as follows:

§ 301.6334 Statutory provisions; property exempt from levy.

Sec. 6334. *Property exempt from levy*—(a) *Enumeration.* • • •

(4) *Unemployment benefits.* Any amount payable to an individual with respect to his unemployment (including any portion thereof payable with respect to dependents) under an unemployment compensation law of the United States, or any State, or of the District of Columbia or of the Commonwealth of Puerto Rico.

• • • • • •

(6) *Certain annuity and pension payments.* Annuity or pension payments under the Railroad Retirement Act (45 U.S.C. ch. 9), benefits under the Railroad Unemployment Insurance Act (45 U.S.C. ch. 11), special pension payments received by a person whose name has been entered on the Army, Navy, Air Force, and Coast Guard Medal of Honor roll (38 U.S.C. 562), and annuities based on retired or retainer pay under chapter 73 of title 10 of the United States Code.

(7) *Workmen's compensation.* Any amount payable to an individual as workmen's compensation (including any portion thereof payable with respect to dependents) under a workmen's compensation law of the United States, any State, the District of Columbia, or the Commonwealth of Puerto Rico.

• • • • • •

[Sec. 6334 as amended by section 406, Social Security Amendments 1958 (72 Stat. 1047); sec. 812, Excise Tax Reduction Act of 1965 (79 Stat. 170); sec. 104(c), Federal Tax Lien Act of 1966 (80 Stat. 1137)]

PAR. 7. Section 301.6334–1 is amended by revising subparagraphs (2), (3), and (4) of paragraph (a), by adding new subparagraphs (6) and (7) to paragraph (a), and by revising paragraph (c). These amended and added provisions read as follows:

§ 301.6334–1 Property exempt from levy.

(a) *Enumeration.* • • •

(2) *Fuel, provisions, furniture, and personal effects.* If the taxpayer is the head of a family, so much of the fuel, provisions, furniture, and personal effects in his household, and of the arms for personal use, livestock, and poultry of the taxpayer, as does not exceed $500 in value. For purposes of this provision, an individual who is the only remaining member of a family and who lives alone is not the head of a family.

(3) *Books and tools of a trade, business or profession.* So many of the books and tools necessary for the trade, business, or profession of an individual taxpayer as do not exceed in the aggregate $250 in value.

(4) *Unemployment benefits.* Any amount payable to an individual with respect to his unemployment (including any portion thereof payable with respect to dependents) under an unemployment compensation law of the United States, of any State, or of the District of Columbia or of the Commonwealth of Puerto Rico.

• • • • • •

(6) *Certain annuity and pension payments.* Annuity or pension payments under the Railroad Retirement Act (45 U.S.C. ch. 9), benefits under the Railroad Unemployment Insurance Act, special pension payments received by a person whose name has been entered on the Army, Navy, Air Force, and Coast Guard Medal of Honor roll (38 U.S.C. 562), and annuities based on retired or retainer pay under chapter 73 of title 10 of the United States Code.

(7) *Workmen's compensation.* Any amount payable to an individual as workmen's compensation (including any portion thereof payable with respect to dependents) under a workmen's compensation law of the United States, any State, the District of Columbia, or the Commonwealth of Puerto Rico.

• • • • • •

(c) *Other property.* No other property or rights to property are exempt from levy except the property specifically exempted by section 6334(a). No provision of a State law may exempt property or rights to property from levy for the collection of any Federal tax. Thus, property exempt from execution under State personal or homestead exemption laws is, nevertheless, subject to levy by the United States for collection of its taxes.

PAR. 8. Section 301.6335 is amended by revising section 6335(b) and by adding a historical note. These amended and added provisions read as follows:

§ 301.6335 Statutory provisions; sale of seized property.

Sec. 6335. *Sale of seized property.* • • •

(b) *Notice of sale.* The Secretary or his delegate shall, as soon as practicable after the seizure of the property, give notice to the owner, in the manner prescribed in subsection (a), and shall cause a notification to be published in some newspaper published or generally circulated within the county wherein such seizure is made, or if there be no newspaper published or generally circulated in such county, shall post such notice at the post office nearest the place where the seizure is made, and in not less than two other public places. Such notice shall specify the property to be sold, and the time, place, manner, and conditions of the sale thereof. Whenever levy is made without regard to the 10-day period provided in section 6331(a), public notice of sale of the property seized shall not be made within such 10-day period unless section 6336 (relating to sale of perishable goods) is applicable.

• • • • • •

[Sec. 6335 as amended by sec. 104(d), Federal Tax Lien Act of 1966 (80 Stat. 1137)]

PAR. 9. Paragraph (b)(1) of § 301.6335–1 is amended to read as follows:

§ 301.6335–1 Sale of seized property.

• • • • • •

(b) *Notice of sale.* (1) As soon as practicable after seizure of the property, the district director shall give notice of sale in writing to the owner. Such notice shall be delivered to the owner or left at his usual place of abode or business if located within the internal revenue district where the seizure is made. If the owner cannot be readily located, or has no dwelling or place of business within such district, the notice may be mailed to his last known address. The notice shall specify the property to be sold, and the time, place, manner, and conditions of the sale thereof, and shall expressly state that only the right, title, and interest of the delinquent taxpayer in and to such property is to be offered for sale. The notice shall also be published in some newspaper published in the county wherein the seizure is made or in a newspaper generally circulated in that county. For example, if a newspaper of general circulation in a county but not published in that county will reach more potential bidders for the property to be sold than a newspaper published within the county, or if there is a newspaper of general circulation within the county but no newspaper published within the county, the district director may cause public notice of the sale to be given in the newspaper of general circulation within the county. If there is no newspaper published or generally circulated in the county, the notice shall be posted at the post office nearest the place where the seizure is made, and in not less than two other public places.

• • • • • •

PAR. 10. Section 301.6337 is amended by revising section 6337(b)(1) and by adding a historical note. These revised and added provisions read as follows:

§ 301.6337 Statutory provisions; redemption of property.

Sec. 6337. *Redemption of property.* • • •

(b) *Redemption of real estate after sale*—(1) *Period.* The owners of any real property sold as provided in section 6335, their heirs, executors, or administrators, or any person having any interest therein, or a lien thereon, or any person in their behalf, shall be permitted to redeem the property sold, or any particular tract of such property, at any time within 120 days after the sale thereof.

• • • • • •

[Sec. 6337 as amended by sec. 104(e), Federal Tax Lien Act of 1966 (80 Stat. 1137)]

PAR. 11. Paragraph (b)(1) of § 301.6337–1 is amended to read as follows:

§ 301.6337–1 Redemption of property.

• • • • • •

(b) *Redemption of real estate after sale*—(1) *Period.* The owner of any real estate sold as provided in section 6335, his heirs, executors, or administrators, or any person having any interest therein, or a lien thereon, or any person in their behalf, shall be permitted to redeem the property sold, or any particular tract of such property, at any time within 120 days after the sale thereof.

• • • • • •

PAR. 12. Section 301.6338 is amended by revising section 6338(c) and by revising the historical note. These amended provisions read as follows:

§ 301.6338 Statutory provisions; certificate of sale; deed of real property.

Sec. 6338. *Certificate of sale; deed of real property.* • • •

(c) *Real property purchased by United States.* If real property is declared purchased by the United States at a sale pursuant to section 6335, the Secretary or his delegate shall at the proper time execute a deed therefor, and without delay cause such deed to be duly recorded in the proper registry of deeds.

[Sec. 6338 as amended by sec. 78, Technical Amendments Act, 1958 (72 Stat. 1662); sec. 104(f), Federal Tax Lien Act of 1966 (80 Stat. 1137)]

PAR. 13. Paragraph (c) of § 301.6338–1 is amended to read as follows:

§ 301.6338–1 Certificate of sale; deed of real property.

• • • • • •

(c) *Deed to real property purchased by the United States.* If real property is declared purchased by the United States at a sale pursuant to section 6335, the district director shall at the proper time execute a deed therefor and shall, without delay, cause the deed to be duly recorded in the proper registry of deeds.

PAR. 14. Section 301.6339 is amended by adding new subsections (c) and (d) to section 6339 and by revising the historical note. These added and amended provisions read as follows:

§ 301.6339 Statutory provisions; legal effect of certificate of sale of personal property and deed of real property.

Sec. 6339. *Legal effect of certificate of sale of personal property and deed of real property.* • • •

(c) *Effect of junior encumbrances.* A certificate of sale of personal property given or a deed to real property executed pursuant to section 6338 shall discharge such property from all liens, encumbrances, and titles over which the lien of the United States with respect to which the levy was made had priority.

(d) *Cross references.* (1) For distribution of surplus proceeds, see section 6342(b).

(2) For judicial procedure with respect to surplus proceeds, see section 7426(a)(2).

[Sec. 6339 as amended by sec. 79, Technical Amendments Act 1958 (72 Stat. 1662); sec. 104(g), Federal Tax Lien Act of 1966 (80 Stat. 1137)]

PAR. 15. Section 301.6339–1 is amended by adding new paragraph (c) which reads as follows:

§ 301.6339–1 Legal effect of certificate of sale of personal property and deed of real property.

• • • • • •

(c) *Effect of junior encumbrances.* A certificate of sale of personal property given or a deed to real property executed pursuant to section 6338 discharges the property from all liens, encumbrances, and titles over which the lien of the United States, with respect to which the levy was made, has priority. For example, a mortgage on real property executed after a notice of a Federal tax lien has been filed is extinguished when the district director executes a deed to the real property to a purchaser thereof at a sale pursuant to section 6335 following the seizure of the property by the United States. The proceeds of such a sale are distributed in accordance with priority of the liens, encumbrances, or titles. See section 6342(b) and the regulations thereunder for provisions relating to the distribution of surplus proceeds. See section 7426(a)(2) and the regulations thereunder for judicial procedures with respect to surplus proceeds.

PAR. 16. Section 301.6342 is amended by revising section 6342(a) (other than paragraph (2) thereof) and by adding a historical note. These amended and added provisions read as follows:

§ 301.6342 Statutory provisions; application of proceeds of levy.

Sec. 6342. *Application of proceeds of levy*—(a) *Collection of liability.* Any money realized by proceedings under this subchapter (whether by seizure, by surrender under section 6332 (except pursuant to subsection (c)(2) thereof), or by sale of seized property), or by sale of property redeemed by the United States (if the interest of the United States in such property was a lien arising under the provisions of this title) shall be applied as follows:

(1) *Expense of levy and sale.* First, against the expenses of the proceedings;

. . . . . .

(3) *Liability of delinquent taxpayer.* The amount, if any, remaining after applying paragraphs (1) and (2) shall then be applied against the liability in respect of which the levy was made or the sale was conducted.

. . . . . .

[Sec. 6342 as amended by sec. 104(h), Federal Tax Lien Act of 1966 (80 Stat. 1137)]

PAR. 17. Paragraph (a) (other than subparagraph (2) thereof) of § 301.6342–1 is amended to read as follows:

§ 301.6342–1 Application of proceeds of levy.

(a) *Collection of liability.* Any money realized by proceedings under subchapter D, chapter 64, of the Code or by sale of property redeemed by the United States (if the interest of the United States in the property was a lien arising under the provisions of the Internal Revenue Code), is applied in the manner specified in subparagraphs (1), (2), and (3) of this paragraph. Money realized by proceedings under subchapter D, chapter 64, of the Code includes money realized by seizure, by sale of seized property, or by surrender under section 6332 (except money realized by the imposition of a 50 percent penalty pursuant to section 6332(c)(2)).

(1) *Expense of levy and sale.* First, against the expenses of the proceedings or sale, including expenses allowable under section 6341 and amounts paid by the United States to redeem property.

. . . . . .

(3) *Liability of delinquent taxpayer.* The amount, if any, remaining after applying subparagraphs (1) and (2) of this paragraph shall then be applied against the liability in respect of which the levy was made or the sale of redeemed property was conducted.

. . . . . .

PAR. 18. Section 301.6343 is amended by revising section 6343 and by adding a historical note. These amended and added provisions read as follows:

§ 301.6343 Statutory provisions; authority to release levy and return property.

Sec. 6343. *Authority to release levy and return property*—(a) *Release of levy.* It shall be lawful for the Secretary or his delegate, under regulations prescribed by the Secretary or his delegate, to release the levy upon all or part of the property or rights to property levied upon where the Secretary or his delegate determines that such action will facilitate the collection of the liability but such release shall not operate to prevent any subsequent levy.

(b) *Return of property.* If the Secretary or his delegate determines that property has been wrongfully levied upon, it shall be lawful for the Secretary or his delegate to return—

(1) The specific property levied upon,

(2) An amount of money equal to the amount of money levied upon, or

(3) An amount of money equal to the amount of money received by the United States from a sale of such property.

Property may be returned at any time. An amount equal to the amount of money levied upon or received from such sale may be returned at any time before the expiration of 9 months from the date of such levy. For purposes of paragraph (3), if property is declared purchased by the United States at a sale pursuant to section 6335(e) (relating to manner and conditions of sale), the United States shall be treated as having received an amount of money equal to the minimum price determined pursuant to such section or (if larger) the amount received by the United States from the resale of such property.

[Sec. 6343 as amended by sec. 104(i), Federal Tax Lien Act of 1966 (80 Stat. 1138)]

PAR. 19. Section 301.6343–1 is amended to read as follows:

§ 301.6343–1 Authority to release levy and return property.

(a) *Release of levy*—(1) *Authority.* The district director may release the levy upon all or part of the property or rights to property levied upon as provided in subparagraphs (2) and (3) of this paragraph. A levy may be released under subparagraph (2) of this paragraph only if the delinquent taxpayer complies with such of the conditions thereunder as the district director may require and if the district director determines that such action will facilitate the collection of the liability. A release pursuant to subparagraph (3) of this paragraph is considered to facilitate the collection of the liability. The release under this section shall not operate to prevent any subsequent levy.

(2) *Conditions for release.* The district director may release the levy as authorized under subparagraph (1) of this paragraph, if—

(i) *Escrow arrangement.* The delinquent taxpayer offers a satisfactory arrangement, which is accepted by the district director, for placing property in escrow to secure the payment of the liability (including the expenses of levy) which is the basis of the levy.

(ii) *Bond.* The delinquent taxpayer delivers an acceptable bond to the district director conditioned upon the payment of the liability (including the expenses of levy) which is the basis of the levy. Such bond shall be in the form provided in section 7101 and § 301.7101–1.

(iii) *Payment of amount of U.S. interest in the property.* There is paid to the district director an amount determined by him to be equal to the interest of the United States in the seized property or the part of the seized property to be released.

(iv) *Assignment of salaries and wages.* The delinquent taxpayer executes an agreement directing his employer to pay to the district director amounts deducted from the employee's wages on a regular, continuing, or periodic basis, in such manner and in such amount as is agreed upon with the district director, until the full amount of the liability is satisfied, and such agreement is accepted by the employer.

(v) *Installment payment arrangement.* The delinquent taxpayer makes satisfactory arrangements with the district director to pay the amount of the liability in installments.

(vi) *Extension of statute of limitations.* The delinquent taxpayer executes an agreement to extend the statute of limitations in accordance with section 6502(a)(2) and § 301.6502–1.

(3) *Release where value of interest of United States is insufficient to meet expenses of sale.* The district director may release the levy as authorized under subparagraph (1) of this paragraph if he determines that the value of the interest of the United States in the seized property, or in the part of the seized property to be released, is insufficient to cover the expenses of the sale of such property.

(b) *Return of property*—(1) *General rule.* If the district director determines that property has been wrongfully levied upon, the district director may return—

(i) The specific property levied upon,

(ii) An amount of money equal to the amount of money levied upon (without interest), or

(iii) An amount of money equal to the amount of money received by the United States from a sale of the property (without interest).

If the United States is in possession of specific property, the property may be returned at any time. An amount equal to the amount of money levied upon or received from a sale of the property may be returned at any time before the expiration of 9 months from the date of the levy. When a request described in subparagraph (2) of this paragraph is filed for the return of property before the expiration of 9 months from the date of levy, an amount of money may be returned after a reasonable period of time subsequent to the expiration of the 9-month period if necessary for the investigation and processing of such request. In cases where money is specifically identifiable, as in the case of a coin collection which may be worth substantially more than its face value, the money will be treated as specific property and, whenever possible, this specific property will be returned. For purposes of subparagraph (1)(iii) of this paragraph, if property is declared purchased by the United States at a sale pursuant to section 6334(e), the United States is treated as having received an amount of money equal to the minimum price determined by the district director before the sale or, if larger, the amount received by the United States from the resale of the property.

(2) *Request for return of property.* A written request for the return of property wrongfully levied upon shall be addressed to the district director (marked for the attention of the chief, special procedures staff) for the internal revenue district in which the levy was made. The written request shall contain the following information:

(i) The name and address of the person submitting the request,

(ii) A detailed description of the property levied upon,

(iii) A description of the claimant's basis for claiming an interest in the property levied upon, and

(iv) The name and address of the taxpayer, the originating internal revenue district, and the date of lien or levy as shown on the Notice of Tax Lien (Form 668), Notice of Levy (Form 668–A), or Levy (Form 668–B) or, in lieu thereof, a statement of the reasons why such information cannot be furnished.

(3) *Inadequate request.* Any request made prior to September 1, 1971, which apprises the Internal Revenue Service of the claimant's demand for the return of property wrongfully levied upon shall be considered adequate. A request made after August 31, 1971, shall not be considered adequate unless it is a written request containing the information required by subparagraph (2) of this paragraph. However, unless a notification is mailed by the district director to the claimant within 30 days of receipt of the request to inform the claimant of the inadequacies, any written request shall be considered adequate. If the district director timely notifies the claimant of the inadequacies of his request, the claimant shall have 30 days from the receipt of the notification of inadequacy to supply in writing any omitted information. Where the omitted information is so supplied within the 30 day period, the request shall be considered to be adequate from the time the original request was made for purposes of determining the applicable period of limitation upon suit under section 6532(c).

[FR Doc.71–12553 Filed 8–27–71;8:45 am]

[26 CFR Part 301]

FEDERAL TAX LIENS

Notice of Proposed Rule Making

Notice is hereby given that the regulations set forth in tentative form in the attached appendix are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury or his delegate. Prior to the final adoption of such regulations, consideration will be given to any comments or suggestions pertaining thereto which are submitted in writing, preferably in quintuplicate, to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224, by September 27, 1971. Any written comments or suggestions not specifically designated as confidential in accordance with 26 CFR 601.601(b) may be inspected by any person upon written request. Any person submitting written comments or suggestions who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit his request, in writing, to the Commissioner by September 27, 1971. In such case, a public hearing will be held, and notice of the time, place, and date will be published in a subsequent issue of the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

[SEAL] HAROLD T. SWARTZ,
Acting Commissioner of Internal Revenue.

In order to conform the Regulations on Procedure and Administration (26 CFR, Part 301) to changes in the Internal Revenue Code of 1954 made by sections 107, 108, 110, 111, 112, and 113 of the Federal Tax Lien Act of 1966 (80 Stat. 1140, 1142, 1145, 1146), such regulations are amended as follows:

PARAGRAPH 1. Section 301.6322 is amended by revising section 6322 and by adding a historical note to read as follows:

§ 301.6322 Statutory provisions; period of lien.

Sec. 6322. *Period of lien.* Unless another date is specifically fixed by law, the lien imposed by section 6321 shall arise at the time the assessment is made and shall continue until the liability for the amount so assessed (or a judgment against the taxpayer arising out of such liability) is satisfied or becomes unenforceable by reason of lapse of time.

[Sec. 6322 as amended by sec. 113(a), Federal Tax Lien Act 1966 (80 Stat. 1146)]

PAR. 2. Section 301.6502 is amended by revising subsection (a) of section 6502 and by adding a historical not to read as follows:

§ 301.6502 Statutory provisions; collection after assessment.

Sec. 6502. *Collection after assessment*—(a) *Length of period.* Where the assessment of any tax imposed by this title has been made within the period of limitation properly applicable thereto, such tax may be collected by levy or by a proceeding in court, but only if the the levy is made or the proceeding begun—

(1) Within 6 years after the assessment of the tax, or

(2) Prior to the expiration of any period for collection agreed upon in writing by the Secretary or his delegate and the taxpayer before the expiration of such 6-year period (or, if there is a release of levy under section 6343 after such 6-year period, then before such release).

The period so agreed upon may be extended by subsequent agreements in writing made before the expiration of the period previously agreed upon. The period provided by this subsection during which a tax may be collected by levy shall not be extended or curtailed by reason of a judgment against the taxpayer.

. . . . . .

[Sec. 6502 as amended by sec. 113(b) Federal Tax Lien Act 1966 (80 Stat. 1146)]

PAR. 3. Section 301.6502–1 is amended by adding a new subparagraph (3) to paragraph (a) to read as follows:

§ 301.6502–1 Collection after assessment.

(a) *Length of period.* * * *

(3) The period provided by section 6502(a) and this section shall not be extended or curtailed by reason of a judgment against a taxpayer. Therefore, a personal judgment rendered against a taxpayer arising out of an unpaid assessed tax liability will not extend the period during which the liability may be collected by levy. Similarly, the period during which the liability may be collected by levy is not curtailed by the fact that the United States secures such a judgment. For example, if the United States secures a personal judgment arising out of a tax liability assessed 4 years earlier, the liability may be collected in any manner provided by section 7403 or in any manner provided for the enforcement of a judgment or, during the remaining 2 years of the 6 year statutory period, by levy as if such judgment had not been secured.

. . . . . .

PAR. 4. Section 301.6532 is amended by adding a new subsection (c) to section 6532 and by amending the historical note to read as follows:

§ 301.6532 Statutory provisions; periods of limitation on suits.

. . . . . .

(c) *Suits by persons other than taxpayers*—(1) *General rule.* Except as provided by paragraph (2), no suit or proceeding under section 7426 shall be begun after the expiration of 9 months from the date of the levy or agreement giving rise to such action.

(2) *Period when claim is filed.* If a request is made for the return of property described in section 6343(b), the 9-month period prescribed in paragraph (1) shall be extended for a period of 12 months from the date of filing of such request or for a period of 6 months from the date of mailing by registered or certified mail by the Secretary or his delegate to the person making such request of a notice of disallowance of the part of the request to which the action relates, whichever is shorter.

[Sec. 6532 as amended by sec. 89(b), Technical Amendments Act 1958 (72 Stat. 1665) and sec. 110(b) Federal Tax Lien Act of 1966 (80 Stat. 1144)]

PAR. 5. Immediately after § 301.6532–2 there is added the following new section:

§ 301.6532–3 Periods of limitation on suits by persons other than taxpayers.

(a) *General rule.* No suit or proceeding, except as otherwise provided in section 6532(c)(2) and paragraph (b) of this section, under section 7426 and § 301.7426–1 relating to civil actions by persons other than taxpayers, shall be begun after the expiration of 9 months from the date of levy or agreement under section 6325(b)(3) giving rise to such action.

(b) *Period when claim is filed.* The 9-month period prescribed in section 6532(c)(1) and paragraph (a) of this section shall be extended to the shorter of,

(1) 12 months from the date of filing by a third party of a written request under § 301.6343–1(b)(2) for the return of property wrongfully levied upon, or

(2) 6 months from the date of mailing by registered or certified mail by the district director to the party claimant of a notice of disallowance of the part of the request to which the action relates.

A request which, under § 301.6343–1(b)(3), is not considered adequate does not extend the 9-month period described in paragraph (a) of this section.

(c) *Examples.* The provisions of this section may be illustrated by the following examples:

Example (1). On June 1, 1970, a tax is assessed against A with respect to his delinquent tax liability. On July 20, 1970, a levy is wrongfully made upon certain tangible personal property of B's which is in A's possession at that time. On September 1, 1970, a final demand is made for the payment of the amount set forth in the notice of levy. Unless a request for the return of property is sooner made to extend the 9-month period, no suit or proceeding under section 7426 may be begun by B after April 20, 1971, which is 9 months from the date of levy.

Example (2). Assume the same facts as in the preceding example except that, on August 3, 1970, B properly files a request for the return of his property wrongfully levied upon. Assume further that the district director mails, on March 1, 1971, a notice of disallowance of B's request for the return of the property. No suit or proceeding under section 7426 may be begun by B after August 3, 1971, which is 12 months from the date of filing a request for the return of property wrongfully levied upon.

Example (3). Assume the same facts as in the preceding example except that the notice of disallowance of B's request for the return of property wrongfully levied upon is mailed to B on November 12, 1970. Since the 6-month period from the mailing of the notice of disallowance expires before the 12-month period from the date of filing the request for the return of property which ends on August 3, 1971, no suit or proceeding under section 7426 may be begun by B after May 12, 1971, which is 6 months from the date of mailing the notice of disallowance.

PAR. 6. Section 301.7402 is amended by redesignating subsection (e) of section 7402 as subsection (f), by adding a new subsection (e) to section 7402, and by adding a historical note to read as follows:

§ 301.7402 Statutory provisions; jurisdiction of district courts.

Sec. 7402. *Jurisdiction of district courts.*

* * * * * *

(e) *To quiet title.* The U.S. district courts shall have jurisdiction of any action brought by the United States to quiet title to property if the title claimed by the United States to such property was derived from enforcement of a lien under this title.

(f) *General jurisdiction.* * * *

[Sec. 7402 as amended by sec. 107(a) Federal Tax Lien Act 1966 (80 Stat. 1140)]

PAR. 7. Section 301.7403 is amended by adding a new sentence at the end of subsection (c) of section 7403 and by adding a historical note to read as follows:

§ 301.7403 Statutory provisions; action to enforce lien or to subject property to payment of tax.

Sec. 7403. *Action to enforce lien or to subject property to payment of tax.*

* * * * * *

(c) *Adjudication and decree.* The court shall, after the parties have been duly notified of the action, proceed to adjudicate all matters involved therein and finally determine the merits of all claims to and liens upon the property, and, in all cases where a claim or interest of the United States therein is established, may decree a sale of such property, by the proper officer of the court, and a distribution of the proceeds of such sale according to the findings of the court in respect to the interests of the parties and of the United States. If the property is sold to satisfy a first lien held by the United States, the United States may bid at the sale such sum, not exceeding the amount of such lien with expenses of sale, as the Secretary or his delegate directs.

* * * * * *

[Sec. 7403 as amended by sec. 107(b) Federal Tax Lien Act 1966 (80 Stat. 1140)]

PAR. 8. Section 301.7403–1 is amended by adding paragraph (b) and by providing a heading for paragraph (a) to read as follows:

§ 301.7403–1 Action to enforce lien or to subject property to payment of tax.

(a) *Civil actions.* In any case where there has been a refusal or neglect to pay any tax, or to discharge any liability in respect thereof, whether or not levy has been made, the Attorney General or his delegate, at the request of the Commissioner (or the Director, Alcohol, Tobacco, and Firearms Division, with respect to the provisions of subtitle E of the Code), or the Chief Counsel for the Internal Revenue Service or his delegate, may direct a civil action to be filed in a district court of the United States to enforce the lien of the United States under the Code with respect to such tax or liability or to subject any property, of whatever nature, of the delinquent, or in which he has any right, title or interest, to the payment of such tax or liability. In any such proceeding, at the instance of the United States, the court may appoint a receiver to enforce the lien, or, upon certification by the Commissioner or the Chief Counsel for the Internal Revenue Service during the pendency of such proceedings that it is in the public interest, may appoint a receiver with all the powers of a receiver in equity.

(b) *Bid by the United States.* If property is sold to satisfy a first lien held by the United States, the United States may bid at the sale a sum which does not exceed the amount of its lien and the expenses of the sale. See also 31 U.S.C. 195.

PAR. 9. The center heading immediately preceding section 301.7421 is revised to read as follows:

PROCEEDINGS BY TAXPAYERS AND THIRD PARTIES

PAR. 10. Section 301.7421 is amended by revising subsection (a) of section 7421 and by adding a historical note to read as follows:

§ 301.7421 Statutory provisions; prohibition of suits to restrain assessment or collection.

Sec. 7421. *Prohibition of suits to restrain assesment or collection.*—(a) *Tax.* Except as provided in sections 6212 (a) and (c), 6213 (a), and 7426 (a) and (b)(1), no suit for the purpose of restraining the assessment or collection of any tax shall be maintained in any court by any person, whether or not such person is the person against whom such tax was assessed.

* * * * * *

[Sec. 7421 as amended by sec. 110(c) Federal Tax Lien Act 1966 (80 Stat. 1144)]

PAR. 11. Section 301.7424 is amended to read as follows:

§ 301.7424 Statutory provisions; intervention.

Sec. 7424. *Intervention.* If the United States is not a party to a civil action or suit, the United States may intervene in such action or suit to assert any lien arising under this title on the property which is the subject of such action or suit. The provisions of section 2410 of title 28 of the United States Code (except subsection (b)) and of section 1444 of title 28 of the United States Code shall apply in any case in which the United States intervenes as if the United States had originally been named a defendant in such action or suit. In any case in which the application of the United States to intervene is denied, the adjudication in such civil action or suit shall have no effect upon such lien.

[Sec. 7424 as amended by sec. 108 Federal Tax Lien Act 1966 (80 Stat. 1140)]

PAR. 12. Section 301.7424–1 is amended by redesignating paragraphs (a) and (b) as paragraphs (b) and (c), respectively, and by adding a new paragraph (a). These redesignated and added paragraphs read as follows:

§ 301.7424–1 Civil action to clear title to property.

(a) The provisions of this section shall apply only to civil actions to clear title commenced on or before November 2, 1966. For provisions permitting the United States to be made a party defendant in a proceeding for the foreclosure of a lien upon property where the United States may have claim upon the property involved, see section 2410 of title 28 of the United States Code.

(b) Any person having a lien upon or any interest in the property referred to in section 7403, notice of which has been duly filed of record in the jurisdiction in which the property is located prior to the filing of the notice of the lien of the United States as provided in section 6323, or any person purchasing the property at a sale to satisfy such prior lien or interest, may make a written request to the Commissioner to authorize the filing of a civil action as provided in section 7403.

(c) If the Commissioner fails to authorize the filing of such civil action within 6 months after receipt of such written request, such person or purchaser may, after giving notice to the Commissioner, file a petition in the district court of the United States for the district in which the property is located praying leave to file a civil action for a final determination of all claims to or liens upon the property in question.

PAR. 13. There is inserted immediately after section 301.7424–1 the following new section:

§ 301.7424–2 Intervention.

If the United States is not a party to a civil action or suit, the United States may intervene in such action or suit to assert any lien arising under title 26 of the United States Code on the property which is the subject of such action or suit. The provisions of section 2410 of title 28 of the United States Code (except subsection (b)) and of section 1444 of title 28 of the United States Code shall apply in any case in which the United States intervenes as if the United States had originally been named a defendant in such action or suit. If the application of the United States to intervene is denied, the adjudication in such civil action or suit shall have no effect upon such lien.

PAR. 14. Immediately after section 301.7425 there are added new § 301.7426 and a historical note and new § 301.7426–1 to read as follows:

§ 301.7426 Statutory provisions; civil actions by persons other than taxpayers.

Sec. 7426. *Civil actions by persons other than taxpayers.*—(a) *Actions permitted.*—(1) *Wrongful levy.* If a levy has been made on property or property has been sold pursuant to a levy, any person (other than the person against whom is assessed the tax out of which such levy arose), who claims an interest in or lien on such property and that such property was wrongfully levied upon may bring a civil action against the United States in a district court of the United States. Such action may be brought without regard to whether such property has been surrendered to or sold by the Secretary or his delegate.

(2) *Surplus proceeds.* If property has been sold pursuant to a levy, any person (other than the person against whom is assessed the tax out of which such levy arose), who claims an interest in or lien on such property junior to that of the United States and to be legally entitled to the surplus proceeds of such sale may bring a civil action against the United States in a district court of the United States.

(3) *Substituted sale proceeds.* If property has been sold pursuant to an agreement described in section 6325(b)(3) (relating to substitution of proceeds of sale), any person who claims to be legally entitled to all or any part of the amount held as a fund pursuant to such agreement may bring a civil action against the United States in a district court of the United States.

(b) *Adjudication.* The district court shall have jurisdiction to grant only such of the following forms of relief as may be appropriate in the circumstances:

(1) *Injunction.* If a levy or sale would irreparably injure rights in property which the court determines to be superior to rights of the United States in such property, the court may grant an injunction to prohibit the enforcement of such levy or to prohibit such sale.

(2) *Recovery of property.* If the court determines that such property has been wrongfully levied upon, the court may—

(A) Order the return of specific property if the United States is in possession of such property;

(B) Grant a judgment for the amount of money levied upon; or

(C) Grant a judgment for an amount not exceeding the amount received by the United States from the sale of such property.

For the purposes of subparagraph (C), if the property was declared purchased by the United States at a sale pursuant to section 6335(e) (relating to manner and conditions of sale), the United States shall be treated as having received an amount equal to the minimum price determined pursuant to such section or (if larger) the amount received by the United States from the resale of such property.

(3) *Surplus proceeds.* If the court determines that the interest or lien of any party to an action under this section was transferred to the proceeds of a sale of such property, the court may grant a judgment in an amount equal to all or any part of the amount of the surplus proceeds of such sale.

(4) *Substituted sale proceeds.* If the court determines that a party has an interest in or lien on the amount held as a fund pursuant to an agreement described in section 6325(b)(3) (relating to substitution of proceeds of sale), the court may grant a judgment in an amount equal to all or any part of the amount of such fund.

(c) *Validity of assessment.* For purposes of an adjudication under this section, the assessment of tax upon which the interest or lien of the United States is based shall be conclusively presumed to be valid.

(d) *Limitation on rights of action.* No action may be maintained against any officer or employee of the United States (or former officer or employee) or his personal representative with respect to any acts for which an action could be maintained under this section.

(e) *Substitution of United States as party.* If an action, which could be brought against the United States under this section, is improperly brought against any officer or employee of the United States (or former officer or employee) or his personal representative, the court shall order, upon such terms as are just, that the pleadings be amended to substitute the United States as a party for such officer or employee as of the time such action was commenced upon proper service of process on the United States.

(f) *Provision inapplicable.* The provisions of section 7422(a) (relating to prohibition of suit prior to filing claim for refund) shall not apply to actions under this section.

(g) *Interest.* Interest shall be allowed at the rate of 6 percent per annum—

(1) In the case of a judgment pursuant to subsection (b)(2)(B), from the date the Secretary or his delegate receives the money wrongfully levied upon to the date of payment of such judgment; and

(2) In the case of a judgment pursuant to subsection (b)(2)(C), from the date of the sale of the property wrongfully levied upon to the date of payment of such judgment.

(h) *Cross reference.* For period of limitation, see section 6532(c).

[Sec. 7426 as added by sec. 110(a), Federal Tax Lien Act 1966 (80 Stat. 1142)]

§ 301.7426–1 Civil actions by persons other than taxpayers.

(a) *Actions permitted.*—(1) *Wrongful levy.* If a levy has been made on property or property has been sold pursuant to a levy, any person (other than the person against whom is assessed the tax out of which such levy arose) may bring a civil action against the United States in a district court of the United States based upon such person's claim—

(i) That he has an interest in, or a lien on, such property which is senior to the interest of the United States; and

(ii) That such property was wrongfully levied upon.

No action is permitted under section 7426(a)(1) unless there has been a levy upon the property claimed. For example, no cause of action arises under this section where the United States sets-off an amount due to the taxpayer against taxes owed by him since no levy has been made.

(2) *Surplus proceeds.* If property has been sold pursuant to levy, any person (other than the person against whom is assessed the tax out of which such levy arose) may bring a civil action against the United States in a district court of the United States based upon such person's claim that he—

(i) Has an interest in or lien on such property junior to that of the United States; and

(ii) Is entitled to the surplus proceeds of such sale.

(3) *Substituted sale proceeds.* Any person who claims to be legally entitled to all or any part of the amount which is held as a fund from the sale of property pursuant to an agreement described in section 6325(b)(3) may bring a civil action against the United States in a district court of the United States to obtain the relief provided by section 7426(b)(4). It is not necessary that the claimant be a party to the agreement which provides for the substitution of the sale proceeds for the property subject to the lien.

(b) *Adjudication.*—(1) *Wrongful levy.* If the court determines that property has been wrongfully levied upon, the court may—

(i) Grant an injunction to prohibit the enforcement of such levy or to prohibit a sale of such property if such sale would irreparably injure rights in the property which are superior to the rights of the United States in such property; or

(ii) Order the return of specific property if the United States is in possession of such property; or

(iii) Grant a judgment for the amount of money levied upon; or

(iv) Grant a judgment for an amount not exceeding the amount received by the United States from the sale of such property (which, in the case of property declared purchased by the United States at a sale, shall be the greater of the minimum amount determined pursuant to section 6335(e) or the amount received by the United States from the resale of such property).

For purposes of this paragraph, a levy is wrongful against a person (other than the taxpayer against whom the assessment giving rise to the levy is made), if (*a*) the levy is upon property exempt from levy under section 6334, or (*b*) the levy is upon property in which the taxpayer had no interest at the time the lien arose or thereafter, or (*c*) the levy is upon property with respect to which such person is a purchaser against whom the lien is invalid under section 6323 or 6324 (a)(2) or (b), or (*d*) the levy or sale pursuant to levy will or does effectively destroy or otherwise irreparably injure such person's interest in the property which is senior to the Federal tax lien. A levy may be wrongful against a holder of a senior lien upon the taxpayer's property under certain circumstances although legal rights to enforce his interest survive the levy procedure. For example, the levy may be wrongful against such a person if the

property is an obligation which is collected pursuant to the levy rather than sold and nothing thereafter remains for the senior lienholder, or the property levied upon is of such a nature that when it is sold at a public sale the property subject to the senior lien is not available for the senior lienholder as a realistic source for the enforcement of his interest. Some of the factors which should be taken into account in determining whether property remains or will remain a realistic source from which the senior lienholder may realize collection are: (1) The nature of the property, (2) the number of purchasers, (3) the value of each unit sold or to be sold, (4) whether, as a direct result of the distraint sale, the costs of realizing collection from the security have or will be so substantially increased as to render the security substantially valueless as a source of collection, and (5) whether the property subject to the distraint sale constitutes substantially all of the property available as security for the payment of the indebtedness to the senior lienholder.

(2) *Surplus proceeds.* If the court determines that the interest or lien of any party to an action under section 7426 was transferred to the proceeds of a sale of the property, the court may grant a judgment in an amount equal to all or any part of the amount of the surplus proceeds of such sale. The term "surplus proceeds" means those proceeds realized on a sale of property remaining after application of the provisions of section 6342(a).

(3) *Substituted sale proceeds.* If the court determines that a party has an interest in or lien on the amount held as a fund pursuant to an agreement described in section 6325(b)(3), the court may grant a judgment in an amount equal to all or any part of the amount of such fund.

PAR. 15. Section 301.7505 is amended to read as follows:

§ 301.7505 Statutory provisions; sale of personal property acquired by the United States.

Sec. 7505. *Sale of personal property acquired by the United States*—(a) *Sale.* Any personal property acquired by the United States in payment of or as security for debts arising under the internal revenue laws may be sold by the Secretary or his delegate in accordance with such regulations as may be prescribed by the Secretary or his delegate.

(b) *Accounting.* In case of the resale of such property, the proceeds of the sale shall be paid into the Treasury as internal revenue collections, and there shall be rendered a distinct account of all charges incurred in such sales.

[Sec. 7505 as amended by secs. 111 (a) and (c) Federal Tax Lien Act 1966 (80 Stat. 1145)]

PAR. 16. Section 301.7505–1 is amended by revising the heading thereof, by revising subparagraph (1) of paragraph (a), and by revising so much of subparagraph (2) of paragraph (a) as precedes subdivision (ii) thereof. These revised provisions read as follows:

§ 301.7505–1 Sale of personal property acquired by the United States.

(a) *Sale*—(1) *In general.* Any personal property (except bonds, notes, checks, and other securities) acquired by the United States in payment of or as security for debts arising under the internal revenue laws may be sold by the district director who acquired such property for the United States. U.S. savings bonds shall not be sold by the district director but shall be transferred to the Division of Loans and Currency, Treasury Department, for redemption. Other bonds, notes, checks, and other securities shall be disposed of in accordance with instructions issued by the Commissioner.

(2) *Time, place, manner, and terms of sale.* The time, place, manner, and terms of sale of personal property acquired for the United States shall be as follows:

(i) *Time, notice, and place of sale.* The property may be sold at any time after it has been acquired by the United States. A public notice of sale shall be posted at the post office nearest the place of sale and in at least two other public places. The notice shall specify the property to be sold and the time, place, manner, and conditions of sale. In addition, the district director may use such other methods of advertising as he believes will result in obtaining the highest price for the property. The place of sale shall be within the internal revenue district where the property was originally acquired by the United States. However, if the district director believes that a substantially higher price may be obtained, the sale may be held outside his district.

* * * * *

PAR. 17. Section 301.7506 is amended by revising subsection (a) of section 7506 and by adding a historical note to read as follows:

§ 301.7506 Statutory provisions; administration of real estate acquired by the United States.

Sec. 7506. *Administration of real estate acquired by the United States*—(a) *Person charged with.* The Secretary or his delegate shall have charge of all real estate which is or shall become the property of the United States by judgment of forfeiture under the internal revenue laws, or which has been or shall be assigned, set off, or conveyed by purchase or otherwise to the United States in payment of debts or penalties arising under the laws relating to internal revenue, or which has been or shall be vested in the United States by mortgage or other security for the payment of such debts, or which has been redeemed by the United States, and of all trusts created for the use of the United States in payment of such debts due them.

* * * * *

[Sec. 7506 as amended by section 111(b) Federal Tax Lien Act 1966 (80 Stat. 1145)]

PAR. 18. Section 301.7506–1 is amended by revising paragraph (a) to read as follows:

§ 301.7506–1 Administration of real estate acquired by the United States.

(a) *Persons charged with.* The district director for the internal revenue district in which the property is situated shall have charge of all real estate which is or shall become the property of the United States by judgment of forfeiture under the internal revenue laws, or which has been or shall be assigned, set off, or conveyed by purchase or otherwise to the United States in payment of debts or penalties arising under the laws relating to internal revenue, or which has been or shall be vested in the United States by mortgage, or other security for payment of such debts, or which has been redeemed by the United States, or which has been or shall be acquired by the United States in payment of or as security for debts arising under the internal revenue laws, and of all trusts created for the use of the United States in payment of such debts due the United States.

* * * * *

PAR. 19. Section 301.7809 is amended by revising subsections (a) and (b) of section 7809, and by revising the historical note. These amended and revised provisions read as follows:

§ 301.7809 Statutory provisions; deposit of collections.

Sec. 7809. *Deposit of collections*—(a) *General rule.* Except as provided in subsections (b) and (c) and in sections 4735, 4762, 7651, 7652, 7654, and 7810, the gross amount of all taxes and revenues received under the provisions of this title, and collections of whatever nature received or collected by authority of any internal revenue law, shall be paid daily into the Treasury of the United States under instructions of the Secretary or his delegate as internal revenue collections, by the officer or employee receiving or collecting the same, without any abatement or deduction on account of salary, compensation, fees, costs, charges, expenses, or claims of any description. A certificate of such payment, stating the name of the depositor and the specific account on which the deposit was made, signed by the Treasurer of the United States, designated depository, or proper officer of a deposit bank, shall be transmitted to the Secretary or his delegate.

(b) *Deposit funds.* * * *

(2) *Sums offered for purchase of real estate.* Sums offered for the purchase of real estate under the provisions of section 7506;

(3) *Surplus proceeds in sales under levy.* Surplus proceeds in any sale under levy, after making allowance for the amount of the tax, interest, penalties, and additions thereto, and for costs and charges of the levy and sale; and

(4) *Surplus proceeds in sales of redeemed property.* Surplus proceeds in any sale under section 7506 of real property redeemed by the United States, after making allowance for the amount of the tax, interest, penalties, and additions thereto and for the costs of sale.

Upon the acceptance of such offer in compromise or offer for the purchase of such real estate, the amount so accepted shall be withdrawn from such deposit fund account and deposited in the Treasury of the United States as internal revenue collections. Upon the rejection of any such offer, the Secretary or his delegate shall refund to the maker of such offer the amount thereof.

* * * * *

[Sec. 7809 as amended by sec. 3(b), Act of Oct. 23, 1962 (Pub. Law 87–870, 76 Stat. 1161) and sec. 112(b) Federal Tax Lien Act 1966 (80 Stat. 1146)]

PAR. 20. Section 301.7810 is added and reads as follows:

§ 301.7810 Statutory provisions; revolving fund for redemption of real property.

Sec. 7810. *Revolving fund for redemption of real property*—(a) *Establishment of fund.* There is established a revolving fund, under the control of the Secretary or his delegate, which shall be available without fiscal year limitation for all expenses necessary for the redemption (by the Secretary or his delegate) of real property as provided in section 7425(d) and section 2410 of title 28 of the United States Code. There are authorized to be appropriated from time to time such sums (not to exceed $1 million in the aggregate) as may be necessary to carry out the purposes of this section.

(b) *Reimbursement of fund.* The fund shall be reimbursed from the proceeds of a subsequent sale of real property redeemed by the United States in an amount equal to the amount expended out of such fund for such redemption.

(c) *System of accounts.* The Secretary or his delegate shall maintain an adequate system of accounts for such fund and prepare annual reports on the basis of such accounts.

[Sec. 7810 as added by sec. 112(a) Federal Tax Lien Act 1966 (80 Stat. 1145)]

Consumer and Marketing Service

[7 CFR Part 948]

IRISH POTATOES GROWN IN COLORADO

Notice of Proposed Limitation of Shipments for Area No. 2

Consideration is being given to the issuance of the limitation of shipments regulation for area No. 2 Colorado, hereinafter set forth, which was recommended by the area No. 2 committee, established pursuant to Marketing Agreement No. 97 and Order No. 948, both as amended (7 CFR Part 948), regulating the handling of Irish potatoes grown in the State of Colorado. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.).

This notice is based on the recommendation and information submitted by the Colorado Area No. 2 Potato Committee, established pursuant to said marketing agreement and order and other available information. The recommendation of the committee reflects its appraisal of the composition of the 1971 crop in area No. 2 and of the marketing prospects for this season.

The grade, size, quality, and maturity requirements as provided herein are necessary to prevent potatoes of poor quality, or undesirable sizes from being distributed into fresh market channels. They will also provide consumers with good quality potatoes consistent with the overall quality of the crop, and maximize returns to the producers for the preferred quality and sizes.

The proposed regulations with respect to special purpose shipments for other than fresh market use, are designed to meet the different requirements for such outlets.

All persons who desire to submit data, views, or arguments in connection with this proposal may file the same in quadruplicate with the Hearing Clerk, Room 112, U.S. Department of Agriculture, Washington, D.C. 20250, not later than 5 days after publication of this notice in the FEDERAL REGISTER. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)). The proposed regulation is as follows:

§ 948.366 Limitation of shipments.

During the period September 16, 1971, through June 30, 1972, no person shall handle any lot of potatoes grown in area No. 2 unless such potatoes meet the requirements of paragraphs (a) and (b) of this section, or unless such potatoes are handled in accordance with paragraphs (c), (d), (e), and (f) of this section. The maturity requirements specified in paragraph (b) of this section shall terminate October 31, 1971, at 11:59 p.m., m.s.t.

(a) *Minimum grade and size requirements.*—(1) *Round varieties.* U.S. No. 2, or better grade, 2 inches minimum diameter.

(2) *Long varieties.* U.S. No. 2, or better grade, 2 inches minimum diameter or 4 ounces minimum weight.

(3) *All varieties.* Size B, if U.S. No. 1, or better, grade.

(b) *Maturity (skinning) requirements.*—(1) *Russet Burbank and Red McClure varieties.* For U.S. No. 2 grade not more than "moderately skinned" and for other grades not more than "slightly skinned."

(2) *All other varieties.* Not more than "moderately skinned."

(c) *Special purpose shipments.*—(1) The grade, size, maturity and inspection requirements of paragraphs (a), (b), and (f) of this section and the assessment requirements of this part shall not be applicable to shipments of potatoes for:

(i) Livestock feed;

(ii) Relief or charity; or

(iii) Canning, freezing, and "other processing" as hereinafter defined.

(2) The grade, size, maturity, and inspection requirements of paragraphs (a), (b), and (f) of this section shall not be applicable to shipments of seed pursuant to § 948.6 but such shipments shall be subject to assessments.

(d) *Safeguards.* Each handler of potatoes which do not meet the grade, size, and maturity requirements of paragraphs (a) and (b) of this section and which are handled pursuant to paragraph (c) of this section for any of the special purposes set forth therein shall,

(1) Prior to handling, apply for and obtain a Certificate of Privilege from the committee.

(2) Furnish the committee such reports and documents as requested, including certification by the buyer or receiver as to the use of such potatoes, and

(3) Bill each shipment directly to the applicable processor or receiver.

(e) *Minimum quantity.* For purposes of regulation under this part, each person may handle up to but not to exceed 1,000 pounds of potatoes without regard to inspection and the requirements of paragraphs (a) and (b) of this section, but this exception shall not apply to any shipment which exceeds 1,000 pounds of potatoes.

(f) *Inspection.* (1) No handler shall handle any potatoes for which inspection is required unless an appropriate inspection certificate has been issued with respect thereto and the certificate is valid at the time of shipment. For purposes of operation under this part it is hereby determined pursuant to paragraph (d) of § 948.40, that each inspection certificate shall be valid for a period not to exceed 4 days following the date of inspection as shown on the inspection certificate.

(2) No handler may transport or cause the transportation by motor vehicle of any shipment of potatoes for which an inspection certificate is required unless each shipment is accompanied by, and made available for examination at any time upon request, a copy of the inspection certificate applicable thereto.

(g) *Definitions.* The terms "U.S. No. 1," "U.S. No. 2," "slightly skinned," and "moderately skinned" shall have the same meaning as when used in the U.S. Standards for Potatoes (§§ 51.1540–51.1566 (35 F.R. 18258)), effective September 1, 1971, including the tolerances set forth therein. The term "other processing" has the same meaning as the term appearing in the act and includes, but is not restricted to, potatoes for dehydration, chips, shoestrings, starch, and flour. It includes only that preparation of potatoes for market which involves the application of heat or cold to such an extent that the natural form or stability of the commodity undergoes a substantial change. The act of peeling, cooling, slicing, or dicing, or the application of material to prevent oxidation does not constitute "other processing." Other terms used in this section shall have the same meaning as when used in Marketing Agreement No. 97, as amended, and this part.

(h) *Applicability to imports.* Pursuant to section 608e–1 of the act and § 980.1, *Import regulations* (7 CFR 980.1), Irish potatoes of the red skinned round type, except certified seed potatoes, imported into the United States during the period September 16, 1971, through June 30, 1972, shall meet the grade, size, and quality requirements specified in paragraph (a) of this section, and during the period September 16, 1971, through October 31, 1971, shall meet the minimum maturity requirements of paragraph (b)

of this section, namely not more than "moderately skinned."

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: August 25, 1971.

PAUL A. NICHOLSON,
Deputy Director, Fruit and Vegetable Division, Consumer and Marketing Service.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 121]

GLYCEROL ESTER OF WOOD ROSIN

Proposed Rule Making

Section 121.1084 of the food additive regulations (21 CFR 121.1084) provides for the use of gycerol ester of wood rosin, without a tolerance limitation, to adjust the density of citrus oils used in the preparation of beverages. Safety of this use was judged on the basis of data indicating that the intended physical or technical effect could be achieved at levels not in excess of 100 parts per million of the additive in the finished beverage.

New information indicates that since promulgation of § 121.1234 on July 28, 1970 (35 F.R. 12062), restricting use of brominated vegetable oil in beverages, the level of glycerol ester of wood rosin in citrus beverages may be exceeding 100 parts per million due to its use in production as a partial replacement for brominated vegetable oil. In the absence of supporting toxicological data for such higher levels, the Commissioner of Food and Drug concludes that usage should be restricted by imposing a tolerance, as proposed below, of not more than 100 parts per million of the additive in the finished beverage.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(d), 72 Stat. 1787; 21 U.S.C. 348(d)) and under authority delegated to him (21 CFR 2.120), the Commissioner proposes that § 121.1084(b) be revised to read as follows:

§ 121.1084 Glycerol ester of wood rosin.

* * * * *

(b) It is used to adjust the density of citrus oils used in the preparation of beverages whereby the amount of the additive does not exceed 100 parts per million of the finished beverage.

Interested persons may, within 30 days after publication hereof in the FEDERAL REGISTER, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–62, 5600 Fishers Lane, Rockville, Md. 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: August 23, 1971.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.71–12649 Filed 8–27–71;8:53 am]

DEPARTMENT OF TRANSPORTATION

Coast Guard

[33 CFR Part 110]

[CGFR 71–86]

SOUTHEAST ALASKA

Anchorage Grounds; Explosives Anchorage

The Coast Guard is considering establishing an explosives anchorage in Southeast Alaska at one of the following locations:

(1) *Annette Bay.* The waters of Annette Bay within a circular area with a radius of 1,500 yards, having its center at latitude 55°16'18" N., longitude 131° 33'00" W. or

(2) *Annette Bay.* The waters of Annette Bay within a circular area with a radius of 1,500 yards, having its center at latitude 55°16'08" N., longitude 131° 33'28" W. or

(3) *Moser Bay.* The waters of Moser Bay within a circular area with a radius of 1,500 yards, having its center at latitude 55°32'30" N., longitude 131°38'56" W. or

(4) *Moth Bay.* The waters of Moth Bay within a circular area with a radius of 1,500 yards, having its center at latitude 55°16'55" N., longitude 131°20'22" W. or

(5) *Hassler Harbor.* The waters of Hassler Harbor within a circular area with a radius of 1,500 yards, having its center at latitude 55°12'48" N., longitude 131°25'38" W. or

(6) *Traitors Cove.* The waters of Traitors Cove within a circular area with a radius of 1,500 yards, having its center at latitude 55°43'30" N., longitude 131°-39'12" W.

The proposed explosive anchorage will provide for improved delivery of explosives to the logging and mining operations in Southeast Alaska. A floating magazine having a 750,000 pound capacity will be anchored in the proposed anchorage.

If the proposed explosive anchorage is established, the regulations for the anchorage would limit the use of the anchorage to vessels carrying, loading, or discharging explosives; restrict the total net weight of explosives aboard all vessels within the anchorage to 800,000 pounds; and require that a permit be obtained from the Captain of the Port, Ketchekan, Alaska, before any vessel may anchor or remain within the anchorage. The regulations would also require vessels carrying explosives to display either a red flag or warning sign by day and a red light, in addition to the anchorage lights, at night. Wooden vessels would be required to have radar reflector screens unless there are steel bulkheads or metallic cases or cargo aboard. The Captain of the Port could require that non-self-propelled vessels be attended by a tug while in the anchorage.

The Coast Guard will consider if the needs of maritime and commercial interest of the United States require that this proposed anchorage be established in the interest of safe navigation. The impact of this proposed anchorage on the public's safety and the environment will also be considered before final action is taken.

Interested persons may participate in this proposed rule making by submitting written data, views, or arguments to the Commander, Seventeenth Coast Guard District, Post Office Box 3–5000, Juneau, AK 99801. Each person submitting comments should include his name and address, identifying the notice (CGFR 71–86) and give any reasons for any recommended change in the proposal. Copies of all submissions received will be available for examination by interested persons at the office of the Commander, Seventeenth Coast Guard District.

The Commander, Seventeenth Coast Guard District will forward any comments received before September 28, 1971, with his recommendations to the Chief, Office of Operations, U.S. Coast Guard Headquarters, who will evaluate all communications received and take final action on this proposal. The proposed regulations may be changed in the light of comments received.

(Sec. 7, 38 Stat. 1053, as amended, sec. 6(g)(1)(A) 80 Stat. 937, 33 U.S.C. 471, 49 U.S.C. 1655(g)(1)(A), 49 CFR 1.46(c)(1), 33 CFR 1.05–1(c)(1))

Dated: August 24, 1971.

R. E. HAMMOND,
Rear Admiral, U.S. Coast Guard Chief, Office of Operations.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 2]

PUBLIC INFORMATION

Notice of Proposed Rule Making

Notice is hereby given that, pursuant to 5 U.S.C. 552, the Environmental Protection Agency intends to adopt the following new Part 2 to Title 40 of the Code of Federal Regulations.

Interested persons are invited to submit written comments regarding the proposed rules to the Office of Public Affairs, Environmental Protection Agency, Washington, D.C. 20460, within 30 days after publication of this notice in the FEDERAL REGISTER. Comments received pursuant to this notice will be available for public inspection during normal working hours (9 a.m. to 5:30 p.m.) at the Office of Public Affairs.

Dated: August 24, 1971.

WILLIAM D. RUCKELSHAUS,
Administrator, Environmental Protection Agency.

PART 2—PUBLIC INFORMATION

Sec.
2.100 Scope.
2.101 General policy.
2.102 Procedures applicable to the public.
2.103 Agency procedures in response to request.
2.104 Duties of receiving office.
2.105 Exemptions.
2.106 Determinations by the Office of General Counsel or a Regional Counsel.
2.107 Determinations by the Office of Public Affairs.
2.108 Records of concern to other Federal Agencies.
2.109 Creation of records.
2.110 Denial of requests for information.
2.111 Copies of documents.
2.112 Payment.

AUTHORITY: The provisions of this part 2 issued under 5 U.S.C. 552, as amended by Public Law 90–23.

§ 2.100 Scope.

This part establishes procedures for the Environmental Protection Agency to implement the provisions of the Administrative Procedure Act relating to the availability to the public of information contained in agency files, and not published in the FEDERAL REGISTER. This part is applicable to all EPA components, including all EPA regional offices, field installations and laboratories.

§ 2.101 General policy.

It is the policy of EPA to make the fullest possible disclosure of information to any person who requests information, without unjustifiable expense or delay. Prior to denial of a request for information based upon 5 U.S.C. 552(b), the EPA Office of Public Affairs may, pursuant to § 2.107, order disclosure in the public interest, unless such disclosure is prohibited by law.

§ 2.102 Procedures applicable to the public.

(a) *Form of request.* A request need not be in any particular form, provided that it (1) must be in writing, and (2) must contain a description of the records or information sought with sufficient specificity to permit identification.

(b) *Place of request.* A request for information may be filed with the EPA Office of Public Affairs, Washington, D.C. 20460, or with any other EPA office. Requests for records located in the indicated States may be filed with the following EPA Regional Offices:

(1) *Region I.* (Massachusetts, Connecticut, Maine, New Hampshire, Rhode Island, Vermont), Room 2303, John F. Kennedy Federal Building, Boston, Mass. 02203.

(2) *Region II.* (New Jersey, New York, Puerto Rico, Virgin Islands), Room 847, 26 Federal Plaza, New York, NY 10007.

(3) *Region III.* (Delaware, Maryland, Pennsylvania, Virginia, West Virginia, District of Columbia), Post Office Box 12900, Philadelphia, PA 19108.

(4) *Region IV.* (Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee), Suite 300, 1421 Peachtree Street, NE., Atlanta, GA 30309.

(5) *Region V.* (Illinois, Indiana, Michigan, Minnesota, Ohio, Wisconsin), 33 East Congress Parkway, Chicago, IL 60605.

(6) *Region VI.* (Arkansas, Louisiana, New Mexico, Oklahoma, Texas), 1114 Commerce Street, Dallas, TX 75202.

(7) *Region VIII.* (Iowa, Kansas, Missouri, Nebraska), Room 702, 911 Walnut Street, Kansas City, MO 64106.

(8) *Region VIII.* (Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming), Room 9041, Federal Office Building, 19th and Stout Streets, Denver, CO 80202.

(9) *Region IX.* (Arizona, California, Hawaii, Nevada, American Samoa, Guam, Trust Territories of Pacific Islands, Wake Island), 760 Market Street, San Francisco, CA 94102.

(10) *Region X:* (Alaska, Idaho, Washington), 1200 Sixth Avenue, Seattle, WA 98101.

§ 2.103 Agency procedures in response to request.

Within 5 working days after receipt of a request for information, the EPA office receiving such request shall forward a copy of the request (with the date and place of receipt noted thereon) to the EPA Office of Public Affairs, and shall subsequently advise the Office of Public Affairs of all further actions taken with reference to the request.

§ 2.104 Duties of receiving office.

Within 10 working days after receipt of a request for information, the EPA office which received such request shall:

(a) Obtain, or ascertain the location of, the records or information sought, and (unless a determination pursuant to § 2.106 hereof is required), inform the requesting party of where the records may be inspected and, if ascertainable, of the charge for furnishing copies; or

(b) Inform the requesting party that the search for the requested information is continuing, and advise him of the anticipated date of completion of the search, and of any necessary subsequent extensions of such date, at which time (but in no event later than 60 days after receipt of a request for information) the alternative provisions of this section shall be promptly followed; or

(c) Inform the requesting party that the information sought is in the possession of another Government agency; refer the request to the office in such other agency where the information may be found; and notify the requesting party of such referral; or

(d) Inform the requesting party that the information requested does not exist, to the best knowledge of the receiving office; or

(e) Inform the requesting party that the information requested has been published in the FEDERAL REGISTER, and furnish the citation to such publication; or

(f) Inform the requesting party that disclosure of all or part of the information requested is under review pursuant to § 2.106, provided that, with respect to any part of the information requested which is not subject to review pursuant to § 2.106, action shall be taken promptly under the appropriate paragraph hereof; or

(g) Furnish such other information or take such other action as is appropriate.

§ 2.105 Exemptions.

(a) *Exempt information.* Information may be exempt from disclosure, pursuant to 5 U.S.C. 552(b), when it pertains to matters that are:

(1) Specifically required by Executive order to be kept secret in the interest of the national defense or foreign policy;

(2) Related solely to the internal personnel rules and practices of an agency;

(3) Specifically exempted from disclosure by statute;

(4) Trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(5) Interagency or intraagency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency;

(6) Personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;

(7) Investigatory files compiled for law enforcement purposes except to the extent available by law to a party other than an agency;

(8) Contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions; or

(9) Geological and geophysical information and data, including maps, concerning wells.

(b) *Procedures.* Whenever compliance with a request for information may result in the disclosure of information exempt from disclosure pursuant to 5 U.S.C. 552(b), the receiving office shall promptly forward a copy of the request and a copy or a description of the information requested, together with a brief statement of the position of the receiving office with reference to the applicability of an exemption, to the Office of the General Counsel at EPA headquarters, or to the Regional Counsel for the region in which the records are located.

§ 2.106 Determinations by the Office of General Counsel or a Regional Counsel.

(a) Not later than 20 working days after receipt of a request for determination from the receiving office, the Office of the General Counsel or Regional Counsel:

(1) Shall advise the receiving office to release the information requested, if no exemption pursuant to 5 U.S.C. 552(b) is found applicable; or

(2) Shall advise the receiving office not to release the information requested, if disclosure is prohibited by law; or

(3) Shall, if it or he finds that an exemption pursuant to 5 U.S.C. 552(b) is applicable, but that disclosure is not prohibited by law, forward to the EPA Office of Public Affairs the entire file

received by the Office of the General Counsel or Regional Counsel, together with an opinion respecting nondisclosure on the basis of statutory exemption.

(b) A determination by a Regional Counsel under paragraph (a) of this section shall be made only after consultation with the Office of the General Counsel.

§ 2.107 Determinations by the Office of Public Affairs.

Not later than ten working days after receipt of an opinion from the Office of the General Counsel or a Regional Counsel pursuant to § 2.106(a)(3) concerning the applicability of an exemption under 5 U.S.C. 552(b), the Office of Public Affairs shall determine whether the information requested should be made available in the public interest, notwithstanding the applicability of an exemption, and shall:

(a) Order the disclosure of the information requested, or

(b) Notify the requesting party in accordance with § 2.112 that the information requested will not be disclosed.

§ 2.108 Records of concern to other Federal Agencies.

Where disclosure of a record requested concerns both EPA and another agency, the views of the other agency shall be obtained prior to the determination whether to disclose the requested information.

§ 2.109 Creation of records.

Documents will not be created by compiling selected items from other documents at the request of a member of the public, nor will records be created to provide the requester with data such as ratios, proportions, percentages, frequency distribution, trends, correlations, or comparisons.

§ 2.110 Denial of requests for information.

If it is determined pursuant to this part that requested information will not be provided, the EPA office receiving the request (or, in the event a determination has been made under § 2.107(b), the Office of Public Affairs) shall notify in writing the party requesting the information that the request has been denied. A written denial of a request for information shall contain a brief explanation of the statutory basis for nondisclosure, and shall state that judicial review is available in the U.S. District Court for the district in which the requesting party resides or has his principal place of business, or in which the records sought are located. Failure to grant, or to deny in writing a request for information within 60 days following its receipt shall constitute denial of such request, and shall constitute final EPA action with respect to such grant.

§ 2.111 Copies of documents.

If it is determined that information requested may be disclosed, the requesting party shall be afforded the opportunity to obtain copies of the documents containing such information. However, records shall not be released for copying by non-EPA personnel. When a determination not to disclose a portion of information requested has been made, records shall be masked for copying of nonexempt portions of the documents.

§ 2.112 Payment.

(a) *Charges.* Fees shall be charged for copies of records which are furnished to a person under this part and for time spent in locating and reproducing them, in accordance with a fee schedule maintained and revised by the Office of Public Affairs. No fee will be charged for time spent in processing of any request for information, nor will any fee be charged for periods of less than one-half hour spent in connection with a search for records. For the purposes of this section, "processing" shall include all time spent in generating correspondence related to a request, and in making determinations under §§ 2.106 and 2.107.

(b) *Prepayment.* In the event pending requests under this part from the same requesting party would require the payment of fees in excess of $10, such records shall not be made available, nor copies of such records furnished, unless the requesting party first submits payment in the total amount due; or, if not ascertainable, in the approximate amount that would become due upon compliance with the request, as determined by the Office of Public Affairs or by the office complying with the request. In the event an advance payment hereunder shall differ from the amount of the fees actually due, an appropriate adjustment shall be effected at the time the copies requested are delivered.

(c) *Waiver.* The Office of Public Affairs or the office complying with the request may waive the payment of fees, if such waiver would be in the public interest.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

CLARENCE RICHARD GAINOR

Notice of Granting of Relief

Notice is hereby given that Clarence Richard Gainor, 4808 Ashton Road, Fayetteville, NC 28304, has applied for relief from disabilities imposed by Federal laws with respect to the acquisition, receipt, transfer, shipment, or possession of firearms incurred by reason of his conviction on October 8, 1947, in the District Court for Okmulgee County, Okla., of a crime punishable by imprisonment for a term exceeding 1 year. Unless relief is granted, it will be unlawful for Clarence R. Gainor because of such conviction, to ship, transport or receive in interstate or foreign commerce any firearm or ammunition, and he would be ineligible for a license under chapter 44, title 18, United States Code as a firearms or ammunition importer, manufacturer, dealer or collector. In addition, under title VII of the Omnibus Crime Control and Safe Streets Act of 1968, as amended (82 Stat. 236; 18 U.S.C., appendix), because of such conviction, it would be unlawful for Clarence R. Gainor to receive, possess, or transport in commerce or affecting commerce, any firearm.

Notice is hereby given that I have considered Clarence R. Gainor's application and:

(1) I have found that the conviction was made upon a charge which did not involve the use of a firearm or other weapon or a violation of chapter 44, title 18, United States Code, or of the National Firearms Act; and

(2) It has been established to my satisfaction that the circumstances regarding the conviction and the applicant's record and reputation are such that the applicant will not be likely to act in a manner dangerous to public safety, and that the granting of the relief would not be contrary to the public interest.

Therefore, pursuant to the authority vested in the Secretary of the Treasury by section 925(c), title 18, United States Code and delegated to me by 26 CFR 178.144: *It is ordered,* That Clarence Richard Gainor be, and he hereby is, granted relief from any and all disabilities imposed by Federal laws with respect to the acquisition, receipt, transfer, shipment, or possession of firearms and incurred by reason of the conviction hereinabove described.

Signed at Washington, D.C., this 18th day of August 1971.

[SEAL] JOHNNIE M. WALTERS,
Commissioner of Internal Revenue.

[FR Doc.71-12581 Filed 8-27-71;8:46 am]

WILLIAM L. LUEDTKE

Notice of Granting of Relief

Notice is hereby given that William L. Luedtke, E 52 LaCrosse Avenue, Spokane, WA, has applied for relief from disabilities imposed by Federal laws with respect to the acquisition, receipt, transfer, shipment, or possession of firearms incurred by reason of his conviction on January 18, 1971, in the U.S. District Court, Spokane, Wash., of a crime punishable by imprisonment for a term exceeding 1 year. Unless relief is granted, it will be unlawful for William L. Luedtke because of such conviction, to ship, transport or receive in interstate or foreign commerce any firearm or ammunition, and he would be ineligible for a license under chapter 44, title 18, United States Code as a firearms or ammunition importer, manufacturer, dealer or collector. In addition, under title VII of the Omnibus Crime Control and Safe Streets Act of 1968, as amended (82 Stat. 236; 18 U.S.C., appendix), because of such conviction, it would be unlawful for William L. Luedtke to receive, possess, or transport in commerce or affecting commerce, any firearm.

Notice is hereby given that I have considered William L. Luedtke's application and:

(1) I have found that the conviction was made upon a charge which did not involve the use of a firearm or other weapon or a violation of chapter 44, title 18, United States Code, or of the National Firearms Act; and

(2) It has been established to my satisfaction that the circumstances regarding the conviction and the applicant's record and reputation are such that the applicant will not be likely to act in a manner dangerous to public safety, and that the granting of the relief would not be contrary to the public interest.

Therefore, pursuant to the authority vested in the Secretary of the Treasury by section 925(c) title 18, United States Code and delegated to me by 26 CFR 178.144: *It is ordered,* That William L. Luedtke be, and he hereby is, granted relief from any and all disabilities imposed by Federal laws with respect to the acquisition, receipt, transfer, shipment, or possession of firearms and incurred by reason of the conviction hereinabove described.

Signed at Washington, D.C., this 18th day of August 1971.

[SEAL] JOHNNIE M. WALTERS,
Commissioner of Internal Revenue.

[FR Doc.71-12582 Filed 8-27-71;8:46 am]

JOHN ELMER MARTIN

Notice of Granting of Relief

Notice is hereby given that John Elmer Martin, Route 2, Summerfield, NC, has applied for relief from disabilities imposed by Federal laws with respect to the acquisition, receipt, transfer, shipment, or possession of firearms incurred by reason of his convictions on January 20, 1964, by the Guilford County Superior Court, Greensboro, N.C., of crimes punishable by imprisonment for a term exceeding 1 year. Unless relief is granted, it will be unlawful for John Elmer Martin, because of such convictions, to ship, transport or receive in interstate or foreign commerce any firearm or ammunition, and he would be ineligible for a license under chapter 44, title 18, United States Code, as a firearms or ammunition importer, manufacturer, dealer or collector. In addition, under title VII of the Omnibus Crime Control and Safe Streets Act of 1968, as amended (82 Stat. 236; 18 U.S.C., appendix), because of such convictions, it would be unlawful for John Elmer Martin to receive, possess, or transport in commerce or affecting commerce, any firearm.

Notice is hereby given that I have considered John Elmer Martin's application and:

(1) I have found that the convictions were made upon charges which did not involve the use of a firearm or other weapon or a violation of chapter 44, title 18, United States Code, or of the National Firearms Act; and

(2) It has been established to my satisfaction that the circumstances regarding the convictions and the applicant's record and reputation are such that the applicant will not be likely to act in a manner dangerous to public safety, and that the granting of the relief would not be contrary to the public interest.

Therefore, pursuant to the authority vested in the Secretary of the Treasury by section 925(c), title 18, United States Code and delegated to me by 26 CFR 178.144: *It is ordered,* That John Elmer Martin be, and he hereby is, granted relief from any and all disabilities imposed by Federal laws with respect to the acquisition, receipt, transfer, shipment, or possession of firearms and incurred by reason of the convictions hereinabove described.

Signed at Washington, D.C., this 18th day of August 1971.

[SEAL] JOHNNIE M. WALTERS,
Commissioner of Internal Revenue.

[FR Doc.71-12583 Filed 8-27-71;8:46 am]

JOHN ALLIE USELTON

Notice of Granting of Relief

Notice is hereby given that John Allie Uselton, 1624 Washington Avenue, Fort Worth, TX, has apaplied for relief from disabilities imposed by Federal laws with respect to the acquisition, receipt, transfer, shipment, or possession of firearms incurred by reason of his conviction on March 26, 1934, by a General Court-Martial convened at the Headquarters 8th Corps Area, Fort Sam Houston, Tex., of a crime punishable by imprisonment for a term exceeding 1 year. Unless relief is granted, it will be unlawul for John A. Uselton because of such conviction, to ship, transport or receive in interstate or foreign commerce any firearm or ammunition, and he would be ineligible for a license under chapter 44, title 18, United States Code as a firearms or ammunition importer, manufacturer, dealer or collector. In addition, under title VII of the Omnibus Crime Control and Safe Streets Act of 1968, as amended (82 Stat. 236; 18 U.S.C., appendix), because of such conviction, it would be unlawful for John A. Uselton to receive, possess, or transport in commerce or affecting commerce, any firearm.

Notice is hereby given that I have considered John A. Uselton's application and:

(1) I have found that the conviction was made upon a charge which did not involve the use of a firearm or other weapon or a violation of chapter 44, title 18, United States Code, or of the National Firearms Act; and

(2) It has been established to my satisfaction that the circumstances regarding the conviction and the applicant's record and reputation are such that the applicant will not be likely to act in a manner dangerous to public safety, and that the granting of the relief would not be contrary to the public interest.

Therefore, pursuant to the authority vested in the Secretary of the Treasury by section 925(c), title 18, United States Code and delegated to me by 26 CFR 178.144: *It is ordered*, That John A. Uselton be, and he hereby is, granted relief from any and all disabilities imposed by Federal laws with respect to the acquisition, receipt, transfer, shipment, or possession of firearms and incurred by reason of the conviction hereinabove described.

Signed at Washington, D.C., this 18th day of August 1971.

[SEAL] JOHNNIE M. WALTERS,
Commissioner of Internal Revenue.

[FR Doc.71-12584 Filed 8-27-71;8:46 am]

HENRY MANSFIELD WILLIAMS

Notice of Granting of Relief

Notice is hereby given that Henry Mansfield Williams, No. 1 Lafayette Plaisance, Detroit, MI, has applied for relief from disabilities imposed by Federal laws with respect to the acquisition, receipt, transfer, shipment, or possession of firearms incurred by reason of his conviction on January 10, 1951, in U.S. District Court for the Eastern District of Michigan, of a crime punishable by imprisonment for a term exceeding 1 year. Unless relief is granted, it will be unlawful for Henry M. Williams, because of such conviction, to ship, transport or receive in interstate or foreign commerce any firearm or ammunition, and he would be ineligible for a license under chapter 44, title 18, United States Code as a firearms or ammunition importer, manufacturer, dealer or collector. In addition, under title VII of the Omnibus Crime Control and Safe Streets Act of 1968, as amended (82 Stat. 236; 18 U.S.C., appendix), because of such conviction, it would be unlawful for Henry M. Williams to receive, possess, or transport in commerce or affecting commerce, any firearm.

Notice is hereby given that I have considered Henry M. Williams' application and:

(1) I have found that the conviction was made upon a charge which did not involve the use of a firearm or other weapon or a violation of chapter 44, title 18, United States Code, or of the National Firearms Act; and

(2) It has been established to my satisfaction that the circumstances regarding the conviction and the applicant's record and reputation are such that the applicant will not be likely to act in a manner dangerous to public safety, and that the granting of the relief would not be contrary to the public interest.

Therefore, pursuant to the authority vested in the Secretary of the Treasury by section 925(c), title 18, United States Code and delegated to me by 26 CFR 178.144: *It is ordered*, That Henry M. Williams be, and he hereby is, granted relief from any and all disabilities imposed by Federal laws with respect to the acquisition, receipt, transfer, shipment, or possession of firearms and incurred by reason of the conviction hereinabove described.

Signed at Washington, D.C., this 18th day of August 1971.

[Order 118]

DIRECTOR, COLLECTION DIVISION

Delegation of Authority To Perform Functions Under Economic Opportunity Act

Pursuant to authority vested in the Commissioner of Internal Revenue by Treasury Department Order No. 150-71, dated January 8, 1971, there is hereby delegated to the Director, Collection Division, the authority conferred upon the Secretary of the Treasury (or his delegate) in the Economic Opportunity Act Amendments (Public Law 91-177), approved December 30, 1969.

Specifically, the Economic Opportunity Amendment Act of 1969 requires the Secretary of the Treasury and the Director of the Office of Economic Opportunity to consult on a quarterly basis concerning the withholding of certain taxes by certain antipoverty agencies and for the Secretary of the Treasury or his delegate to notify the Director, OEO, when persons entitled to receive payment pursuant to grants, loans, or other assistance become delinquent in paying and depositing Federal taxes. Notification requires the Director, OEO, to suspend payment or contract negotiations until payment or adequate provision for payment is made.

The authority contained herein may not be redelegated.

Date of issue: August 23, 1971.

Effective date: August 23, 1971.

[SEAL] JOHNNIE M. WALTERS,
Commissioner.

[Order 117]

REGIONAL COMMISSIONERS ET AL.

Implementation of Program Providing for Stabilization of Prices, Rents, Wages and Salaries

The authority delegated to the Secretary of the Treasury by OEP Economic Stabilization Order No. 1, dated August 19, 1971, and redelegated to the Commissioner of Internal Revenue by Treasury Department Order No. 150-75, dated August 19, 1971, is hereby redelegated to Regional Commissioners, District Directors, and Service Center Directors, as follows:

1. Responsibility and authority for the establishment, operation, and maintenance of local service and compliance centers established in support of the economic stabilization program in Standard Metropolitan Statistical Areas and such other places as they may determine. The functions to be exercised through these centers will include but not be limited to the following:

(a) Dissemination of information and guidance to the public;

(b) Receipt, analysis, and evaluation of complaints received with respect to program violations; and

(c) Subject to the general policy guidance and coordination of the Director of the Office of Emergency Preparedness, or his designee, the investigation, compliance, and enforcement of the stabilization of prices, rents, wages, and salaries as directed by section 1(a) of Executive Order 11615 of August 15, 1971.

2. The authority to establish local service and compliance centers may not be redelegated. All other authority delegated by this order may be redelegated.

3. Under the terms of section 4(d) of Executive Order 11615 and Treasury Department Order No. 150-75, all Treasury Bureaus and organizations are available to assist the Internal Revenue Service in carrying out the responsibilities assigned by this order.

Date of issue: August 20, 1971.

Effective date: August 20, 1971.

[SEAL] JOHNNIE M. WALTERS,
Commissioner.

Office of the Secretary

[Dept. Circ.; Public Debt Series No. 9-71]

TREASURY NOTES OF SERIES D-1976

Offering of Notes

AUGUST 26, 1971.

I. *Offering of notes.* 1. The Secretary of the Treasury, pursuant to the authority of the Second Liberty Bond Act, as amended, invites tenders at a price not less than 98.76 percent of their face value for $1,250,000,000, or thereabouts, of notes of the United States, designated Treasury Notes of Series D-1976. The interest rate for the notes will be publicly announced by the Secretary of the Treasury on August 27, 1971. Tenders will be received up to 1:30 p.m., e.d.s.t., Tuesday, August 31, 1971. The notes will be issued under competitive and noncompetitive bidding, as set forth in section III hereof.

II. *Description of notes.* 1. The notes will be dated September 8, 1971, and will bear interest from that date, payable on a semiannual basis on May 15 and November 15, 1972, and thereafter on May 15 and November 15 in each year until the principal amount becomes payable. They will mature November 15, 1976, and will not be subject to call for redemption prior to maturity.

2. The income derived from the notes is subject to all taxes imposed under the Internal Revenue Code of 1954. The notes are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

3. The notes will be acceptable to secure deposits of public moneys. They will not be acceptable in payment of taxes.

4. Bearer notes with interest coupons attached, and notes registered as to principal and interest, will be issued in denominations of $1,000, $5,000, $10,000, $100,000 and $1,000,000. Provision will be made for the interchange of notes of different denominations and of coupon and registered notes, and for the transfer of registered notes, under rules and regulations prescribed by the Secretary of the Treasury.

5. The notes will be subject to the general regulations of the Department of the Treasury, now or hereafter prescribed, governing United States notes.

III. *Tenders and allotments.* 1. Tenders will be received at Federal Reserve Banks and Branches and at the Office of the Treasurer of the United States, Washington, D.C. 20220, up to the closing hour, 1:30 p.m., e.d.s.t., Tuesday, August 31, 1971. Each tender must state the face amount of notes bid for, which must be $1,000 or a multiple thereof, and the price offered, except that in the case of noncompetitive tenders the term "noncompetitive" should be used in lieu of a price. In the case of competitive tenders, the price must be expressed on the basis of 100, with two decimals, e.g., 100.00. Tenders at a price less than 98.76 will not be accepted. Fractions may not be used. Noncompetitive tenders from any one bidder may not exceed $200,000. It is urged that tenders be made on the printed forms and forwarded in the special envelopes marked "Tender for Treasury Notes", which will be supplied by Federal Reserve Banks on application therefor.

2. Commercial banks, which for this purpose are defined as banks accepting demand deposits, may submit tenders for account of customers provided the names of the customers are set forth in such tenders. Others than commercial banks will not be permitted to submit tenders except for their own account. Tenders will be received without deposit from banking institutions for their own account, federally-insured savings and loan associations, States, political subdivisions or instrumentalities thereof, public pension and retirement and other public funds, international organizations in which the United States holds membership, foreign central banks and foreign States, dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions with respect to Government securities and borrowings thereon, and Government accounts. Tenders from others must be accompanied by payment of 5 percent of the face amount of notes applied for.

3. Immediately after the closing hour tenders will be opened, following which public announcement will be made by the Department of the Treasury of the amount and price range of accepted bids. Those submitting tenders will be advised of the acceptance or rejection thereof. In considering the acceptance of tenders, the highest prices offered will be accepted in full down to the amount required, and if the same price appears in two or more tenders, and it is necessary to accept only a part of the amount offered at such price, the amount accepted at such price will be prorated in accordance with the respective amounts applied for. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders, in whole or in part, and his action in any such respect shall be final. Subject to these reservations, noncompetitive tenders for $200,000 or less without stated price from any one bidder will be accepted in full at the average price [1] (in two decimals) of accepted competitive tenders.

4. All bidders are required to agree not to purchase or to sell, or to make any agreements with respect to the purchase or sale or other disposition of any notes of this issue at a specific rate or price, until after 1:30 p.m., e.d.s.t., Tuesday, August 31, 1971.

5. Commercial banks in submitting tenders will be required to certify that they have no beneficial interest in any of the tenders they enter for the account of their customers, and that their customers have no beneficial interest in the banks' tenders for their own account.

IV. Payment. 1. Settlement for accepted tenders in accordance with the bids must be made or completed on or before September 8, 1971, at the Federal Reserve Bank or Branch or at the Office of the Treasurer of the United States, Washington, D.C. 20220, in cash or other funds immediately available by that date. Payment will not be deemed to have been completed where registered notes are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. In every case where full payment is not completed, the payment with the tender up to 5 percent of the amount of notes allotted shall, upon declaration made by the Secretary of the Treasury in his discretion, be forfeited to the United States. Any qualified depositary will be permitted to make settlement by credit in its Treasury Tax and Loan Account for notes allotted to it for itself and its customers.

V. General provisions. 1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make such allotments as may be prescribed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of notes on full-paid tenders allotted, and they may issue interim receipts pending delivery of the definitive notes.

2. The Secretary of the Treasury may at any time, or from time to time, prescribe supplemental or amendatory rules and regulations governing the offering, which will be communicated promptly to the Federal Reserve Banks.

[SEAL] CHARLS E. WALKER,
Acting Secretary of the Treasury.

[1] Average price may be at, or more or less than 100.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

CHIEF, DIVISION OF ADMINISTRATION, LEWISTOWN DISTRICT, MONT.

Delegation of Authority Regarding Contracts and Leases

A. Pursuant to delegation of authority contained in Bureau Manual 1510-03B2, the Chief, Division of Administration, Lewistown District, Lewistown, Mont., is authorized:

1. To enter into contracts with established sources for supplies and services, excluding capitalized equipment, regardless of amount, and

2. To enter into contracts on the open market for supplies and materials, excluding capitalized equipment, not to exceed $2,500 per transaction ($2,000 for construction), provided that the requirement is not available from established sources.

JOSEPH A. GIBSON,
District Manager.

Approved:

HAROLD C. LYND,
Acting State Director.

[Docket No. M 71-28]

CF&I STEEL CORP.

Petition for Modification of Interim Mandatory Safety Standard

In accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969 (30 U.S.C. sec. 861(c) (Supp. V, 1970)), notice is given that the CF&I Steel Corp. has filed a petition to modify the application of section 311(f) of the Act, 30 U.S.C. sec. 871(f) (Supp. V, 1970), and 30 CFR 75.1101-10, 35 F.R. 17919, to its Allen Mine.

Section 311(f) of the Act provides as follows:

(f) Deluge-type water sprays or foam generators automatically actuated by rise in temperature, or other no less effective means approved by the Secretary of controlling fire, shall be installed at main and secondary belt-conveyor drives. Where sprays or foam generators are used they shall supply a sufficient quantity of water or foam to control fires.

30 CFR 75.1101-10 provides as follows:

Each water sprinkler system shall be equipped with a device designed to stop the belt drive in the event of a rise in temperature and each such warning device shall be capable of giving both an audible and visual warning when a fire occurs.

Petitioner requests that it be allowed to continue the use of its present system which it describes as follows:

Deluge type water sprays have been installed at all main and secondary belt drives in our Allen Mine—These systems are presently operated with manually controlled two (2) inch quick open and shut type valves.

The belt drive pulleys and fifty (50) feet of belt line are protected with sprays. The belt is a type that has been approved as fire resistant by the U.S. Bureau of Mines—Three (3) inch water lines, carrying water a [sic] an excess of 250 pounds p.s.i.a. from 195,000 gallon storage tanks, feed into two (2) inch lines at the belt drive and extend along the belt line for a distance of fifty (50) feet. Quarter (¼) inch lines are installed in the two (2) inch line at seven foot intervals to which each is attached two (2) 86 degree full cone sprays so adjusted as to direct the water to bathe the upper and lower surfaces of the load carrying and return portions of the belt. These sprays apply water in excess of five (5) gallons per minute each to the surface of thirty (30) inch wide belt and have been equipped with blow off dust covers. Including the two sprays at the drive pulley, there are sixteen sprays at each installation.

A designated employee is stationed at each belt drive either to direct the coal from the belt into a mine car or to observe and clean up around a transfer point in the case of a secondary belt drive—Each of these employees have been instructed in the operation of the deluge spray system.

Petitioner asserts that "since the belt drives are attended at all times we have a no less effective means of controlling fires at these belt drives" and that the requirement of a heat sensing device to stop the belt and actuate the deluge system in case of a fire should be waived.

Parties interested in this petition should file their answers or comments within 30 days from the date of publication of this notice in the FEDERAL REGISTER with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 6432 Federal Building, Salt Lake City, Utah 84111. Copies of the petition are available for inspection at that address.

ERNEST F. HOM,
Acting Director,
Office of Hearings and Appeals.

AUGUST 20, 1971.

[Docket No. M 71-25]

CHAPPELL COAL CO.

Petition for Modification of Interim Mandatory Safety Standard

In accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969 (30 U.S.C. sec. 861(c) (Supp. V, 1970)), notice is given that the Chappell Coal Co. has filed a petition to modify the application of section 309(c) of the Act, 30 U.S.C. sec. 869(c) (Supp. V, 1970), to its Chappell Mine.

Section 309(c) provides as follows:

(c) Six months after the operative date of this title, low- and medium-voltage resistance grounded systems shall include a fail safe ground check circuit to monitor continuously the grounding circuit to assure continuity which ground check circuit shall cause the circuit breaker to open when either the ground or pilot check wire is broken, or other no less effective device approved by the Secretary or his authorized representative to assure such continuity, except that an extension of time, not in excess of twelve months, may be permitted by the Secretary on a mine-by-mine basis if he determines that such equipment is not available. Cable couplers shall be constructed so that the ground check continuity conductor shall be broken first and the ground conductors shall be broken last when the coupler is being uncoupled.

This statutory provision has been implemented by regulations, 30 CFR 75.900 to 75.900-4, 35 F.R. 17916.

Petitioner proposes as an alternate standard the use of its present system is described in its petition as follows:

This statutory provision has been implemented by regulations, 30 CFR 75.902 to 75.902-4, 35 F.R. 17916-17917.

Petitioner proposes as an alternate standard the use of its present system which is described in its petition as follows:

The underground electrical equipment is served by three A.C. 20-KVA transformers, on the surface, primary volts 11,000, secondary volts 480, 8-amp fuses on the primary side. Power is transmitted underground by No. 1-0 three-conductor lead sheathed cable, a distance of 1,500 feet to a distribution box. This cable is protected by 150-amp. fuses at the disconnect switch on the surface, against phase to phase to ground short circuit.

The lead sheath is connected to the frames of all electrical equipment and is in contact with the ground through its length. It is also grounded to Subpart H-grounding Regulation § 75-701-1(a) and § 75-701-1(b) of the FEDERAL REGISTER.

Petitioner states that this system furnishes adequate safety protection to the miners.

Parties interested in this petition should file their answers or comments within 30 days from the date of publication of this notice in the FEDERAL REGISTER with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 6432 Federal Building, Salt Lake City, UT 84111. Copies of the petition are available for inspection at that address.

ERNEST F. HOM,
Acting Director,
Office of Hearings and Appeals.

AUGUST 20, 1971.

[Docket No. M 71-27]

CHAPPELL COAL CO.

Petition for Modification of Interim Mandatory Safety Standard

In accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969 (30 U.S.C. sec. 861(c) (Supp. V, 1970)), notice is given that the Chappell Coal Co. has filed a petition to modify the application of section 309(a) of the Act, 30 U.S.C. sec. 869(a) (Supp. V, 1970), to its Chappell Mine.

Section 309(a) provides as follows:

(a) Low- and medium-voltage power circuits serving three-phase alternating current equipment shall be protected by suitable circuit breakers of adequate interrupting capacity which are properly tested and maintained as prescribed by the Secretary. Such breakers shall be equipped with devices to provide protection against undervoltage, grounded phase, short circuit, and overcurrent.

This statutory provision has been implemented by regulations, 30 CFR 75.900 to 75.900-4, 35 F.R. 17916.

Petitioner proposes as an alternate standard the use of its present system is described in its petition as follows:

One Westinghouse 'De-Ion' 100-amp, circuit breaker between the junction box at the terminal of the lead cable and the nipping station for equipment for each of two working face [sic]. The circuit breaker shall be set not to exceed the maximum allowable instantaneous setting for the smallest cable used in the circuit in compliance with Subpart G—Trailing Cables Regulation § 75-601-1 of the FEDERAL REGISTER.

One 35-hp. shortwall cutter, one 15-hp. shaker conveyor and one 2-hp. blower fan is used in each working place. One cat mounted timber truck, 10-hp., serves the two working faces. One Joy 12-bu. loader is used in necking off rooms and where mining conditions will permit.

Petitioner states that this system has been used in its mine for 20 years without failure and that it will furnish adequate safety to the miners until such time as higher horsepower equipment may be used.

Parties interested in this petition should file their answers or comments within 30 days from the date of publication of this notice in the FEDERAL REGISTER with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 6432 Federal Building, Salt Lake City, UT 84111. Copies of the petition are available for inspection at that address.

ERNEST F. HOM,
Acting Director,
Office of Hearings and Appeals.

[Docket No. FDC-D-372; NADA No. 5-633V, etc.]

AGRI-TECH, INC., ET AL.

Iodinated Casein; Notice of Opportunity for Hearing

In an announcement in the FEDERAL REGISTER of October 8, 1970 (35 F.R. 15859, DESI 5-633V), the Commissioner of Food and Drugs announced the conclusions of the Food and Administration following evaluation of reports received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the following drugs which contain iodinated casein:

1. Protamone Thyroactive · Casein; NADA (new animal drug application) No. 5-633V and NADA No. 5-987V; Agri-Tech, Inc., 4722 Broadway, Kansas City, Mo. 64112.

2. Stimulac Pellets; NADA No. 5-987V; Agri-Tech, Inc.

3. MOM Sow Milking Tablets; NADA No. 5-987V; Agri-Tech, Inc.

4. Iocine; NADA No. 7-857V; Haver-Lockhart Laboratories, Post Office Box 676, Kansas City, Mo. 64141.

5. Libidoxin Powder, NADA No. 8-581V; Jensen-Salsbery Laboratories, 520 West 21st Street, Kansas City, Mo. 64141.

The announcement invited the holders of said new animal drug applications and any other interested persons to submit pertinent data on the drugs' effectiveness.

Adequate data were not submitted in response to the announcement and available information fails to provide substantial evidence that the drugs are effective for improving fertility in bulls, boars, goats, and sheep; increasing milk production in goats, beef cows, and sheep; improving rate of gain in dairy cattle, sheep, and goats; feathering in chickens and turkeys; increasing milk flow in nursing sows; or improving egg production and egg shell texture in chickens.

Therefore, notice is given to Agri-Tech, Inc., Haver-Lockhart Laboratories, Jensen-Salsbery Laboratories, and to any interested person who may be adversely affected that the Commissioner of Food and Drugs proposes to issue an order under the provisions of section 512(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(e)) withdrawing approval of NADA No. 5-633V, NADA No. 5-987V, NADA No. 7-857V, NADA No. 8-581V, and all amendments and supplements thereto. This action is proposed on the grounds that there is a lack of substantial evidence that the drugs have the effect they purport or are represented to have under the conditions of use prescribed, recommended, or suggested in their labeling.

In accordance with the provisions of section 512 of the act (21 U.S.C. 360b), the Commissioner will give the applicant and any other interested person who would be adversely affected by an order withdrawing such approval an opportunity for a hearing at which time such persons may produce evidence and arguments to show why approval of said new animal drug applications should not be withdrawn. Promulgation of the order will cause any drug similar in composition to the above listed drug products and recommended for similar conditions of use to be a new animal drug for which an approved new animal drug application is not in effect. Any such drug then on the market would be subject to appropriate regulatory action.

Within 30 days after publication hereof in the FEDERAL REGISTER, such persons are required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Office of the General Counsel, Room 6-62, 5600 Fishers Lane, Rockville, Md. 20852, a written appearance electing whether:

1. To avail themselves of the opportunity for a hearing; or

2. Not to avail themselves of the opportunity for a hearing.

If such persons elect not to avail themselves of the opportunity for a hearing, the Commissioner, without further notice, will enter a final order withdrawing approval of the new animal drug applications.

Failure of such persons to file a written appearance of election within said 30 days will be construed as an election by such persons not to avail themselves of the opportunity for a hearing.

The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process which the Commissioner finds is entitled to protection as a trade secret will not be open

to the public, unless the respondent specifies otherwise in his appearance.

If such persons elect to avail themselves of the opportunity for a hearing, they must file a written appearance requesting the hearing and giving the reasons why approval of the new animal drug application should not be withdrawn together with a well-organized and full-factual analysis of the clinical and other investigational data they are prepared to prove in support of their opposition to the grounds for this notice. A request for a hearing may not rest upon mere allegations or denials but must set forth specific facts showing a genuine and substantial issue of fact that requires a hearing. When it clearly appears from the data in the application and from the reasons and factual analysis in the request for the hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of approval of the application, the Commissioner will enter an order stating his findings and conclusions on such data. If a hearing is requested and is justified by the response to this notice, the issues will be defined, a hearing examiner will be named, and he shall issue a written notice of the time and place at which the hearing will commence. The time shall be not more than 90 days after the expiration of said 30 days, unless the hearing examiner and the applicant otherwise agree.

Responses to this notice will be available for public inspection in the Office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512, 82 Stat. 343–51; 21 U.S.C. 360b) and under the authority delegated to the Commissioner (21 CFR 2.120).

Dated: August 23, 1971.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.71–12647 Filed 8–27–71;8:53 am]

[Docket No. FDC–D–278; NDA 1–726, etc.]

AMERICAN CYANAMID CO. ET AL.

Certain OTC Combination Drugs for Topical Use; Notice of Withdrawal of Approval of New Drug Applications

On February 18, 1971, there was published in the FEDERAL REGISTER (36 F.R. 3145) a notice of opportunity for hearing in which the Commissioner of Food and Drugs proposed to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of the following new drug applications in the absence of substantial evidence that the drugs are effective for their labeled indication.

1. Rhulitol Solution, containing 5 percent tannic acid, with chlorobutanol, phenol, camphor, alum, and isopropyl alcohol; Lederle Laboratories Division, American Cyanamid Co., Post Office Box 500, Pearl River, N.Y. 10965 (NDA 4–875).

2. Zirnox Topical Lotion, containing phenyltoloxamine citrate and zirconium oxide; Bristol Laboratories, Division of Bristol-Myers Co., Thompson Road, Post Office Box 657, Syracuse, N.Y. 13201 (NDA 8–084).

3. Enzo-Cal Topical Cream, containing benzocaine with calamine and zinc oxide; Crookes-Barnes Laboratories, Inc., Division of Chemway Corp., Fairfield Road, Wayne, N.J. 07470 (NDA 1–726).

Following publication of the notice of opportunity for a hearing Crookes-Barnes Laboratories notified the Food and Drug Administration that marketing of Enzo-Cal Topical Cream (NDA No. 1–726) has been discontinued.

Neither the holders of the new drug applications listed above nor any other interested person have filed a written appearance of election as provided by said notice. The failure to file such an appearance is construed as an election by such persons not to avail themselves of the opportunity for a hearing.

The Commissioner of Food and Drugs, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505 (e), 52 Stat. 1053, as amended; 21 U.S.C. 355(e)), and under authority delegated to him (21 CFR 2.120), finds that on the basis of new information before him with respect to each of said drugs, evaluated together with the evidence available to him when each of the applications was approved, there is a lack of substantial evidence that each of the drugs will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling thereof.

Therefore, pursuant to the foregoing findings, approval of the listed new drug applications, and all amendments and supplements applying thereto, is withdrawn effective on the date of the signature of this document.

Dated: August 18, 1971.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.71–12644 Filed 8–27–71;8:52 am]

[Docket No. FDC–D–331; NDA 6–046]

BREWER AND CO.

Sodium Succinate Injection; Notice of Withdrawal of Approval of New-Drug Application

In a notice (DESI 6046) published in the FEDERAL REGISTER of March 27, 1970 (35 F.R. 5190), the Commissioner of Food and Drugs announced his conclusions pursuant to evaluation of a report received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on Soduxin (sodium succinate) for intravenous use, provided for by new-drug application No. 6–046, held by Brewer and Co., 6 Roosevelt Avenue, Box 190, Mystic, CT 06355. That announcement stated that the drug was regarded: To be an effective diagnostic agent for determining circulation time; possibly effective as an analeptic for arousal following barbiturate anesthesia, for reduction of waking time following barbiturate anesthesia, and for the treatment of barbiturate poisoning; to lack substantial evidence of effectiveness for use as a respiratory stimulant.

Labeling guidelines were provided for the indication for which the drug is regarded to be effective. Six months were allowed for submitting data providing substantial evidence of effectiveness for the possibly effective indications.

In that no new evidence of effectiveness of the drug was received nor was the application supplemented to delete from the labeling those indication regarded as less than effective, a notice of opportunity for hearing was published in the FEDERAL REGISTER of April 29, 1971 (36 F.R. 8073). Neither the holder of the application nor any other person filed a written appearance electing whether or not to avail themselves of the opportunity for a hearing within the 30 days provided by said notice. The failure to file such an appearance is construed as an election by such persons not to avail themselves of an opportunity for hearing.

The Commissioner of Food and Drugs, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505(e), 52 Stat. 1053, as amended; 21 U.S.C. 355(e)) and under authority delegated to him (21 CFR 2.120), finds that on the basis of new information before him with respect to such drug, evaluated together with the evidence available to him when the application was approved, there is a lack of substantial evidence that the drug will have all the effects it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in its labeling.

Therefore, pursuant to the foregoing finding, approval of new-drug application No. 6–046 and all amendments and supplements thereto, is withdrawn effective on the date of signature of this document.

Dated: August 18, 1971.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.71–12643 Filed 8–27–71;8:52 am]

[Docket No. FDC–D–368; NADA No. 11–322V]

DIAMOND LABORATORIES, INC.

Neacain Ointment; Notice of Opportunity for Hearing

In an announcement in the FEDERAL REGISTER of July 21, 1970 (35 F.R. 11648), the Commissioner of Food and Drugs announced the conclusions of the Food and Drug Administration and the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, following evaluation of a report received from the Academy of Neacain Ointment, NADA (new animal drug application) No. 11–322V. Neacain Ointment contains neomycin sulfate, vitamin A palmitate, riboflavin, prednisolone, and benzocaine; by Diamond Laboratories, Inc., 2518 Southeast 43d Street, Des Moines, Iowa 50317.

The announcement invited the holder of said new animal drug application and any other interested persons to submit adequate documentation in support of the labeling used.

No data were received in response to the announcement and available information fails to provide substantial evidence that the drug is effective for nonspecific dermatosis and for the treatment of eye conditions.

Therefore, notice is given to the above-named firm and to any interested person who may be adversely affected that the Commissioner proposes to issue an order under the provisions of section 512(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(e)) withdrawing approval of the new animal drug application listed above and all amendments and supplements thereto held by said firm for the listed drug on the grounds that:

Information before the Commissioner with respect to the drug evaluated together with the evidence available to him when the application was approved fails to provide substantial evidence that the drug has the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

In accordance with the provisions of section 512 of the act (21 U.S.C. 360b), the Commissioner will give the applicant and any interested person who would be adversely affected by an order withdrawing such approval an opportunity for a hearing at which time such persons may produce evidence and arguments to show why approval of the above-named new animal drug application should not be withdrawn. Promulgation of the order will cause any drug similar in composition to the above listed drug product and recommended for similar conditions of use to be a new animal drug for which an approved new animal drug application is not in effect. Any such drug then on the market would be subject to regulatory proceedings.

Within 30 days after publication hereof in the FEDERAL REGISTER, such persons are required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Office of the General Counsel, Room 6–62, 5600 Fishers Lane, Rockville, Md. 20852, a written appearance electing whether:

1. To avail themselves of the opportunity for a hearing; or

2. Not to avail themselves of the opportunity for a hearing.

If such persons elect not to avail themselves of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing the approval of the new animal drug application.

Failure of such persons to file a written appearance of election within said 30 days will be construed as an election by such persons not to avail themselves of the opportunity for a hearing.

The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process which the Commissioner finds is entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

If such persons elect to avail themselves of the opportunity for a hearing, they must file a written appearance requesting the hearing and giving the reasons why approval of the new animal drug application should not be withdrawn together with a well-organized and full-factual analysis of the clinical and other investigational data they are prepared to prove in support of their opposition to this notice. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. When it clearly appears from the data in the application and from the reasons and factual analysis in the request for the hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of approval of the application, the Commissioner will enter an order stating his findings and conclusions on such data. If a hearing is requested and is justified by the response to this notice, the issues will be defined, a hearing examiner will be named, and he shall issue a written notice of the time and place at which the hearing will commence. The time shall be not more than 90 days after the expiration of said 30 days unless the hearing examiner and the applicant otherwise agree.

Responses to this notice will be available for public inspection in the Office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512, 82 Stat. 343–51; 21 U.S.C. 360b) and under the authority delegated to the Commissioner (21 CFR 2.120).

Dated: August 23, 1971.

SAM D. FINE,
Associate Commissioner for Compliance.

[Docket No. FDC–D–364; NDA 8–738, etc.]

NDK CO. ET AL.

Certain Dentifrices; Follow-Up Announcement and Notice of Opportunity for Hearing

In a notice (DESI 8738) published in the FEDERAL REGISTER of July 21, 1970 (35 F.R. 11643), the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of reports received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group of certain dentifrices containing sodium N-lauroyl sarcosinate, chlorophyllins, sodium oxalate, sodium dehydroacetate, sodium fluoride, urea, or sodium monofluorophosphate. The announcement stated that the dentifrice containing 6 percent sodium monofluorophosphate was regarded as possibly effective as an aid in reducing the incidence of dental caries, and that the dentifrices containing any of the other ingredients above lacked substantial evidence of effectiveness for their labeled or implied indications.

The intent of the July 21, 1970 announcement was to require either the substantiation of expressed or implied claims for therapeutic or prophylactic benefit or their removal from labeling of all such preparations on the market.

The Colgate-Palmolive Co. has submitted satisfactorily revised labeling for two of its products which were included in the announcement and has stated that marketing of the other one, Brisk Activated Tooth Paste, was discontinued several years ago.

Block Drug Co. and the NDK Co. submitted data in behalf of their preparations; however, the data do not provide substantial evidence of effectiveness for the expressed or implied claims.

Therefore, since evidence has not been submitted which supports expressed or implied therapeutic or prophylactic claims such as those described in the notice of July 21, 1970, the holders of the new-drug applications listed below should submit a supplement for any drug which is intended to be marketed. Such supplement should be submitted within 30 days following publication of this notice in the FEDERAL REGISTER, under the provisions of § 130.9 (d) and (e) of the new-drug regulations (21 CFR 130.9), to provide for revised labeling deleting such claims and deleting any declaration of an ingredient which implies such claims. The revised labeling should be put into use promptly, but not later than 60 days following publication of this notice.

1. NDK Dentifrice, containing sodium monofluorophosphate and benzethonium chloride; the NDK Co., 440 Charles Street, New Iberia, La. 70561 (NDA 8–851).

2. Antizyme Tooth Paste, containing sodium oxalate and sodium dehydroacetate; Lambert Pharmacal Co., Division Warner-Lambert Pharmaceutical Co., 201 Tabor Road, Morris Plains, N.J. 07950 (NDA 8–777).

3. Kolynos Fluoride Tooth Paste, containing sodium fluoride; Whitehall Laboratories, Inc., 685 Third Avenue, New York, N.Y. 10017 (NDA 10–383).

4. Super Amm-I-Dent, containing sodium fluroide with sodium N-lauroyl sarcosinate and urea (NDA 9–944), and

5. Amm-I-Dent Tooth Paste, containing sodium N-lauroyl sarcosinate and urea (NDA 9–298), and

6. Amm-I-Dent Tooth Powder, containing urea (NDA 9–298); all held by

Block Drug Co., Inc., 257 Cornelison Avenue, Jersey City, N.J. 07302.

7. Brisk Activated Tooth Paste, containing sodium N-lauroyl sarcosinate; Colgate-Palmolive Co., 300 Park Avenue, New York, N.Y. 10022 (NDA 8–738). Marketing of this preparation was discontinued several years ago.

The Commissioner of Food and Drugs proposes to issue an order under the provisions of section 505(e) of the Federal Food, Drug, and Cosmetic Act withdrawing approval of those portions of the listed new-drug applications which provide for preparations whose labeling contains expressed or implied indications for which substantial evidence of effectiveness is lacking or declares an ingredient which implies such usefulness. An order withdrawing approval will not be issued if such applications are satisfactorily supplemented as described above.

In accordance with the provisions of section 505 of the Act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner will give the applicants, and any interested person who would be adversely affected by such an order, an opportunity for a hearing to show why unsubstantiated expressed or implied therapeutic or prophylactic indications should not be deleted from labeling.

Within 30 days after publication hereof in the FEDERAL REGISTER, such persons are required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–62, 5600 Fishers Lane, Rockville, Maryland 20852, a written appearance electing whether:

1. To avail themselves of the opportunity for a hearing; or

2. Not to avail themselves of the opportunity for a hearing.

If such persons elect not to avail themselves of the opportunity for a hearing the Commissioner without further notice will enter a final order withdrawing approval of the new-drug applications which have not been supplemented as described above. Failure of such persons to file a written appearance of election within said 30 days will be construed as an election by such persons not to avail themselves of the opportunity for a hearing.

The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

If such persons elect to avail themselves of the opportunity for a hearing they must file, within 30 days after publication of this notice in the FEDERAL REGISTER, a written appearance requesting the hearing, giving the reasons why approval of the new-drug application should not be withdrawn, together with a well-organized and full factual analysis of the clinical and other investigational data they are prepared to prove in support of their opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing. When it clearly appears from the data in the application and from the reasons and factual analysis in the request for the hearing that no genuine and substantial issue of fact precludes the withdrawal of approval of the application, the Commissioner will enter an order on these data, making findings and conclusions on such data.

If a hearing is requested and justified by the response to this notice, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after the expiration of such 30 days, a written notice of the time and place at which the hearing will commence (35 F.R. 7250, May 8, 1970; 35 F.R. 16631, October 27, 1970).

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–53, as amended; 21 U.S.C. 355) and under the authority delegated to the Commissioner (21 CFR 2.120).

Any dentifrice on the market which is not now the subject of an approved new-drug application will be regarded to be in violation of the Act and subject to regulatory proceedings unless, within 60 days following publication of this document in the FEDERAL REGISTER, expressed or implied claims for therapeutic or prophylactic benefit, and declaration of any ingredient which implies such claims are deleted from the labeling.

Dated: August 16, 1971.

CHARLES C. EDWARDS,
Commissioner of Food and Drugs.

[FR Doc.71–12646 Filed 8–27–71;8:52 am]

[Docket No. FDC–D–353; NDA 9–120, etc.]

ARMOUR PHARMACEUTICAL CO. ET AL.

Trypsin or Chymotrypsin Injection; Notice of Withdrawal of Approval of New Drug Applications

In an announcement (DESI 10110) published in the FEDERAL REGISTER on June 25, 1970 (35 F.R. 10396), the Commissioner of Food and Drugs announced his conclusions pursuant to an evaluation of reports received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group concerning certain preparations for human use containing trypsin or chymotrypsin for intramuscular injection and a topical preparation containing trypsin, chymotrypsin, and aminacrine hydrochloride, stating that there is a lack of substantial evidence that these preparations are effective for their labeled indications. Pertinent data were invited bearing on the announced intention to initiate proceedings to withdraw approval of the new-drug applications. No such data were received.

In addition to those drugs listed in the announcement, other holders of approved new-drug applications for such drugs were notified that their drugs will be similarly affected by the published conclusions.

The following firms have voluntarily requested withdrawal of approval of their applications, thereby waiving their opportunity for a hearing.

NDA No.	Drug name	NDA holder
10–992	Chymar-L Powder for Injection, containing chymotrypsin.	Armour Pharmaceutical Co., Box 511, Kankakee, IL 60901.
10–110	Chymar Injection in Oil containing chymotrypsin.	Armour Pharmaceutical Co.
11–007	Chymar Aqueous Injection, containing chymotrypsin.	Do.
9–120	Parenzyme Injection, containing trypsin.	National Drug Co., Division of Richardson-Merrell, Inc., 4663 Stenton Ave., Philadelphia, PA 19144.
12–963	Kumotrip, containing chymotrypsin.	Kremers-Urban Co., 5600 West County Line Road, Milwaukee, WI 53201.

In addition to the firms listed above, Fellows-Testagar, Division of Fellows Medical Manufacturing Co., Inc., 12741 Capital Avenue, Oak Park, Michigan 48237, has voluntarily requested withdrawal of approval of new-drug application No. 12–729 for Chymotest Injection containing chymotrypsin. However, since NDA No. 12–729 has never been an approved application, having been allowed to become only conditionally effective, it is not an appropriate subject of this order, and is included for informational purposes only.

The Commissioner of Food and Drugs, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505(e), 52 Stat. 1053, as amended; 21 U.S.C. 355(e)) and under the authority delegated to him (21 CFR 2.120), finds on the basis of new information before him with respect to such drugs evaluated together with the evidence available to him when the applications were approved, that there is a lack of substantial evidence that the drugs will have the effects they purport or are represented to have under the conditions of use prescribed, recommended, or suggested in the labeling thereof.

Therefore, pursuant to the foregoing finding, approval of the above-listed new drug applications and all amendments and supplements applying thereto is withdrawn effective on the date of signature of this document.

Dated: August 19, 1971.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.71–12651 Filed 8–27–71;8:53 am]

[Docket No. FDC–D–374; NADA 6–830V, NADA 7–963V]

DR. MAYFIELD LABORATORIES AND E. R. SQUIBB & SONS, INC.

Sul-Quin-Ox Liquid and Soluline; Notice of Withdrawal of Approval of New Animal Drug Applications

In the FEDERAL REGISTER of July 9, 1970 (35 F.R. 11069, DESI 6391V), the Commissioner of Food and Drugs announced the conclusions of the Food and Drug Administration following evaluation of reports from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on Dr. Mayfield Sul-Quin-Ox Liquid; NADA (new animal drug application) No. 6–830V; marketed by Dr. Mayfield Laboratories, 1209 South Main Street, Charles City, Iowa 50616; and Soluline; NADA No. 7–963V; marketed by E. R. Squibb & Sons, Inc., Squibb Agricultural Research Center, Three Bridges, N.J. 08887. These products contain sulfaquinoxaline as the designated active ingredient.

Both Dr. Mayfield Laboratories and E. R. Squibb & Sons, Inc., responded to the announcement by requesting that the Commissioner withdraw approval of their new animal drug applications.

Based on the grounds set forth in the announcement and the firms' response, the Commissioner concludes that approval of said new animal drug applications should be withdrawn. Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512, 82 Stat. 343–51; 21 U.S.C. 360b) and under the authority delegated to the Commissioner (21 CFR 2.120), approval of NADA 6–830V, and NADA 7–963V, including all amendments and supplements thereto, is hereby withdrawn on the date of signature of this document.

Dated: August 19, 1971.

SAM D. FINE,
Associate Commissioner for Compliance.

[Docket No. FDC–D–123; NDA No. 8–986, 10–144]

HYNSON, WESTCOTT & DUNNING, INC.

Lutrexin Tablets, Trexinest Tablets; Notice of Denial of Petition to Stay Effective Date of Order Withdrawing Approval of New-Drug Applications

The petition of Hynson, Westcott & Dunning, Inc. (HW & D) for a stay of the order withdrawing approval of new-drug applications Nos. 8–986 and 10–144 for its drugs containing lututrin is, after consideration of all the data offered by HW & D to support continued marketing of these preparations, denied for the following reasons:

1. Since 1966 HW & D has had repeated opportunities to come forward and present evidence derived from adequate and well-controlled clinical investigations demonstrating that lututrin is effective for its intended uses and has repeatedly failed to provide such data. No acceptable scientific data to support the efficacy claims made for these preparations, was presented to either the National Academy of Sciences-National Research Council or the Food and Drug Administration.

2. There is no acceptable scientific data showing that lututrin has any biological activity in humans. To the contrary, there is evidence that lututrin is destroyed by hydrolysis due to the action of the gastric enzymes before it can pass the membrane barrier of the intestinal mucosa and be absorbed into the blood stream.

3. While lututrin is not a highly toxic pharmacologic agent—actually it appears to be inert—its use in patients exposes them to drug therapy without any concomitant possibility of therapeutic benefit.

4. In respect to the drug Trexinest, HW & D did not attempt to offer evidence that either component of that fixed ratio combination drug contributes to the claimed efficacy of the drug.

Dated: August 18, 1971.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.71–12645 Filed 8–27–71;8:52 am]

[Docket No. FDC–D–352; NDA 10–522, etc.]

WILSON LABORATORIES ET AL.

Trypsin or Chymotrypsin Injection and Ointment; Notice of Opportunity for Hearing on Proposal to Withdraw Approval of New-Drug Applications

In a notice (DESI 10110) published in the FEDERAL REGISTER of June 25, 1970 (35 F.R. 10396), holders of new-drug applications for certain trypsin or chymotrypsin injectable preparations or ointment, as well as other interested persons were invited by the Commissioner of Food and Drugs to submit pertinent data bearing on his announced intention to initiate proceedings to withdraw approval of the new-drug applications. Other holders of new-drug applications were notified that their drugs are similarly affected by the published conclusion that there is a lack of substantial evidence that the drugs are effective for their labeled indications. No data establishing effectiveness have been received. Some holders of new-drug applications for such preparations have voluntarily requested withdrawal of approval of their applications, thereby waiving their opportunity for a hearing, and those applications are included in final order withdrawing approval published elsewhere in this issue of the FEDERAL REGISTER.

Therefore notice is given to the holders of the applications listed below, and, to any interested person who may be adversely affected that the Commissioner of Food and Drugs proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), withdrawing approval of the listed new-drug applications, and all amendments and supplements applying thereto, on the grounds that new information before him with respect to each of the drugs, evaluated together with the evidence available to him when each application was approved, shows there is a lack of substantial evidence that the drugs will have the effects they purport or are represented to have under the conditions of use prescribed, recommended, or suggested in their labeling.

NDA No.	Drug name	NDA holder
11–882	Chymotrypsin Injection.	The Wilson Laboratories, Division of Wilson Pharmaceutical and Chemical Corp., 4221 South Western Ave., Chicago, IL 60609.
11–883	Trypsin Injection	The Wilson Laboratories.
12–743	Chymotrypsin Injection.	North American Pharmacal, 6851 Chase Rd., Dearborn, MI 48126 (The former holder was Chicago Pharmacal Inc., Division of Conal Pharmaceuticals).
10–779	Enzeon (chymotrypsin) Injection.	Breon Laboratories, Inc., Division Sterling Drug, Inc., 90 Park Ave., New York, NY 10016.
10–522	Parenzyme Aqueous Inj., containing trypsin.	National Drug Co., Division of Richardson-Merrell, Inc., 4663 Stenton Ave., Philadelphia, PA 19144.
11–252	Parenzyme Ointment, containing trypsin, chymotrypsin, and aminacrine hydrochloride.	National Drug Co.

In accordance with the provisions of section 505 of the Act (21 U.S.C. 355), and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner will give the applicants, and any interested person who would be adversely affected by an order withdrawing such approval, an opportunity for a hearing to show why approval of the new-drug applications should not be withdrawn. Any related drug for human use, not the subject of an approved new-drug application, may be affected by this action.

Within 30 days after publication hereof in the FEDERAL REGISTER, such persons are required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–62, 5600 Fishers Lane, Rockville, Maryland 20852, a written appearance electing whether:

1. To avail themselves of the opportunity for a hearing; or

2. Not to avail themselves of the opportunity for a hearing.

If such persons elect not to avail themselves of the opportunity for a hearing the Commissioner without further notice will enter a final order withdrawing approval of the new-drug applications. Failure of such persons to file a written appearance of election within said 30 days will be construed as an election by such persons not to avail themselves of the opportunity for a hearing.

The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

If such persons elect to avail themselves of the opportunity for a hearing

they must file, within 30 days after publication of this notice in the FEDERAL REGISTER, a written appearance requesting the hearing, giving the reasons why approval of the new-drug application should not be withdrawn, together with a well-organized and full factual analysis of the clinical and other investigational data they are prepared to prove in support of their opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing. When it clearly appears from the data in the application and from the reasons and factual analysis in the request for the hearing that no genuine and substantial issue of fact precludes the withdrawal of approval of the application, the Commissioner will enter an order on these data, making findings and conclusions on such data.

If a hearing is requested and justified by the response to this notice, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after the expiration of such 30 days, a written notice of the time and place at which the hearing will commence (35 F.R. 7250, May 8, 1970; 35 F.R. 16631, October 27, 1970).

Received requests for a hearing, and/or elections not to request a hearing, may be seen in the office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–53, as amended; 21 U.S.C. 355), and under the authority delegated to the Commissioner (21 CFR 2.120).

Dated: August 19, 1971.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.71-12650 Filed 8-27-71;8:53 am]

[DESI 50417]

CERTAIN COMBINATION ANTIBIOTIC PREPARATIONS FOR OPHTHALMIC USE

Drugs for Human Use; Drug Efficacy Study Implementation

The Food and Drug Administration has evaluated reports received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the following drugs:

1. *Preparations containing neomycin sulfate, polymyxin B sulfate, and gramicidin.* a. Neo-Polycin Ophthalmic Solution; The Dow Chemical Co., Post Office Box 10, Zionsville, Indiana 46077 (NDA 60–427).

b. Neosporin Ophthalmic Solution; Burroughs Wellcome and Co., 3030 Cornwallis Road, Research Triangle Park, North Carolina 27709 (NDA 60–582).

2. *Preparations containing bacitracin and neomycin sulfate.* a. Bacimycin Ophthalmic Ointment; National Drug Co., Division of Richardson-Merrell, Inc., 4663 Stenton Avenue, Philadelphia, Pennsylvania 19144 (NDA 61–059).

3. *Preparations containing bacitracin, neomycin sulfate, and polymyxin B sulfate.* a. Mycitracin Ophthalmic Ointment; The Upjohn Co., 7171 Portage Road, Kalamazoo, Michigan 49001 (NDA 61–048).

b. Polymyxin B-Bacitracin-Neomycin Ophthalmic Ointment; Chas. Pfizer and Co., Inc., 235 East 42nd Street, New York, New York 10017 (NDA 60–281).

c. Neo-Polycin Ophthalmic Ointment; The Dow Chemical Co. (NDA 60–647).

d. Bacitracin-Neomycin-Polymyxin B Ophthalmic Ointment; Biocraft Laboratories, Inc., 92 Route 46, East Paterson, New Jersey 07407 (NDA 60–965).

4. *Preparations containing zinc bacitracin, neomycin sulfate, and polymyxin B sulfate.* a. Neosporin Ophthalmic Ointment; Burroughs Wellcome and Co. (NDA 50–417).

b. Polymyxin B-Bacitracin-Neomycin Ophthalmic Ointment; Day-Baldwin, Inc., 1460 Chestnut Avenue, Hillside, New Jersey 07205 (NDA 61–078).

c. Bacitracin - Polymyxine - Neomycin Ophthalmic Ointment; Kasco Laboratories, Inc., Hicksville, New York 11820 (NDA 60–764).

5. *Preparations containing neomycin sulfate and gramicidin.* a. Spectrocin Ophthalmic Ointment; E. R. Squibb and Sons, Inc., Georges Road, New Brunswick, New Jersey 08903 (NDA 60–932).

Preparations containing these drugs are subject to the antibiotic certification procedures pursuant to section 507 of the Federal Food, Drug, and Cosmetic Act.

A. *Effectiveness classification.* The Food and Drug Administration concludes that these drugs:

1. Are possibly effective for their labeled indications related to use in superficial ocular infections.

2. Lack substantial evidence of effectiveness for their other labeled indications.

B. *Marketing status.* To allow applicants to obtain and submit data to provide substantial evidence of effectiveness of the drugs in those conditions for which they have been evaluated as possibly effective, batches of such drugs which bear labeling with those indications will continue to be accepted for release or certification by the Food and Drug Administration for a period of 6 months after publication of this announcement in the FEDERAL REGISTER.

Preparations containing these drugs with labeling bearing those claims for which they lack substantial evidence of effectiveness will no longer be acceptable for certification or release after 40 days following the publication date of this announcement in the FEDERAL REGISTER. Any person who would be adversely affected by deletion of the claims for which such drug lacks substantial evidence of effectiveness, as described above, may, within 30 days following publication of this announcement, submit comments or pertinent data.

To be acceptable for consideration in support of the effectiveness of a drug, any such data must be previously unsubmitted, well-organized, and include data from adequate and well-controlled clinical investigations (identified for ready review) as described in § 130.12(a)(5) of the regulations published in the FEDERAL REGISTER of May 8, 1970 (35 F.R. 7250). Carefully conducted and documented clinical studies obtained under uncontrolled or partially controlled situations are not acceptable as a sole basis for the approval of claims of effectiveness, but such studies may be considered on their merits for corroborative support of efficacy and evidence of safety.

At the end of the 6-month period, any data submitted to support the possibly effective indications will be evaluated to determine whether there is substantial evidence of effectiveness for such uses. After that evaluation, the conclusions concerning the drug will be published in the FEDERAL REGISTER. If no studies have been undertaken, or if the studies do not provide substantial evidence of effectiveness, such drug will not be eligible for release or certification.

A copy of the Academy's report has been furnished to each firm referred to above. Communications forwarded in response to this announcement should be identified with the reference number DESI 50417, directed to the attention of the appropriate office listed below, and addressed to the Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20852:

Amendments (identify with NDA number): Division of Anti-Infective Drug Products (BD–140), Office of Scientific Evaluation, Bureau of Drugs.
Requests for the Academy's report: Drug Efficacy Study Information Control (BD–67), Bureau of Drugs.
All other communications regarding this announcement: Drug Efficacy Study Implementation Project Office (BD–60), Bureau of Drugs.

This notice is issued pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (secs. 502, 507, 52 Stat. 1050–51, as amended; 59 Stat. 463, as amended; 21 U.S.C. 352, 357) and under the authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120).

R. E. DUGGAN,
Acting Associate Commissioner for Compliance.

Dated: August 6, 1971.

[DESI 7600]

SODIUM THIAMYLAL

Drugs for Human Use; Drug Efficacy Study Implementation; Followup Notice

In a notice (DESI 7600) published in the FEDERAL REGISTER of September 11, 1969 (34 F.R. 14299), the Commissioner of Food and Drugs announced his conclusions pursuant to evaluation of reports received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on Surital (sodium thiamylal for injection); Parke, Davis and Co., Detroit, Mich. 48232 (NDA 7–600). The announcement stated that this drug was regarded as effective and possibly effective for its various labeled indications. The possibly effective indication (i.e., for terminating convulsions of unknown cause) has been reclassified as lacking substantial evidence of effectiveness in that no new evidence of effectiveness for that indication has been submitted pursuant to the notice of September 11, 1969.

Parke, Davis, the holder of the only new-drug application for sodium thiamylal for injection supplemented their application to delete the possibly effective indication from the drug's labeling and the supplement was approved May 5, 1970.

Any such preparation on the market with labeling bearing indications for which substantial evidence of effectiveness is lacking may be subject to regulatory proceedings.

This notice is issued pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050–53, as amended; 21 U.S.C. 352, 355), and under authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120).

Dated: August 18, 1971.

SAM D. FINE,
Associate Commissioner for Compliance.

[Docket No. D-71-124]

DIRECTOR, OFFICE OF LOAN MANAGEMENT

Redelegation of Authority and Assignment of Functions

The redelegation of authority and assignment of functions to the Director, Office of Loan Management, et al., published at 35 F.R. 4019, March 3, 1970, and amended at 36 F.R. 14164, July 30, 1971, is hereby amended by adding new paragraphs 10, 11, and 12 to section A as follows:

10. To waive the fees for transfer of physical assets in the sale of property on which there is an insured mortgage or a Secretary-held mortgage.

11. To approve the sale and terms of sale of mortgages taken as security in selling property acquired in connection with HUD insurance claims.

12. To waive all or part of the 1-percent deduction upon assignment of a project mortgage to the Secretary, and to make determinations concerning collection of adjusted premium and termination charges. (Secretary's delegation of authority, 36 F.R. 5005, March 16, 1971).

Effective date. This amendment is effective July 1, 1971.

BABCOM, INC., AND GIANT BROADCASTING CO., INC.

Enlarging Issues

Memorandum opinion and order. In re applications of Babcom, Inc., Springfield, Mo., Docket No. 17921, File No. BP-16908, Giant Broadcasting Co., Inc., Docket No. 17923, File No. BP-17103, for construction permits.

1. On December 13, 1967, the Commission designated for hearing the mutually exclusive applications of Babcom, Inc. (Babcom), Springfield, Mo., and Giant Broadcasting Co., Inc. (Giant), Ozark, Ark., for construction permits for new standard broadcast facilities.[1] FCC 67-1331.

[1] The application of Dr. Samuel N. Morris, trading as Upshur Broadcasting Co., Gilmer, Tex., was also designated for hearing with the applications of Babcom and Giant. By an order released July 3, 1968, the Examiner removed Upshur's application from hearing status and returned it to the processing line.

Issues designated were inter alia, the following:

(a) To determine the areas and populations which would receive primary service from the proposed operations and the availability of other primary service to such areas and populations;

(b) To determine whether the proposal of Giant Broadcasting Co., Inc., will realistically provide a local transmission facility for Ozark or for Fort Smith, Ark. * * *;

(c) To determine, in the light of section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient and equitable distribution of radio service.

2. Following the hearing, the Hearing Examiner in an Initial Decision, FCC 68–65, 24 FCC 2d 702, released October 24, 1968, denied Giant's application on the grounds that it had not met its burdens of proof under the areas and populations issue, and under the 307(b) suburban community issue. The Examiner therefore granted Babcom's application.

3. The Review Board subsequently held that the Examiner had erred in refusing to grant Giant a continuance so that it could introduce into evidence a reformed areas and populations exhibit. FCC 69R–184, 17 FCC 2d 357, released April 28, 1969. The Board therefore remanded the case to the Examiner. After further hearings, the Examiner in a Supplemental Initial Decision again denied Giant's application on the same grounds as before. FCC 69D–55, released October 27, 1969.

4. Following an appeal by Giant, the Review Board reversed the Hearing Examiner and granted Giant's application. FCC 70R–268, 24 FCC 2d 690, released August 5, 1970; reconsideration denied, FCC 71R–41, 27 FCC 2d 437, released February 8, 1971. The Board held that Giant had sustained its burden of proof under the 307(b) suburban community issue by showing that its 5 mv/m contour would not in fact penetrate the geographical boundaries of Fort Smith. The Board further concluded that, under the areas and populations issue, Giant had properly and accurately ascertained the service contours of its proposed station, and that therefore it had sustained its burden of proof under this issue. The Board also rejected the Hearing Examiner's conclusions that Mr. Charles Price, an 11.6 percent stockholder of Giant, had made disqualifying misrepresentations during his testimony in this hearing. Finally, the Board concluded that, under the section 307(b) issue, Ozark, Ark., Giant's proposed community, has a greater need for a second broadcast facility than Springfield, Mo., Babcom's proposed community, has for a ninth facility. Hence, the Board granted Giant's application and denied that of Babcom.

5. Now before the Commission is an application for review, filed by Babcom, seeking reversal of the above Review

Board actions.[2] Babcom attacks the Board's decision on numerous grounds. However, except on the two points discussed more fully below, we shall deny the application for review without specification of reasons pursuant to § 1.115 (g) of the rules.

6. The first of the points concerns Giant's use of a combination of actual field conductivity measurements with the theoretical ground conductivity values taken from the Commission's Figure M–3 in an exhibit showing Giant's service contours as well as the areas and populations Giant would serve. Giant itself took measurements on a test transmitter on the 260° radial toward Fort Smith.[3] In determining its service contours, Giant also relied upon field measurements taken by Babcom on Station KZRK[4] along 19°, 163°, 199°, and 343° radials. To establish its service contours, Giant used the measured ground conductivities to the extent of the measurements, and Figure M–3 conductivities beyond these points. The distances to the 2 mV/m and 0.5 mV/m contours on each of the measured radials were then determined and assumed applicable over an azimuth of 10 degrees to either side of the radial. In all other directions the determinations of the distances to the contours employed only ground conductivity values from Figure M–3.

7. The problem with this method of determining service contours is that, as the Hearing Examiner noted, it is internally inconsistent and blatantly contradictory in view of the facts in this case. Giant has used Figure M–3 conductivity values to determine much of its service contours, and yet all of the actual conductivity measurements which Giant and Babcom have taken, and upon which Giant relies, show that the Figure M–3 values are, for the Ozark area, much too high, and hence, grossly inaccurate. The measured values of conductivities in the Ozark area are in the range of 1–4 mmhos/m while the conductivity depicted by Figure M–3 in Giant's proposed service area is 8 to 15 mmhos/m. To quote the Hearing Examiner, "the bulk of [Giant's] exhibit relies on presumptive high conductivities which the balance of the exhibit proves are wrong." [5] Thus, the areas and populations showing of Giant is internally inconsistent to the extent that a large part of Giant's showing relies on Figure M–3, while the remainder of the showing demonstrates that Figure M–3 is wholly inaccurate. The inescapable conclusion is therefore that the areas and populations shown by Giant are also wholly inaccurate insofar as Giant has relied upon Figure M–3.

8. For these reasons we have concluded that Giant has not satisfactorily met its burden of proof under the areas and populations issue. This issue required Giant "to determine the areas and populations which would receive primary service from the proposed operations and the availability of other primary service to such areas and populations." This Giant has not done. As the Examiner noted:

> The engineering techniques employed to prepare the exhibit serve only to convince the Examiner that the station's actual coverage will be materially less than any of the Giant predictions. Because nothing but guesswork is available to determine just how much less, no finding as to the areas and populations to be served by Giant can be made. Not knowing the boundaries of the area to be served, it is also impossible to make a finding as to other services available within such area.

9. Giant in its opposition to Babcom's application for review tacitly admits that it has not accurately shown the contours of its proposed station. Rather, Giant contends that whether it made an accurate showing is irrelevant since "the precise figures of areas and populations to be served were not at all decisive to the choice between applicants" under section 307(b). This argument, however, ignores two basic considerations. First, the Commission in its designation order specifically directed Giant accurately to determine what areas and populations it would serve. Once such an issue has been specified, the duty to meet it cannot be negated by claiming that it is irrelevant. Second, a determination of service populations and areas cannot be considered irrelevant in this case. It is the principal source of data in making the 307(b) comparison of the applications. Moreover, it is difficult to understand how Giant could propose to ascertain and serve the needs and interests of the population within its service area if it had no realistic idea of what that population or area was.

10. The Hearing Examiner denied Giant's application because he concluded that it had failed to sustain its burden of proof under the areas and populations issue. While we do not agree with the Review Board that Giant's present showing is satisfactory,[6] we do not believe that denial of Giant's application would be appropriate under the circumstances of this case. Although it is clear that Giant had ample notice from the Hearing Examiner that its areas and populations showing left much to be desired,[7] it is also true that Giant has never been specifically ordered to take field intensity measurements in lieu of its reliance on Figure M–3. However, it is clear that it would be appropriate in view of the circumstances in this case to order Giant, under § 73.188(l) of the rules[8] to take actual field intensity measurements so as to determine its service contours accurately and completely. Giant will therefore be directed to take such additional measurements as may be required, in conjunction with the existing measurements to the extent that they are applicable, so as to provide a proper basis for resolution of the section 307(b) issue.

11. Our second area of concern involves the Review Board's reversal of the Hearing Examiner's conclusion, reached in his Supplemental Initial Decision, that Mr. Charles Price, an 11.6 percent stockholder of Giant, deliberately misrepresented certain facts to the Commission. The Examiner concluded that Mr. Price had knowingly given misleading testimony at a hearing held on July 23, 1968. This conclusion was based on conflicts between Mr. Price's testimony on July 23, 1968, and his subsequent testimony at a later hearing on August 25, 1969. The testimony of Mr. Price at both hearings concerned certain field intensity measurements that he had taken in connection with Giant's application.[9] The Review Board concluded, however, that Mr. Price had not knowingly given false testimony, and that in any event, even if he had given such testimony, it was not of sufficient significance to warrant adding an issue to inquire into Giant's character qualifications.

12. When Mr. Price testified at the earlier hearing on July 23, 1968, he stated that the terrain on the first 17 points on which he took measurements on KCCL was flat pasture land, and that in taking the measurements he was on or very near the radial at all times. From an examination of the transcript of his testimony, it seems clear that a serious question exists as to whether or not Mr. Price deliberately misrepresented the situation in both of these statements.

13. The following extracts from Mr. Price's testimony reveals the conflicts between his testimony on July 23, 1968, and his subsequent testimony at a later hearing on August 25, 1969. On July 23, 1968, Mr. Price testified as follows:

> Q. Now sir, with respect to KCCL could you tell us the nature of the terrain, the close-in measurements?
>
> A. For the first 17 points, 2 miles was pasture land, flat pasture land, very little undergrowth, except in spots. That is the general nature of the terrain.
>
> Q. Did you have any difficulty in pacing off the distances?
>
> A. No extreme difficulty at all.
>
> (TR. 246)
>
> Q. If I understand your previous testimony with Mr. Joyce correctly, if you were to place your first 16 points on this map, they would fall right on that line or very close to that line, is that correct, because one of your principal concerns was staying on radial?
>
> A. Yes, sir.
>
> (TR. 274).

14. Subsequently, on August 25, 1969, Babcom's engineer testified that the first 2 miles of terrain on the radial on which Mr. Price took measurements is not entirely flat pasture land and that in fact there is a heavily wooded mountain directly on the radial covering points 4 to 9 as measured by Mr. Price. Whereupon, Mr. Price, according to the Hearing Examiner, "[w]hen it was revealed that his version of events was physically impossible, * * * simply changed his testimony." [10] Thus, Mr. Price subsequently testified on August 25, 1969, as follows:

> Q. Lets go to point 5. Where do your field notes say you were at that point?
>
> A. At the base of mountain.
>
> Q. Was that on the radial?
>
> A. No, sir, it was not.
>
> Q. Do you know how far off the radial you were and in what direction?
>
> A. I was approximately, I would say between 5 and 600 feet off the radial to the west and about 5 to 600 feet to the west.
>
> (TR. 460).

15. Thus, Mr. Price testified that in fact points 5 to 8 were all off radial, since he had had to detour around the mountain in order to take his measurements.[11] This testimony directly conflicts with his earlier testimony that all of his measurements were made in a straight line on or near the radial, and that the terrain on which the measurements were made was flat pasture land. We do not believe that Mr. Price's earlier testimony can be attributed to mere forgetfulness or confusion in view of the facts that he was testifying only 3 weeks after he had made the measurements and that he plainly gave unequivocal answers to the questions during his testimony.[12] Further, he later admitted that at his earlier testimony he had been testifying from his field notes taken at the time he made the measurements, and that for points 4 to 6, these notes contained the notation "at base of mountain." TR. 479.

16. There are also other less obvious inconsistencies in Mr. Price's testimony. Mr. Price originally testified that he paced the first 10 points 0.1 mile apart directly on the radial, and that he missed by 30 feet the 1 mile point (point 10), which he stated he knew was located where Highway 22 crossed the radial. Subsequently, it was revealed that it was impossible for points 5 to 8 to be on the radial because of the intervening mountain. Mr. Price then testified that for points 5 to 8 he had been unable to stay on the radial, that he had been forced to skirt west around the mountain, and that points 5 to 8 were not in a straight line with points 1 to 4. He also testified that from point 8, he walked to point 11, where his car was parked along Highway 22.[13] He then paced south to point 9 which was on the radial, and then paced north on the radial to points 10 and 11, the latter of which he stated he missed by 30 feet.

17. Thus, Mr. Price never paced the distance between points 8 and 9, and so, contrary to what his earlier testimony would have led the Hearing Examiner to believe, he had no idea how far apart these two points were. Moreover, and more seriously, Mr. Price's subsequent testimony shows that the 30-foot miss about which he earlier testified was not from the transmitter to point 10, 1 mile away, but rather was merely from points 9 to 11. Thus, Mr. Price would have led the Hearing Examiner to believe that he had very accurately paced on the radial 0.1 mile between each of the first 10 points, and that the total error in his pacing was only 30 feet for these points. The truth, however, was that the 30-foot error was only between points 9 and 11, that Mr. Price had no idea how far points 8 and 9 were apart, and that there is no assurance that the distances between points 5, 6, 7, and 8 were in fact 0.1 mile as Mr. Price had originally stated.

18. We believe that judging from the above evidence there is a substantial question of whether Mr. Price has deliberately attempted to mislead the Commission. The Hearing Examiner, who observed Mr. Price's demeanor and heard his testimony, reached this same conclusion. It is clear that the Examiner's conclusion in this regard, based as it is upon demeanor evidence, is entitled to significant weight. See "Universal Camera Corp. v. NLRB," 340 U.S. 474 (1951).

19. Moreover, we do not agree with the Review Board's statement that, even if it were assumed that Mr. Price had intentionally given false testimony, the significance of such conduct was not sufficient to warrant an inquiry into Giant's character qualifications.[14] Mr. Price himself that he expects to become Giant's general manager and chief engineer, the individual charged with day-to-day responsibility for operation of the proposed station. As such, Mr. Price would be likely to have considerable authority over the manner in which the station observes our requirements. In view of the conflicts in Mr. Price's sworn testimony, his character cannot be regarded as an insignificant consideration. We place great reliance upon the integrity and truthfulness of our licensees, and we must therefore be assured that they will provide the utmost veracity at all times.

20. The Broadcast Bureau and Babcom have both recommended that Giant be disqualified on the basis of Mr. Price's testimony. We believe, however, that, rather than summary denial, a fairer course would be for us to remand the proceeding to the Hearing Examiner with the addition of issues inquiring into whether Mr. Price deliberately gave false testimony in the hearing below and, if so, whether Giant should be disqualified from becoming a Commission licensee. We have adopted this course of action

---

[2] Other pleadings before the Commission are: (a) An opposition to application for review, filed March 24, 1971, by Giant; (b) a statement supporting application for review filed March 25, 1971, by the Broadcast Bureau; and (c) a reply to opposition filed April 5, 1971, by Babcom.

[3] Giant took these measurements toward Fort Smith to show that its 5 mV/m contour would not penetrate Fort Smith, in order to rebut the 307(b) suburban community issue. Had Giant relied solely on Figure M–3 to establish ground conductivity, its 5 mV/m would have been shown as penetrating Fort Smith, and Giant would then have been faced with the task of overcoming the presumption that it intended to serve Fort Smith rather than Ozark. See Policy Statement on section 307(b) Considerations for Standard Broadcast Facilities Involving Suburban Communities, 2 FCC 2d 190 (1965).

[4] Station KZRK (1540 kHz, 500 w, D, Ozark, Ark.), is located approximately 2½ miles northwest of Giant's proposed transmitter site. The measurements were submitted by Babcom in rebuttal to Giant's initial showing.

[5] Hearing Examiner's Supplemental Initial Decision, FCC 69D–55, 17 RR 2d 725, released October 27, 1969, p. 5.

[6] While the Review Board is correct that mixed showings based on actual measurements and Figure M–3 are permissible under our Rules and have been accepted in the past, we agree with the Examiner that the discrepancies in Giant's showing accepted by the Board are simply too substantial to be condoned. Thus, a more accurate showing by Giant on the areas and populations issue might result in a different weighing of the merits of these two proposals under section 307(b). That is, if Giant's proposed service area and population were significantly reduced due to low conductivity in the area, the differences between the reception aspects of these proposals might become relevant. If this occurred, a further comparison of the proposals would be required to determine whether Babcom's reception service preference would outweigh Giant's transmission service preference under the circumstances of this case.

[7] Hearing Transcript 197, 291–92.

[8] Section 73.188(l) states in part:

> Since the valves specified [in Figure M–3] are only for general areas and since conductivity values over particular paths may vary widely from those shown, caution must be exercised in using the maps for selection of a satisfactory transmitter site. Where the submission of field intensity measurements is deemed necessary or advisable, the Commission, in its discretion, may require an applicant for new or changed broadcast facilities to submit such data in support of its application.

[9] Mr. Price took measurements on Station KCCL, Paris, Ark., on a 348° radial toward Ozark. On the basis of these measurements, Giant's engineer concluded that KCCL did not put a primary (2.0 mV/m) signal into Ozark.

[10] Hearing Examiner's Supplemental Initial Decision, FCC 69D–55, released October 27, 1969, page 7.

[11] It should also be noted that Giant's Exhibit 5, a supplement to figure 3h of Giant Exhibit 4, showed these points, without further explanations, as being directly on radial, and in a straight line with all of Mr. Price's other measurements. Mr. Price in subsequent testimony admitted that points 5 to 8 were incorrectly marked on the exhibit and in fact were 200 to 600 feet west of the radial. TR. 478. Mr. Price testified that on the map which he gave to Mr. Lawrence Behr, one of Giant's engineering consultants, for the preparation of Giant's exhibit, Mr. Price had the first 11 points plotted every 0.1 mile on the radial. He did not advise Mr. Behr that some of the measurements were taken off of the radial, and so the points were plotted on the exhibit by Mr. Behr as being on the radial.

[12] In spite of Mr. Price's inexperience in taking measurements, it is difficult to believe that he could testify in good faith: (a) That the terrain on the radial was flat pasture land, when in fact there was a mountain lying directly on the radial, or (b) that his measurements were on or near the radial when in fact points 5 to 8 were up to 600 feet, or more than 0.1 mile, off of the radial.

[13] In Mr. Price's earlier testimony, he had stated that this was point 10. Tr. 275.

[14] Although the Board relied on "Young People's Church of the Air, Inc.," 36 FCC 1127, 2 RR 2d 527 (1964), we noted in "Radio Broadcasters, Inc.," 23 FCC 2d 209 (1970), that the earlier case, even though it involved only a single misrepresentation, could not be read as indicating that such conduct would not warrant disqualification. See also "F.C.C. v. WOKO, Inc.," 329 U.S. 223 (1946).

because there may be extenuating circumstances, although none appear in the present record, which would make disqualification inappropriate in this case.

21. *Accordingly, it is ordered,* That the application for review, filed March 10, 1971, by Babcom, Inc. is granted to the extent indicated, and is denied in all other respects.

22. *It is further ordered,* That the Review Board's actions herein, FCC 70R–268, 24 FCC 2d 690, released August 5, 1970, and FCC 71R–41, 27 FCC 2d 437, released February 8, 1971, are set aside, that the record is reopened, and that this proceeding is remanded to the Hearing Examiner for further hearings consistent with this Memorandum Opinion and Order.

23. *It is further ordered,* That the issues in this proceeding are enlarged by the addition of the following issues:

(a) To determine whether Mr. Charles Price knowingly gave false testimony under oath at a Federal Communications Commission hearing on July 23, 1968;

(b) To determine whether, in light of the above issue, Giant Broadcasting Company, Inc. has the requisite character qualifications to be a Commission licensee.

24. *It is further ordered,* That in accordance with § 73.188(1) of our rules, Giant Broadcasting Co. Inc. is directed to determine the area and population within its proposed primary service area utilizing ground conductivity values established by field intensity measurement data taken in substantial accord with the provisions of §§ 73.153 and 73.186 of our rules.

Adopted: August 18, 1971.

Released: August 25, 1971.

[Dockets Nos. 19303; 19304; FCC 71–864]

COMMUNITY BROADCASTERS, INC., AND EASTON BROADCASTING CO.

Designating Applications for Consolidated Hearing on Stated Issues

Order. In re applications of: Community Broadcasters, Inc., Easton, Md., Docket No. 19303, File No. BPH–7403, requests: 96.7 MHz, No. 244; 3 kw. (H); 3 kw. (V); 300 ft., Richard S. Cobb and Mary Cobb, doing business as Easton Broadcasting Co., Easton, Md., Docket No. 19304, File No. BPH–7493, requests: 96.7 MHz, No. 244; 3 kw. (H); 3 kw. (V); 300 ft., for construction permits.

1. The Commission has under consideration the captioned applications, which are mutually exclusive in that operation by the applicants as proposed would result in mutually destructive interference.

2. Community Broadcasters, Inc., proposes independent programing while Easton Broadcasting Co., proposes to duplicate the programing of station WEMD(AM). Therefore, evidence regarding program duplication will be admissible under the standard comparative issue. The showing permitted under that issue will be limited to evidence concerning the benefits to be derived from the proposed duplication, and a full comparison of the applicants' program proposals will not be permitted, Jones T. Sudbury, 8 FCC 2d 360, 10 RR 2d 114 (1967).

3. Each of the applicants is qualified to construct and operate as proposed. However, because of their mutual exclusivity, the Commission is unable to make a statutory finding that a grant of the subject applications would serve the public interest, convenience, and necessity, and is of the opinion that they must be designated for hearing in a consolidated proceeding on the issues set forth below.

4. *Accordingly, it is ordered,* That, pursuant to section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent order, upon the following issues:

a. To determine which of the proposals would on a comparative basis better serve the public interest.

b. To determine in the light of the evidence adduced pursuant to the foregoing issue, which of the applications for a construction permit should be granted.

5. *It is further ordered,* That, to avail themselves of the opportunity to be heard, the applicants pursuant to § 1.221(c) of the Commission's rules, in person or by attorney shall, within twenty (20) days of the mailing of this order, file with the Commission in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this order.

6. *It is further ordered,* That, the applicants shall, pursuant to section 311(a)(2) of the Communications Act of 1934, as amended and § 1.594 of the Commission's rules, give notice of the hearing, either individually or, if feasible and consistent with the rules, jointly, within the time and in the manner prescribed in such rule, and shall advise the Commission of the publication of such notice as required by § 1.594(g) of the rules.

Adopted: August 18, 1971.

Released: August 24, 1971.

[Dockets Nos. 19301, 19302; FCC 71–856]

EMPIRE COMMUNICATIONS CO. AND LANE PAGING, INC.

Designating Applications for Consolidated Hearing on Stated Issues

Memorandum opinion and order. In re applications of Empire Communications Co., Docket No. 19301, File No. 531–C2–P–70, for a construction permit to establish additional facilities for Station KLF 595 in the Domestic Public Land Mobile Radio Service at Eugene, Oreg., Lane Paging, Inc., Docket No. 19302, File No. 1895–C2–P–70, for a construction permit to establish new facilities in the Domestic Public Land Mobile Radio Service at Eugene, Oreg.

1. The Commission has before it for consideration (a) an application filed August 1, 1969 by Empire Communications Co. (Empire) for a construction permit to establish an additional one-way signaling (paging) service in the Domestic Public Land Mobile Radio Service (DPLMRS) at Eugene, Oreg. on the 158.70 MHz Guardband channel; and an application filed October 10, 1969 by Lane Paging, Inc. (Lane), for a construction permit to establish a new one-way signaling (paging) facility near Eugene, Oreg., in the DPLMRS using the same base station frequency of 158.70 MHz; (b) Empire's Petition to Deny Lane's application, filed April 12, 1971; Lane's Opposition to Empire's Petition to Deny, filed May 7, 1971; and Empire's Reply to the Opposition, filed June 2, 1971.

2. Empire and Lane are each seeking to provide communications service on the same frequency in the same geographical area, and their applications are mutually exclusive by reason of potential harmful electrical interference. Therefore, a comparative hearing is necessary.

3. Empire is the licensee of two radio stations in the DPLMRS near Eugene, Oreg.: Station KOK 331 providing two-way service on base station frequencies of 152.09, 152.18, and 152.21 MHz, with the corresponding mobile units operating on 158.55, 158.64, and 158.67 MHz, with one-way service offered on a secondary basis; and Station KLF 595, a one-way signaling station operating on 152.24 MHz. In its Petition to Deny Empire states that the 158.70 MHz frequency at the location proposed by Lane near Eugene, Oreg. would result in harmful interference to reception by Empire's Station KOK 331. Specifically, Empire maintains that since its and Lane's base stations would be separated by only 30 KHz and operate within 350 feet of one another at Blanton Heights, Oreg., harmful adjacent channel electrical interference would occur to the reception of mobile signals by Empire's station KOK 331.

4. Lane in its Opposition contends that Empire's Petition to Deny should be dismissed, first because it is untimely, having been filed some 16 months after the 30-day period provided in § 21.27(c) of the Commission's rules; and second, even if the Commission were to construe Empire's petition as an informal objection, the affidavit of Lane's consulting engineer demonstrates that lack of merit in Empire's allegations. The affidavit, inter alia, challenges the factual premises assumed in the Petition; and further states that § 21.501(h)(2) of the Commission's rules provide for the assignment of the 152.24 MHz and 158.70 MHz Guardband channels without any qualification whatsoever. Receiver locations, it is contended, can be changed in location or equipment as local conditions require.

5. Empire in its Reply to Lane's Opposition states that since its Petition to Deny was filed on April 12, 1971, and is directed to Lane's application as amended on or about April 2, 1971, it was filed within the prerequisite 30 days and is not violative of § 21.27(c) of the rules and section 309(d) of the Communications Act. It further states that its engineering facts and data are at war with Lane's, which fails to refute the possibility of electrical interference. Moreover, it contends that section 309(a) of the Act requires that all grants of the use of any frequency must serve the public interest, convenience and necessity and such a determination cannot be made where the grant will result in the degradation of the two-way service on 152.21/158.67 MHz. Although the Commission is not convinced that the problem is of the magnitude projected by Empire, we do recognize that there is the possibility of adjacent channel interference being caused to the mobile receiver of Empire with the geographical separation indicated. However the Commission's rules[1] do not provide protection for interference of this nature inasmuch as it is reasonably within the power of a licensee receiving such interference to take steps which will obviate the problem. Thus, Empire can resolve the problem by making minor technical changes in its equipment or by moving its mobile receiver to one of its other sites. Under these circumstances Empire's request for denial of Lane's application or for an interference issue will be denied.

6. Empire's application for a construction permit to establish additional one-way facilities for Station KLF 595 in the DPLMRS operating on a base frequency of 158.70 MHz at Eugene, Ore., requires the showing postulated by § 21.516(b)(4) of the Commission's rules.[2] Although Empire submitted information and data in purported compliance with the aforementioned section it was neither responsive nor adequate. Moreover it appeared to support the conclusion that the present channel capacity is sufficient to meet traffic needs for the reasonably foreseeable future for an additional channel as proposed herein. Empire contends that a tone-only paging facility and the proposed dial-access tone and voice paging are incompatible. The Commission has adhered to the contrary view that they are compatible. Accordingly, we will add an issue whether the traffic load study and other data required under § 21.516(b)(4) of the Commission's rules tend to support Empire's request for an additional channel at this time. (See Mobile Radio Communications, Inc., 29 FCC 2d 62 (1971).)

7. It appears that except for the matters placed in issue herein, both applicants are legally, financially and technically qualified to render the services they have proposed.

8. Accordingly, in view of our conclusions above: *It is ordered,* Pursuant to the provisions of section 309(e) of the Communications Act of 1934 as amended, that the captioned applications are designated for hearing in a consolidated proceeding, at the Commission's offices in Washington, D.C. on a date to be specified upon the following issues:

(a) To determine on a comparative basis, the nature and extent of service proposed by each applicant, including the rates, charges, maintenance personnel, practices, classifications, regulations, and facilities pertaining thereto.

(b) To determine on a comparative basis the areas and populations that each applicant will serve within the respective 43 dbu contours, based upon the standards set forth in § 21.504(a) of the Commission's rules and regulations; and to determine the need for the proposed services in said area.[3]

(c) To determine the nature and extent of services now rendered by Empire Communications Co., the capacity of its existing facilities, and in the light of § 21.516(b) of the Commission's rules, or other pertinent regulations or Commission policy, whether the grant of Empire's application for an additional channel is justified in the public interest.

(d) To determine, in consideration of all the evidence on the foregoing issues, whether the public interest, convenience or necessity will be best served by a grant of the application of the Empire Communications Co. or the application of Lane Paging, Inc., and the terms or conditions, if any, that should be attached thereto.

9. *It is further ordered,* That the burden of proof on the Issues (a) and (b) is placed on the respective applicants herein and on Issue (c) the burden is placed on Empire Communications Co.

10. *It is further ordered,* That the parties desiring to participate herein shall file their notices of appearance in accordance with the provisions of § 1.221 of the Commission's rules.

Adopted: August 18, 1971.

Released: August 26, 1971.

[Docket No. 18950, FCC 71–842]

D. H. OVERMYER COMMUNICATIONS COMPANY, INC. ET AL.

Modifying FCC71–911 (36 F.R. 14348)

Memorandum opinion and order. In the matter of applications for the transfer of control of D. H. Overmyer Communications Co., Inc. and D. H. Overmyer Broadcasting Co., Inc. from D. H. Overmyer to U. S. Communications Corp., San Francisco, Calif., Docket No. 18950, files Nos. BTC–5376, 5377, 5378, 5379 and 5380.

1. The procedural history of this docketed proceeding has been adequately detailed in our memorandum opinion and order (FCC 70–911, 25 FCC 2d 442, released Sept. 4, 1970) designating this case for evidentiary hearing and in a subsequent memorandum opinion and order (FCC 71–213, 27 FCC 2d 982) released March 8, 1971, and, accordingly, is not repeated here. Presently before us for consideration are: (1) A petition for deletion of issues and for shift of burden of proof filed September 28, 1970, by D. H. Overmyer, D. H. Overmyer Communications Co., Inc., and D. H. Overmyer Broadcasting Co., Inc. (petitioners);[1] (2) an opposition thereto filed on October 12, 1970, by the Chief of the Broadcast Bureau (Bureau); and (3) a

---

[16] Commissioner H. Rex Lee absent.

[1] Commissioner H. Rex Lee absent.

[2] Section 21.501.

[3] An application requesting the assignment of an additional channel or channels at an existing Domestic Public Land Mobile Radio Station (other than control dispatch or repeater), in addition to the information required by other sections of the rules, shall include a showing of the following: (b) Data showing the actual traffic loading on each channel assignment of the present radio systems during the busiest 12-hour periods on 3 days (within a 7-day period) having normal message traffic not more than 60 days prior to the date of filing. This information should be reported separately for each of the 3 days selected, which should be identified by dates, and should disclose the following: (4) For systems that provide one-way signaling as a primary service, (i) the number of mobile receivers in operation during the study period, (ii) the number of calls held, (iii) the total holding time; or for systems that do not provide message relay service, (iv) the total number of minutes the channel is utilized for transmission between the base station and the mobile receiver during each hour.

[3] Section 21.504(a) of the Commission's rules and regulations describes a field strength contour of 43 decibels above one microvolt per meter as the limits of the reliable service area for base stations engaged in one-way communications service. Propagation data set forth in § 21.504(b) are the proper basis for establishing the location of service contours (F50, 50) for the facilities involved in this proceeding.

[4] Commissioner H. Rex Lee absent.

[1] This multiple request petition and the responsive pleadings thereto were originally filed with the Review Board. By memorandum opinion and order (FCC 71R–43, 27 FCC 2d 505) released Feb. 8, 1971, the Review Board denied the petitioners' request to delete issues and certified the request to shift the burden of proof to us.

reply to the opposition filed on October 22, 1970, by the petitioners.

2. When we designated this proceeding for evidentiary hearing, we directed D. H. Overmyer (Overmyer) to proceed with the introduction of evidence and also to carry the burden of proof under the hearing issues that were specified. Petitioners now request that the burden of proof under those hearing issues be shifted to the Bureau. In support of their request, petitioners contend that the Commission's approval in 1967 of the above-captioned applications was a final agency action; that any proposed revision of that action by the Commission, at this last date, is in the nature of a revocation, or at the very least, a modification of a final Commission action; that this designated proceeding is therefore essentially a Commission revocation or modification proceeding and, accordingly, must be governed by either sections 312 or 316 of the Communications Act of 1934, as amended; and that consequently the burden of proof under the designated hearing issues of this case must fall upon the Commission, because of the statutory mandates of those sections of the Act. We disagree. Neither section 312 nor section 316 of the Act are applicable to this particular proceeding.[2] Those sections of the Act deal only with Commission proceedings looking toward possible revocation or modification of station licenses and/or construction permits. Our Designation Order in this case does not contemplate any agency action respecting such an authorization, and Overmyer has not been ordered to participate in an evidentiary hearing as either a station licensee or construction permittee.

3. While we disagree with the petitioners' arguments in support of their request, we have nevertheless reconsidered, on our own motion, the evidentiary burdens that have been placed upon the parties to this proceeding. Accordingly, we are persuaded that certain revisions in the assignment of these burdens appear warranted because of the unusual nature of this case. Moreover, to avoid any possible misunderstandings and to assist the parties in their hearing preparations, we think it is appropriate, at this time, to also set forth some of the reasons for our determinations in this respect.

4. Certainly, the data needed to substantiate Overmyer's claimed expenses for developing and acquiring the subject UHF television construction permits are peculiarly within the possession and/or knowledge of Overmyer rather than the Bureau, the other named party to this proceeding. Thus, we think, it is both reasonable and necessary to require Overmyer to proceed with the introduction of evidence under the specified hearing issues of this particular case. Indeed, to direct the Bureau to produce, at the hearing, a precise and full documentation of this data would be both unrealistic and unfair. Accordingly, it is for these reasons that we determined, at the time of designation, that Overmyer should be assigned the burden of proceeding.[3] Moreover, in the interest of clarification, we wish to point out that the placing of this burden upon Overmyer not only requires him to proceed with the introduction of evidence under the specified hearing issues, but further requires him to make a prima facie showing substantially corroborating his alleged out-of-pocket expenses as were previously represented to the Commission.

5. Concerning the remaining burden of proof question presented by this case, we believe that the better policy would be to require the Bureau to carry this burden under the hearing issues that have been specified. We are persuaded that such an order of procedure would be more in accord with basic fairness and due process, because of both the circumstances surrounding our designation order and the seriousness of charges with which Overmyer is required to answer under the hearing issues of this particular proceeding.

6. *Accordingly, it is ordered*, That the petition for deletion of issues and for shift of burden of proof, filed September 28, 1970, by D. H. Overmyer, D. H. Overmyer Communications Co., Inc. and D. H. Overmyer Broadcasting Co., Inc., is granted to the extent indicated herein.

7. *It is further ordered*, That the memorandum opinon and order (FCC 70–911, 25 FCC 2d 442) designating this proceeding for evidentiary hearing is modified to the extent that the Chief of the Broadcast Bureau is directed to carry the burden of proof under the designated hearing issues.

Adopted: August 18, 1971.

Released: August 24, 1971.

FEDERAL COMMUNICATIONS COMMISSION,[4]

[SEAL] BEN F. WAPLE, *Secretary.*

[FR Doc.71-12664 Filed 8-27-71;8:50 am]

[2] The legislative history of these sections of the Act does not support petitioners' additional contention that because this case resembles a revocation or modification proceeding, the Commission must therefore be guided by either sections 312 or 316 of the Act in determining the burden of proof. The Commission's authority for prescribing the procedural rules, in cases such as this, flows instead from its inherent powers to conduct its proceedings in the manner which will best achieve the proper dispatch of business and the ends of justice, pursuant to section 4(j) of the Act.

[3] In "D&E Broadcasting Co.," 5 RR 2d 475 (1968), we indicated that there may be some cases where a departure from the customary evidentiary burdens normally observed in Commission proceedings would be justified. The instant proceeding, we believe, represents such a case.

[4] Commissioners Bartley and Johnson dissenting; Commissioner H. Rex Lee absent.

FEDERAL HOME LOAN BANK BOARD

[H.C. 108]

GENERAL OHIO S & L CORP.

Notice of Receipt of Application for Approval of Acquisition of Control of Mutual Savings and Loan Association

AUGUST 25, 1971.

Notice is hereby given that the Federal Savings and Loan Insurance Corporation has received an application from General Ohio S & L Corp., Findlay, Ohio, a multiple savings and loan holding company, for approval of acquisition of control of The Mutual Savings and Loan Association, Celina, Ohio, an insured institution, under the provisions of section 408(e) of the National Housing Act, as amended (12 U.S.C. 1730a(e)), and § 584.4 of the regulations for Savings and Loan Holding Companies, said acquisition to be effected by the exchange of stock of the applicant for stock of The Mutual Savings and Loan Association. Comments on the proposed acquisition should be submitted to the Director, Office of Examinations and Supervision, Federal Home Loan Bank Board, Washington, D.C. 20552, within 30 days of the date this notice appears in the FEDERAL REGISTER.

MARSEILLES NORTH ATLANTIC FREIGHT CONFERENCE

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1405 I Street NW., Room 1015; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, La., and San Francisco, Calif. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 20 days after publication of this notice in the FEDERAL REGISTER. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Guy L. Retournat, Secretary, Marseilles North Atlantic U.S.A. Freight Conference, 10, Place de la Joliette, Marseille 2, France.

Agreement No. 5660–16, between the member lines of the Marseilles North Atlantic U.S.A. Freight Conference, amends Article 1 of the basic agreement to provide that cargo originating from the Bordeaux area and covered by a Bordeaux bill of lading may be forwarded to Marseilles for shipment at the expense of the carrying member.

Dated: August 25, 1971.

By order of the Federal Maritime Commission.

JOSEPH C. POLKING, *Assistant to the Secretary.*

[Docket No. 71-80]

MARITIME FRUIT CARRIERS CO., LTD., AND REFRIGERATED EXPRESS LINES (A/ASIA) PTY., LTD.

Order of Investigation and Hearing

It appearing that there is a dispute between Maritime Fruit Carriers Co., Ltd. and Refrigerated Express Lines (A/Asia) Pty., Ltd., parties to Agreement No. 9944, on the one hand and Blue Star Line Ltd., Ellerman Lines, Ltd., Port Line Ltd., Farrell Lines Inc., and Columbus Line on the other, in which the latter allege that the individual voting membership of the parties to Agreement No. 9944 in the Australian/U.S. Atlantic and Gulf Conference Agreement No. 9450 of which all of the foregoing persons are members, may be discriminatory or unfair as between carriers, in violation of section 15 of the Shipping Act, 1916:

Now therefore, it is ordered, That pursuant to sections 15 and 22 of the Shipping Act, 1916, that an investigation be hereby instituted to determine whether the individual voting membership of the parties of Agreement No. 9944 in conferences to which they now or may belong in the Australian/United States trades would be discriminatory or unfair between carriers or would operate to the detriment of the commerce of the United States in violation of the subject act; and

It is further ordered, That Maritime Fruit Carriers Co., Ltd., and Refrigerated Express Lines (A/Asia) Pty., Ltd., are hereby made respondents and Blue Star Line Ltd., Ellerman Lines, Ltd., Port Line Ltd., Farrell Lines Inc., and Columbus Line are hereby made petitioners in this proceeding; and

It is further ordered, That this proceeding shall be limited to the submission of affidavits of fact and memoranda of law, replies, and oral argument. Should any party feel that an evidentiary hearing be required, that party must accompany any request for such hearing with a statement setting forth in detail the facts to be proven, their relevance to the issues in this proceeding, and why such proof cannot be submitted through affidavit. Requests for hearing shall be filed on or before September 17, 1971. Affidavits of fact and memoranda of law shall be filed by respondents and served upon all parties no later than the close of business September 17, 1971. Reply affidavits and memoranda shall be filed by the Commission's Bureau of Hearing Counsel, petitioners and intervenors, if any, no later than close of business October 4, 1971. Oral argument will be scheduled at a later date if requested and/or deemed necessary by the Commission.

It is further ordered, That notice of this order be published in the FEDERAL REGISTER and that a copy thereof and notice of hearing be served upon respondents and petitioners, listed in appendix A.

It is further ordered, That persons other than those already party to this proceeding who desire to become parties to this proceeding and to participate therein shall file a petition to intervene pursuant to Rule 5(1) of the Commission's rules of practice and procedure (46 CFR 502.72) no later than close of business September 10, 1971.

It is further ordered, That all documents submitted by any party of record in this proceeding shall be directed to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, in an original and 15 copies as well as being mailed directly to all parties of record.

By the Commission.

FEDERAL POWER COMMISSION

[Docket No. CP72-37]

EL PASO NATURAL GAS CO.

Notice of Application

AUGUST 20, 1971.

Take notice that on August 12, 1971, El Paso Natural Gas Co. (Applicant), Post Office Box 1492, El Paso, TX 79978, filed an application in Docket No. CP72–37 pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale and delivery of natural gas

through existing facilities to the Washington Water Power Co. (Water Power) for resale and distribution in the incorporated municipalities of Harrington, Wash., and Mullan, Idaho, all as set forth in the application on file with the Commission and open to public inspection.

Applicant proposes to make deliveries to Water Power for service to Harrington, Wash., through use of its existing Spokane West Meter Station and for service to Mullan, Idaho, through its existing Kellogg-Wardner Meter Station Water Power proposes to initiate natural gas service to each of the new areas and proposes to install necessary distribution facilities. The estimated combined peak day and annual firm natural gas requirements of Water Power during the third full year of the proposed services to the two areas are 427 Mcf and 47,963 Mcf, respectively.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 13, 1971, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.71-12608 Filed 8-27-71;8:47 am]

LANDS WITHDRAWN IN PROJECT NO. 1815

Order Vacating Withdrawal Under Section 24 of the Federal Power Act

AUGUST 20, 1971.

Application has been filed by the Forest Service, U.S. Department of Agriculture, for vacation of land withdrawal for Project No. 1815 affecting the following described lands of the United States:

PRINCIPAL MERIDIAN, MONTANA

T. 31 N., R. 33 W., sec. 14, lot 5, SE¼SW¼ (approximately 2.27 acres).

The lands lie along the Kootenai River and are withdrawn in Power Site Reserve No. 29 dated July 2, 1910, and pursuant to the filing on December 27, 1940, of an application for license for the Mahoney Springs Minor Project No. 1815. As a result of a request from the licensee, surrender of the license was accepted by Commission order issued February 8, 1971.

The lands lie in reach of the river which was included in a plan of development by the Corps of Engineers (H.D. 403, 87th Cong. 2d Ses.). The Corps proposed development of the Katka Dam site located about 25 miles downstream from the subject lands, which would raise the water surface to 1,875 feet elevation, and the development of the Kootenai Falls Dam site located immediately upstream from the lands, with a tailrace elevation of 1,900 feet. Lot 5 lies at approximately 1,910 feet elevation along the river. The lowest elevation of the lands occupied by the facilities of Project No. 1815 was about 2,080 feet.

A review of the Columbia River Basin is contemplated. Power Site Reserve No. 29 will protect any power value that the lands may have.

The Commission finds: The withdrawal for Project No. 1815 serve no useful purpose and should be vacated.

The Commission orders: The withdrawal of the subject lands pursuant to the application for Project No. 1815 is hereby vacated in its entirety.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

NATIONAL GAS SURVEY

Order Designating an Additional Member of the Executive Advisory Committee

AUGUST 20, 1971.

The Federal Power Commission by order issued April 6, 1971, established an Executive Advisory Committee of the National Gas Survey.

1. *Membership.* An additional member to the Executive Advisory Committee, as selected by the Chairman of the Commission with the approval of the Commission, is as follows:

Honorable William D. Ruckelshaus, Administrator, Environmental Protection Agency.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[FR Doc.71-12606 Filed 8-27-71;8:46 am]

[Docket No. CP72-38]

VGS CORP.

Notice of Application

AUGUST 23, 1971.

Take notice that on August 16, 1971, VGS Corp.[1] (applicant), 31 Swift Street, South Burlington, VT 05401, filed in Docket No. CP72-38 an application pursuant to section 3 of the Natural Gas Act for authorization to import additional volumes of natural gas from Canada to the United States through existing facilities located at the International boundary near Highgate Springs, Vt., all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant's sole source of natural gas is Trans-Canada Pipe Lines Ltd. The volumes of natural gas purchased therefrom are authorized for importation into the United States at a rate up to 14,500 Mcf per day, and 5,292,500 Mcf annually in Dockets Nos. CP66-141 et al. (33 FPC 899), and CP68-132 (40 FPC 1521). Applicant states that the natural gas requirements of its customers exceed the present supply and seeks authorization herein to increase the volume of natural gas imported by 3,200 Mcf per day, and 1,168,000 Mcf annually.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 13, 1971, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP72-18]

CONSOLIDATED GAS SUPPLY CORP.

Notice of Proposed Changes in Rates and Charges

AUGUST 23, 1971.

Take notice that Consolidated Gas Supply Corp. (Consolidated) on August 5, 1971, tendered for filing proposed changes in its FPC Gas Tariff, Original Volume No. 3, to become effective on September 19, 1971. The proposed rate changes would increase charges for jurisdictional sales under Rate Schedules F-14, F-17, F-19, and F-20 by approximately $1,364,250 annually in the aggregate, based on estimated volumes projected for the 12-month period ended September 19, 1972.

Consolidated states that the reason for the proposed increase is to reflect the Base Area Rates as permitted by the Commission's Opinion No. 598 and order in Dockets Nos. AR61-2, et al., and AR69-1 (ordering paragraphs (A) and (C)), issued July 16, 1971.

Copies of the filing were served on each of the purchasers under the respective rate schedules.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 8, 1971, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.71-12655 Filed 8-27-71;8:49 am]

[1] Applicant was originally incorporated under the name Vermont Gas Systems, Inc. By amendment to the Articles of Association, this name has been changed to VGS Corp.

[Docket No. R-394, etc.]

MOBIL OIL CORP.

Order Denying Rehearing of Order

AUGUST 24, 1971.

Termination of Moratorium Provisions in Southern Louisiana, Docket No. R-394, Area Rate Proceeding (Southern Louisiana), Dockets Nos. AR61-2, et al., Docket No. AR69-1.

Mobil Oil Corp. (Mobil) on July 28, 1971 filed an application for rehearing of the Commission's order issued on June 29, 1971 in the above-entitled proceedings. That order further modified Order No. 413, which was previously modified on rehearing by order issued December 24, 1970, so as to extend the rate filing limitations for sales of natural gas in Southern Louisiana (which were due to expire as of July 1, 1971) until September 30, 1971 or until such time as the Commission establishes just and reasonable rates for producer sales in Southern Louisiana, whichever occurs first. Following the issuance of the June 29 order, but prior to the filing of Mobil's application for rehearing, the Commission issued Opinion No. 598 on July 16, 1971 establishing just and reasonable rates in Southern Louisiana.

The arguments advanced here by Mobil are the same as those previously made when it sought rehearing of the December 24, 1970 order herein. These arguments were rejected by the Commission in its order issued February 10, 1971 denying rehearing of the December 24, 1970 order. They are likewise rejected here. In addition, in view of the issuance of Opinion No. 598, the question posed here is moot assuming, of course, that the Commission's action in that case is upheld upon judicial review.

Mobil's application for rehearing sets forth no further facts or principles of law which were not fully considered in the June 29, 1971, order, or which, having now been considered, warrant any modification of that order.

The Commission orders:

Mobil's application for rehearing of the order issued June 29, 1971 in the above-entitled proceedings is denied.

This order is subject to our Statement of Policy Implementing the Economic Stabilization Act of 1970 (P.L. 91-379, 84 Stat. 799, as amended by P.L. 92-15, 85 Stat. 38) and Executive Order No. 11615, including such amendments as the Commission may require.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[Dockets Nos. RP70-42, CP72-33]

NATURAL GAS PIPELINE COMPANY OF AMERICA

Notice of Application

AUGUST 23, 1971.

Take notice that on August 9, 1971, Natural Gas Pipeline Company of America (applicant), 122 South Michigan Avenue, Chicago, IL 60603, filed in Dockets Nos. RP70-42 and CP72-33 respectively (1) a petition for an order approving a supplemental allocation of natural gas to Northern Illinois Gas Co. (Northern Illinois) during the months of August through October 1971 and April through October 1972, and (2) an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing a 20,000 Mcf per day increase in natural gas service under applicant's FPC Rate Schedule S-2, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, applicant and Northern Illinois have entered into an agreement dated July 1, 1971, whereby Northern Illinois agrees to reduce its withdrawal quantity under applicant's FPC Rate Schedule S-1 by 50,000 Mcf per day beginning November 1, 1971, and by 50,000 additional Mcf per day beginning November 1, 1972, in return for additional sales of natural gas to Northern Illinois of 3 million Mcf above its curtailed level for the period of August through October 1971 and 3 million Mcf above its curtailed level for the period of April through October 1972. Applicant states that the effect of this agreement is to allow both applicant and Northern Illinois to continue to fully develop and maximize their storage facilities and that through prudent storage programing, applicant will be able to offer to all of its customers except Northern Illinois additional Rate Schedule S-2 storage service equivalent to one hundred (100) days of service at 20,000 Mcf per day, thereby allowing its customers to attach additional firm space heating loads to which service is presently being denied.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 13, 1971, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP72-17]

SOUTHERN NATURAL GAS CO.

Notice of Proposed Changes in Rates and Charges

AUGUST 23, 1971.

Take notice that Southern Natural Gas Co. (Southern Natural), on August 2, 1971, tendered for filing a proposed change in its FPC Gas Tariff, Original Volume No. 3, to become effective on September 19, 1971. The proposed rate change would increase charges for the jurisdictional sale to Sea Robin Pipeline

Co. under Rate Schedule F-9 by approximately $213,750 annually, based on estimated volumes projected for the 12-month period ended September 19, 1972.

Southern Natural states that the reason for the proposed increase is to reflect the Base Area Rate of 26 cents per Mcf as permitted by the Commission's Opinion No. 598 and order in Docket Nos. AR61-2 et al. and AR69-1 (ordering paragraph (A)(c)), issued July 16, 1971.

A copy of the filing was served on Sea Robin Pipeline Co.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 8, 1971, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.71-12656 Filed 8-27-71;8:49 am]

[Docket No. RP71-6, etc.]

TENNESSEE GAS PIPELINE CO.

Notice of Motion for Approval of Settlement

AUGUST 23, 1971.

Take notice that on August 16, 1971, Tennessee Gas Pipeline Co. (Tennessee), filed a motion for approval of settlement in Docket Nos. RP71-6, RP71-57, and RP 72-1, together with a proposed settlement agreement. The settlement agreement resolves all issues in these proceedings, with the exception of the allocation of total Tenneco Inc. interest for the purpose of determining the Federal income tax expense includable in Tennessee's cost of service and the issue of normalization of liberalized tax depreciation for rate making purposes.

The settlement agreement and accompanying tariff sheets provide for rates which would produce an increase in Tennessee's test period revenues of approximately $71,500,000, exclusive of tracking rate increases in Dockets Nos. RP71-57 and RP72-1. The settlement agreement further provides that Tennessee may adjust its rates to reflect further changes in the company's purchase gas expense, expenditures for advance payments, changes in Federal income tax rates, safety program expenditures and research and development expenditures. Tennessee agrees not to file for a general increase in its jurisdictional rates which would become effective after a maximum suspension period, prior to one year after the Commission's order making the agreement fully effective has become final and nonappealable, or December 31, 1972, whichever is of shorter duration. To the extent that necessary additional gas supplies become available and that capital can be obtained, Tennessee agrees to make expenditures of up to $100 million annually with a total obligation of $500 million to expand the delivery capacity of its pipeline system for additional sales and transportation service. The settlement agreement provides for the refund with interest of the difference between revenues collected at the rates which became effective on March 17, 1971 and the rates provided for in the agreement.

Copies of the motion and the settlement agreement were served on all parties of record in the proceedings in accordance with the requirements of § 1.17 of the Commission's rules of practice and procedure.

Answers or comments to the motion and proposed settlement agreement may be filed with the Federal Power Commission, Washington, D.C. 20426, on or before September 16, 1971.

KENNETH F. PLUMB,
Secretary.

[FR Doc.71-12659 Filed 8-27-71;8:49 am]

Order granting petitions to intervene, prescribing procedures, consolidating proceedings, setting dates for hearing and service of evidence, and denying petition for reconsideration.

The above-named independent producers have pending before the Commission applications to sell additional quantities of natural gas from the La Gloria Field, Jim Wells and Brooks Counties, Texas Railroad District No. 4, to Natural Gas Pipeline Company of America and to terminate an existing sale of 81,000 Mcf per day maximum of natural gas to Transcontinental Gas Pipe Line Corp. The producers seek to abandon the sale to Transcontinental on the basis that the contract for sale of gas expired by its own terms on April 1, 1971; the contract having been entered into on September 12, 1947, and asserted ly contains no provision for renewal of extension. The proposed increased sales to Natural Gas Pipeline would increase the contract quantity to 206,000 Mcf per day. The increased volumes are attributable to the termination of sales to Transcontinental Gas Pipe Line as well as to quantities available due to reduced cycling and quantities previously sold in the intrastate market. Applicants dedicated the additional gas to Natural Gas Pipeline by amendments dated July 13, 1970 (which dedicates the gas available due to reduced cycling and the gas previously sold intrastate) and January 5, 1971, which dedicates to Natural the gas currently being sold to Transcontinental Gas Pipe Line.

All of the above listed producers selling natural gas to Natural Gas Pipeline and Transcontinental Gas Pipe Line do so by virtue of agreements whereby deliveries are made to the pipeline companies of their respective shares of natural gas production from oil and gas producing acreage behind the plant.

By order of February 15, 1958, Argo Oil Corp., et al., Dockets Nos. G-6810, et al., 15 FPC 622, these producers allegedly dedicated all reserves of natural gas in the La Gloria area to Natural Gas Pipe Line Co., subject to the specified volume and limited term contract with Transcontinental Gas Pipe Line. Pending disposition of the applications in this proceeding, sales of natural gas by these producers are continuing to Transcontinental Gas Pipe Line.

Petitions to intervene and notices of intervention have been filed by the following parties in the dockets which are hereinafter consolidated for hearing and decision:

Associated Gas Distributors.
Atlanta Gas Light Co.
Brooklyn Union Gas Co.
Carolina Pipeline Co.
City of Chicago.
Consolidated Edison Company of New York, Inc.
Elizabethtown Gas Co.
Illinois Commerce Commission.
Illinois Gas Co.
Illinois Power Co.
Interstate Power Co.
Iowa Electric Light and Power Co.
Iowa-Illinois Gas and Electric Co.
Iowa Power and Light Co.
Iowa Southern Utilities Co.
Long Island Lighting Co.
Natural Gas Pipeline Company of America.
North Carolina Utilities Commission.
Northern Illinois Gas Co.
Northern Indiana Public Service Co.
North Shore Gas Co.
Peoples Gas Light and Coke Co.
Philadelphia Electric Co.
Phildelphia Gas Works, Division of UGI Corp.
Piedmont Natural Gas Company, Inc.
Public Service Commission of the State of Georgia.
Public Service Company of North Carolina, Inc.
Public Service Commission of State of New York.
Public Service Electric and Gas Co.
South Jersey Gas Co.
Transcontinental Gas Pipe Line Corp.
Washington Gas Light Co.

In view of the complex nature of these proceedings and the widespread interest in participating herein, good cause exists for permitting the filing of the petitions which were filed late.

On July 26, 1971, a motion to consolidate these proceedings, inter alia, was submitted by Natural Gas Pipeline Co., and as hereinafter ordered, said motion will be granted.

Several producers having small interests in the La Gloria Field are presently authorized to sell gas to both Natural Gas Pipeline and Transcontinental Gas Pipe Line and have not filed applications to increase or terminate sales. These producers are:

(1) Continental Oil Co., Docket No. G-6211 (with respect to January 5, 1971, amendment);
(2) H. H. Phillips, Jr., et al., Dockets Nos. CI63-586 (with respect to January 5, 1971, amendment) and CI63-588.
(3) Reserve Oil and Gas Co., et al., Docket No. G-12671;
(4) Irene Sherin et., Docket No. G-3975;
(5) Shell Oil Co., Dockets Nos. G-10633 and G-10634;
(6) C. C. Small & Binford Arney, Trustees, Docket No. G-3976; and
(7) Sun Oil Co., Docket No. G-5135.

The names and docket numbers of these producers have been listed herein (identified with an asterisk) as applicants only in the provisional sense. They may desire to be a party to a Commission decision affecting the majority of the interests from the La Gloria Field. In the event that these producers do not file appropriate applications to abandon their sales to Transcontinental Gas Pipe Line, or increase sales to Natural Gas Pipeline, before the date set for hearing in these consolidated proceedings, their provisional participation shall terminate.

The Secretary of the Commission will direct a copy of this order to each of the above-described provisional applicants in order that each may determine promptly whether or not it desires to have its fractional share of the gas production from the La Gloria Area allocated to the pipeline companies in the same manner as the other producers.

In the formal hearing which is hereinafter provided for, applicants and intervenors are to present evidence, which will develop on the record the total amount of remaining recoverable gas reserves, the estimated deliverability life of the said gas reserves, and the contractual obligations of the producers to sell and deliver gas, including shrinkage volumes at the processing plant, gas to be used in recycling and repressurization, and fuel for drilling and workover of new and existing wells, and any others uses of natural gas which will diminish the availability of supplies of natural gas to the pipeline companies.

Pleadings submitted to the Commission in this proceeding, as well as in other proceedings presently before the Commission, adequately demonstrate the need of each of the interstate pipeline companies herein concerned for additional as well as existing gas supplies. The parties to this proceeding, therefore, need not make an issue of the question of need for gas supplies by either pipeline company or its customers.

As the instant proceeding may involve questions involving past implied or express contractual commitments by the participants herein, the Commission's notice in Docket No. R-388 (rejection of rate schedules or contracts containing provisions inhibiting good faith presentations before Commission), issued June 18, 1970, should be brought to the attention of the participants at the outset of this proceeding.

As hereinbefore stated, a motion to consolidate all of the producer dockets has been filed, to which no opposition has been submitted. As each of the producer dockets involves common questions of law and of fact, the motion to consolidate should be granted, and as set forth above, all producers owning an interest in the gas delivered at the outlet of the plant are permitted an opportunity to participate herein to avoid unnecessary duplication of hearing procedures. Furthermore, as any applications by the provisional applicants will involve the same issues as those for which applications for certificates or abandonment authority have been filed, no further petitions to intervene need be filed in the instant consolidated proceeding as the granting of the intervention in one docket will be construed as permitting intervention in all similarly situated dockets herein during the pendency of the consolidated proceeding. Should any of these dockets be severed, however, the rules of practice and procedure relating to the necessity of formal intervention will apply.

On July 26, 1971, Natural Gas Pipeline Co. filed a petition for reconsideration of the Commission's order issued July 21, 1971, in Getty Oil Co., Docket No. G-3732, Monsanto Oil Co. et al., Docket No. G-9357 and Marathon Oil Co., Docket No. G-11818. The substance of Natural Gas Pipeline's petition is that the gas sold to Natural by these producers pursuant to the agreement dated July 13, 1970, is related to a termination of deliveries by the producers to the Celanese Corporation of America, and is not involved in the continuing sale and delivery of gas to Transcontinental Gas Pipeline. Natural argues that the requirement for potential restoration of gas volumes to Transcontinental Gas Pipe Line is inconsistent with an alleged prior refusal by Transcontinuental and its customers to permit abandonment of deliveries of 81,000 Mcf per day by the producers under an agreement by which Natural would return said volumes to Transcontinental in the event of a final order of the Commission denying abandonment. Similarly petitions for reconsideration were filed on August 2, 1971, by The Peoples Gas Light & Coke Co. and by Marathon Oil Co., and on August 13 by Associated Gas Distributors.

We do not agree with the premise upon which the arguments of petitioners are bottomed. The Commission's order issued July 21, 1971, under no circumstances dealt with the merits of either pipeline's position in regard to the division of gas suplies from the La Gloria area producers, but simply recognized that the Commission had erred in granting permanent authorization to these three producers in the face of outstanding and unresolved petitions for intervention and requests for formal hearing prior to the grant of any such permanent certification. In these circumstances the Commission was required by section 7 of the Act to grant the intervention of the petitioners and recognized their right to a hearing on the merit of their claims. By the instant order, the Commission grants the petitioners their right to support their positions on the record prior to a decision on the merits. As the order of July 21, 1971, makes abundantly clear, it was issued without prejudice to any further action which the Commission may take pursuant to the provisions of the Act and the rules and regulations thereunder. Moreover, the remedial measures designed to permit continued delivery of gas by the three producers pending resolution of this dispute after hearing, grants to Natural the right to continue to receive gas from these producers even though there is not, and could not be, a validly issued certificate of public convenience and necessity for the permanent additional sales proposed by the producers. The distributors dependent on Transcontinental for gas supply have their interests protected by the provisions of the order of July 21, 1971.

The Commission finds:

(1) It is desirable and in the public interest to allow the above-named petitioners to intervene in this proceeding in order that they may establish the facts and law from which the nature and validity of their alleged rights and interest may be determined and show what further action may be appropriate under these circumstances in the administration of the Natural Gas Act.

(2) The above applications involve common questions of fact and law and should, therefore, be heard and decided on the basis of a consolidated record.

(3) The expeditious disposition of this proceeding will be effectuated by providing testimony prior to the convening of formal hearing.

The Commission orders:

(A) Pursuant to authority conferred on the Federal Power Commission by the Natural Gas Act and the Commission's rules of practice and procedure, a public hearing will commence on October 5, 1971, at 10 a.m., (e.d.t.), in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, DC 20426, respecting the matters set forth

above and more fully set forth in the applications in these dockets and designated as Hilda B. Weinert and Jane W. Blumberg, et al., Dockets Nos. G–2730, et al.

(B) Applicants and persons in support of the applications shall serve prepared testimony in support thereof including prepared testimony of witnesses and exhibits on the Office of the Hearing Examiners, the Commission's staff and every party to this proceeding on or before September 7, 1971.

(C) All other interveners herein may serve answering evidence to (B) above, including prepared testimony of witnesses and exhibits, in the same manner as applicants above, not later than September 20, 1971.

(D) A hearing examiner to be hereinafter designated by the Chief Examiner shall preside at the hearing and, in his discretion, shall control the proceedings thereafter.

(E) The petitioners named above are hereby permitted to intervene in this proceeding subject to the Commission's rules and regulations: *Provided, however,* That they shall comply with the terms of this order and that their participation shall be limited to matters affecting rights and interests expressly asserted in the petitions to intervene; and provided further that granting of the petitions to intervene shall not be construed as recognition by the Commission that any intervener might be aggrieved by any order entered in this proceeding.

(F) The applications listed at the head of this order are hereby consolidated for hearing and decision. Those applicants listed as provisional applicants (indicated by an asterisk) owning an interest in the production of gas from the La Gloria Field area are consolidated herein on a provisional basis in order that they may have an opportunity to participate in the proceeding involving the other owners of interests in the field. The Secretary of the Commission shall send a copy of this order to each of these provisional applicants. In the event that any of these provisional applicants does not file an appropriate application to abandon its sale to Transcontinental Gas Pipe Line or to increase sales to Natural Gas Pipe Line on or before the date set for commencement of formal hearing herein, the aforesaid provisional applicants are severed from this proceeding. The above petitioners granted permission to intervene in this proceeding will be considered interveners in each of the dockets herein, including the provisional applicants, until such time said docket(s) are severed from the consolidated proceeding.

(G) The petitions for reconsideration of the Commission's order of July 21, 1971, in Getty Oil Co. et al., Docket No. G–3732, et al., filed by Natural Gas Pipe Line, The Peoples Gas Light & Coke Co., Marathon Oil Co., and Associated Gas Distributors are denied.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

FEDERAL RESERVE SYSTEM

FIRST AT ORLANDO CORP.

Notice of Application for Approval of Acquisition of Shares of Bank

Notice is hereby given that application has been made, pursuant to section 3(a)(3) of the Banking Holding Company Act of 1956 (12 U.S.C. 1842(a)(3)), by First at Orlando Corp., which is a bank holding company located in Orlando, Fla., for prior approval by the Board of Governors of the acquisition by Applicant of at least 90 percent of the voting shares of National Bank Gulf Gate, Sarasota, Fla.

Section 3(c) of the Act provides that the Board shall not approve:

(1) Any acquisition or merger or consolidation under section 3 which would result in a monopoly, or which would be in furtherance of any combination or conspiracy to monopolize or to attempt to monopolize the business of banking in any part of the United States, or

(2) Any other proposed acquisition or merger or consolidation under section 3 whose effect in any section of the country may be substantially to lessen competition, or to tend to create a monopoly, or which in any other manner would be in restraint of trade, unless the Board finds that the anticompetitive effects of the proposed transaction are clearly outweighed in the public interest by the probable effect of the transaction in meeting the convenience and needs of the community to be served.

Section 3(c) further provides that, in every case, the Board shall take into consideration the financial and managerial resources and future prospects of the company or companies and the banks concerned, and the convenience and needs of the community to be served.

Not later than thirty (30) days after the publication of this notice in the FEDERAL REGISTER, comments and views regarding the proposed acquistion may be filed with the Board. Communications should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. The application may be inspected at the office of the Board of Governors or the Federal Reserve Bank of Atlanta.

Board of Governors of the Federal Reserve System, August 20, 1971.

[SEAL] NORMAND BERNARD,
Assistant Secretary.

FIRST AT ORLANDO CORP.

Notice of Application for Approval of Acquisition of Shares of Bank

Notice is hereby given that application has been made, pursuant to section 3(a)(3) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a)(3)), by First at Orlando Corp., which is a bank holding company located in Orlando, Fla., for prior approval by the Board of Governors of the acquisition by Applicant of at least 90 percent of the voting shares of National Bank of Sarasota, Sarasota, Fla.

Section 3(c) of the Act provides that the Board shall not approve:

(1) Any acquisition or merger or consolidation under section 3 which would result in a monopoly, or which would be in furtherance of any combination or conspiracy to monopolize or to attempt to monopolize the business of banking in any part of the United States, or

(2) Any other proposed acquisition or merger or consolidation under section 3 whose effect in any section of the country may be substantially to lessen competition, or to tend to create a monopoly, or which in any other manner would be in restraint of trade, unless the Board finds that the anticompetitive effects of the proposed transaction are clearly outweighed in the public interest by the probable effect of the transaction in meeting the convenience and needs of the community to be served.

Section 3(c) further provides that, in every case, the Board shall take into consideration the financial and managerial resources and future prospects of the company or companies and the banks concerned, and the convenience and needs of the community to be served.

Not later than thirty (30) days after the publication of this notice in the FEDERAL REGISTER, comments and views regarding the proposed acquisition may be filed with the Board. Communications should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. The application may be inspected at the office of the Board of Governors or the Federal Reserve Bank of Atlanta.

Board of Governors of the Federal Reserve System, August 20, 1971.

NORMAND BERNARD,
Assistant Secretary.

[FR Doc.71–12561 Filed 8–27–71;8:45 am]

FIRST FLORIDA BANCORPORATION

Order Approving Acquisition of Bank Stock by Bank Holding Company

In the matter of the application of First Florida Bancorporation, Tampa, Fla., for approval of acquisition of 90 percent or more of the voting shares of Marine National Bank of St. Petersburg, St. Petersburg, Fla., a proposed new bank.

There has come before the Board of Governors, pursuant to section 3(a)(3) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a)(3)) and § 222.3(a) of Federal Reserve Regulation Y (12 CFR 222.3(a)), an application by First Florida Bancorporation (Applicant), Tampa, Fla., a registered bank holding company, for the Board's prior approval of the acquisition of 90 percent or more of the voting shares of Marine National Bank of St. Petersburg (Bank), St. Petersburg, Fla., a proposed new bank.

As required by section 3(b) of the Act, the Board gave written notice of receipt of the application to the Comptroller of the Currency, and requested his views and recommendation. The Comptroller recommended approval of the application.

Notice of receipt of the application was published in the FEDERAL REGISTER on July 9, 1971 (36 F.R. 12929), providing an opportunity for interested persons to submit comments and views with respect to the proposal. A copy of the application was forwarded to the U.S. Department of Justice for its consideration. Time for filing comments and views has expired and all those received have been considered.

The Board has considered the application in the light of the factors set forth in section 3(c) of the Act, including the effect of the proposed acquisition on competition, the financial and managerial resources and future prospects of the Applicant and the banks concerned, and the convenience and needs of the communities to be served, and finds that:

Applicant controls 20 banks with aggregate deposits of approximately $424 million, representing 3 percent of the total commercial bank deposits in the State, and is the seventh largest banking organization in Florida. (All banking data are as of December 31, 1970, and reflect holding company formations and acquisitions approved through July 31, 1971.) Since Bank is a proposed new bank, no existing competition would be eliminated nor would concentration be increased in any relevant area.

Bank will be located in a growing residential area (estimated population: 23,000) that is northeast of downtown St. Petersburg. Bank's location is in an area regarded as the fastest growing in greater St. Petersburg and the only area with a substantial amount of undeveloped land. Bank's proposed site is adjacent to one of the largest shopping centers in the St. Petersburg area. Applicant's closest subsidiary to Bank is also located in the St. Petersburg banking market, about 4.8 miles southeast of Bank and, with approximately $22.4 million of deposits, holds 2.7 percent of deposits in the market. Although the service area of said subsidiary overlaps that of Bank, it appears that the subsidiary does not derive a significant portion of its business from Bank's proposed service area; and the service areas are separated by marshland and a new interstate highway. No other subsidiary of Applicant is within 19 road miles of Bank.

Consummation of the proposal would not give Applicant a dominant position in the market which is defined as approximated by the St. Petersburg Peninsula south of Route 688. The St. Petersburg market is comprised of 19 banks including six holding companies which hold, in the aggregate, 45 percent of deposits in that market, with Applicant controlling the smallest percentage of deposits (2.7 percent). In addition to holding companies, the relevant market is served by two banking groups and eight independent banks. Therefore, it appears that acquisition of Bank should enable Applicant to compete more effectively with the larger banking organizations in the relevant area.

On the basis of the record before it, the Board concludes that consummation of the proposed acquisition would not adversely affect competition in any relevant area. The financial condition, management, and prospects of Applicant and its subsidiary banks are regarded as generally satisfactory. Bank has no operating financial history. It will open with satisfactory capital, and it will be able to draw on Applicant for its management. Its prospects are favorable. The banking factors are consistent with approval. Bank's proposed location is adjacent to a major shopping center, in an area where residents and businesses generally do their banking with downtown St. Petersburg banks. The proposed bank would provide services more conveniently to area customers, and should also stimulate business activity in the community. Bank will receive from Applicant technical and managerial resources, a source for placement of excess funds in the form of loan participations, and aid in raising capital as needed to support expanded operations. Therefore, considerations relating to the convenience and needs of the communities to be served lend some weight toward approval of the application. It is the Board's judgment that consummation of the proposed acquisition would be in the public interest and that the application should be approved.

It is hereby ordered, For the reasons set forth in the findings summarized above, that said application be and hereby is approved, provided that the action so approved shall not be consummated (a) before the 30th calendar day following the date of this order or (b) later than 3 months after the date of this order; and provided further that (c) Marine National Bank of St. Petersburg, St. Petersburg, Fla., shall be opened for business not later than 6 months after the date of this order. Each of the periods described in (b) and (c) above may be extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Board of Governors,[1] August 23, 1971.

[SEAL] ELIZABETH L. CARMICHAEL,
Assistant Secretary.

[FR Doc.71–12562 Filed 8–27–71;8:45 am]

[1] Voting for this action: Chairman Burns and Governors Mitchell, Daane, Maisel, Brimmer, and Sherrill. Absent and not voting: Governor Robertson.

STS CORP.

Notice of Application for Approval of Acquisition of Shares of Bank

Notice is hereby given that application has been made, pursuant to section 3(a)(1) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a)(1)), by STS Corp., Billings, Mont., for prior approval by the Board of Governors of action whereby Applicant would become a bank holding company through the acquisition of 98.68 percent of the voting shares of Security Trust and Savings Bank, Billings, Mont.

Section 3(c) of the Act provides that the Board shall not approve:

(1) Any acquisition or merger or consolidation under section 3 which would result in a monopoly, or which would be in furtherance of any combination or conspiracy to monopolize or to attempt to monopolize the business of banking in any part of the United States, or

(2) Any other proposed acquisition or merger or consolidation under section 3 whose effect in any section of the country may be substantially to lessen competition, or to tend to create a monopoly, or which in any other manner would be in restraint of trade, unless the Board finds that the anticompetitive effects of the proposed transaction are clearly outweighed in the public interest by the probable effect of the transaction in meeting the convenience and needs of the community to be served.

Section 3(c) further provides that, in every case, the Board shall take into consideration the financial and managerial resources and future prospects of the company or companies and the banks concerned, and the convenience and needs of the community to be served.

Not later than thirty (30) days after the publication of this notice in the FEDERAL REGISTER, comments and views regarding the proposed acquisition may be filed with the Board. Communications should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. The application may be inspected at the office of the Board of Governors or the Federal Reserve Bank of Minneapolis.

Board of Governors of the Federal Reserve System, August 23, 1971.

[SEAL] ELIZABETH L. CARMICHAEL,
Assistant Secretary.

INTERAGENCY TEXTILE ADMINISTRATIVE COMMITTEE

CERTAIN COTTON TEXTILE PRODUCTS PRODUCED OR MANUFACTURED IN HAITI

Entry or Withdrawal From Warehouse for Consumption

AUGUST 24, 1971.

On August 16, 1971, the U.S. Government, in furtherance of the objectives of, and under the terms of, the Long-Term Arrangement Regarding International Trade in Cotton Textiles, done at Geneva on February 9, 1962, including Article 6(c) thereof relating to nonparticipants, informed the Government of Haiti that it was renewing for an additional 12-month period beginning August 31, 1971, and extending through August 30, 1972, the restraint on imports into the United States of cotton textile products in Category 39, produced or manufactured in Haiti. Pursuant to Annex B, paragraph 2, of the Long-Term Arrangement, the level of restraint for this 12-month period is 5 percent greater than the level of restraint applicable to this category for the preceding 12-month period.

There is published below a letter of August 24, 1971, from the Chairman of the President's Cabinet Textile Advisory Committee to the Commissioner of Customs, directing that the amount of cotton textile products in Category 39, produced or manufactured in Haiti, which may be entered or withdrawn from warehouse for consumption in the United States for the 12-month period beginning August 31, 1971, be limited to the designated level.

STANLEY NEHMER,
Chairman, Interagency Textile Administrative Committee, and Deputy Assistant Secretary for Resources.

THE SECRETARY OF COMMERCE
WASHINGTON, D.C. 20230

PRESIDENT'S CABINET TEXTILE ADVISORY COMMITTEE

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20226.

AUGUST 24, 1971.

DEAR MR. COMMISSIONER: Under the terms of the Long-Term Arrangement Regarding International Trade in Cotton Textiles done at Geneva on February 9, 1962, including Article 6(c) thereof relating to nonparticipants, and in accordance with the procedures outlined in Executive Order 11052 of September 28, 1962, as amended by Executive Order 11214 of April 7, 1965, you are directed to prohibit, effective August 31, 1971, and for the 12-month period extending through August 30, 1972, entry into the United States for consumption and withdrawal from warehouse for consumption, of cotton textile products in Category 39, produced or manufactured in Haiti, in excess of a level of restraint for the period of 103,037 dozen pair.

In carrying out this directive, entries of cotton textile products in Category 39, produced or manufactured in Haiti, which have been exported to the United States from Haiti prior to August 31, 1971, shall, to the extent of any unfilled balances, be charged against the level of restraint established for such goods during the period August 31, 1970, through August 30, 1971. In the event that the above level of restraint has been exhausted by previous entries, such goods shall be subject to the level set forth in this letter.

A detailed description of Category 39 in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on January 17, 1968 (33 F.R. 582), and amendments thereto on March 15, 1968 (33 F.R. 4800).

In carrying out the above directions, entry into the United States for consumption shall be construed to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of Haiti and with respect to imports of cotton textiles and cotton textile products from Haiti have been determined by the President's Cabinet Textile Advisory Committee to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the notice provisions of 5 U.S.C. 553 (Supp. V, 1965–69). This letter will be published in the FEDERAL REGISTER.

Sincerely,

MAURICE H. STANS,
Secretary of Commerce, Chairman, President's Cabinet Textile Advisory Committee.

SECURITIES AND EXCHANGE COMMISSION

[70-5062]

EASTERN UTILITIES ASSOCIATES

Notice of Proposed Issue and Sale of Shares of Common Stock Pursuant to Underwritten Rights Offering

AUGUST 20, 1971.

Notice is hereby given that Eastern Utilities Associates (EUA), Post Office Box 2333, Boston, MA 02107, a registered holding company, has filed a declaration and an amendment thereto with this Commission pursuant to the Public Utility Holding Company Act of 1935 (Act), designating sections 6(a), 7, and 12(c) of the Act and Rules 42 and 50 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transaction.

EUA proposes to offer 214,227 authorized but unissued shares of its common stock ("additional shares") for subscription by the holders of its outstanding shares of common stock on the basis of (a) one share of the additional common stock for each twelve (12) shares of common stock held on the record date, plus (b) an additional subscription privilege at the same price per additional share subject to allotment on the basis of primary rights exercised under clause (a) above. The record date will be September 23, 1971. The subscription price, to be determined by the Trustees of EUA shortly before the proposed offering, will not be lower than 85 percent of the closing price of the common shares of EUA on the New York Stock Exchange on the last business day on which there are reported sales on said Exchange preceding the day on which the trustees of EUA fix the price at which the additional shares are to be so offered.

The rights and the additional subscription privilege will be evidenced by a single form of subscription warrant (the "warrant"), which, together with an accompanying letter to shareholders, contains instructions and terms and conditions for subscriptions. Twelve rights are required in order to subscribe for one additional share. No fractional shares or scrip therefor will be issued. Warrants may be purchased or sold through a bank or broker and it is expected that the rights will be admitted to trading on the New York Stock Exchange through the close of business on October 8, 1971. The subscription agent will, if practicable, arrange for the purchase or sale of rights for the account of warrant holders, but not in excess of 11 in any one transaction. No charge will be made for this service. The subscription agent may offset orders for the purchase and sale of rights and all such transactions by the subscription agent on each business day will be settled on the basis of the average price of the transactions made on each such day. The execution of buy and sell orders is subject to the subscription agent being able to find a seller or purchaser for the rights.

EUA proposes to issue and sell, subject to the competitive bidding requirements of Rule 50 under the Act, such of the additional shares not sold under its offering to shareholders. Such shares will be sold to underwriters at the price fixed by the trustees of EUA for sale to its shareholders. The best bid will be determined on the basis of the lowest aggregate compensation to be paid to the underwriters.

The net proceeds of the sale of the additional shares will be applied, first, to the prepayment of the installment in the principal amount of $3,400,000 which will be due December 18, 1971 on EUA's 5-year promissory note which is held by a bank and is due serially to December 18, 1975, and, second, to the prepayment in part of the installment in the principal amount of $3,400,000 due December 18, 1972 on the above-mentioned note, and/or to the prepayment in part or in whole of such short-term bank borrowings by EUA as may at the time be outstanding.

The fees and expenses to be incurred by EUA are estimated at $110,000, including counsel fees and expenses of $14,600 and fees of accountants of $7,500. It is stated that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transaction. The fee of counsel for the underwriters, to be paid by the successful bidders, is estimated at $8,500.

Notice is further given that any interested person may, not later than 12 m.

on September 13, 1971, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] THEODORE L. HUMES,
Associate Secretary.

[31-718]

FIRST WISCONSIN NATIONAL BANK OF MILWAUKEE AND THE FIRST NATIONAL BANK OF CHICAGO

Notice of Filing of Application for Order Declaring Applicants Not To Be Electric Utility Companies

AUGUST 23, 1971.

Notice is hereby given that First Wisconsin National Bank of Miuwaukee (Wisconsin), 743 North Water Street, Milwaukee, WI 53202, and The First National Bank of Chicago (Chicago), One First National Plaza, Chicago, IL 60670, have filed an application for an order declaring that neither Wisconsin nor Chicago will become "an electric utility company" within the meaning of section 2(a)(3) of the Public Utility Holding Company Act of 1935 (Act) as a result of the transactions set forth in the application. All interested persons are referred to the application, which is summarized below, for a complete statement of the facts.

Wisconsin is a national bank organized and existing under the laws of the United States. Substantially all of the outstanding capital stock of Wisconsin is owned by First Wisconsin Bankshares Corporation (Bankshares). Neither Wisconsin nor Bankshares nor corporations owned or controlled by Bankshares is presently a "holding company" or a "subsidiary company" of a "holding company," as defined in the Act. Chicago is also a national bank organized and existing under the laws of the United States. All of the outstanding capital stock of Chicago is owned by First Chicago Corp. (the Corporation), a Delaware corporation. Neither Chicago nor the Corporation nor corporations owned or controlled by the Corporation is presently a "holding company" or a "subsidiary company" of a "holding company," as defined in the Act. If either Wisconsin or Chicago were to become or be deemed to be an electric utility company under the Act as a result of the proposed transactions described below, Wisconsin and Chicago and their respective parent corporations would in the absence of an appropriate exemption become subject to regulation under the Act.

Madison Gas and Electric Co. (MG&E) is a gas and electric public utility company organized under the laws of the State of Wisconsin and is subject to the jurisdiction of the Public Service Commission of Wisconsin under the Public Utilities Law of Wisconsin.

MG&E has previously entered into a purchase agreement (the "purchase agreement") with a manufacturer to purchase a gas turbine generating unit and accessory equipment (the unit) for an aggregate purchase price of approximately $1,700,000. On May 27, 1971, MG&E entered into a financing agreement with Wisconsin, Chicago, as trustee (trustee), and Nationwide Life Insurance Co., of Columbus, Ohio (lender), providing for the assignment and purchase of the unit. MG&E assigned its right and interest in the purchase agreement to Chicago who acquired the unit as trustee for the benefit of Wisconsin and lender. The trustee leased the unit to MG&E under a lease (the lease) having a term of approximately 25 years. On June 1, 1971, the unit was placed in commercial operation.

The trustee borrowed approximately 80 percent of the funds required to purchase the unit from the lender, who received Equipment Trust Notes (notes) bearing a fixed rate of interest and providing for full amortization over the last 15 years of the lease. The notes are obligations of the trustee, payable solely out of the proceeds of the lease and secured by a security interest in the unit and the lease. MG&E will not guarantee the the notes. The remaining 20 percent of the purchase price was advanced to the trustee by Wisconsin as an investment in the beneficial ownership of the unit. Wisconsin and MG&E have applied to the Commissioner of Internal Revenue for a tax ruling to the effect that Wisconsin as beneficial owner of the unit will be entitled to depreciate the cost of the unit and to deduct interest paid by the trustee on the notes.

The lease is a net lease under which MG&E is responsible for operating, maintaining, repairing and insuring the unit and for paying substantially all taxes, assessments and other costs arising from the possession and use thereof. The rentals to be paid semi-annually in arrears by MG&E to the trustee during the term of the lease are calculated to provide funds sufficient to pay the interest of the notes for the first 20 payments, and the principal of and interest on the notes during the balance of the payments, and together with the residual value and the other benefits of ownership to return Wisconsin's equity investment over the full term of the lease. After the term has expired, MG&E has the option of purchasing the Unit for its then fair market value. Wisconsin would be entitled to receive any proceeds realized from selling the unit to MG&E or to others.

The Public Service Commission of Wisconsin issued a certificate of authority to MG&E granting it the right to lease the unit.

The applicants state that they are companies primafily engaged in one or more businesses other than the business of an electric utility company, and that they will not receive any revenue from the sale of electric energy generated by the unit, their only financial interest in the transactions being to receive payments from rentals and other proceeds as described above. Chicago acts solely in the ordinary course of its business as a fiduciary, and will be paid by MG&E for its reasonable fees and disbursements.

Notice is further given that any interested person may, not later than September 14, 1971, request in writing that a hearing be held in respect of the request for exemption, stating the nature of his interest and the reasons for such request, and the issues of fact or law which he desires to controvert; or he may request that he be notified should the Commission order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. At any time after said date the Commission may grant the exemption requested, or take such other action as it deems appropriate.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] THEODORE L. HUMES,
Associate Secretary.

[612-3007]

PAN AMERICAN SULPHUR CO.

Notice of Filing of Application

AUGUST 24, 1971.

Notice is hereby given that Pan American Sulphur Co. (applicant), Shirley Highway at Edsall Road, Alexandria, VA 22314, a Delaware corporation, has filed an application pursuant to section 6(c) of the Investment Company Act of 1940 (Act) for an order of the Commission extending the period from sixty (60) to eighty (80) days within which a meeting of the holders of its outstanding voting securities must be

held to elect directors of the applicant pursuant to the requirements of section 16(a) of the Act as a result of the fact that a majority of the directors of the applicant now holding office were not elected by the holders of its outstanding voting securities.

By order dated November 1, 1967 (the order), the Commission granted to the Applicant a temporary exemption from the provisions of section 7 of the Act until such time as the Commission should act on its application for an order of the Commission pursuant to section (3b)(2) of the Act declaring that applicant is primarily engaged in a business or businesses other than that of investing, reinvesting, owning, holding or trading in securities through controlled companies conducting similar types of business, or, for an order pursuant to section 6(c) of the Act exempting applicant from all provisions of the Act. (Investment Company Act Release No. 5146.) The principal effect of this order was that the applicant was to be treated as an "investment company" within the meaning of section 3(a)(3) of the Act and that the applicant was, with certain specified exceptions, to be subject to all provisions of the Act (including section 16(a)) and the rules and regulations thereunder as though the applicant were a registered investment company.

On July 7, 1971, as a result of a reconstitution of the Board of Directors, less than a majority of the directors then holding office were elected by the holders of the outstanding voting securities of the Applicant.

Section 16(a) of the Act provides that in the event that at any time less than a majority of the directors of a company holding office at that time were elected by holders of outstanding voting securities, the Board of Directors or proper officer of such company shall forthwith cause to be held as promptly as possible and in any event within 60 days a meeting of the holders of the outstanding voting securities of the company for the purpose of electing directors unless the Commission shall by order extend such period.

Applicant, in requesting such extension of time within which to hold a meeting of the holders of its outstanding voting securities, has stated that it will need such additional time to prepare, for inclusion in its proxy statement relating to such meeting, an appropriate response to the view of the staff of the Commission that the applicant should register as an investment company under section 8 of the Act, to convene a meeting of the Board of Directors of the applicant to authorize such response, and to provide holders of its outstanding voting securities adequate notice of the meeting in compliance with its bylaws and the requirements of the New York Stock Exchange.

Section 6(c) of the Act provides that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security or transaction from any provision or provisions of the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the procedure fairly intended by the policies and provisions of the Act.

Notice is further given that any interested person may, not later than 5:30 p.m. on September 3, 1971, submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon the applicant at the address stated above. Proof of such service (by affidavit or in case of an attorney at law by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

By the Commission.

[SEAL] THEODORE L. HUMES,
Associate Secretary.

DEPARTMENT OF LABOR

Office of the Secretary

CONOVER-CABLE PIANO CO.

Notice of Certification of Eligibility of Workers To Apply for Adjustment Assistance

On June 25, 1971, a petition requesting certification of eligibility to apply for adjustment assistance was filed with the Director, Office of Foreign Economic Policy, Bureau of International Labor Affairs, by the International Association of Machinists and Aerospace Workers, AFL-CIO, on behalf of workers at the Conover-Cable Piano Co., in Oregon, Ill. The certification request was made under the terms of Presidential Proclamation 3964 (Modification of Trade Agreement Concessions and Adjustment of Duty on Certain Pianos) of February 21, 1970. Among other things, the proclamation provided that pursuant to section 302(a)(3) of the Trade Expansion Act of 1962, workers of the piano industry may request the Secretary of Labor for certification of eligibility to apply for adjustment assistance under chapter 3, title III thereof.

The Trade Expansion Act, section 302(b)(2), provides that the Secretary of Labor shall certify as eligible to apply for adjustment assistance under Chapter 3 any group of workers in an industry with respect to which the President has acted under section 302(a)(3), upon a showing by such group of workers to the satisfaction of the Secretary of Labor that the increased imports which the Tariff Commission has determined to result from concessions granted under trade agreements have caused or threatened to cause unemployment or underemployment of a significant number or proportion of workers of such workers' firm or subdivision thereof. The same degree of causal connection is applicable here as under the tariff adjustment and other adjustment assistance provisions; that is, the increased imports have been the major factor.

Upon receipt of the petition, the Department's Director of Foreign Economic Policy instituted an investigation, following which a recommendation was made to me relating to the matter of certification (Notice of Delegation of Authority and Notice of Investigations 34 F.R. 18342 and 36 F.R. 12715; 29 CFR Part 90). In that recommendation it was reported that increased pianos of the types covered by the Presidential Proclamation 3964 have been the major factor in causing the unemployment or underemployment of a significant number or proportion of workers from the Conover-Cable Piano Co. in Oregon, Ill. He further reported that unemployment or underemployment began April 12, 1971, and has continued to the present.

After due consideration, I make the following certification:

All hourly and salaried employees of the Conover-Cable Piano Co. in Oregon, Ill., who became or will become unemployed or underemployed after April 12, 1971, are eligible to apply for adjustment assistance under chapter 3, title III, of the Trade Expansion Act of 1962.

Signed at Washington, D.C., this 20th day of August 1971.

GEORGE H. HILDEBRANDT,
Deputy Under Secretary, International Affairs.

[Notice 738]

MOTOR CARRIER TRANSFER PROCEEDINGS

AUGUST 24, 1971.

Synopses of orders entered pursuant to section 212(b) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings within 20 days from the date of publication of this notice. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-73046. By order of August 19, 1971, the Motor Carrier Board approved the transfer to Gary E. Odendahl, Manning, Iowa, of Certificate No. MC-78950, issued October 19, 1949, to Elmer Fischer, Manning, Iowa, authorizing the transportation of: General commodities, with the usual exceptions, but including livestock, between Manning, Iowa, and Omaha, Nebr.

No. MC-FC-73049. By order of August 20, 1971, the Motor Carrier Board approved the transfer to Metro Trucking, Inc., Richmond, Va., of the operating rights in Certificate No. MC-133653, issued November 14, 1969 to Blanton Enterprises, Inc., Richmond, Va., authorizing the transportation of general commodities, with exceptions, between Richmond, Va., on the one hand, and, on the other, points in a described area of Virginia. Thomas F. Kilroy, 2111 Jefferson Davis Highway, Arlington, VA 22202, Attorney for applicants.

No. MC-FC-73056. By order of August 20, 1971, the Motor Carrier Board approved the transfer to Canning Truck Service, Inc., Fairbury, Nebr., of the operating rights in Certificate of Registration No. MC-120120 (Sub-No. 1) and Certificate No. MC-120120 (Sub-No. 2), issued November 22, 1963 and July 30, 1968, respectively, to Gerald E. Canning, Fairbury, Nebr., the former evidencing a right to engage in transportation in interstate or foreign commerce solely within the State of Nebraska and the latter authorizing the transportation of general commodities, with the usual exceptions, between specified points in Nebraska. James E. Ryan, 214 Sharp Building, Lincoln, Nebr. 68508. Attorney for applicants.

No. MC-FC-73065. By order of August 20, 1971, the Motor Carrier Board approved the transfer to Priestley and Sons Moving & Storage Co., an Oregon corporation, Portland, Oreg., of the operating rights in Certificate No. MC-109065 issued September 22, 1964, to C. H. Priestley, doing business as Priestley and Sons Moving & Storage, Portland, Oreg., authorizing the transportation of household goods between points in Multnomah County, Oreg., on the one hand, and, on the other, points in Washington. Earle V. White, White & Southwell, 2400 Southwest Fourth Avenue, Portland, OR 97201. Attorney for applicants.

[SEAL] ROBERT L. OSWALD,
Secretary.

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATION

AUGUST 24, 1971.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No.-MC-67 (49 CFR Part 1131), published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, within 15 calendar days after the date of notice of the filing of the application is published in the FEDERAL REGISTER. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six (6) copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 3460 (Sub-No. 8 TA), filed August 17, 1971. Applicant: MORAN TRUCKING CO., INCORPORATED, Post Office Drawer E, Westernport, MD

21562. Applicant's representative: William P. Jackson, Jr., 919–18th Street NW., Washington, DC 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Water*, in containers, from Deer Park., Md., to points in Delaware, Indiana, Kentucky, Maryland, New Jersey, New York, Ohio, Pennsylvania, Virginia, West Virginia, and the District of Columbia; and (2) *glass and plastic containers and other related packaging materials*, from points in the states named above and the District of Columbia to Deer Park, Md., for 180 days. Supporting shipper: Boiling Spring Holding Corp., 100 Bloomingdale Road, White Plains, NY 10605. Send protests to: Joseph A. Niggemyer, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 416 Old Post Office Building, Wheeling, W. Va. 26003.

No. MC 19778 (Sub-No. 75 TA), filed August 16, 1971. Applicant: MILWAUKEE MOTOR TRANSPORTATION COMPANY, 516 West Jackson Boulevard, Room 508, Chicago, IL 60606. Applicant's representative: L. H. Tietz (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities*, except those of unusual value, classes A and B explosives, household goods, as defined by the Commission, commodities in bulk, commodities requiring special equipment and those injurious or contaminating to other lading, between Davenport, Iowa and Muscatine, Iowa, serving no intermediate points, from Davenport, Iowa over U.S. Highway 61 to Muscatine, Iowa, and return over the same route. Restriction: The service authorized herein is restricted to traffic having a prior or subsequent movement by rail, for 180 days. NOTE: Applicant indicates it intends to tack the authority here applied for to MC–19778—Davenport, Iowa. Supporting shipper: Chicago, Milwaukee, St. Paul, and Pacific Railroad Co., Union Station, 516 West Jackson Boulevard, Chicago, IL 60606. Send protests to: William J. Gray, Jr., District Supervisor, Interstate Commerce Commission, Bureau of Operations, Everett McKinley Dirksen Building, 219 South Dearborn Street, Room 1086, Chicago, IL 60604.

No. MC 59680 (Sub-No. 191 TA), filed August 16, 1971. Applicant: STRICKLAND TRANSPORTATION CO., INC., 3011 Gulden Avenue, Post Office Box 5689 (75212), Dallas, TX 75222. Applicant's representative: O. P. Peck, Post Office Box 5689, Dallas, TX 75222. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Playground and recreational equipment and/or apparatus*, from the plantsite and storage facilities of Gym-Dandy, Inc., at Bossier City, La., to points in Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, New Jersey, Delaware, Maryland, Virginia, West Virginia, Ohio, Indiana, Illinois, Michigan, Wisconsin, Kentucky, Tennessee, and the District of Columbia, for 180 days. NOTE: Applicant does not intend to tack the authority. Supporting shipper: Gym Dandy, Inc., 415 Hamilton Road, Bossier City, LA 71010. Send protests to: District Supervisor E. K. Willis, Jr., Interstate Commerce Commission, Bureau of Operations, 1100 Commerce Street, Room 13C12, Dallas, TX 75202.

No. MC 99780 (Sub-No. 18 TA), filed August 13, 1971. Applicant: CHIPPER CARTAGE COMPANY, INC., 1327 Northeast Bond Street, Peoria, IL 61603. Applicant's representative: George S. Mullins, 4704 West Irving Park Road, Chicago IL 60641. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat and meat products and meat byproducts and articles distributed by meat packinghouses* as described in sections A and C of Appendix 1 to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides and commodities in bulk), from Davenport, Iowa, to points in Illinois (restricted to the transportation of Oscar Mayer & Co., Inc., Davenport, Iowa, traffic originating at the plantsite and/or storage facilities and destined to points in Illinois), for 180 days. Supporting shipper: Oscar Mayer & Co., Inc., 910 Mayer Avenue, Madison, WI 53701. Send protests to: Raymond E. Mauk, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 219 South Dearborn Street, Room 1086, Chicago, IL 60604.

No. MC 114533 (Sub-No. 232 TA), filed August 17, 1971. Applicant: BANKERS DISPATCH CORPORATION, 4970 South Archer Avenue, Chicago, IL 60632. Applicant's representative: Stanley Komosa (same address as above). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Audit media and other business records*, (a) between Lansing, Mich., on the one hand, and, on the other, Lima, Ohio and Marion, Ind., (b) between points in Grundy County, Ill., on the one hand, and, on the other, points in Indiana, Michigan and Wisconsin, for 180 days. Supporting shippers: Mr. Alex Kirkpatrick, Auto-Owners Insurance Co., Lansing, Mich. 48903; Mr. Dale Norgan, Humiston, Keeling & Co., 3900 South Michigan Avenue, Chicago, IL 60653. Send protests to: Robert G. Anderson, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Everett McKinley Dirksen Building, 219 South Dearborn Street Room 1086, Chicago, IL 60604.

No. MC 114533 (Sub-No. 233 TA), filed August 17, 1971. Applicant: BANKERS DISPATCH CORPORATION, 4970 South Archer Avenue, Chicago, IL 60632. Applicant's representative: Stanley Komosa (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fresh cut flowers, decorative greens, and supplies* as are used in the conduct and operations of floral shops, between North Kansas City, Mo., on the one hand, and, on the other, points in Kansas and Nebraska, for 180 days. Supporting shipper: Kansas City Wholesale Florist, 21 West 13th Avenue North Kansas City, MO 64116. Send protests to: Robert G. Anderson, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Everett McKinley Dirksen Building, 219 South Dearborn Street, Room 1086, Chicago, IL 60604.

No. MC 114533 (Sub-No. 234 TA), filed August 17, 1971. Applicant: BANKERS DISPATCH CORPORATION, 4970 South Archer Avenue, Chicago, IL 60632. Applicant's representative: Stanley Komosa (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Human blood and blood products*, between Wichita, Kans., on the one hand, and, on the other, points in Grant, Kay, Garfield, Woods, Ellis, Muskegee, Washington, Oklahoma, Tulsa, and Pawnee, Okla., for 180 days. Supporting shipper: Wichita Regional Red Cross Blood Center, 321 North Topeka, Wichita, KS 67202. Send protests to: Robert G. Anderson, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Everett McKinley Dirksen Building, 219 South Dearborn Street, Room 1086, Chicago, IL 60604.

No. MC 114533 (Sub-No. 235 TA), filed August 17, 1971. Applicant: BANKERS DISPATCH CORPORATION, 4970 South Archer Avenue, Chicago, IL 60632. Applicant's representative: Stanley Komosa (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Audit media and other business records*, (a) between points in Nevada and Missouri, on the one hand, and, on the other, points in Kansas (b) between Wichita, Kans., on the one hand, and, on the other, points in Oklahoma, for 180 days. Supporting shippers: Mr. Paul Hirschman, Farm & Home Savings Association, Nevada, Mo. 64772; Mr. Charles N. Thorpe, Federal Intermediate Credit Bank of Wichita, Box 2035, Wichita, KS 67201. Send protests to: Robert G. Anderson, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Everett McKinley Dirksen Building, 219 South Dearborn Street, Room 1086, Chicago, IL 60604.

No. MC 116077 (Sub-No. 315 TA), filed August 16, 1971. Applicant: ROBERTSON TANK LINES, INC., Post Office 1505, 77001, 5700 Polk Avenue, Houston, TX 77023. Applicant's representative: J. C. Browder (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Hydrochloric acid*, in bulk, from the plant of Kaiser Aluminum & Chemical Corp., near Gramercy, La., the plant of Dow Chemical Co., Plaquemine, La., and the plant of Rubicon Chemical at Geismar, La.; to the New Orleans, La., docks for export to Kaiser Facility in Jamaica, for 180 days. NOTE: Applicant does not intend to tack with existing authority. Supporting shipper: Kaiser Chemicals, Division of Kaiser Aluminum & Chemical Corp., Kaiser Center, 300 Lakeside Drive, Post Office Box 2099, Oakland, CA 94604. Send protests to: District Supervisor John C. Redus, Interstate Commerce Commission, Bureau of Operations, Post Office Box 61212, Houston, TX 77061.

No. MC 123383 (Sub-No. 59 TA), filed August 16, 1971. Applicant: BOYLE BROTHERS, INC., 941 South Second Street, Camden, NJ 08103. Applicant's representative: Thomas E. Kiley (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plywood, hardboard, and particleboard*, from Camden, N.J., and Philadelphia, Pa., to points in Connecticut, Delaware, Washington, D.C., Illinois, Indiana, Kentucky, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia, and Wisconsin, for 180 days. [Notice 739]

MOTOR CARRIER TRANSFER PROCEEDINGS

AUGUST 25, 1971.

Synopses of orders entered pursuant to section 212(b) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings within 20 days from the date of publication of this notice. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-72942. By order of August 20, 1971, the Motor Carrier Board approved the transfer to Orin J. James, Jr.,

Osborn, Mo., of the operating rights in Certificates Nos. MC-105095 and MC-105095 (Sub-No. 2), issued May 1, 1945, and January 29, 1952, respectively, to Homer Snider, Hamilton, Mo., authorizing the transportation of livestock, from Hamilton, Mo., and points within 10 miles of Hamilton to Kansas City, Mo., and Kansas City, Kans.; livestock, and other related commodities, from Kansas City, Mo., and Kansas City, Kans., to Hamilton, Mo., and points within 10 miles of Hamilton; general commodities, with exceptions, between Kansas City, Kans., and Polo, Mo., serving specified intermediate and off-route points; household goods, as defined in Practices of Motor Common Carriers of Household Goods, 17 M.C.C. 467, and livestock, between points in the Kansas City, Mo.-Kans., commercial zone on the one hand, and, on the other, Kingston, Polo, Mirabile, and Knoxville, Mo., and points within 10 miles thereof.

No. MC-FC-73061. By order of August 20, 1971, the Motor Carrier Board approved the transfer to John R. Loomis, Inc., Pawlett, Vt., of the operating rights in Certificates Nos. MC-92822, MC-92822 (Sub-No. 12), MC-92822 (Sub-No. 13), and MC-92822 (Sub-No. 17), issued October 16, 1968, August 22, 1967, July 12, 1957, and July 6, 1965, respectively, to John R. Loomis, Granville, N.Y., authorizing the transportation of various commodities of a general commodity nature from, to, and between points in Connecticut, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, and Vermont. Martin Werner, Two West 45th Street, New York, NY 10036, attorney for applicants.

No. MC-FC-73063. By order of August 20, 1971, the Motor Carrier Board approved the transfer to Mid Nebraska Trucking, Inc., Cornlea, Nebr., of the operating rights in Permit No. MC-133233 (Sub-No. 13), issued May 19, 1971, to Clarence L. Werner, doing business as Werner Enterprises, Council Bluffs, Iowa, authorizing the transportation of specified commodities from and to Lindsay, Nebr., to points in the United States except points in Alaska, Hawaii, Maine, Massachusetts, Nebraska, Nevada, New Hampshire, Rhode Island, Vermont, West Virginia, and the District of Columbia. Charles J. Kimball, 605 South 14th Street, Post Office Box 82028, Lincoln, NE 68501, attorney for applicants.

No. MC-FC-73064. By order of August 20, 1971, the Motor Carrier Board approved the transfer to Bond Transfer Co., Inc., Baltimore, Md., of the operating rights in Permit No. MC-86690 issued June 2, 1954, to William Elmer Constantine, Jr., doing business as Bond Transfer Co., Baltimore, Md., authorizing the transportation of such commodities as are dealt in by wholesale, retail, and chain grocery and food business houses, and in connection therewith, equipment, materials, and supplies used in the conduct of such business between points in Pennsylvania, West Virginia, Maryland, Delaware, Virginia, and the District of Columbia, as specified, and paperboard, scrap paper, alum, rosin size, and press rolls, between Baltimore, Md., on the one hand, and, on the other, named points in Pennsylvania. S. Harrison Kahn, Suite 733, Investment Building, Washington, D.C. 20005, attorney for applicants.

No. MC-FC-73066. By order of August 20, 1971, the Motor Carrier Board approved the transfer to Acadia Express Co., Inc., Main Street, Southwest Harbor, ME 04679, of Certificate of Registration No. MC-28806 (Sub-No. 3), issued to Maynard D. Blanchard and Thomas H. Newman, Jr., a partnership, doing business as Acadia Express Co., Main Street, Southwest Harbor, ME 04679, evidencing a right of the holder thereof to engage in interstate or foreign commerce solely within the State of Maine.

No. MC-FC-73085. By order of August 20, 1971, the Motor Carrier Board approved the transfer to Mary D. Bryant and James Walter Bryant, a partnership, doing business as Harry C. Jones Transfer, Centralia, Ill., of the operating rights in Certificate of Registration in No. MC-60475 (Sub-No. 2), issued March 26, 1965, to Harry C. Jones, doing business as Harry C. Jones Transfer, Centralia, Ill., evidencing a right to engage in transportation in interstate or foreign commerce soley within the State of Illinois pursuant to Certificate of Public Convenience and Necessity No. 941MC dated July 20, 1954, issued by the Illinois Commerce Commission. Robert T. Lawley, Routman & Lawley, 300 Reisch Building, Springfield, Ill. 62701, attorney for applicants.

VETERANS ADMINISTRATION

STATEMENT OF ORGANIZATION

Addresses of Installations and Central Office and Jurisdictional Areas of Insurance Centers

In the Veterans Administration statement of organization (32 F.R. 9776 and 34 F.R. 8733) section 4 is revised to read as follows:

SEC. 4. *Addresses of Veterans Administration installations and Central Office and jurisdictional areas of insurance centers.* This is a guide to the location of Veterans Administration Central Office and field stations in each State (also District of Columbia, Republic of the Philippines, and Commonwealth of Puerto Rico) where information may be obtained concerning benefits to veterans and their dependents and beneficiaries. Information concerning benefits as well as such matters as office hours, location of public reference facilities, fees charged for certain services such as records searching or copying, forms for use by the public and where they may be obtained, and officials to contact for various services, information or decisions, may be obtained by writing or otherwise contacting the office concerned. On any matter in which there may be a question as to the proper point of contact for services, information, or decisions, request may be directed to the Director or Contact Officer in the nearest VA regional office.

Guide to Record Retention Requirements

[Revised as of January 1, 1971]

This useful reference tool is designed to keep businessmen and the general public informed concerning the many published requirements in Federal laws and regulations relating to record retention.

The 90-page "Guide" contains over 1,000 digests which tell the user (1) what type records must be kept, (2) who must keep them, and (3) how long they must be kept. Each digest carries a reference to the full text of the basic law or regulation providing for such retention.

The booklet's index, numbering over 2,200 items, lists for ready reference the categories of persons, companies, and products affected by Federal record retention requirements.

Price: $1.00

FEDERAL REGISTER

Area Code 202 Phone 962-8626

Published daily, Tuesday through Saturday (no publication on Sundays, Mondays, or on the day after an official Federal holiday), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U.S.C., Ch. 15), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $2.50 per month or $25 per year, payable in advance. The charge for individual copies is 20 cents for each issue, or 20 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended (44 U.S.C. 1510). The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER or the CODE OF FEDERAL REGULATIONS.

EQUAL EMPLOYMENT OPPORTUNITY—

Title 7—AGRICULTURE

Chapter VIII—Agricultural Stabilization and Conservation Service (Sugar), Department of Agriculture

SUBCHAPTER E—DETERMINATION OF SUGAR COMMERCIALLY RECOVERABLE

PART 833—MAINLAND CANE SUGAR AREA

Sugar Commercially Recoverable From Sugarcane; 1971 Crop

Pursuant to the provisions of section 302(a) of the Sugar Act of 1948, as amended, § 833.18 is added to read as follows:

§ 833.18 Rates of recoverability, 1971 crop.

For the 1971 crop of sugarcane, the amount of sugar, in hundredweight, raw value, commercially recoverable from sugarcane grown on a farm in the Mainland Cane Sugar Area and marketed (or processed by the producer) for the extraction of sugar or liquid sugar, shall be obtained by multiplying the net weight of the sugarcane in tons by the rate of recoverability specified for the average percentage of sucrose in the normal juice of such sugarcane, as follows:

(a) *For farms in Louisiana.*

Percentage of sucrose in normal juice[1]	*Rate of recoverable sugar (hundredweight) per net ton of sugarcane*
5.0	0.398
6.0	0.596
7.0	0.794
8.0	0.974
9.0	1.145
10.0	1.322
11.0	1.492
12.0	1.662
13.0	1.836
14.0	2.009
15.0	2.184
16.0	2.349
17.0	2.502
18.0	2.691

(b) *For farms in Florida.*

Percentage of sucrose in normal juice[1]	*Rate of recoverable sugar (hundredweight) per net ton of sugarcane*
5.0	0.489
6.0	0.676
7.0	0.863
8.0	1.050
9.0	1.243
10.0	1.424
11.0	1.599
12.0	1.776
13.0	1.950
14.0	2.126
15.0	2.303
16.0	2.478
17.0	2.650
18.0	2.819

[1] Rates for the intervening tenths of 1 percent shall be calculated by interpolation and less than 5 percent or more than 18 percent shall be computed in proportion to the immediately higher or preceding interval.

STATEMENT OF BASES AND CONSIDERATIONS

Section 833.16 (34 F.R. 16422) provides the method of determining and establishing amounts of sugar commercially recoverable from sugarcane in the Mainland Cane Sugar Area and provides that the rates shall become effective when public notice thereof is given in the FEDERAL REGISTER. Pursuant to the provisions of § 833.16, this section sets forth the rates applicable for the 1971 crop of sugarcane in the Mainland Cane Sugar Area. These rates reflect changes in the 5-year averages of normal juice extraction, boiling house efficiency, net cane as a percent of gross cane, polarization of sugar produced, and normal juice purity at each normal juice sucrose level.

The rates of recoverable sugar for the 5 and 6 percent normal juice sucrose levels in Florida and the 5 percent normal juice sucrose level in Louisiana have been computed by proportionately decreasing the immediately succeeding interval as the number of analyses in these ranges are insufficient to give a reliable purity. These extrapolations are included as they have been used at various times under prior programs.

The rates are slightly higher in the average normal juice sucrose range than those for the preceding crop in both Louisiana and Florida due to small changes in all of these averages.

A notice of proposed rule making was not given for this determination as it is a mathematical formula which makes use of actual operating and production data reported by the sugar factories involved. Therefore, no discretionary decisions are involved and a public recommendation would not change the data. Public notice is, therefore, unnecessary.

Accordingly, I hereby find and conclude that this determination will effectuate the applicable provisions of the Act.

(Secs. 302, 303, 304, 403, 61 Stat. 930, as amended, 931, 932; 7 U.S.C. 1132, 1133, 1134, 1163)

Effective date: Date of publication (8–31–71).

Signed at Washington, D.C., on August 20, 1971.

CHAS. M. COX,
Acting Deputy Administrator, State and County Operations, Agricultural Stabilization and Conservation Service.

[FR Doc.71–12693 Filed 8–30–71;8:46 am]

Chapter X—Consumer and Marketing Service (Marketing Agreements and Orders; Milk), Department of Agriculture

[Milk Order No. 68]

PART 1068—MILK IN THE MINNEAPOLIS-ST. PAUL, MINN., MARKETING AREA

Order Suspending Certain Provisions

This suspension order is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and of the order regulating the handling of milk in the Minneapolis-St. Paul marketing area.

It is hereby found and determined that for the month of August 1971, the following provisions of the order do not tend to effectuate the declared policy of the Act:

1. In § 1068.9(b) the provision "40 percent or more of such plant's total receipts for such month from farms of"; and

2. In the first proviso of § 1068.9(b) the provision "40 percent or more of such plant's receipts of."

STATEMENT OF CONSIDERATION

This action suspends the shipping requirements of a pool supply plant for August 1971. The suspension is needed to permit an association of producers supplying the market to pool for the month of August 1971 milk which has been regularly associated with the market.

Petitioner requested this action at a hearing that was convened in Bloomington, Minn., on August 17, 1971, and the petition was supported by nine other cooperative associations on the market. These cooperatives represent over 90 percent of the producers on the market. No adverse views were expressed at the hearing concerning this suspension action. One of the issues considered at the hearing was a proposal to lower the shipping requirements for pooling supply plants.

It is hereby found and determined that notice of proposed rule making, public procedure thereon, and 30 days' notice of the effective date hereof are impractical, unnecessary, and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area in that some of the supply plants and producers regularly associated with the market and supplying milk to it will not be pooled under the order for August 1971 unless this suspension is made.

(b) This suspension order does not require of persons affected substantial or extensive preparation prior to the effective date, and

(c) Producers requested this suspension at a public hearing held August 17, 1971. Interim action is necessary pending review of the testimony and evidence presented at the hearing concerning a proposal to reduce the supply plant shipping requirements now provided.

Therefore, good cause exists for making this order effective upon publication in the FEDERAL REGISTER.

It is therefore ordered, That the aforesaid provisions of the order are hereby suspended for August 1971.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: Upon publication in the FEDERAL REGISTER (8–31–71).

Signed at Washington, D.C., on August 25, 1971.

RICHARD E. LYNG,
Assistant Secretary.

Chapter XIV—Commodity Credit Corporation, Department of Agriculture

SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

[CCC Grain Price Support Regs., 1971 Crop Rice Supp., Amdt. 1]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1971 Crop Rice Loan and Purchase Program

SUPPORT RATES

The regulations issued by the Commodity Credit Corporation, and published in 36 F.R. 8559, which set forth specific requirements with respect to price support for the 1971 crop of rice are hereby amended to change certain value factors. It is impracticable to follow the notice of proposed rule making procedure with respect to this amendment because 1971 crop rice is being harvested and it is essential that the rates provided in this subpart be put into effect with respect to such rice on the earliest possible date.

Paragraph (a) of § 1421.328 is hereby amended to increase the value factors for all classes of head rice 23 cents per hundredweight and broken rice 12 cents per hundredweight. The amended paragraph (a) reads as follows:

§ 1421.328 **Support rates.**

* * * * * *

(a) * * *

VALUE FACTORS FOR HEAD AND BROKEN RICE

Rough rice class	Head rice	Broken rice
	(Cents per pounds)	
Long grains	$8.62	$4.33
Medium grains	7.82	4.33
Short grains	7.77	4.33

* * * * * *

Effective date: Upon filing with the Office of the Federal Register.

Signed at Washington, D.C., on August 25, 1971.

KENNETH E. FRICK,
Executive Vice President,
Commodity Credit Corporation.

Title 9—ANIMALS AND ANIMAL PRODUCTS

Chapter III—Consumer and Marketing Service (Meat Inspection), Department of Agriculture

SUBCHAPTER A—MEAT INSPECTION REGULATIONS

PART 331—SPECIAL PROVISIONS FOR DESIGNATED STATES AND TERRITORIES; AND FOR DESIGNATION OF ESTABLISHMENTS WHICH ENDANGER PUBLIC HEALTH AND FOR SUCH DESIGNATED ESTABLISHMENTS

Designation of Nebraska Under Federal Meat Inspection Act

Statement of considerations. Subsection 301(c)(3) of the Federal Meat Inspection Act (21 U.S.C. 661(c)(3)) authorizes the Secretary of Agriculture to designate any State, upon 30 days' notice to the Governor and publication of the designation order in the FEDERAL REGISTER, as a State in which the requirements of titles I and IV of said Act shall apply to intrastate operations and transactions, and to persons, firms, and corporations engaged therein, with respect to meat products and other articles and animals subject to the Act, if he determines that the State involved is not effectively enforcing requirements, at least equal to those imposed under titles I and IV, with respect to establishments within the State at which cattle, sheep, swine, goats, or equines are slaughtered, or their carcasses, or parts or products thereof, are prepared for use as human food, solely for distribution within such State.

The Secretary heretofore determined that the State of Nebraska had developed and activated the prescribed requirements. However, the Secretary has now determined that Nebraska currently is not effectively enforcing the prescribed requirements, and he has notified the Governor of the State of such determination and of the intended designation of the State. Therefore, notice is hereby given that the Secretary of Agriculture designates said State under section 301(c) of the Act. Upon the expiration of 30 days afer publication of this notice in the FEDERAL REGISTER, the provisions of titles I and IV of the Act shall apply to intrastate operations and transactions in said State and to persons, firms, and corporations engaged therein, to the same extent and in the same manner as if such operations and transactions were conducted in or for "commerce," within the meaning of the Act. The exemption provisions of Nebraska which conducts an slaughtering or preparation of carcasses or parts or products thereof as described above must have Federal inspection or cease its operations, unless it qualifies for an exemption under section 23(a) or 301(c) of the Act. The exemption provisions of the Act are very limited.

Therefore, the operator of each such establishment who desires to continue such operations after designation of the State becomes effective should immediately communicate with the Acting Regional Director for Meat and Poultry Inspection, listed below, for information concerning the requirements and exemptions under the Act and application for inspection and a survey of the establishment:

Dr. M. J. Hatter, Acting Director, Central Region for Meat and Poultry Inspection Program, Room 905, U.S. Courthouse Building, 811 Grand Avenue, Kansas City, MO 64106, Telephone: AC 816/374–2621.

Accordingly, § 331.2 of the regulations under the Federal Meat Inspection Act (9 CFR 331.2) is amended pursuant to said Act by adding the following State name (in alphabetical order) and effective date of designation to the list set forth in said section:

State:	*Effective Date of Designation*
Nebraska	October 1, 1971

This amendment of the regulations is necessary to reflect the determination of the Secretary of Agriculture under section 301(c) of the Federal Meat Inspection Act. It does not appear that public participation in this rulemaking proceeding would make additional information available to the Secretary. Therefore, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that such public procedure is impracticable and unnecessary, and good cause is found for making this amendment effective less than 30 days after publication in the FEDERAL REGISTER.

This amendment and the notice given hereby shall become effective upon publication in the FEDERAL REGISTER (8–31–71).

Done at Washington, D.C., on August 25, 1971.

RICHARD E. LYNG,
Assistant Secretary.

Title 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

PART 121—FOOD ADDITIVES

Subpart C—Food Additives Permitted in Feed and Drinking Water of Animals or for the Treatment of Food-Producing Animals

SUBCHAPTER C—DRUGS

PART 135g—TOLERANCES FOR RESIDUES OF NEW ANIMAL DRUGS IN FOOD

Erythromycin Thiocyanate

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (10–092V) filed by Amdal Co. proposing the safe and effective use of erythromycin in the feed of laying chickens as an aid in increasing egg production. The application is approved.

On the basis of an evaluation of the data before him, the Commissioner concludes that a tolerance limitation is required to assure that eggs from chickens treated with erythromycin are safe for human consumption.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)), in accordance with § 3.517 (21 CFR 3.517), and under authority delegated to the Commissioner (21 CFR 2.120), Parts 121 and 135g are amended as follows:

1. Section 121.292 is amended by adding a new item 7.1 to the table in paragraph (d), as follows:

§ 121.292 **Erythromycin thiocyanate.**

* * * * * *

(d) * * *

ERYTHROMYCIN IN ANIMAL FEED

Principal ingredient	Grams per ton	Combined with—	Grams per ton	Limitations	Indications for use
* * *	* * *	* * *	* * *	* * *	* * *
6.1 * * *					
7.1 Erythromycin	18.5			For laying chickens	As an aid in increasing egg production.

2. Section 135g.34 is amended by revising paragraph (b) and adding a new paragraph (c), as follows:

§ 135g.34 **Erythromycin.**

* * * * * *

(b) Zero in the uncooked edible tissues of chickens, turkeys, and beef cattle and in milk.

(c) In uncooked eggs—0.025 part per million.

Any person who will be adversely affected by the foregoing order may at any time within 30 days after its date of publication in the FEDERAL REGISTER file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–62, 5600 Fishers Lane, Rockville, Md. 20852, written objections thereto in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

Effective date. This order shall be effective upon publication in the FEDERAL REGISTER (8–31–71).

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i))

Dated: August 9, 1971.

C. D. VAN HOUWELING,
Director,
Bureau of Veterinary Medicine.

[FR Doc.71–12639 Filed 8–30–71; 8:45 am]

PART 135e—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Decoquinate, Zinc Bacitracin

The Commissioner of Food and Drugs has evaluated a new animal drug application (45–348V), filed by Hess & Clark, Division of Richardson-Merrell, Inc., Ashland, Ohio 44805, proposing the safe and effective use of decoquinate in combination with zinc bacitracin in chicken feed for the purposes set forth below. The application is approved.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), Part 135e is amended in § 135e.51 by adding a new subitem a to the table in paragraph (g), as follows:

§ 135e.51 **Decoquinate.**

* * * * * *

(g) * * *

Principal ingredient	Grams per ton	Combined with—	Grams per ton	Limitations	Indications for use
* * *	* * *	* * *	* * *	* * *	* * *
2. * * *					
a. 1	* * *	Bacitracin	10	For broiler chickens; do not feed to laying chickens; feed as sole ration; as zinc bacitracin.	For increased rate of weight gain and improved feed efficiency.

Effective date. This order shall be effective upon publication in the FEDERAL REGISTER (8–31–71).

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i))

Dated: August 9, 1971.

C. D. VAN HOUWELING,
Director,
Bureau of Veterinary Medicine.

[FR Doc.71–12640 Filed 8–30–71; 8:45 am]

Title 29—LABOR

Chapter XX—Occupational Safety and Health Review Commission

PART 2200—RULES OF PROCEDURE

Pursuant to section 12(g) of the Occupational Safety and Health Act of 1970 (84 Stat. 1604; 29 U.S.C. 651, et seq.), hereinafter referred to as the Act, the Occupational Safety and Health Review Commission has by official action adopted the following interim rules of procedure for the orderly transaction of proceedings brought before it under authority of section 10 of the Act and for the just and expeditious determination of the issues raised in such proceedings.

These rules of procedure are designed to effect, to the extent possible, the expressed congressional intent that the resolution of contested issues regarding the Act's application and enforcement be made as expeditiously as possible, consistent with due process, in order that safe and healthful working conditions will neither be delayed nor denied to any employee. Consistent with that design, the time limitations set forth herein should be strictly observed.

No notice of proposed rule making is required inasmuch as these rules of agency procedure or practice are exempted under 5 U.S.C. 553(b)(A). However, the Commission desires to afford the public and the Secretary of Labor an opportunity to participate in the formulation of its rules of procedure. Accordingly, interested persons may submit, in quadruplicate, written comments, suggestions, or objections with respect to these rules of procedure to the Occupational Safety and Health Review Commission, 1825 K Street NW., Washington, DC 20006, within 30 days from the date of publication of this notice in the FEDERAL REGISTER.

These rules shall take effect as interim rules 30 days from the date of publication in the FEDERAL REGISTER and all proceedings before the Commission, initiated after 30 days from the date of this publication and prior to the publication of the Commission's final rules, shall be conducted in accordance with these interim rules.

By the Commission.

Dated: August 25, 1971.

[SEAL] ROBERT D. MORAN,
Chairman.

JAMES F. VAN NAMEE,
Commissioner.

ALAN F. BURCH,
Commissioner.

As adopted, Part 2200 reads as set forth below:

Sec.

2200.1 Definitions.

2200.46 Official Seal Occupational Safety and Health Review Commission.

AUTHORITY: The provisions of this Part 2200 issued under 84 Stat. 1604; 29 U.S.C. 651, et seq.

§ 2200.1 Definitions.

As used in the rules in this part:

(a) The term "Act" means the Occupational Safety and Health Act of 1970, 84 Stat. 1590, 29 U.S.C. 651.

(b) The terms "Commission," "person," "employer," and "employee" (except as otherwise provided herein, e.g., § 2200.18(a)), have the meanings set forth in section 3 of the Act.

(c) The term "citation" means a written communication from the Secretary issued pursuant to section 9(a) of the Act and describing with particularity the nature of the alleged violation of the Act together with the date by which the alleged violation is to be corrected.

(d) The terms "notification of proposed penalty" and "notification of failure to correct a violation," mean written communications from the Secretary issued pursuant to section 10(a) or 10(b) of the Act.

(e) The term "Examiner" means any Hearing Examiner appointed or assigned by the Chairman of the Commission pursuant to section 12 of the Act.

(f) The term "authorized employee representative" or "representative of employees," means a labor organization certified by the National Labor Relations Board as bargaining representative for the affected employees. In the absence of certification it shall be the organization which the affected employees have designated and which has a collective bargaining relationship with the employer. If no labor organization has been certified or has such a collective bargaining relationship the term "authorized employee representative" or "representative of employees," shall mean any person or persons designated by the affected employees to represent them for the purpose of proceedings under this Act.

(g) The term "proceeding" means any proceeding before the Commission or its Examiners initiated under section 10 of the Act.

(h) The term "Secretary" means the Secretary of Labor and shall include any of his duly authorized representatives.

(i) The term "day" means a calendar day.

(j) The term "working day" has the meaning set forth in § 1903.21(c) of this title.

§ 2200.2 Scope of rules; application of Federal Rules of Civil Procedure and Administrative Procedure Act.

(a) Except insofar as proceedings before the Commission and its Examiners are governed by the rules in this part, all procedures at such proceedings shall be in conformity with the provisions of the Federal Rules of Civil Procedure and the Administrative Procedure Act.

(b) Nothing contained herein, or in the Federal Rules of Civil Procedure or the Administrative Procedure Act shall be construed as requiring any party (including a corporation) to be represented by an attorney-at-law.

§ 2200.3 The Commission.

(a) The Occupational Safety and Health Review Commission is an independent establishment of the executive branch of the U.S. Government created by the Act, consisting of three members, appointed by the President by and with the advice and consent of the Senate, one of whom is designated by the President to serve as Chairman.

(b) The Chairman has the administrative authority and responsibilities set forth in section 12(e) of the Act. The Commission will, in case of a vacancy in the office of the Chairman, or in the absence or inability of the Chairman to serve, designate one of its members Acting Chairman to serve during the period of vacancy, absence, or inability.

(c) The Executive Secretary is selected by the Chairman and reports to the Commission.

(1) *Principal duties and responsibilities.* (i) Receives and processes notices of contest from the Secretary. Reviews all formal submissions for sufficiency and compliance with the Commission's rules of procedure, and serves notices and orders upon all parties as required herein. Immediately upon receipt of a notice of contest, he shall formally docket the case and notify all parties of the docket number.

(ii) Schedules hearings, setting the times therefor in accordance with § 2200.7, and designating places therefor as convenient as possible for the employers and employees.

(iii) Prepares agenda and dockets of matters subject to action by the Commission and is responsible for the preparation of minutes with respect to such actions.

(iv) Processes all formal submissions to the Commission.

(v) Serves as the legal custodian of the Commission's seal, property, papers, and legal and public records.

(vi) Processes and certifies all decisions, orders, decrees, and records of the Commission to the appropriate U.S. Court of Appeals when cases are appealed.

(vii) Rules upon requests for enlargement of time for the filing of petitions for discretionary review and answers thereto, as set forth in § 2200.42.

(d) [Reserved]

(e) [Reserved]

(f) The principal office of the Commission is in Washington, D.C. All communications to the Commission should be addressed to: 1825 K Street NW., Washington, DC 20006, except that communications may be filed directly with an Examiner during the period a case is within his jurisdiction unless otherwise provided herein.

(g) The offices of the Commission will be open from 8:30 a.m. to 5 p.m. of each day except Saturdays, Sundays, and Federal legal holidays unless otherwise directed by Executive order or officially declared with appropriate notice.

§ 2200.4 Use of gender and number.

Words importing the singular number may extend and be applied to the plural. Words importing the masculine gender may be applied to the feminine gender.

§ 2200.5 Parties.

(a) In all proceedings brought pursuant to sections 10(a), 10(b), or 10(c) of the Act, the Secretary, the employer to whom the citation, notice of proposed penalty, or notice of failure to abate has been issued, and the affected employees or authorized employee representatives shall be deemed parties. An affected employee (or group of affected employees), who is not represented by an authorized employee representative, as contemplated by section 8(e) of the Act, who has been duly served and notified in accordance with §§ 2200.7(i) and 2200.31, and who fails to identify himself as a party by appropriate notice to the Examiner or the Commission prior to or at the commencement of the hearing shall,

except upon order of the Examiner or the Commission be estopped from asserting his party status. All pleadings served by posting, in accordance with § 2200.7(i)(1), and all notices of hearings shall specifically advise such unrepresented employees of the estoppel provisions of this section. All other affected employees who have an authorized representative, as defined in § 2200.1(f), shall be represented in proceedings before the Commission or its Examiners only by such representative.

(b) In the case of any transfer of interest, the action may be continued by or against the original party, unless the Commission or Examiner directs that the person to whom the interest is transferred be substituted in the action or joined with the original party.

§ 2200.6 Intervention; appearance by non-parties.

(a) A petition for leave to intervene may be filed at any stage of a proceeding. The petition must set forth the interest of the petitioner in the proceeding and show that the petitioner's participation will assist in the determination of the issues in question, and that the intervention will not unnecessarily delay the proceeding. The Commission or the Examiner may grant a petition for intervention and designate the intervenor as a party to such an extent and upon such terms as the Commission or the Examiner shall deem just. In the discretion of the Commission or the Examiner a person may be denied intervention in a matter in which he could have participated as a party but failed to avail himself of the opportunity to do so.

(b) Any person desiring to appear and participate at any hearing or prehearing conference shall, within the time specified in the notice of hearing, file with the Commission or the Examiner a written notice of appearance setting forth his name, address, and interest. If any interested person desires to be heard through a representative, such representative shall file with the Commission or the Examiner a written appearance setting forth his name, address, and employment. The participation of such person in the proceeding shall be determined pursuant to the provisions of paragraph (a) of this section.

§ 2200.7 Pleadings; filing; procedure.

(a) *Pleadings.* There shall be a notice of contest, complaint, answer, and motions or petitions for specific relief. No other pleadings shall be allowed, except as ordered specifically by the Commission or the Examiner.

(b) *Form.* (1) There shall be no specific requirements as to the form of a notice of contest, or a modification of abatement petition, except that it shall clearly identify the citation, notification of proposed penalty, or notification of failure to correct violation which forms the basis for its filing (e.g., by citation number, date of issuance, and employer's name and address, etc.), shall clearly identify the party by whom it is filed (e.g., employer, employee, or representative of employees), shall set forth the names and addresses of the parties personally served and the address of the posting, where such service is required, in accordance with paragraph (i) of this section, and shall indicate the address to which subsequent pleadings should be directed by other parties.

(2) Documents other than notices of contest and modification of abatement petitions shall clearly show the docket number and title of the proceeding.

(3) Pleadings (except the notice of contest and modification of abatement petitions) and other documents shall be printed, typewritten double-spaced, or otherwise processed in permanent form and on good unglazed paper. The paper must not be less than 8 inches nor more than 8½ inches by not less than 10½ inches nor more than 11 inches. The left margin must be 1½ inches and the right margin 1 inch. Documents must be bound or stapled on the left side. If printed, the type shall be not less than 10 point adequately leaded.

(4) In its absolute discretion, and without affirmative action by order or otherwise, the Commission or the Examiner may permit the filing of pleadings or other documents which it deems to comply substantially with paragraphs (b), (c), (d), (e), and (i) of this section. Where the Commission (or the Examiner) finds a filing unacceptable, it shall inform the person submitting the filing, within 3 days of receipt, as to its nonacceptance together with the reason therefor and the period of time allowed to conform.

(c) *Filing.* (1) Notice of contest by an employer, an employee, or a representative of employees under section 10 of the Act shall be filed with the Occupational Safety and Health Administration, U.S. Department of Labor, pursuant to the procedures set out in § 1903.17 of this title. Modification of abatement petitions shall be filed in like manner and will be governed by § 2200.41.

(2) Within 3 days after receipt of the notice of contest, or modification of abatement petition, the Secretary shall file, or cause to be filed, with the Commission the notice of contest or modification of abatement petition and all citations, notifications of proposed penalty, and notifications of failure to correct violations which form the basis for, or in any manner relate to, the notice of contest or modification of abatement petition. Unless otherwise ordered by the Commission, the Executive Secretary shall set a date for the hearing which shall be no sooner than 30 nor later than 40 days after receipt of the notice of contest or modification of abatement petition; except as provided for in paragraph (f) (1) and (2) of this section.

(d) *Complaint.* (1) Within 10 days after receipt of a notice of contest, the Secretary shall file, or cause to be filed, with the Commission a complaint. The complaint shall contain (i) a short and plain statement of the grounds upon which the Commission's jurisdiction depends, (ii) a short and plain statement in support of the citation he issued, the abatement period assigned, and the penalty proposed, (iii) a description of the number and kind of employees affected, and (iv) a demand for the relief to which he deems himself entitled.

(2) The complaint shall also contain the case title, i.e., the Secretary of Labor (see rule 25(d)(2), Federal Rules of Civil Procedure), the name of the affected employer, and the Commission's docket number.

(e) *Answer.* An answer, whether in support of or in opposition to a complaint, shall be filed within 10 days of the receipt or posting of a copy of the complaint, whichever is earlier. The answer shall contain, in short and plain terms, the party's reply to each of the assertions to which he elects to respond and a statement of the facts which constitute the basis for his reply. Where an employee or representative of employees, as a party, does not elect to file an answer, he shall be deemed to have neither admitted nor denied any assertions in the complaint. Where such a party elects to reply, but remains silent on specific assertion(s) within the complaint, he shall be deemed to have neither admitted nor denied such specific assertion(s). The Commission's jurisdiction shall be deemed admitted unless specifically denied by one of the responding parties.

(f) *Expedited procedures.* (1) In any proceeding before the Commission, at any time before the commencement of the hearing, any party may petition the Commission to hold a hearing under the expedited procedures set forth herein. Such petition shall be in writing or by telegraph and shall contain a short and plain statement of the reasons why the proceeding should be held in an expedited manner, and service thereof shall be in accordance with paragraph (i) of this section. The petition shall be granted upon the approval of any member of the Commission. Upon the granting of such petition the Commission shall immediately notify all parties by telegraph of the approval of such petition. The Secretary shall file his complaint within 3 days after receipt of the notice of such approval and the other parties shall file their answers (in accordance with the provisions of paragraph (e) of this section) within 3 days after receipt of a copy of the complaint. The Commission shall schedule a hearing in the matter upon 24 hours' notice to the parties after 8 days from the date on which the petition is granted.

(2) In extraordinary circumstances, the Commission may schedule a hearing in the matter at any time after the petition is granted upon 24 hours' notice to the parties, and order that the Secretary's complaint and the other parties' answers (in accordance with the provisions of paragraph (e) of this section), be made orally at such hearing.

(3) In a proceeding conducted in accordance with subparagraph (1) or (2) of this paragraph, the Examiner will issue his decision without delay upon the conclusion of the hearing and without awaiting receipt of a transcript of the

testimony if a delay would result. The Commission may exercise its discretionary right of review, in accordance with section 12(j) of the Act, as expeditiously as it deems necessary under the circumstances.

(g) *Signature.* (1) Two copies of each document shall be signed by the party or his representative.

(2) Signing a document constitutes a representation by the signer, subject to the provisions of section 17(g) of the Act, that he has read it, that to the best of his knowledge, information, and belief the statements made in it are true, and that it is not interposed for delay. If a document is not signed or is signed with intent to defeat the purpose of this section, it may be stricken as sham and false and the proceeding may go forward as though the document had not been filed.

(h) *Record address.* Every person who files a document in connection with a proceeding shall at the time of his initial filing in the matter state his address. Thereafter he must promptly inform the office in which the filing was made of any change in address, giving the docket numbers of all matters in which he had made such a filing. The successors of such person shall likewise promptly inform such office of their interest in the matters and state their addresses. If a person fails to furnish a record address as required in this section, he will not be entitled to notice in connection with the proceedings on the matter.

(i) *Service.* (1) Copies of all pleadings and other documents filed with the Commission shall be served by the person filing them on all parties to the proceeding as defined in § 2200.5 as well as on all persons granted leave to appear in the proceeding pursuant to § 2200.6. Where there is no authorized employee representative as contemplated by section 8 (e) of the Act, and the affected employees have not been personally served, service in such instance shall be deemed effected when the employer posts copies of all pleadings pertinent to the case in a manner consistent with the notice requirements of § 1903.16 of this title. Each party shall supply sufficient copies of his pleadings to the employer so they may be posted similarly.

(2) Unless otherwise specified herein, wherever these rules require that a copy of a document be served upon a person, service shall be made by delivering the copy personally to him or by sending the document by registered or certified mail, return receipt requested, to his address of record as listed in the file at the Commission.

(3) In any case, service may be proved by an acknowledgement of service signed by the person to be served. Personal service may be proved by a written statement of the person who made such service. Service by registered or certified mail or telegraph may be proved by an appropriate receipt showing that the document was delivered at the person's record address or showing that the document could not be delivered to such person at his record address because he had moved therefrom without leaving a forwarding address or because delivery was refused at that address or because no such address exists. Proof of service of a copy of a document should be filed with the Commission. Unless disputed, a written statement by the person filing the document stating that he has served the same, or caused the same to be served, and the manner of service, will be sufficient as proof of service.

(4) A document will be considered to have been served at the time of personal service, or delivery of a registered or certified letter, or telegram, or upon posting by an employer in accordance with the rules in this part.

(5) Where notice of hearing is made pursuant to paragraph (f)(1) or (2) of this section, such notice will be transmitted by telegraph.

(6) In all cases where a party is represented, such representative will be recognized as fully controlling the same on behalf of his client, and service of any document relating to the proceeding upon such attorney or other representative will be deemed to be service on the party he represents. Where a party is represented by more than one attorney or other representative, service upon one shall be sufficient.

(7) Filings with the Commission may be effected by first-class mail, postage prepaid, or by telegraph at 1825 K Street, NW., Washington, DC 20006.

(8) Except as otherwise provided in this section, the provisions of rules 8, 10, and 11, Federal Rules of Civil Procedure, shall apply to the extent practicable.

§ 2200.8 Appearance; withdrawal of a representative.

(a) Any party may appear on his own behalf. Any other person appearing on behalf of a party (except an attorney at law) shall file, together with his appearance, a power of attorney establishing his authority to act in such capacity.

(b) Any person who appears as the representative of a party in a proceeding before the Commission must notify the Commission of his withdrawal from such representative status within three days of any such withdrawal. A copy of such notice shall be served by the representative on the party whom he had represented before the Commission and on all other parties.

§ 2200.9 Time for filing.

(a) *Computation of time.* In computing any period of time prescribed for filing and serving a document, the day upon which the decision or document to be contested or answered was received, or the day of any other event, after which the designated period of the time begins to run is not to be included. The last day of the period so computed is to be included unless it is a Saturday, Sunday, or Federal legal holiday in which event the period runs until the end of the next day which is not a Saturday, Sunday, or Federal legal holiday. When the time prescribed or allowed is less than 7 days, intermediate Saturdays, Sundays, or Federal legal holidays shall be excluded in the computation. However, this provision is not intended to extend the time requirements of § 2200.7(f)(2).

(b) *Extension of time.* (1) The Commission may extend the time for filing or serving a document in any proceeding.

(2) A request for an extension of time must, except in extraordinary circumstances, be filed within the time allowed for the filing or serving of the document and must be filed in the same office in which the document in connection with which the extension is requested must be filed.

§ 2200.10 Consolidation of proceedings.

The Commission may at any time order a proceeding consolidated with any other such proceeding; provided the proceedings involve the same employer and the same general location and are then pending before the Commission.

§ 2200.11 Withdrawal of notice of contest.

A party may withdraw his notice of contest at any stage of a proceeding, subject to review by the Commission within 5 days after its receipt of notice of such withdrawal, except that, after commencement of the hearing, withdrawal of a notice of contest shall be only by approval of the Commission.

§ 2200.12 Interlocutory appeals.

(a) No interlocutory appeal from a ruling of the Examiner shall be allowed in a proceeding conducted in accordance with § 2200.7(f) (1) or (2).

(b) In all other proceedings, an interlocutory appeal shall be allowed only in accordance with paragraphs (c), (d), and (e) of this section. A ruling by the Examiner, supported by a reasoned statement, will precede consideration by the Commission of any question raised by interlocutory appeal.

(c) Interlocutory appeal from a ruling of the Examiner shall be allowed only when the Examiner certifies that (1) the ruling involves an important question of law concerning which there is substantial ground for difference of opinion; and (2) an immediate appeal from the ruling will materially expedite the ultimate disposition of the proceeding.

(d) The Commission may thereupon, in its discretion, permit an appeal to be taken from such a ruling by the Examiner which has been so certified if a petition is made to it within 5 days after such certification: *Provided, however,* That such petition shall not stay the proceedings before the Examiner for more than 5 days unless otherwise ordered by the Commission for extraordinary circumstances.

(e) Unless it otherwise orders, the Commission will decide the interlocutory appeal on the record without briefs or oral argument.

§ 2200.13 Ex parte communication.

(a) In a proceeding, no employee or agent of the Secretary who performs any investigative or prosecuting function in

connection with the proceeding, no employer in the proceeding, or agent, or counsel, or anyone acting on behalf of an employer, no employee or representative or agent of such employee and no other person who has appeared before the Examiner or Commission in such proceeding shall communicate ex parte, directly or indirectly, with the Examiner, or the Commission, or any employee involved in the decisional process in such proceeding, with respect to the merits of that or a factually related proceeding.

(b) In any proceeding, neither the Commission, an Examiner nor any other person involved in the decisional process of such proceeding, shall communicate ex parte, directly or indirectly, with any employee or agent of the Secretary who performs any investigative or prosecuting function in connection with the proceeding, with any party employer in the proceeding, or agent, or counsel, or anyone acting on behalf of an employer, with any employee or representative or agent of such employee or with any other person who has appeared before the Examiner or Commission in such proceeding, with respect to the merits of that or any factually related proceeding.

(c) In any proceeding, if any such oral or written ex parte communication is made to or by the Examiner, or any other person involved in the decisional process, in violation of paragraph (a) or (b) of this section, such Examiner or person, as the case may be, shall promptly deliver to the Commission any such written communication, or if oral, a report giving the substance thereof in writing, together with a written statement of the circumstances under which it was made. If the Commission determines that any such communication should, in fairness, be brought to the attention of all parties to the proceeding, the relevant written material pertaining thereto shall be made a part of the record of the proceeding to which it applies and the Commission shall send copies thereof to all parties respondent.

(d) In any case where the Commission determines that the dictates of fairness so require, any party requesting an opportunity to do so may rebut, on the record, any facts or contentions contained in any such ex parte communication.

(e) Upon notice and hearing, the Commission may censure, suspend, or revoke the privilege of practice before the Commission of any person who knowingly and willfully makes or solicits the making of a prohibited ex parte communication. To the extent permitted by law, the Commission may, under appppropriate circumstances, deny or limit remedial measures otherwise available under the Act to any party who shall, directly or indirectly, knowingly and willfully make or solicit the making of an unauthorized communication. However, before the Commission institutes formal proceedings under this section, it shall first advise the person or persons concerned in writing that it proposes to take such action and that they may show cause, within a period to be stated in such written advice, but not less than 7 days from the date thereof, why it should not take such action. The Commission may censure or, to the extent permitted by law, suspend, dismiss, or institute proceedings for the dismissal of any Commission employee who knowingly and willfully violates the prohibitions or requirements of this section.

§ 2200.14 Restrictions as to participation by investigative or prosecuting officers.

In any proceeding noticed pursuant to the rules in this part, no officer, employee, or agent of the Secretary who appears before the Commission as an attorney or witness or who actively participates in the preparation of evidence or argument presented by such persons, shall participate or advise as to the Examiner's report or Commission's decision in that proceeding except as a witness or counsel in public proceedings.

§ 2200.15 Standards of conduct and suspension.

(a) All persons appearing before the Commission shall conform to the standards of ethical conduct required in appearances in the courts of the United States.

(b) The Examiner shall have the authority, for good cause stated in the record, to bar from participation in a particular proceeding any person who shall refuse to comply with his directions, or who shall be guilty of disorderly conduct, dilatory tactics, or contemptuous language in the course of such proceedings. Any person so barred shall have the right to appeal to the Commission from such action of the Examiner.

(c) Misconduct of an aggravated character, when engaged in by an attorney or other representative of a party, may be grounds for suspension or disbarment by the Commission from further practice before it after due notice and hearing.

(d) The refusal of a witness at any hearing before the Commission to answer any question which has been ruled to be proper shall, in the discretion of the Examiner, be grounds for striking all testimony given by such witness on related matters.

§ 2200.16 Inspection and reproduction of documents.

Subject to the provisions of law restricting public disclosure of information, all documents filed in the docket in any proceeding may be inspected and copied, at the person's own expense, at the offices of the Commission.

§ 2200.17 Protection of trade secrets.

Upon application by any person required to divulge trade secrets (as that term is referred to in 18 U.S.C. 1905) in a proceeding before the Commission, the Commission or Examiner shall issue such orders as may be appropriate to protect the confidentiality of the trade secret.

§ 2200.18 Restrictions as to former employees.

(a) As used in this section the term "employee" includes a Member of the Commission, or an employee, agent, or attorney of the Commission or of the Secretary.

(b) No former employee shall appear before the Commission as an attorney or other representative of any party to any proceeding or other matter, formal or informal:

(1) In which the former employee participated personally and substantially during the period of such employment; or

(2) For which the former employee was officially responsible during the period of such employment;

unless 1 year has elapsed since the termination of such employment.

§ 2200.19 Postponements.

(a) Postponements of hearings will not be allowed at the request of any party except upon a showing of good cause and proper diligence. A request for a postponement must be served upon all parties to the proceeding and filed in the office of the Examiner at least 5 days prior to the date of the hearing. In no case will a request for postponement served or filed less than 5 days in advance of the hearing or made at the hearing be granted unless the party requesting it demonstrates that an extreme emergency occurred which could not have been anticipated and which justified beyond question the granting of a postponement. In any such emergency, if time does not permit the filing of such request prior to the hearing, it may be made orally at the hearing.

(b) The request for a postponement must state in detail the reasons why a postponement is necessary. If a request is based upon the absence of a witness, it must state what the substance of the testimony of the absent witness would be. No postponement will be granted if the other parties file with the Examiner within 5 days after the service of the request a statement admitting that the witness on account of whose absence the postponement is desired would, if present, testify as stated in the request. If time does not permit the filing of such statement prior to the hearing, it may be made orally at the hearing.

(c) Only one postponement will be allowed to a party on account of the absence of a witness unless the party requesting a further postponement shall at the time apply for an order to take testimony of the alleged absent witness by deposition.

(d) No party may object to a postponement requested on the basis of the absence of a witness, or on the unavailability of evidence, if the witness' absence or the unavailability of the evidence was wrongfully procured by that party.

§ 2200.20 Hearings.

The hearing requirements set forth herein apply to all hearings conducted by the Commission or its Examiners under sections 10(a), 10(b), and 10(c) of the Act.

§ 2200.21 Duties and authority of Examiners.

The Examiner shall have the duty to conduct a fair hearing, to take all necessary action to avoid delay, and to maintain order. Except as provided in § 2200.7 (f)(3), the hearing shall be completed within 30 days from the date of the designation of the Examiner unless for compelling reasons the Commission extends such period. He shall have all powers necessary to these ends, including (but not limited to) the power to:

(a) Arrange for hearings previously set by the Executive Secretary.

(b) Hold prehearing conferences to settle, simplify, stipulate, or fix the issues in a proceeding, and to consider other matters that may aid in the expeditious disposition of the proceeding, including the power to require the prehearing exchange (at a time reasonably close to the hearing date) by the parties of witnesses' names and address, and evidentiary exhibits.

(c) Require parties, and allow interested persons, to state their positions with respect to the various issues in the proceeding.

(d) Administer oaths and affirmations and issue subpoenas as authorized.

(e) Rule on motions, depositions, and other procedural items on matters pending before him.

(f) Regulate the course of the hearing and the conduct of all persons thereat.

(g) Examine witnesses and direct witnesses to testify.

(h) Receive, rule on, exclude, or limit evidence.

(i) Fix the time for filing motions, petitions, briefs, or other items in matters pending before him, subject to the various filing provisions of the rules in this part.

(j) Issue decisions, in accordance with 5 U.S.C. 557 (Administrative Procedure Act), as expeditiously as possible, but in any case (except in proceedings under § 2200.7(f) (1) and (2)) within a period not to exceed 30 days from the completion of the hearing unless for compelling reasons the Commission extends such period.

(k) Take any action authorized by these rules and in conformance with the provisions of 5 U.S.C. 556 (Administrative Procedure Act).

(l) Withdraw from a proceeding whenever he deems himself disqualified. Any party may request the Examiner, at any time following his designation by the Chairman and before filing his decision, to withdraw on ground of personal bias or disqualification, by filing with him promptly upon the discovery of the alleged facts a timely affidavit setting forth in detail the matters alleged to constitute grounds for disqualification. If, in the opinion of the Examiner, such affidavit is filed with due diligence and is sufficient on its face, he shall forthwith disqualify himself and withdraw from the proceeding. If the Examiner does not disqualify himself and withdraw from the proceeding, such decision of the Examiner will be considered to be a ruling involving an important question of law as contemplated in § 2200.12, and the Examiner shall make the certification necessary for a consideration of the question by the Commission as provided for in § 2200.12.

§ 2200.22 Prehearing conferences.

(a) At any time before the hearing begins, the Examiner, on his own motion or on motion by a party, may, and when consistent with the stated purpose of the rules in this part to expedite proceedings should, direct the parties or their counsel to participate with him in a prehearing conference to consider the following:

(1) Simplification and clarification of the issues.

(2) Necessity or desirability of amending pleadings.

(3) Obtaining stipulations of fact or admissions of undisputed facts or the contents and authenticity of documents.

(4) Issuance of and response to subpoenas.

(5) Taking of depositions and the use of depositions in the proceeding.

(6) Orders for discovery, inspection, and examination of premises, documents, and other physical objects, and responses to such orders.

(7) Orders limiting the number of expert and other witnesses and limiting the subject matter of their testimony.

(8) Disclosure of the names and addresses of witnesses (if at a time that is reasonably close to the date of hearing) and the exchange of documents intended to be offered in evidence.

(9) Precis of expert testimony intended to be introduced at the hearing.

(10) Any other matter that will tend to simplify the issues or expedite the proceedings, including the avoidance of undue repetition or complication in the presentation of evidence or argument.

(b) Whenever a prehearing conference is held, the Examiner shall issue a binding prehearing order which recites the matters discussed, the agreements reached, and the rulings made at the prehearing conference. The order is to be served on the parties and shall be filed in the record of the proceedings.

§ 2200.23 Settlement.

If all parties agree, settlement will be allowed at any stage of the proceedings, subject to the approval of the Examiner who shall certify that such settlement is consistent with the provisions of the Act. Settlement agreements submitted by the parties shall be accompanied by an appropriate proposed order.

§ 2200.24 Affidavits.

Affidavits may be admitted only if the evidence is otherwise admissible and the parties agree that affidavits may be used in lieu of oral testimony by a witness, either depositional or by personal appearance.

§ 2200.25 Depositions.

(a) At any time after the filing of a notice of contest or a request for modification under § 2200.41, any party, upon reasonable notice to all other parties, may take the deposition of any person upon oral examination, except that the deposition of an employee of the Secretary may be taken only upon order of the Commission, or the Examiner, as the case may be, upon a showing that the party desiring to take the deposition is seeking significant unprivileged information which is not discoverable by alternative means prior to the hearing. Attendance may be compelled in accordance with § 2200.28. Upon a failure of agreement as to the time and place for the taking of a deposition, an appropriate order of the Commission, or of the Examiner, if one has been designated at that time, may be obtained by the party seeking to take the deposition. The Examiner's authority to order the submission of oral testimony by deposition is limited only to the extent that such order must provide for the avoidance of unnecessary delay of the proceedings. The Examiner shall, upon the application of any party, prohibit the taking of a deposition by oral examination, if, in his discretion, he deems that any unnecessary delay of the proceedings is likely to result.

(b) Depositions by written interrogatories shall not be allowed.

(c) Unless otherwise ordered by the Commission or the Examiner, rules 26, 27, 28, 29, 30, 32, and 37 of the Federal Rules of Civil Procedure shall govern the procedures for the taking and use of depositions unless inconsistent with the rules in this part.

(d) Each witness testifying upon deposition shall be sworn, and all other parties shall have the right to cross-examine. The questions propounded and the answers thereto, together with all objections made, shall be reduced to writing, read by the witness, subscribed by him, and certified by the officer before whom the deposition is taken. Thereafter, the officer shall seal the deposition with two copies thereof, in an envelope and mail the same by certified mail to the Examiner, or to the Comission, if prior to the designation of the Examiner.

(e) The Examiner, or the Commission, as the case may be, shall rule upon the admissibility of the deposition or any part thereof upon its attempted use at the hearing.

(f) Upon the written stipulation of all the parties and of the deponent, a deposition, or any designated part thereof may be used in lieu of the deponent's oral testimony at the hearing. Any such stipulation, previously made, may be revoked by any party, or by the deponent, upon notice to all parties, provided such notice is given 5 days prior to the hearing.

(g) If the parties so stipulate in writing, depositions may be taken before any person at any time or place, upon any notice and in any manner, and when so taken may be used like other depositions, subject to the avoidance of unnecessary delay as provided in paragraph (a) of this section.

§ 2200.26 Interrogatories; requests for admission of facts; and production of documents.

(a) Interrogatories and requests for admission shall not be allowed.

(b) For substantial need shown, the Examiner may order a party to produce and permit inspection and copying or photographing of designated documents relevant to the proceeding, and order that a party permit entry upon designated land or other property in the possession or control of the party upon whom the request is served for the purpose of inspecting, measuring, surveying, photographing, testing, or sampling the property or any designated object, operation, or material thereon.

§ 2200.27 Failure to comply with orders for discovery.

If a party or an officer or agent of a party fails to obey an order of the Commission or the Examiner to provide or permit discovery, pursuant to § 2200.25 or § 2200.26, the Commission on the Examiner may make such orders in regard to the failure as are just. He may, among other things, direct that the matters regarding which the order was made, or any other designated facts, shall be taken to be established for the purposes of the proceeding in accordance with the claim of the party obtaining the order, or prohibit the disobedient party from introducing designated matters in evidence, or strike any evidence, complaint, or pleadings or parts thereof, subject, however, to the provisions of § 2200.35(c).

§ 2200.28 Issuance of subpoenas; petitions to revoke subpoenas; right to inspect or copy data.

(a) Any member of the Commission shall, on the application of any party directed to the Commission, forthwith issue subpoenas requiring the attendance and testimony of witnesses and the production of any evidence, including relevant books, records, correspondence, or documents, in his possession or under his control. Applications for suboenas, if filed subsequent to the appointment of an Examiner, shall be filed with the Examiner. An Examiner shall grant the application on behalf of any member of the Commission. Applications for subpoenas may be made ex parte. The subpoena shall show on its face the name and address of the party at whose request the subpoena was issued.

(b) Any person served with a subpoena, whether ad testificandum or duces tecum, shall, within 5 days after the date of service of the subpoena upon him, move in writing to revoke the subpoena if he does not intend to comply. All motions to revoke subpoenas shall be served on the party at whose request the subpoena was issued. Such motion to revoke, if made prior to the appointment of an Examiner, shall be filed with the Commission, and the Executive Secretary shall refer the motion to the Examiner or to the Commission for ruling. Motions to revoke subpoenas filed during the hearing shall be filed with the Examiner. Notice of the filing of motions to revoke shall be promptly given by the Executive Secretary or the Examiner, as the case may be, to the party at whose request the subpoena was issued. The Examiner or the Commission, as the case may be, shall revoke the subpoena if in its opinion the evidence whose production is required does not relate to any matter under investigation or in question in the proceedings or the subpoena does not describe with sufficient particularity the evidence whose production is required, or if for any other reason sufficient in law the subpoena is otherwise invalid. The Examiner or the Commission, as the case may be, shall make a simple statement of procedural or other grounds for the ruling on the motion to revoke. The motion to revoke, any answer filed thereto, and any ruling thereon shall become a part of the official record.

(c) Persons compelled to submit data or evidence at a public proceeding are entitled to retain or, on payment of lawfully prescribed costs, to procure copies or transcripts of the data or evidence submitted by them.

(d) Upon the failure of any person to comply with a subpoena issued upon the request of a private party, the Commission by its counsel shall initiate proceedings in the appropriate district court for the enforcement thereof, unless in the judgment of the Commission the enforcement of such subpoena would be inconsistent with law and with the policies of the Act. Neither the counsel nor the Commission shall be deemed thereby to have assumed responsibility for the effective prosecution of the same before the court.

§ 2200.29 Failure to file.

Failure of any party to file a pleading or other document within the time prescribed may, in the discretion of the Commission or the Examiner, if one has been assigned, be grounds for denial of the right to participate as a party in the proceedings.

§ 2200.30 Proof of documents.

A true copy of every written entry in the records of the Commission or of the Secretary, made by an officer or employee thereof in the course of his official duties, and relevant to the issues involved in the hearing, shall be admissible, in accordance with 28 U.S.C. 1733. The provisions of 28 U.S.C. 1732 are likewise applicable in proceedings before the Commission and its Examiners.

§ 2200.31 Notice of hearings.

(a) Notice of the time, place, nature of hearing, the legal authority and jurisdiction under which the hearing is to be held, and the matters of fact and law asserted shall be given to all parties to the proceeding within the times prescribed in § 2200.7. Except as otherwise provided herein, such notice shall be in writing.

(b) The employer shall post a notice of the hearing in a manner consistent with the notice requirements of § 1903.16 of this title, or accomplish notification by other appropriate means. A description of how employees have been informed shall be contained in the certification to be filed by the employer with the Examiner.

§ 2200.32 Rules of evidence.

Hearings before the Commission and its Examiners will be governed by the provisions of rule 43 of the Federal Rules of Civil Procedure.

§ 2200.33 Burden of proof.

Except as otherwise provided in the rules in this part (e.g., § 2200.41(d)), the burden of proof shall be on the Secretary in all proceedings to sustain the assertions contained in his citation, notification of proposed penalty, and notification of failure to correct a violation.

§ 2200.34 Exhibits.

(a) All written statements, charts, tabulations, or similar data offered in evidence at the hearing or prehearing shall, after identification by the proponent and upon a satisfactory showing of the admissibility of the contents thereof, be numbered as exhibits, received in evidence, and made a part of the record.

(b) Unless the Examiner finds that the furnishing of copies is impracticable, a copy of each exhibit shall be filed with the Examiner for the use of each other party to the proceeding. The Examiner shall advise the parties as to the exact number of copies which will be required to be filed and shall make and have noted on the record the proper distribution of the copies.

§ 2200.35 Objections.

(a) If any person objects to the admission or rejection of any evidence or to other limitation of the scope of any examination or cross-examination, he shall state briefly the grounds for such objection, and the transcript shall include argument or debate thereon, unless otherwise ordered by the Examiner. A ruling by the Examiner on any such objection shall be a part of the transcript.

(b) Exceptions to rulings by the Examiner are unnecessary.

(c) Whenever evidence is excluded from the record, the party offering such evidence may make an offer of proof, which shall be included in the record of the proceeding.

§ 2200.36 Failure to appear.

(a) Subject to the provisions of paragraph (b) of this section, the failure to appear at a hearing shall be deemed to be a waiver of all rights except the rights to be served with a copy of the Examiner's report and to request Commission review pursuant to § 2200.42.

(b) The Commission or the Examiner upon a showing of good cause may excuse the failure to appear at a hearing and reschedule the hearing at a suitable time thereafter. Requests for reinstatment must be made, in the absence of extraordinary circumstances, within 5 days subsequent to the scheduled hearing date.

§ 2200.37 Transcript of testimony.

Hearings shall be recorded and transcripts will be made available to any party or interested person upon payment of the cost thereof. A copy of the transcript of the testimony taken at any hearing, duly certified by the reporter, shall be filed with the Executive Secretary or the Examiner. The Executive Secretary or the Examiner shall promptly serve notice upon each of the parties of such filing and transmittal.

§ 2200.38 Payment of witness fees and mileage; fees of persons taking depositions.

Witnesses summoned before the Examiner or the Commission shall be paid the same fees and mileage that are paid witnesses in the courts of the United States, and witnesses whose depositions are taken and the persons taking the same shall severally be entitled to the same fees as are paid for like services in the courts of the United States. Witness fees and mileage shall be paid by the party at whose instance the witness appears, and the person taking a deposition shall be paid by the party at whose instance the deposition is taken.

§ 2200.39 Reporter's fees.

Reporter's fees shall be borne by the Commission, except as provided in § 2200.37.

§ 2200.40 Proposed findings and conclusions; reply; and Examiner's report.

(a) Except in proceedings conducted in accordance with § 2200.7(f) (1) and (2), each party to a hearing may, in the absolute discretion of the Examiner, have a period of 10 days after the certification by the Examiner of the record (or such shorter or longer period as the Examiner for good cause shall determine), to file with the Examiner proposed findings of fact, conclusions of law, and an order, which may be accompanied by a brief memorandum in support thereof. Such proposals shall be supported by citation of such statutes, decisions, and other authorities, and by page references to such portions of the record as may be relevant. All such proposals, briefs, and memoranda shall become a part of the record.

(b) If the filing of proposed findings of fact, conclusions of law, and order is allowed in accordance with paragraph (a) of this section, a party may, in the absolute discretion of the Examiner, be accorded 5 days (or more or less, as the need for expediency appears to the Examiner) following receipt by the Examiner of the proposed findings to except to the proposed findings of any other party. No new matter shall be introduced in the reply.

(c) Within a reasonable time after the filing of the replies to the proposed findings or within a reasonable time after the termination of the period allowed for the filing of replies to the proposed findings of fact, conclusions, and order, the Examiner shall prepare his report, upon the basis of the evidence received at the hearing, and shall file that report with the Executive Secretary. Such report shall be prepared in the form of findings of fact, conclusions of law, and an order.

§ 2200.41 Special procedures for modification of abatement requirements; burden of proof; and posting.

(a) Where, pursuant to section 10(c) of the Act, an employer has been required by a final order of the Commission to abate a violation of the Act, and he petitions the Secretary for a modification of the abatement order, such request shall be filed prior to the date by which abatement was to be effected. The request shall be forwarded to the Commission for hearing and order in conformity with the rules in this part.

(b) The petition shall contain a short and plain statement of the factors beyond his reasonable control which prevented his abatement despite his good faith efforts.

(c) Answers to the petition shall be filed within 10 days of receipt, or posting, of a copy of the petition. The answer shall contain, in short and plain terms, the party's reply to the factors asserted in the petition. Where a party does not elect to file an answer, he shall be deemed to have neither admitted nor denied any assertions of the petition.

(d) The burden of proving the need for such modification shall be upon the employer.

(e) Copies of any petition under this section shall be posted by the employer from the day of filing until the order of the Commission is rendered. They shall be posted in conspicuous places, including all places where notices to employees are customarily displayed. Reasonable steps shall be taken by the employer to insure that such notices are not altered, defaced, or covered by other material.

§ 2200.42 Petitions for discretionary review of the decision of the Examiner.

(a) *Petitions for discretionary review.* (1) Review by the Commission pursuant to this section is not a matter of the right of any party but is available only in the sound discretion of the Commission, upon the petition of a party, or otherwise, in accordance with section 12(j) of the Act. A petition for discretionary review by the Commission must be filed within 5 days after receipt of the Examiner's report or receipt of the transcript, whichever is later. Such petitions shall be accompanied by proof of service on all parties.

(2) Petitions for discretionary review shall be filed only to assert that:

(i) A material factual finding is erroneous;

(ii) A legal conclusion necessary to the ultimate result is a departure from or contrary to law, rules, or precedent;

(iii) A substantial question of law, policy, or discretion is involved; or

(iv) A prejudicial procedural error has occurred.

(3) Each issue shall be separately numbered, plainly and concisely stated, and should be supported by detailed citations of the record when objections are based on the record, and by statutes, regulations, or principal authorities relied upon. Any matters of fact or law not argued before the Examiner, but which the petitioner proposes to argue to the Commission shall be stated together with a concise statement of the reason for the failure to argue the matter below.

(4) Petitions for discretionary review shall be self-contained and where they incorporate by reference any other document shall specify by name and page number the referenced material. Where such documents are not part of the record, copies thereof shall be attached to the petitions. Petitions should be contained in no more than 10 pages.

(5) Requests for oral argument on petitions for discretionary review may be entertained by the Commission.

(b) *Answer.* Within 5 days after receipt of a petition for discretionary review, any party may file and serve a reply of not more than 10 pages in support of or in opposition to the petition. If any party desires to reply to more than one petition for discretionary review in the same proceeding, he shall do so in a single document of not more than 20 pages.

(c) *Orders declining review.* Failure of the Commission to grant the petition within 30 days of the filing of the Examiner's decision shall constitute denial of the petition. The Examiner's decision thereupon becomes the final order of the Commission in accordance with section 12(j) of the Act.

(d) *Review proceedings.* (1) The Commission will exercise its right of review upon petition for review or on its own initiative, where no petition has been filed, when one or more Commission members vote in favor of review.

(2) Where the Commission desires further proceedings, the Commission will issue an order for review, to be served on all parties, which will:

(i) Make the entire record subject to review;

(ii) Specify the portions of the Examiner's decision, if any, which are to be stayed as well as the effective date of the remaining portions thereof;

(iii) Specify whether the Commission desires oral argument and/or the filing of supplementary briefs and, if so, on which specific points.

§ 2200.43 Oral argument before the Commission.

(a) In the case where the Commission determines that oral argument is appropriate, all parties to the proceeding will be advised of the date and hour set for such argument and the amount of time allowed to each party.

(b) Pamphlets, charts, and other written data may be presented to the Commission at oral argument only in accordance with the following rules: All such material shall be limited to facts in the record of the case being argued. All such material shall be served on all parties to the proceeding and three copies should be transmitted to the Chairman of the Commission at least 5 days in advance of the argument. As used herein, "material" includes, but is not limited to, maps, charts included in briefs, and similar exhibits which are to be enlarged and used for demonstration purposes at the argument, but does not include the enlargements of such exhibits.

§ 2200.44 Remand for additional testimony.

Where any matter is before the Commission, the Commission may issue an order remanding the proceeding for further hearings by the Examiner in accordance with such order or may order the taking of additional testimony before the Commission itself.

§ 2200.45 Amendments to rules.

The Commission may at any time upon its own initiative or upon written suggestion of any interested person setting forth reasonable grounds therefor amend or revoke any of the rules contained herein. Such suggestions should be addressed to the Commission in Washington, D.C. (§ 2200.3(f)).

§ 2200.46 Official Seal Occupational Safety and Health Review Commission.

The seal of the Commission shall consist of: A gold U.S. eagle with outstretched wings, head facing west, a shield with 13 vertical stripes on its breast, perched on an olive branch; superimposed over a plain solid white Greek cross formed of five equal squares with a green background, the arc between the two arms of the cross is defined as the square that would be formed if intersecting lines were drawn from the end of the arms; encircled by a white band edged in black and inscribed "Occupational Safety and Health Review Commission" in black letters.

[FR Doc.71-12685 Filed 8-30-71;8:45 am]

Title 32—NATIONAL DEFENSE

Chapter I—Office of the Secretary of Defense

SUBCHAPTER E—DEFENSE CONTRACTING

PART 179—USE OF CONTRACTOR AND GOVERNMENT RESOURCES FOR MAINTENANCE OF MATERIEL

The Deputy Secretary of Defense approved the following:

Sec.
179.1 Purpose.
179.2 Applicability and scope.
179.3 Definitions.
179.4 Policy.
179.5 Criteria.
179.6 Responsibilities.

AUTHORITY: The provisions of this Part 179 issued under sec. 301, title 5 of the United States Code.

§ 179.1 Purpose.

This part establishes policies and related criteria governing the use of contractor and Department of Defense resources in providing DoD material maintenance requirements, in consonance with the policies set forth in DoD Directives 3232.1,[1] "Department of Defense Maintenance Engineering Program," 4000.19,[1] "Basic Policies and Principles for Interservice and Interdepartmental Logistic Support," and Parts 168 and 169 of this subchapter, and further delineates Military Department responsibilities for assuring the accomplishment of such materiel maintenance by either contracting or interservicing arrangements.

§ 179.2 Applicability and scope.

(a) The provisions of this part apply to the Military Departments, and to those Defense Agencies having responsibilities for the maintenance of materiel.

(b) This part does not conflict with nor alter DoD Directives 3232.1, 4000.19 and Parts 168 and 169 of this subchapter.

§ 179.3 Definitions.

(a) *Contract maintenance.* That maintenance (i.e., modification, modernization, rebuild, overhaul, repair or servicing of materiel) performed under contract by commercial organizations (including original manufacturers) on a one-time or continuing basis and utilizing contractor personnel.

(b) *Organic maintenance.* That maintenance performed by a Military Department utilizing (government-owned or controlled facilities, tools, test equipment, spares, repair parts) military or government civilian personnel.

(c) *Materiel.* Materiel consists of all tangible items (including ships, tanks, self-propelled weapons, aircraft, etc., and related spares, repair parts and support equipment; but, excluding real property, installations, and utilities) necessary to equip, operate, maintain, and support military activities without distinction as to its application for administrative or combat purposes.

(d) *Mission-essential materiel.* That materiel, authorized and assigned to approved combat and combat support forces which would be immediately employed to (1) destroy the enemy or his capacity to continue war, (2) provide battlefield protection of personnel, (3) communicate under war conditions, (4) detect, locate, or maintain surveillance over the enemy, (5) permit contiguous combat transportation and support of men and materiel, and (6) equipment assigned to training missions that is of the same type and configuration as that assigned to combat and combat support forces which is designated to be immediately employed for purposes enumerated above.

(e) *Interservice maintenance support.* Maintenance performed by the organic capability of one military service or element thereof in support of another military service or element thereof. Such action can be recurring or nonrecurring in character. (See DoD Directive 4000.19).[1]

(f) *Direct maintenance support.* Refers to that maintenance performed to materiel while it remains under the custody of the using military command. Upon restoration of serviceable condition, the materiel normally is returned directly to service.

(g) *Indirect maintenance support.* Refers to that maintenance performed to materiel after its withdrawal from the custody of the using military command. Upon restoration to servicable condition, the materiel is returned to stock for reissue, or returned directly to the user under conditions authorized by the Military Department concerned.

(h) *Maintenance capability.* Consists of those resources, namely: Facilities, tools, test equipment, drawings, technical publications, trained maintenance personnel, engineering support, and an assured availability of spare parts, required to modify, retain materiel in, or restore materiel to, serviceable condition.

(i) *Maintenance capacity.* Is the quantitative expression of maintenance capability in the amount of direct labor man-hours that can be applied on a 40-hour week (one shift—5 days).

(j) *Depot maintenance support assignment.* The DoD component designated by the Secretary of Defense to provide depot maintenance support to all users of specified multiservice equipment.

(k) *Weapon system.* An instrument of combat either offensive or defensive used to destroy, injure, defeat, or threaten the enemy. It consists of the total entity that is an instrument of combat that incorporates in itself a complex assembly of functional parts, e.g., F-104 aircraft, FBM submarines, M-60 tank, Hawk missile.

(l) *Major end items.* A major piece of equipment, including support equipment, used to aid, assist or complement a weapon system.

(m) *Analytical overhaul.* The complete disassembly, inspection, engineering evaluation, repair, assembly, and test of military materiel either in or entering the inventory for the purpose of refining requirements for spares and repair parts, maintenance technical criteria, tooling, test equipment and technical data and/or determining the need for product improvement.

§ 179.4 Policy.

(a) Maintenance support of military equipment is vital to the sustained application of military power. It is necessary, therefore, that the Military Departments provide an adequate program for maintenance of assigned equipment to effectively and efficiently meet sustained readiness in accordance with responsibility for military missions.

(b) Guidance with respect to the use of government or contract sources to meet defense maintenance needs is provided below. It is intended that:

[1] Filed as part of original. Copies may be obtained from U.S. Naval Publications and Forms Center, 5801 Tabor Avenue, Philadelphia, PA 19120, Attn: Code 300.

[1] Ibid.

(1) Combat and combat support activities of the Military Departments will be self-sufficient insofar as possible in providing direct (intermediate-organizational) maintenance support for assigned weapons systems and equipment. The use of contractual services for such support will generally be limited to short term tasks to overcome specific deficiencies.

(2) The evaluation and determination of the source of direct support of other than combat and combat support activities will be based on (i) the need to maintain a training/rotational base for military technical personnel; (ii) the security implications involved, and (iii) cost/effectiveness considerations.

(3) Indirect (depot) maintenance support of military weapons and equipment will be planned and accomplished by the combined use of contractual sources and organic military capability, in order to establish and sustain a flexible maintenance production base capable of expansion to accommodate emergency military needs within a limited time frame (DoD Directive 4005.1, "DoD Industrial Mobilization Production Planning Program—Limited War").

(4) Normally each Military Department and Defense Agency will provide for the support of DoD mission-essential equipment. Interservice support arrangements (see DoD Directive 4000.19 [1]) will be established and executed wherever such actions will prove more beneficial to the DoD in terms of effectiveness of support or economy of operations.

(5) The extent of facility capability and capacity within the Military Departments for depot support of mission-essential equipment will be kept to the minimum required to insure a ready and controlled source of technical competence and resources necessary to meet military contingencies. Generally, organic depot maintenance capacity will be planned to accomplish no more than 70 percent of the gross mission-essential depot maintenance workload requirements with a facility capacity loading at a minimum rate of 85 percent, on a 40-hour week, one-shift basis. The Services will attempt in the implementation of this part to utilize the DoD-wide industrial organization in a manner that will insure the most advantageous and economic benefits to the DoD.

(6) A Joint Support Plan will be developed in all cases where the same weapon is being procured for use by two or more military services. Joint Support Plans may also be selectively required for jointly used major end items and components when such plans are in the best overall interest of the DoD. The Support Plan will include an assessment of existing depot maintenance capabilities of the Military Departments involved and will indicate (i) the basic considerations; (ii) how the depot maintenance proposed assignments make maximum use of existing DoD capabilities and reduces to a minimum new investment in additional resources and (iii) the planned distribution of depot maintenance workloads between organic and commercial sources over the weapon or equipment's planned life (see DoD Directives 5126.22 (26 F.R. 1922) and 4100.35, "Development of Integrated Logistic Support for Systems and Equipment" [1]). These plans will be submitted to the ASD(I&L) for approval.

(7) Workloads which are not directly related to mission-essential systems and equipments on approved listings and which are to be performed by organic depot maintenance facilities will be submitted and justified annually under the criteria for a new start set forth in Part 169a of this subchapter.

§ 179.5 Criteria.

(a) Within the policy statements in § 179.4, the maintenance of mission-essential military materiel will be accomplished with DoD organic resources when required to assure a controlled source of equipment support of military operations under emergency or war conditions, and when essential:

(1) To retain or upgrade technical ability within the Military Service to permit effective performance of the Military Mission, or

(2) To provide necessary experience and information on the military requirements, design specifications, performance evaluations, and the review and control of costs, or

(3) To develop the technical competency necessary to conduct analytical evaluations of maintenance criteria, specification and performance data that are necessary to assure improved performance of military equipment.

(b) Within the policy statements in § 179.4:

(1) Contract maintenance has its principal applications in the following areas (see also Part 170 of this subchapter).

(i) For accomplishment of indirect maintenance requirements which exceed the military capacity retained to support mission-essential materiel, and such requirements can be accomplished at reasonable cost (considering the allowable costs set forth in Part 15 of this chapter) and when compared with the actual costs experienced by existing organic maintenance activities.

(ii) For accomplishment of direct and indirect maintenance requirements in support of nontactical elements when the military control and performance of such work is not required for (*a*) military effectiveness, (*b*) personnel training, or (*c*) rotation and career development of manpower.

(iii) For direct maintenance support of materiel of a temporary nature pending the attainment of an organic capability or to accommodate peak workloads of a transitory nature.

(iv) When required for an interim period to attain an earlier operational status for new military materiel.

(v) For accomplishment of analytical overhaul or modification of new military materiel entering the inventory (see DoD Instruction 7041.3 [1]).

(vi) When the extent or complexity of modification or modernization work to be accomplished requires the inherent technical qualifications of the original manufacturer.

(vii) When the contract lead times and processing of equipment through contractors would not result in overall increased costs for procurement of spares to fill an enlarged logistic pipeline.

(viii) When administrative cost of contracting for small lots would be appropriate to the requirement.

(2) Interservice maintenance has its principal applications in the following areas:

(i) Where capability and capacity exists or can be made available through redistribution of DoD workloads.

(ii) Where two or more services use the same item and the workload of one service for the item is of small magnitude in comparison to the quantity being repaired by the other service.

(iii) When it provides for a reduction in equipment out-of-service time; will result in a reduction of logistic pipeline inventories; and/or provides the potential for reducing investment and operating support costs.

§ 179.6 Responsibilities.

(a) Each Military Department and Defense Agency shall:

(1) Determine and designate those systems and equipments in their operating programs which are mission-essential materiel, including the extent of depot level maintenance capacity and capability that should be developed and/or retained within the DoD for its support, and publish lists of these mission-essential systems and equipment covering the current year and 4 out years.

(2) Develop and present the annual depot maintenance program as a part of the normal budget cycle. The program will reflect the total military department or defense agency requirements for accomplishment by organic, contract or interservice sources as appropriate (see DoD Instruction 7110.1 [1]).

(3) Assure that efficient utilization is being realized from that organic capability retained for the depot maintenance support of mission-essential materiel.

(4) Maintain the technical competency necessary to assure effective and efficient management of the total depot maintenance workload program.

(5) Determine, in coordination with other departments and agencies, as appropriate, those workloads which can be most effectively and economically accomplished by defense organic or commercial industry sources.

(6) Foster the establishment and retention of a competitive commercial depot maintenance industrial base.

(7) Assure that the same degree of management emphasis and attention is given to workloads accomplished by contract sources as that given to workloads performed by organic sources (see Part 170 of this subchapter).

(8) Request deviation from the provisions of this part in those cases where there are peculiar circumstances or there are other overriding factors to be considered.

(b) The ASD(I&L) shall be responsible for:

(1) Annual reviews of departmental depot maintenance programs concurrent with the OSD/BoB [2] budget reviews of departmental programs. Conduct reviews at least annually of mission-essential weapons and equipment end item lists for which a depot maintenance capability has been established or will be required. Take actions necessary to insure the effective implementation of the policies set forth in and intent of this part.

(2) Review of DoD depot maintenance capabilities and capacities. Assess alternative plans for depot maintenance support. Review and approve proposed plans for depot maintenance support of multiservice use weapons and selected end items (see also DoD Directive 5126.22 (26 F.R. 1922)).

(3) Providing final determination on all requests for deviation from the provisions of this part.

MAURICE W. ROCHE,
Director, Correspondence and Directives Division, OASD (Administration).

Title 35—PANAMA CANAL

Chapter I—Canal Zone Regulations

SUBCHAPTER C—SHIPPING AND NAVIGATION

PART 101—ARRIVING AND DEPARTING VESSELS: VARIOUS QUARANTINE, CUSTOMS, IMMIGRATION AND ADMEASUREMENT REQUIREMENTS

CFR Correction

In § 101.9 appearing on page 173 of Title 35, Revised as of January 1, 1971, the final sentence is corrected to read as follows:

§ 101.9 Papers required by boarding officer.

* * * If a vessel fails to present any one of the prescribed papers upon arrival it shall be subject to delay or to denial of entry or denial of the use of Canal Zone port and other facilities in whole or in part in accordance with § 101.13, but it shall not be subject to fine.

Title 41—PUBLIC CONTRACTS AND PROPERTY MANAGEMENT

Chapter 1—Federal Procurement Regulations

RESPONSIBLE PROSPECTIVE CONTRACTORS

This amendment of the Federal Procurement Regulations prescribes a new Subpart 1–1.12, Responsible Prospective Contractors, which replaces the treatment of this subject that previously appeared in § 1–1.310. The new subpart provides substantial additional coverage of the subject, particularly with respect to standards, special findings, preaward surveys, and responsibility of subcontractors.

The table of contents for Part 1–1 is amended to include revised and additional entries as follows:

PART 1–1—GENERAL

Subpart 1–1.3—General Policies

Sec.
1–1.310 [Reserved]

Subpart 1–1.12—Responsible Prospective Contractors

1–1.1200 Scope of subpart.
1–1.1201 Applicability.
1–1.1202 General policy.
1–1.1203 Minimum standards for responsible prospective contractors.
1–1.1203–1 General standards.
1–1.1203–2 Additional standards.
1–1.1203–3 Special standards.
1–1.1203–4 Ability to meet certain minimum standards.
1–1.1204 Determination of responsibility or nonresponsibility.
1–1.1204–1 Requirement.
1–1.1204–2 Affiliated concerns.
1–1.1205 Procedures for determining responsibility of prospective contractors.
1–1.1205–1 General.
1–1.1205–2 When information will be obtained.
1–1.1205–3 Sources of information.
1–1.1205–4 Preaward surveys.
1–1.1206 Subcontractor responsibility.
1–1.1207 Disclosure of preaward data.

AUTHORITY: The provisions of this Subpart 1–1.12 issued under sec. 305(c), 63 Stat. 390; 40 U.S.C. 486(c).

Subpart 1–1.3—General Policies

1. Section 1–1.302–2(e) is revised to read as follows:

§ 1–1.302–2 Production and research and development pools.

* * * * *

(e) *Responsibility of pool member.* Where a member of a production pool has submitted a bid or proposal in its own name, the pool agreement shall be considered in determining the pool member's responsibility pursuant to Subpart 1–1.12.

2. Section 1–1.310 is revised to delete the text and to reserve the section for future use, as follows:

§ 1–1.310 [Reserved]

Subpart 1–1.12—Responsible Prospective Contractors

1. Subpart 1–1.12 is added which reads as follows:

§ 1–1.1200 Scope of subpart.

This subpart prescribes policies concerning the responsibility of prospective contractors, minimum standards for responsible prospective contractors, requirements and procedures for the determination of responsibility, and policies regarding the determination of subcontractor responsibility.

§ 1–1.1201 Applicability.

(a) This subpart applies to all formally advertised or negotiated procurements made by executive agencies from contractors located in the United States, its possessions, or the Commonwealth of Puerto Rico. In addition, it applies to such procurements from contractors in other places, except where inconsistent with the laws and customs of the place where the prospective contractor is located. The subpart also applies to the procurement of automatic data processing equipment and related supplies and equipment by Federal agencies in the judicial and legislative branches, other than the Senate, the House of Representatives, and the Architect of the Capitol, as well as to the procurement of such equipment by executive agencies.

(b) This subpart does not apply to procurements from (1) other governments, including State and local governments or their instrumentalities, (2) other U.S. Government agencies or their instrumentalities (e.g., the Federal Prison Industries, Inc.), or (3) the National Industries for the Blind.

§ 1–1.1202 General policy.

(a) Purchases shall be made only from, and contracts shall be awarded only to, responsible prospective contractors (see 41 U.S.C. 253(b) and 10 U.S.C. 2305(c)). A responsible prospective contractor is one who meets the standards set forth in §§ 1–1.1203–1 and 1–1.1203–2 and such special standards as may be prescribed in accordance with § 1–1.1203–3.

(b) The award of a contract to an offeror solely on the basis of the lowest evaluated price is a disservice to the Government if subsequently the contractor defaults, is late in his deliveries, or otherwise performs unsatisfactorily, with the result that the Government incurs additional procurement or administrative costs, and acceptable supplies or services may not be furnished within the time required. Such awards are also unfair to other offerors who are capable of satisfactory performance and tend to discourage them from submitting bids or proposals on future procurements.

(c) While it is important that purchases be made on the basis of offers which are most advantageous to the Government, price and other factors considered, this does not require an award to an offeror solely because he submits the lowest bid or offer. A prospective contractor must affirmatively demonstrate his responsibility and, when necessary, the responsibility of his proposed subcontractors.

(d) A determination of nonresponsibility shall be made by the contracting officer if, after compliance with §§ 1–1.1205 and 1–1.1206, the information obtained does not indicate clearly that the prospective contractor is responsible. Recent unsatisfactory performance regarding either quality or timeliness of delivery, whether or not default proceedings were instituted, is an example

[2] Now Office of Management and Budget.

of a problem which the contracting officer must consider and resolve as to its impact on the current procurement prior to making an affirmative determination of responsibility. Where a contracting officer has doubts regarding the productive capacity or financial strength of a prospective contractor which cannot be resolved affirmatively, the contracting officer shall determine that the prospective contractor is nonresponsible. (See § 1–1.708 if a small business concern is involved.)

§ 1–1.1203 Minimum standards for responsible prospective contractors.

§ 1–1.1203–1 General standards.

Except as otherwise provided in this § 1–1.1203, a prospective contractor must:

(a) Have adequate financial resources, or the ability to obtain such resources as required during performance of the contract;

(b) Be able to comply with the required or proposed delivery or performance schedule, taking into consideration all existing business commitments, commercial as well as governmental;

(c) Have a satisfactory record of performance. Contractors who are or have been seriously deficient in current or recent contract performance, when the number of contracts and the extent of deficiency of each are considered, in the absence of evidence to the contrary or circumstances properly beyond the control of the contractor, shall be presumed to be unable to meet this requirement. Past unsatisfactory performance will ordinarily be sufficient to justify a finding of nonresponsibility (see § 1–1.708 if a small business concern is involved);

(d) Have a satisfactory record of integrity and business ethics (see § 1–1.708–2 if a small business concern is involved); and

(e) Be otherwise qualified and eligible to receive an award under applicable laws and regulations, e.g., see Subparts 1–12.6 and 1–12.8.

§ 1–1.1203–2 Additional standards.

(a) In addition to the standards in § 1–1.1203–1, where procurements involve production, maintenance, construction (see § 1–18.106), or research and development work (and in other procurements as appropriate), a prospective contractor must:

(1) Have the necessary organization, experience, operational controls, and technical skills; or the ability to obtain them. This standard includes, where appropriate, such elements as adequacy of production control procedures and quality assurance measures, including those applicable to materials produced or services performed by subcontractors (see § 1–1.1203–4); and

(2) Have the necessary production, construction, and technical equipment and facilities, or the ability to obtain them. Where a prospective contractor proposes to use the facilities or equipment of another concern, not a subcontractor, or of his affiliate (see § 1–1.701–2), all existing business arrangements, firm or contingent, for the use of such facilities or equipment shall be considered in determining the ability of the prospective contractor to perform the contract (see also § 1–1.1203–4).

(b) Procurement of subsistence shall be made only from those sources which, in addition to meeting the standards in § 1–1.1203–1, are approved with respect to agency standards and procedures.

§ 1–1.1203–3 Special standards.

When the situation warrants, contracting officers shall develop with the assistance of technical personnel or other specialists, special standards of responsibility to be applicable to a particular procurement or class of procurements. Such special standards may be particularly desirable where a history of unsatisfactory performance has demonstrated the need for insuring the existence of unusual expertise or specialized facilities necessary for adequate contract performance. The resulting standards shall form a part of the solicitation and shall be applicable to all bidders or offerors.

§ 1–1.1203–4 Ability to meet certain minimum standards.

Except to the extent that a prospective contractor proposes to perform the contract by subcontracting (see § 1–1.1206), acceptable evidence of his "ability to obtain" equipment, facilities, and personnel (see §§ 1–1.1203–1(a) and 1–1.1203–2) shall be required. If these are not represented in the contractor's current operations, they should normally be supported by a commitment or explicit arrangement, which is in existence at the time the contract is to be awarded, for the rental, purchase, or other acquisition of such resources, equipment, facilities, or personnel.

§ 1–1.1204 Determination of responsibility or nonresponsibility.

§ 1–1.1204–1 Requirement.

(a) No purchase shall be made from, and no contract shall be awarded to, any person or firm unless the contracting officer first makes an affirmative determination that the prospective contractor is responsible within the meaning of § 1–1.1202. Such affirmative determinations shall be documented in accordance with agency procedures. In this regard, however, the signing of a contract may be deemed to be an affirmative determination by the contracting officer that the prospective contractor is responsible with respect to that contract. Supporting documents and reports, including any preaward survey reports (see §1–1.1205–4) and any applicable SBA certificate of competency (see § 1–1.708), shall be made a part of the contract file.

(b) Where a bid or offer on which an award would otherwise be made is rejected because the prospective contractor is found to be nonresponsible, a determination of nonresponsibility shall be made, signed, and placed in the file. (See § 1–1.708 if a small business concern is involved.) The determination of nonresponsibility shall set forth the basis of the determination.

§ 1–1.1204–2 Affiliated concerns.

(a) Affiliated concerns generally shall be considered as separate entities in determining whether the concern which is to perform the contract meets the applicable standards for a responsible prospective contractor. (See § 1–1.701 regarding the use of the term "affiliates" in the definition of a small business concern; see also the definition of "affiliates" in § 1–1.701–2 which shall apply to all business concerns, including small business concerns, for the purpose of this Subpart 1–1.12.)

(b) The record of performance and integrity of an affiliated concern which may adversely affect the responsibility of the prospective contractor shall be considered by the contracting officer when making a determination of responsibility.

§ 1–1.1205 Procedures for determining responsibility of prospective contractors.

§ 1–1.1205–1 General.

(a) Before making a determination of responsibility (see § 1–1.1204), the contracting officer shall have in his possession information sufficient to satisfy himself that a prospective contractor currently meets the minimum standards set forth in § 1–1.1203, to the extent that such standards are applicable to a specific procurement.

(b) Maximum practicable use shall be made of currently valid information which is on file within the agency. Each agency shall, at such level and in such manner as it deems appropriate, maintain records and experience data which shall be made readily available for use by contracting officers in the placement of new procurement.

§ 1–1.1205–2 When information will be obtained.

Generally, information regarding the responsibility of a prospective contractor, including preaward surveys when deemed necessary (see § 1–1.1205–4), shall be obtained promptly after bid opening or receipt of proposals. However, in negotiated procurements, especially those involving research and development, such information may be obtained before the issuance of requests for proposals. Notwithstanding the foregoing, information regarding financial resources (see §1–1.1203–1(a)) and performance capability (see § 1–1.1203–1 (b) and (c)) shall be obtained on as current a basis as feasible with relation to the date of contract award.

§ 1–1.1205–3 Sources of information.

Information regarding the responsibility of prospective contractors may be obtained from the following sources:

(a) Any list of debarred, suspended, or ineligible concerns or individuals established pursuant to § 1–1.602;

(b) From the prospective contractor. This should include representations and other information contained in or attached to bids and proposals; replies; replies to questionnaires; financial data such as balance sheets, profit and loss statements, cash forecasts, and financial histories of the contractor an affiliated concerns; current and past production records; personnel records; lists of tools, equipment, and facilities; written statements or commitments concerning financial assistance and subcontracting arrangements; and analysis of operational control procedures. Where it is considered necessary by the contracting officer to prevent practices prejudicial to fair and open competition or for other reasons, prospective contractors may be required to submit statements concerning their ability to meet any of the minimum standards set forth in § 1–1.1203, and company ownership and control;

(c) Other information existing within the agency, including records on file and knowledge of personnel within the purchasing office making the procurement, other purchasing offices, related activities, audit activities, and offices concerned with contract financing;

(d) Publications, including credit ratings, trade and financial journals, and business directories and registers; and

(e) Other sources. These should include suppliers, subcontractors, and customers of the prospective contractor; banks and financing institutions; commercial credit agencies; Government departments and agencies; purchasing and trade associations; and better business bureaus and chambers of commerce.

§ 1–1.1205–4 Preaward surveys.

(a) A preaward survey is an evaluation of a prospective contractor's performance capability under the terms of a proposed contract. Such evaluation shall be used by the contracting officer as an aid in determining the prospective contractor's responsibility. The evaluation may be accomplished by use of (1) data on hand, (2) data from another Government agency or commercial source, (3) an onsite inspection of plant and facilities to be used for performance of the proposed contract, or (4) any combination of the above. Preaward surveys shall be conducted in accordance with agency procedures.

(b) A preaward onsite survey shall be made when the information available to a purchasing office (see § 1–1.1205–3) is not sufficient to enable the contracting officer to make a determination regarding the responsibility of a prospective contractor (see paragraph (c) of this section). When this situation occurs, the contracting officer shall request the appropriate agency officials to make a preaward survey for the purpose of providing needed responsibility information in such detail as is commensurate with the dollar value and complexity of the procurement. In requesting a preaward survey, the contracting officer shall identify the factors which he believes should receive special attention. The factors selected by the contracting officer shall be applicable to all firms responding to the solicitation and shall be considered in all preaward surveys performed in connection with the solicitation.

(c) Where a procurement is significant in terms of the dollar value or the critical nature of the requirements, a verification of the information available regarding current workload and financial capacity shall be considered. The consideration of such a verification shall not be affected by the apparent sufficiency of the information available to the purchasing office to indicate contractor responsibility with respect to the standards set forth in § 1–1.1203–1 (a) and (b).

§ 1–1.1206 Subcontractor responsibility.

(a) To the extent that a prospective contractor proposes to perform the contract by subcontracting, determinations regarding the responsibility of prospective subcontractors may be necessary in order to determine the responsibility of the prospective prime contractor. Determinations concerning the responsibility of prospective subcontractors generally should be made by the prospective prime contractor (see § 1–1.603 relating to subcontractors listed on any list of debarred, suspended, and ineligible contractors). A prospective prime contractor may be required to (1) provide written evidence regarding the responsibility of proposed subcontractors, or (2) show that he has an acceptable and effective purchasing and subcontracting system which includes a method for determining subcontractor responsibility.

(b) Notwithstanding the general ability of a prospective contractor to demonstrate the responsibility of his prospective subcontractors, it may be in the best interest of the Government to make a direct determination of the responsibility of one or more prospective subcontractors prior to award of the prime contract. Illustrations of such situations where direct determination would be appropriate include the following: (1) Medical items, (2) supplies or services which are so urgently needed that it is necessary for the Government to go beyond the normal process in determining contractor responsibility, and (3) supplies or services, a substantial portion of which will be subcontracted. Determination of prospective subcontractor responsibility by the Government shall be based on the same factors which are applicable to determinations of prospective prime contractor responsibility.

§ 1–1.1207 Disclosure of preaward data.

Data, including information obtained from a preaward survey, accumulated for purposes of determining the responsibility of a prospective contractor shall not be released outside the Government, and shall not be made available for inspection by individuals, firms, or trade organizations. Such data may be disclosed to, or summarized for, other elements within the Government upon request. Prior to making a determination of responsibility, such data may be discussed with the prospective contractor as determined necessary by the purchasing office. After an award, the findings of the preaward survey may be discussed by the contracting officer with the company surveyed as provided in § 1–2.408.

Subpart 1–1.18—Postaward Orientation of Contractors

Section 1–1.1802 (b) is revised to read as follows:

§ 1–1.1802 Policy.

* * * * * *

(b) However, a postaward orientation conference may not be used in substitution for affirmative preaward determinations as to a bidder's responsibility, e.g., as to his willingness and ability to comply with the equal employment opportunity requirements.

PART 1–2—PROCUREMENT BY FORMAL ADVERTISING

Subpart 1–2.1—Use of Formal Advertising

Section 1–2.103(c) is revised to read as follows:

§ 1–2.103 General requirements for formally advertised contracts.

* * * * * *

(c) Determination has been made as to the responsible bidder (see Subpart 1–1.12) whose bid is responsive to the invitation for bids and is most advantageous to the Government, price and other factors considered, and award is made as prescribed in Subpart 1–2.4.

Subpart 1–2.4—Opening of Bids and Award of Contract

1. Section 1–2.404–2(e) is revised as follows:

§ 1–2.404–2 Rejection of individual bids.

* * * * * *

(e) Low bids received from firms determined to be not responsible, pursuant to Subpart 1–1.12, shall be rejected (but if a bidder is a small business concern, see Subpart 1–1.7 with respect to certificates of competency).

* * * * * *

2. Section 1–2.407–2 is revised to read as follows:

§ 1–2.407–2 Responsible bidder—reasonableness of price.

Before awarding the contract, the contracting officer shall determine that a prospective contractor is responsible (see Subpart 1–1.12) and that the prices offered are reasonable. The price analysis techniques set forth in § 1–3.807–2(b)(1) may be used as guidelines, where appropriate, but determination in each case shall be made in the light of all prevailing circumstances. Particular care must be taken in cases where only a single bid is received.

PART 1–3—PROCUREMENT BY NEGOTIATION

Subpart 1–3.1—Use of Negotiation

Section 1–3.101(b)(4) is revised to read as follows:

§ 1–3.101 General requirements for negotiation.

* * * * * *

(b) * * *

(4) The prospective contractor has been determined to be responsible in accordance with Subpart 1–1.12.

* * * * * *

Subpart 1–3.8—Price Negotiation Policies and Techniques

Section 1–3.802(b) is revised to read as follows:

§ 1–3.802 Preparation for negotiation.

• • • • •

(b) *Selection of prospective sources.* Selection of qualified sources for solicitation of proposals is basic to sound prices. Proposals should be invited from a sufficient number of competent potential sources to insure adequate competition (see §§ 1–1.302, 1–1.702, 1–1.1203, and 1–3.101). The bidder's mailing lists prescribed by § 1–2.205 should be used where appropriate.

• • • • •

PART 1–18—PROCUREMENT OF CONSTRUCTION

Subpart 1–18.1—General Provisions

Section 1–18.106 is revised to read as follows:

§ 1–18.106 Minimum standards for responsible prospective contractors.

In evaluating the financial resources and ability to perform of a prospective contractor, the contracting officer, in addition to other pertinent factors (see Subpart 1–1.12), shall consider whether a bid guarantee has been and performance and payment bonds are to be furnished. However, the mere ability to furnish bonds shall not, in itself, be considered acceptable evidence of adequate financial resources and ability to perform. Where the prospective contractor is a joint venture, the contracting officer shall consider the financial resources and individual capacities of all its members in determining the responsibility of the joint venture.

PART 1–30—CONTRACT FINANCING

Subpart 1–30.2—Basic Policies

1. Section 1–30.210(a) is revised to read as follows:

§ 1–30.210 Financing not a handicap.

(a) The need for advance payments or for progress payments or for a guaranteed loan (with reasonable percentage of guarantee) shall not be treated as a handicap in awarding contracts to those qualified contractors who are deemed competent and capable of satisfactory performance (see §§ 1–1.1204, 1–2.407, 1–30.211, and 1–30.212). The ability of the contractor to perform the contract, including the availability of money or credit necessary for performance, must be reasonably assured in all cases. Awards which are otherwise proper must not be deterred by the necessity for providing reasonable contract financing. A contractor deemed reliable, competent, capable, and otherwise responsible, must not be regarded as any less responsible by reason of the need for reasonable contract financing provided or guaranteed by a procuring agency. Responsible personnel must endeavor to assure that full, proper, and prudent use is made of contract financing, in such ways that financial difficulties will not bring about delay or failure in performance or result in monetary losses to the Government. In selection of an appropriate method for provision of funds, contractors will not be expected to seek or obtain loans or credit (1) at excessive interest rates or other exorbitant charges, or (2) from agencies of the Government other than the procurement agency.

• • • • •

2. Section 1–30.211 is revised to read as follows:

§ 1–30.211 Financial responsibility of contractors.

Procuring activities in placing contracts shall give due regard to the financial capabilities of the supplier. Financial difficulties encountered by contractors and subcontractors may (a) disrupt production schedules, (b) cause wastage of manpower and materials, and (c) if connected with guaranteed loans, advance payments, or progress payments, result in monetary loss to the Government. Also, if financial crises occur in the course of a contractor's production, the need for continued production may make guaranteed loans or advance payments imperative for continuance of such production, even though monetary losses may be likely under the circumstances. In order to reduce these hazards so far as possible, contracts should be entered into only with those potential contractors who meet the requirements of § 1–1.1204 or § 1–2.407, and who have the financial capacity or credit (giving due regard to the availability of progress payments, guaranteed loans, and advance payments), technical skill, management competence, and plant capacity and facilities (including subcontracting capacity) reasonably to assure their ability to perform their contracts in accordance with their terms. Care should be taken also to the extent practicable to avoid the placement of additional contracts or subcontracts with contractors in situations where additional contracts will overload the contractor's production capacity, overextend his financial resources and credit, and thus tend to interfere with timely performance of contracts on hand, and create need for additional contract financing arrangements, which may be impossible to establish on a prudent basis. In all cases, whether involving formal advertising or negotiation, it must be determined that the contractor is financially and otherwise able to perform the contract. In addition, consideration must be given to the judgment, skill, and integrity of the potential contractor, and to his reputation and experience, including prior work of a similar nature done by him, and the other factors set forth in §§ 1–1.1203, 1–2.407, and 1–3.102, as appropriate. Persons placing subcontracts, at all levels of subcontracting, should be encouraged to apply these standards in placing subcontracts. Some practical examples of important points which should be kept in mind are set out in §§ 1–30.211–1 through 1–30.211–6.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Effective date. These regulations are effective August 30, 1971, but may be observed earlier.

Dated: August 24, 1971.

ROBERT L. KUNZIG,
Administrator of General Services.

Chapter 5A—Federal Supply Service, General Services Administration

REVISION OF GSA FORM 1246, GSA SUPPLEMENTAL PROVISIONS (A.I.D. PROCUREMENT)

Chapter 5A of title 41 is amended as follows:

PART 5A–2—PROCUREMENT BY FORMAL ADVERTISING

Subpart 5A–2.2—Solicitation of Bids

Section 5A–2.201–70(e)(2) is amended to read as follows:

§ 5A–2.201–70 Forms to be used.

• • • • •

(e) • • •

(2) GSA Form 1246, GSA Supplemental Provisions (A.I.D. Procurement), July 1971 edition, shall be incorporated by reference in each solicitation for offers under the AID buying program by using the following provision:

> GSA Form 1246, GSA Supplemental Provisions (A.I.D. Procurement), July 1971 edition, receipt of which is acknowledged by the bidder, is hereby incorporated by reference. A copy of GSA Form 1246, if not enclosed, is available upon request.

• • • • •

PART 5A–16—PROCUREMENT FORMS

The table of contents for Part 5A–16 is amended as follows:

Sec.
5A–16.950–1246 GSA Form 1246, GSA Supplemental Provisions (A.I.D. Procurement), July 1971 edition.

Subpart 5A–16.9—Illustrations of Forms

Section 5A–16.950–1246 is revised as follows:

§ 5A–16.950–1246 GSA Form 1246, GSA Supplemental Provisions (A.I.D. Procurement), July 1971 edition.

PART 5A–74—SPECIAL PURCHASE PROGRAMS

Subpart 5A–74.4—Overseas Supply Support Program

Section 5A–74.407–2(b) is amended to read as follows:

§ 5A–74.407–2 Agency for International Development (AID).

• • • • •

(b) *Buy American Act—Restrictions on source.* Article 14 of GSA Form 1246 deletes Article 14 (Buy American Act) of SF 32 and paragraph 7 (Buy American Certificate) of SF 33.

• • • • •

NOTE: The revised form mentioned in § 5A–2.201–70(e)(2) and listed in § 5A–16.950–1246 is filed as part of the original document. Copies may be obtained from General Services Administration (3BRD), Washington, D.C. 20407.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); 41 CFR 5–1.101(c))

Effective date. These regulations are effective 30 days after the date shown below.

Dated: August 16, 1971.

L. E. SPANGLER,
Acting Commissioner,
Federal Supply Service.

Chapter 101—Federal Property Management Regulations

SUBCHAPTER E—SUPPLY AND PROCUREMENT

CLARIFICATION OF POLICY ON PROCUREMENT OF PERSONAL CONVENIENCE ITEMS AND PROCUREMENT OF SIMILAR ITEMS FROM GSA SOURCES

The policy on procurement of personal convenience items is clarified and strengthened, and guidelines are provided to enable agencies to more effectively restrict the procurement and use of such items. The policy guidance on requests for waivers to procure similar items from other than GSA is relocated to provide a single source reference for such guidance.

PART 101–25—GENERAL

The table of contents of Part 101–25 is amended to read as follows:

Sec.
101–25.105 [Reserved]

Subpart 101–25.1—General Policies

The text of § 101–25.105 is deleted and the caption revised to read as follows:

§ 101–25.105 [Reserved]

PART 101–26—PROCUREMENT SOURCES AND PROGRAMS

The table of contents of Part 101–26 is amended to read as follows:

Sec.
101–26.100–2 Request for waivers.
101–26.103 Establishing essentiality of requirements.
101–26.103–1 Policy for personal property.
101–26.103–2 Restriction on personal convenience items.

Subpart 101–26.1—General

1. Section 101–26.100 is revised as follows:

§ 101–26.100 Scope of subpart.

This subpart provides policy guidance of a general nature concerning procurement of lowest cost items obtainable from GSA supply sources; availability from GSA of special buying services in addition to the specified GSA procurement sources; criteria for placing end-of-year purchase documents with GSA and for insuring that end-of-year requisitions placed with GSA obligate the applicable fiscal year appropriation; and justification requirements to support negotiated procurement by GSA for other agencies.

2. Section 101–26.100–1 is revised and § 101–26.100–2 is added as follows:

§ 101–26.100–1 Procurement of lowest cost items.

GSA provides under both its supply distribution system and the Federal Supply Schedule program, lines of similar items to meet particular end-use requirements. Although these similar items may differ in terms of price, quality, and essential characteristics, they can often serve the same functional end-use procurement needs of the various ordering agencies. Therefore, in submitting requisitions or purchase orders for an item obtainable from both GSA stock and Federal Supply Schedule contracts, agencies shall utilize the source from which the lowest cost item can be obtained which will adequately serve the functional end-use purpose.

§ 101–26.100–2 Request for waivers.

When an agency required to use GSA stock or Federal Supply Schedule items determines that such items will not serve the required functional end-use purpose of the item proposed to be procured, requests to waive the requirement for use of GSA sources shall be submitted to GSA for consideration. (Personal preference and subjective evaluations are not acceptable as sufficient justification for a waiver.) However, a waiver is not required where a desired similar item will be procured at a lower cost from another GSA source in accordance with the policy set forth in § 101.26.100–1 relating to the acquisition of the lowest cost item from GSA sources.

(a) Requests for waivers shall be submitted to the Commissioner, Federal Supply Service, General Services Administration, Washington, D.C. 20406, and, if considered justified, will be approved. If disapproved, the requesting office will be so notified. Such requests shall contain:

(1) Complete description of the item requested. (Descriptive literature such as cuts, illustrations, drawings, and brochures which show the characteristics or construction of the item or explain its operation should be furnished wherever possible in satisfaction of this requirement.)

(2) Comparison of price and pertinent technical differences between the item requested and the GSA item:

(i) Inadequacies of the GSA item in performing required functions.

(ii) Advantages of the item requested, such as technical, economic, or other.

(3) Quantity required. (If demand is recurrent (estimate annual usage), nonrecurrent, or unpredictable, so state.)

(4) Other pertinent date when applicable.

(b) Agencies shall not initiate action to procure similar items from non-GSA sources until a request for a waiver has been requested from and approved by GSA. The fact that action to procure a similar item has been initiated will not influence GSA action on a request for waiver.

3. Section 101–26.102–2(b) is revised as follows:

§ 101–26.102–2 Utilization by military agencies.

• • • • •

(b) The items involved are not properly obtainable from GSA stock or Federal Supply Schedules.

4. Sections 101–26.103, 101–26.103–1, and 101–26.103–2 are added as follows:

§ 101–26.103 Establishing essentiality of requirements.

§ 101–26.103–1 Policy for personal property.

To obtain maximum benefit from Government funds available for procurement of personal property, each executive agency shall:

(a) Insure that personal property currently on hand is being utilized to the fullest extent practical and provide supporting justification prior to effecting new procurement for similar type property. (When the proposed procurement is for similar items from non-GSA sources, the provisions of § 101–26.100–2 apply.)

(b) Procure the minimum quantity and quality of property which is required to support the mission of the agency and to satisfy the function for which the property is required.

(c) Limit procurement of different varieties, types, sizes, colors, etc., of required items to those essential in satisfying the functional end-use purpose. To this end the quantity, quality, and variety of personal property required to adequately perform the end-use function should be determined prior to initiation of procurement processes.

§ 101–26.103–2 Restriction on personal convenience items.

Government funds may be expended for pictures, objects of art, plants, or flowers (both artificial and real), or any other similar type items when such items are included in a plan for the decoration of Federal buildings approved by the agency responsible for the design and construction. Determinations as to the need for purchasing such items for use in space assigned to any agency are judgments reserved to the agency. Determinations with respect to public space such as corridors and lobbies are reserved to the agency responsible for operation of the building. Except as otherwise authorized by law, Government funds shall not be expended for pictures, objects of art, plants, flowers (both artificial and real), or any other similar type items intended solely for the personal convenience or to satisfy

the personal desire of an official or employee. These items fall into the category of "luxury items" since they do not contribute to the fulfillment of missions normally assigned to Federal agencies.

Subpart 101–26.3—Procurement of GSA Stock Items

Section 101–26.301–1 is revised as follows:

§ 101–26.301–1 Similar items.

(a) Agencies required to procure, exclusively, items listed in the GSA Stock Catalog shall utilize such items in lieu of procuring similar items from other sources when the GSA items will adequately serve the required functional end-use purpose.

(b) When an agency determines that items available from GSA stock will not serve the required functional end-use purpose of the item proposed to be procured, a request to waive the requirement to use this source shall be submitted to GSA for consideration in accordance with the provisions of § 101–26.100–2.

Subpart 101–26.4—Purchase of Items From Federal Supply Schedule Contracts

Section 101–26.401–3 is revised as follows:

§ 101–26.401–3 Similar items.

(a) Agencies required to use Federal Supply Schedule contracts shall obtain needed items from this source in lieu of procuring similar items from other sources when the Federal Supply Schedule item will adequately serve the required functional end-use purpose. This is not applicable where procurement (1) does not exceed the amount set forth in the "Small Requirements" provision, (2) is to be effected under the "Urgent Requirements" provision, or (3) is for delivery outside the geographical area specified in the scope of contract provision.

(b) When an agency determines that items available from Federal Supply Schedule contracts will not serve the required functional end-use purpose of the item proposed to be procured, a request to waive the requirement to use this source shall be submitted to GSA for consideration in accordance with the provision of § 101–26.100–2.

Section 101–26.401–4 is amended as follows:

§ 101–26.401–4 Exceptions to mandatory use.

* * * * *

(f) [Deleted]

(Sec. 205(c) 63 Stat. 390; 40 U.S.C. 486(c))

Effective date. This regulation is effective upon publication in the FEDERAL REGISTER (8–31–71).

Dated August 24, 1971.

ROBERT L. KUNZIG,
Administrator of General Services.

[FR Doc.71–12716 Filed 8–30–71;8:49 am]

PART 101–26—PROCUREMENT SOURCES AND PROGRAMS

Establishing Policy on Adjusting Quantities Requisitioned

A policy is established to permit GSA a reasonable degree of latitude in adjusting quantities requisitioned to conform to the applicable bulk/shipping container pack.

The table of contents for Part 101–26 is amended by the addition of the following new entry:

Sec.
101–26.312 Adjusting quantities requisitioned.

Subpart 101–26.3—Procurement of GSA Stock Items

Section 101–26.312 is added as follows:

§ 101–26.312 Adjusting quantities requisitioned.

Quantities on requisitions may be adjusted, upward or downward, to allow GSA to ship the entire quantity from bulk stocks. Adjustments will be limited to 10 percent of the quantity requisitioned or $5, whichever will permit the greater adjustment potential. Such adjustments will be made only when shipment of the exact quantity requisitioned would result in a mixture of one or more full shipping containers (as originally received from GSA suppliers), and a lesser quantity repackaged by GSA. Requisitions for quantities less than one full shipping container generally will not be adjusted (upward). Agencies may use advice code 2D, "Do not adjust," to preclude adjustment by GSA of requisitioned quantities. However, use of advice code 2D shall be limited to those cases where space and fund limitations or shelf-life considerations make it uneconomical for the user to accept more than the quantity requisitioned.

(Sec. 205(c) 63 Stat. 390; 40 U.S.C. 486(c))

Effective date. This regulation is effective upon publication in the FEDERAL REGISTER (8–31–71).

Dated: August 24, 1971.

ROBERT L. KUNZIG,
Administrator of General Services.

Title 43—PUBLIC LANDS: INTERIOR

Chapter II—Bureau of Land Management, Department of the Interior

[Circular No. 2312]

PART 2720—PUBLIC SALE-PUBLIC LAND SALE ACT

Expiration of Authority

The purpose of this amendment is to delete the regulations which implemented the Public Land Sale Act of September 19, 1964, as amended (43 U.S.C. 1421–1427). That Act expired on December 23, 1970. Part 2720 is being deleted in its entirety. The regulations contained therein will be applied to sales initiated under the regulations prior to December 23, 1970, and which, in accordance with section 7 of the Act may still be completed. No other substantive changes are intended.

It is the policy of the Department of the Interior to give notice of proposed rule making and to invite the public to participate in rule making except where such participation would be impracticable, unnecessary or contrary to the public interest and a specific finding to this effect is published with the rules or regulations (36 F.R. 8336, May 4, 1971). Public participation is unnecessary in this case since the amendment simply removes provisions from the regulations where the legal effect has expired by operation of law.

Part 2720 of Chapter II, Title 43 of the Code of Federal Regulations is deleted in its entirety.

Effective date: August 31, 1971.

W. T. PECORA,
Acting Secretary of the Interior.

AUGUST 24, 1971.

Title 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

[Docket No. 18931; FCC 71–848]

PART 2—FREQUENCY ALLOCATION AND RADIO TREATY MATTERS: GENERAL RULES AND REGULATIONS

PART 87—AVIATION SERVICES

Channel Spacing To Provide Additional Frequencies

Report and order. In the matter of amendment of Parts 2 and 87 of the rules to provide additional frequencies in the 128.825–132.025 MHz band by permitting the use of 25 kHz channel spacing, Docket No. 18931, RM–1507.

1. The Commission on August 7, 1970, released a combined Notice of Proposed Rule Making and Notice of Inquiry in the above-entitled proceeding. The notice was published in the FEDERAL REGISTER (35 F.R. 1277) on August 12, 1970, and provided for filing comments and reply comments. The time allowed for filing comments and reply comments has expired. The notice was in response to a petition for rule making (RM 1507), filed by Aeronautical Radio, Inc. (ARINC), proposing that the number of frequencies in the 128–132 MHz band be doubled by permitting the use of 25 kHz channel spacing rather that the 50 kHz now authorized, and that 6A9 emission be authorized in that band.

2. The Commission proposed rules in accordance with the ARINC request to provide for 25 kHz channel spacing. With respect to the use of 6A9 emission, however, we did not believe that ARINC had furnished sufficient specific information for proper evaluation. We, therefore, did not propose the use of 6A9 emission, but issued a Notice of Inquiry on this aspect of the petition.

3. In response to the notices, comments were filed by Aircraft Owners and Pilots Association (AOPA), In-Flight Devices Corp. (IFD), Collins Radio Co. (Collins) and ARINC. All commentators either expressly concur in, or do not object to, the proposed 25 kHz channel spacing. AOPA supports a footnote provision in the proposed rule change to permit the continued use of 50 kHz equipment for 5 years asserting that this will provide a reasonable time period to accommodate smaller airlines and larger general aviation aircraft that utilize ARINC's services and the 5-year period will permit an orderly transition to more sophisticated airborne equipment without undue hardship. AOPA states, however, it does not want 25 kHz spacing for airline operational purposes to establish a precedent which will later be applicable to, and work a hardship on, general aviation, operating in the aeronautical band other than 128–132 MHz by requiring the use of more sophisticated equipment. IFD contends that 25 kHz channel spacing as proposed should be accompanied by a substantial tightening of the frequency tolerance of aviation ground stations to minimize adjacent channel interference. IFD asserts that if the tolerance in the rules were changed to 0.0005 percent for ground stations, adjacent channel interference would be minimized. IFD requests that no action be taken to split channels without concurrent action to require a more stringent frequency tolerance for the ground stations.

4. Collins generally supports the proposal to provide for 25 kHz channels and says the Commission should proceed to adopt the proposed rule changes. Collins also furnished information concerning the feasibility of field modification of 50 kHz equipment to operate on 25 kHz channels. Collins states that it is one of the major manufacturers of aeronautical radio communications equipment affected by the rule changes proposed in this proceeding. The Company explains that current production transmitters and receivers are designed for operation in a 25 kHz environment and that the equipment can, at the option of the users, be converted from 50 kHz to 25 kHz operation by a simple field modification at an estimated cost of $400 including parts and labor. Collins states there are a number of earlier transmitters and receivers still in wide use by aircraft that employ the ARINC networks and other stations operating in the 128–132 MHz band and that about 10,000 sets manufactured by Collins could be modified for 25 kHz channel operation for about $1,000 each; and that about another 10,000 units used mostly by business aircraft and costing about $2,500, made in 1962 and earlier could not economically be modified and would have to be declared obsolete, except that they would continue to be satisfactory for operation on 50 kHz channels in the balance of the aeronautical 118–136 MHz band. Additionally, Collins discusses the need for careful consideration of the acceptable frequency tolerance of both transmitters and receivers for airborne and ground stations operating in the 128–132 band MHz. Finally, Collins proposes that as a consequence of the adoption of this proposed rule change, that all ground station transmitters, government and nongovernment, employed in the band 118–136 MHz be required to meet 0.003 percent frequency tolerance within 1 year to insure compatability with aircraft receivers designed for operation with a 25 kHz channel capability. With respect to ARINC's request for authority to use an emission for data link operations, Collins agrees that the designator 6A9 is too imprecise but that the Commission should adopt rules or policy governing the regular use of data link systems, as a separate matter, as early as may be appropriate.

5. ARINC supports the rule changes providing for 25 kHz channels as proposed in our notice but urges the Commission not to specify any date for the termination of the use of equipment designed to operate on 50 kHz channels. ARINC asserts that whereas aircraft currently being delivered to domestic airlines are configured to operate with 25 kHz interleaved channels, many domestic and foreign flag aircraft still in use do not have this capability, and that reasonable time should be afforded to amortize this investment. With respect to the use of an emission for data link operations, ARINC furnished additional specific technical information in response to the Notice of Inquiry and urges the Commission to proceed to amend the rules to authorize an emission as hereinafter discussed.

6. The comment of AOPA that the rule changes proposed in this proceeding should not set a precedent that will adversely affect general aviation operating in other aeronautical bands is not a valid argument for not making necessary rule changes as proposed in this docket for the frequencies used by enroute stations. We cannot refuse to adopt changes in our rules needed now because such action may establish a precedent that, conjecturally, may later have adverse effects beyond the scope of this proceeding. If we later propose, as a result of a petition for rule making, or on our own motion, to extend the 25 kHz channels to other than the 128–132 MHz aeronautical bands, this will be undertaken through our usual rule making proceedings with advance public notice and provision for the filing of comments by the public and interested parties.

7. The concern expressed as to the suitability of our present frequency tolerances for ground and aircraft transmitters operating with 25 kHz channel spacing is noted. However, these frequency tolerances are not a factor which is decisively applicable to this proceeding or sufficient reason to deny ARINC authority to operate now with 25 kHz channel spacing. The question of the suitability of our present frequency tolerances for 25 kHz channel spacing was considered by us in 1964 in Docket 14452. That Docket was a part 87 rule making proceeding to implement certain requirements of the 1959 Geneva Radio Regulations regarding frequencies, frequency stability and definitions. After exhaustive study and review of technical information and consideration of 274 comments filed in response to the Notice of Proposed Rule Making released in that proceeding, we conclude, in part, that "A 0.005 percent tolerance for ground and aircraft transmitters, together with suitable receivers, will allow for an unrestricted use of 50 kc/s channel spacing and may permit use of 25 kc/s channeling" and that "A 0.003 percent tolerance for all equipment is, of all the alternatives, the most favorable to extensive use of 25 kc/s channel spacing" (paragraph 9 (b) and (d), second report and order, adopted July 29, 1964). Although, as indicated above, we found the 0.003 percent tolerance for all equipment to be the most favorable to extensive use of 25 kc/s channeling, we compromised then in order to ease the economic impact on the aircraft licensee and specified in the rules a frequency tolerance of 0.003 percent for ground stations and 0.005 percent for aircraft stations taking into consideration that the 0.005 percent tolerance would also permit the use of 25 kc/s channeling.[1] Thus, we believe tolerances contained in our rules will not prevent ARINC from instituting the 25 kHz channel operation as requested.

8. We have noted ARINC's comment that additional time, beyond the 5-year period specified in the Notice of Proposed Rule Making, should be allowed to phase out the use of 50 kHz channel equipment to permit amortization of equipment investment by some domestic and foreign carriers. A study of type acceptance data in Commission files for many aircraft station communication transmitter types has shown that only a small percentage of those presently type accepted fail to meet a 25 kHz occupied bandwidth limit, and we believe most of those which fail to meet this limit are not types normally used by scheduled air carriers. Therefore, we have not specified a cutoff date as originally proposed, inasmuch as few transmitters not meeting the 25 kHz limit are expected to be operated in the 128.825–132.000 MHz band. (Licensees may find that performance characteristics of the receiver, rather than the associated transmitter, are the deciding factor in whether any particular item of aircraft equipment must be replaced or modified to operate in a 25 kHz channel spacing environment. The Commission's

[1] At the time of the release of the NPRM in this proceeding, our rules contained a typographical error. The allowable frequency tolerance for aircraft stations in § 87.65(a)(5) was incorrectly shown as 0.003 percent rather than 0.005 percent as specified in our report and order adopted July 29, 1964, in Docket No. 14452. That error was corrected by Transmittal Sheet No. 3 to Volume V of the rules and regulations January 1970 Edition.

rules do not specify performance characteristics for receivers in aircraft stations, other than the radiation limits and certification thereto in part 15.) Instead of the cutoff date originally proposed, the rules herein adopted require that all transmitters type accepted for use in this band on or after February 1, 1972 meet the 25 kHz authorized bandwidth limit and permit use of transmitters type accepted for use in this band prior to that date until further notice.

9. In response to Notice of Inquiry concerning ARINC's request for new emission authorization for data link service, only ARINC commented and urged that the Commission proceed to authorize such an emission. In support of this, ARINC furnished technical information entitled Voice and Data Communications in the Aeronautical Service, compiled by Nathan D. Steele, Jr., and dated September 14, 1970. Additionally, ARINC asserts as follows:

• • • ARINC is currently testing the various candidate systems, and the final decision as to which system, or systems, will be implemented has not been made. Probably two systems will be used—one for the domestic environment where high signal-to-noise ratios are encountered and a separate system for ARINC's extended range VHF overocean environment where the signal-to-noise ratios are significantly lower.

Implementation of any of these systems will not in any way derogate the voice communications system now employed. The voice bandwidth compatible techniques (audio phase shift keying, audio frequency shift keying, carrier phase shift keying, and carrier frequency shift keying) can either be assigned discrete channels in any given area or multiplexed on top of the voice carrier. The audio receiving equipment on board the aircraft will only produce the audio bandwith and reception will not be derogated by the existence of higher order signals. The pulse duration modulation (PDM) technique will be used to transmit both analogue voice signal and digital data and during transition separate channels for 6A3 and PDM emission will be maintained. The advantages of data link are twofold. First, data link transmits information at a vastly improved rate over voice with the same bandwidth. Second, it will permit the utilization of more of the 25 kHz channel than presently occupied by a single voice channel. The voice bandwith compatible techniques will be multiplexed on top of existing voice signals thereby permitting the use of 12 kHz, not including guardbands. Similarly, the PDM technique will transmit data and voice on a 13 kHz bandwidth.

10. We believe that the additional information submitted by ARINC on the purpose, need and characteristics of the emission desired for data link service is now adequate to justify a rule change to authorize such an emission.

11. *Accordingly, it is ordered,* That pursuant to the authority contained in sections 4(i) and 303(b) (g) and (r) of the Communications Act, as amended, our rules are amended effective October 5, 1971, as set forth below. *It is further ordered,* That this proceeding is hereby terminated.

(Secs. 4, 303, 48, Stat. as amended, 1066, 1082; 47 U.S.C. 154, 303)

Adopted: August 18, 1971.

Released: August 23, 1971.

FEDERAL COMMUNICATIONS COMMISSION,[2]
[SEAL] BEN F. WAPLE,
Secretary.

§ 2.106 [Amended]

1. Section 2.106 is amended by changing the footnote reference in column 10 for the frequency band 128.825–132 MHz from NG34 to NG67, and a new footnote is added to read as follows:

NG67. The spacing between frequency assignments in this band shall be 25 kHz. The first and last assignable frequencies are those indicated in column 10.

2. In § 87.67(b)(1), the table is amended by adding A9 as a new class of emission and by adding footnotes 5 and 6 in the column for authorized bandwidth above 50 MHz for A3 and A9 emission, respectively, to read as follows:

§ 87.67 Types of emission.

• • • • • •

(b) (1) • • •

Class of emission	Emission designator	Authorized bandwidth: Below 50 MHz	Above 50 MHz	Frequency deviation
• • •	• • •	*Kilohertz* • • •	*Kilohertz* • • •	*Kilohertz* • • •
A3	6A3	8.0	[5]50	
	• • •	• • •	• • •	• • •
A3J [3]	3A3J [3]	4.0		
A9	13A9		[6]25	
F1	L7F1	1.7		
• • •	• • •	• • •	• • •	• • •

• • • • • •

[5] In the band 128.825–132.000 MHz, the authorized bandwidth is 25 kHz. The 25 kHz limit applies to all transmitters type accepted for use in this band on or after Feb. 1, 1972. Transmitters type accepted for use in this band prior to Feb. 1, 1972, will continue to be subject to the 50 kHz limit until further notice.

[6] This emission is authorized only for audio phase and frequency shift keying and carrier phase and frequency shift keying for digital data link purposes in the 128.825–132.000 MHz band when the channel on which the signal is transmitted is not used for voice communications; Or, if voice communication the emission is authorized, as specified herein, provided it is multiplexed on the voice carrier without derogation to voice or other higher order signals.

3. In § 87.295, the frequencies listed in paragraph (b) are amended to read:

§ 87.295 Continental U.S. (excluding Alaska).

[Docket No. 18425; FCC 71-879]

PART 73—RADIO BROADCAST SERVICES

Operation of VHF and UHF TV Broadcast Stations by Remote Control

Second Report and Order. In the matter of amendment of Part 73, Subpart E of the Commission's rules and regulations governing television broadcast stations concerning the operation of VHF and UHF television broadcast stations by remote control; RM-1340.

1. On March 17, 1971, the Commission adopted amendments of its rules governing the remote control of television broadcast stations. On the same date, it issued a Further Notice of Proposed Rule Making (FCC 71-286) in the same docket, soliciting comments concerning the requirements of paragraph (f) of § 73.676 of the amended rules, which reads as follows:

Suitable test signals generated at the remote control point shall be transmitted in the vertical interval pursuant to § 73.682(a)(21). These signals shall be received and observed at the remote control point for the purpose of verifying that the entire system is so adjusted and operated that the visual modulation envelope meets the requirements of the Commission's rules.

A note appended to this rule suspended its effectiveness pending a determination of the characteristics and manner of use of such test signals. It was the purpose of the further notice to obtain information on which any necessary or desirable amplification of the rule may be based.

2. The Commission requested interested parties to comment on all aspects of the matter, and particularly on the following points:

(1) The characteristics of specific test signals which could most usefully be employed.

(2) Whether the rules should specify the duration of transmission of each of selected test signals, or specify a composite test signal.

(3) Whether the rules should set the levels for test signal transmissions.

(4) The times at which the test signals should be transmitted.

(5) Whether the same test signals should accompany monochrome and color transmissions.

(6) Whether the rules should specify the line or lines to be occupied by the test signals.

As extended by order of April 28, 1971, the deadlines for filing comments and reply comments in this proceeding were May 17, 1971 and May 28, 1971, respectively. The matter is, accordingly, ready for decision.

3. The following parties filed timely comments:

Electronic Industries Association (EIA).
Channel 3, Inc. (KVDO–TV, Salem, Oreg.).
KRGV–TV.
Screen Gems Stations, Inc.
Spantronics Engineering, Inc.
Kaiser Broadcasting Corp.
American Broadcasting Cos., Inc. (ABC).
Leake TV, Inc.
Columbia Broadcasting System, Inc. (CBS).
National Association of Broadcasters (NAB).
Forward Communications Corp.
National Broadcasting Co., Inc. (NBC).
Tektronix, Inc.

No reply comments were filed. All comments have been fully considered in arriving at a decision in this matter.

4. All parties favor the requirement that test signals be generated and transmitted in the vertical interval; it is the general opinion that this offers a potentially effective means for monitoring and maintaining the quality of the transmitted signal. There is also a rather general consensus that such test transmissions should be confined to lines 18 and 19; several parties point out that line 17 is being considered for occupation by test signals accompanying programs intended for international distribution (Docket 18505), while present efforts to develop a vertical interval reference (VIR) signal, which would be inserted at the source of a color program, look toward the dedication of line 20 to this purpose. Lines earlier than 17 might be suitable for such test signals, but it remains to be demonstrated that earlier lines can be used without adversely affecting the performance of too large a percentage of receivers now in the hands of the general public.

5. Beyond these two points, there is little agreement. Many of those commenting are of the opinion that decisions on the test signals to be employed, the levels at which they are transmitted (as long as they meet the requirements of § 73.682(a)(13) or the rules), and the duration and frequency of transmission should be left to the discretion of each licensee. These parties hold that little purpose would be served by requiring the continuous transmission of test signals; conditions in the transmitter and associated equipment do not change with such rapidity as to require continuous surveillance. In any event, where the observation of test signals indicated the desirability of transmitter adjustment, in most cases corrective measures could not be taken at the remote control point, or prior to the next maintenance period. Others suggest that test signal observations be required a minimum number of times during the day, perhaps at the time meter readings were logged; observations could be made at such other times as a licensee might deem desirable.

6. NAB, NBC, and CBS, in particular, while looking toward the possibility of the standardization of test signals and requirements for their observation at some future time, maintain that extensive field tests should be conducted prior to the adoption of definitive rules governing their transmission and use. Furthermore, each separately urges that such signals not be used by the Commission in the enforcement of its rules, and in any case should not be relied on for this purpose when they are observed at other than the remote control point.

7. Noting that VITS signals have been used successfully for a number of years for monitoring the performance of network lines, these parties urge that there are a number of factors which militate against their successful employment for the evaluation of transmitter performance. CBS lists these factors as follows:

(1) The introduction of distortion in the demodulation of the transmitter output signal to provide a baseband signal for observation on waveform monitor or vectorscope.

(2) Multipath distortions which may attend off-the-air observations.

(3) Variations in the VITS with changes in the average picture level of the program.

(4) Many transmitters react differently to vertical interval transmissions than to program material.

8. CBS points out that certain of the test signals which we suggest as appropriate for vertical interval transmission (multiburst, color bars) might be used (if received without distortion) to demonstrate compliance with specific requirements of the Commission's rules. Other signals mentioned are useful in evaluating signal characteristics which are vital for proper color transmissions, but for which the Commission has established no standards. The transmission of such signals would not be necessary to demonstrate that "the visual modulation envelope meets the requirements of the Commission's rules."

9. CBS foresees the development of test signals other than those in general use, having greater potential virtues than conventional signals. It suggests that that only minimum requirements should be set now for test signal transmissions, to allow for innovation and to permit broadcasters to gain experience in utilizing these signals. Therefore, it offers that the rules should impose maximum levels only, and require that test signals include elements of reference white and reference black. The other characteristics of such signals, and the time and duration of their transmission should be left entirely to the discretion of the broadcaster.

10. Three parties are of the opinion that specific test signals should be adopted, ABC, EIA, and Tektronix, Inc. They make specific proposals to this end. ABC offers for adoption without modification its "Omni-Vit", a composite signal occupying one line in one field, which it has employed over a period of 2 years in testing the network lines between its stations in New York, Chicago, and Washington. The signal consists of a five-riser staircase, subcarrier modulated in phase with the color burst, with the peak amplitude of the upper tread subcarrier extending to 110 IRE units, a sine squared 20T pulse, and a half line pulse at 100 IRE unit level.

11. EIA proposes a "package" of test signals, specifically, multiburst with white flag, to be transmitted at 40 IRE unit level and 60 IRE unit peak to peak amplitude on field 1 at line 18, color bars with white and black level indicators on line 18, field 2, and a composite signal, normally transmitted in both fields of line 19.[1] The composite signal consists of a five-riser staircase, 2T and 12.5T sine squared pulses, and a bar at reference white of 18 us duration. For color transmissions, the staircase and 12.5T pulse are modulated with a color subcarrier in phase with the color burst. EIA recommends the retention of subcarrier modulation during monochrome program transmission, even though, in this

[1] EIA suggests that line 19, field 2, may, on occasion, be employed for transmission of special test signals chosen by the licensee, or, in more general practice, would carry the composite signal, but inserted at the transmitter input. Several of the parties have noted the desirability of providing for test signals at the transmitter input, so that the performance of transmitter and STL equipment may be separately evaluated.

case, the subcarrier is not controlled by the incoming signal.[2]

12. In the EIA proposal, the absolute and relative levels of the components of each test signal, and the levels of each signal relative to other signals have been adjusted to minimize the interaction of one signal with another, the effect of the test signal transmission on program material, to permit accurate measurements in the presence of noise, and to avoid the more serious effects of quadrature distortion which may result when the test signals are demodulated to baseband.

13. The filing of Tektronix, Inc., supports the EIA proposal, and elaborates on the technical details and the application of the various test signals.

14. After full consideration of all of the views of the parties, we have decided to adopt rules which require the transmission of vertical interval test signals essentially as proposed by EIA.

15. While we do not question the usefulness of the "Omni-Vit" for its present purpose, we think the EIA signal package, tailored specifically for transmitter surveillance and with the problems of off-the-air reception in mind, is more appropriate for use with remotely controlled broadcast transmissions.

16. The transmission and frequent observation of appropriate test signals in the vertical interval during regular operation we believe, and most parties agree, can contribute importantly to high quality picture transmission, especially when the picture is in color. We are convinced that the adoption of standards for such test signals is the best means for promoting their effective use for the following reasons:

(1) Standardization will make for the maximum simplicity in test signal generating and encoding apparatus, and facilitate automatic operation of such equipment.

(2) It is important that test signals transmitted in the vertical interval simultaneously with program material, and observed off-the-air, have appropriate absolute and relative levels, both to limit the possibility of interference with program material and to minimize the effects of distortion and noise involved in the monitoring process. This objective can most easily be achieved through a standardization of the test signals.

(3) Standardization will encourage the regular use and reliance on test signal observations.

17. EIA proposes the integrated use of recognized test signals; the majority of television engineers are fully familiar with the use and interpretation of these signals. By adopting such a standardized "package" we do not intend to preclude the development and use of special signals which, CBS suggests, may prove to be more generally useful than some of the recognized test signals. Stations may employ such signals in the vertical interval at such times as the standard signal is not being transmitted, or transmit such signals on field 2 of line 19 simultaneously with the standard signal, if the average picture level (APL) of the special signal is adjusted to approximate the APL of the test signal on field 1.

18. At least a part of the reluctance of NAB and other parties to concur in the establishment of specific vertical interval test signals at this time, and, perhaps, to any specific schedule for the transmission of these signals, may stem from an apprehension that the Commission intends to use the results of off-the-air monitoring of these signals in the enforcement of its rules. The language of § 73.676(f) may be responsible partially for this apprehension.

19. We have no such intention. We fully realize that these signals may be subject to distortion in demodulation, and to multipath effects, particularly when observed from other than the remote control point. We will not undertake to hold a licensee responsible for transmissions which off-the-air monitoring of test signals might indicate to be faulty in the absence of substantiating on-the-site observations and measurements.

20. On the other hand, we do not believe that the possibility of such distortion substantially lessens the utility of vertical interval test signals as a means by which a licensee can maintain effective surveillance of system performance. At the fixed location of the remote control point, multipath distortion may be minimized by the proper selection, siting and orientation of the receiving antenna. Demodulators of recent design normally incorporate features, which, in one way or another, increase, prior to demodulation, the effective level of the picture carrier relative to components in the color subcarrier region for the purpose of minimizing quadrature distortion. As we stated in the first report and order in this proceeding, we expect extreme care will be exercised in the design and installation of off-the-air monitoring equipment, and that a state-of-the-art demodulator will be employed. Such residual distortions as may occur, we expect, may be recognized and provided for in the periodic calibration of the remote monitors against monitors at the transmitter, which is required by our rules. In any event, the immediate purpose of the test signals is to permit the detection of changes occurring in the operation of the transmitting system which may have adverse effects on the transmitted picture. Such changes should be manifested as changes in the characteristics of the test signals from those observed at the remote control point when the system is properly adjusted, rather than as departures from the ideal configuration of such signals.

21. Similarly, we are of the the opinion that, to the extent that vertical interval test signals emitted by some transmitters may not fully reflect the performance of the transmitter in picture transmission, the differences experienced may be provided for by appropriate calibration procedures (e.g., by a comparison of the test signals transmitted full field against the vertical interval transmissions).

22. All broadcast transmitters not exempted from the requirement by statute are required to be under the continuous surveillance of licensed operators. Thus, even though our rules require the reading and logging of specific parameters only at stated intervals, this represents but a periodic verification of such surveillance; the operator, of course, is responsible for departures from proper transmitter operation occurring at any time, not just at the times log entries are required. So that he may fully discharge this responsibility, the facilities for observing presently specified transmitter parameters are made continuously available to the operator.

23. Vertical interval test signals offer the broadcaster a new and, we believe, highly effective means for supervising the performance of his television system on a continuous basis. However, if the potentialities of test signal transmissions are to be fully exploited, the operator must have a capability for observing the test signals at any time during the daily operation of the television broadcast station. We have no reason to believe that the provision of test signals on a continuous basis would impose an undue burden on the broadcaster.

24. The appended rules therefor, require such continuous test signal transmission. While the logging of test signal observations are required only every half hour, the test signals are available for observation at such other times as may be necessary or desirable.

25. Signals of specified characteristics, originated at the remote control point are to be inserted on line 18, fields 1 and 2, and line 19, field 1. Normally, the composite signal specified for field 1, line 19, would also be inserted in field 2 of this line at the remote control point. However, the rules permit the optional insertion of the composite signal on field 2 at the transmitter input, or, subject to certain safeguards, the employment of line 19, field 2 for the transmission of test signals chosen by the station licensee.

26. The characteristics of the required test signals are established by charts included in the rules by an amendment hereby made of § 73.699. The values specified are nominal; no tolerances will be set at this time. The pertinent levels of the components of these signals are specified at the point of signal insertion in units on the IRE standard scale, a method of measurement in general use throughout the industry which is appropriate and convenient to apply in test signal specification. However, since this scale has not been utilized or recognized previously in our rules, we are amending § 73.681 to include a definition of the term IRE standard scale.

27. Since the lines chosen for locally generated vertical interval transmission are the same as those utilized by the networks for test transmissions, the facilities utilized by each network-connected station must include provision for erasing the network test signals before insertion of locally generated signals.[3] We expect there will be available a single generator or simple combination of apparatus which will perform this function and generate all of the required test signals for direct insertion in the designated lines without a separate encoder, and which will require a minimum of manipulation by the user. Pending the general availability of suitable apparatus, we are suspending the applicability of the test signal requirement until April 1, 1972.

28. While not pertinent to the subject matter of the further notice, EIA, in its comment in this proceeding has called our attention to an inconsistency created in our adoption by the first report and order of § 73.682(a)(23)(vi), which sets the permissible aural transmitter output noise level for operation with telemetry signals for remote observation multiplexed on the aural carrier. EIA points out that maximum noise level permitted on the main carrier, 60 decibels below the level corresponding to 100 percent modulation of the main carrier, is lower than the permissible level for FM noise specified for the aural transmitter without multiplexing, pursuant to § 73.687(b)(4) and (5).

29. It suggests that the permissible FM and AM output noise levels for multiplex operation should be the same as those specified for regular operation, and should be established by reference to § 73.687(b) (4) and (5). It offers an amendment of § 73.682(a)(23)(vi) for this purpose.

30. We agree that EIA's point is well taken, and we will avail ourselves of this opportunity to amend § 73.682(a)(23)(vi) essentially in accordance with its suggestion, viz: "Multiplexing of the aural carrier shall not result in transmitting system output noise levels exceeding those specified in § 73.687(b) (4) and (5)."

31. *Accordingly, it is ordered,* Effective October 5, 1971, that part 73 of the rules and regulations is amended as set forth below.

32. Authority for the adoption of these rule amendments is found in sections 4(i) and 303(r) of the Communications Act of 1934, as amended.

33. *It is further ordered,* That this proceeding is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Adopted: August 18, 1971.

Released: August 24, 1971.

• • • • • •

2. Section 73.676(f) is amended to read as follows, including the substitution of a new Note amending the effective date of this paragraph.

§ 73.676 Remote control operation.

• • • • • •

(f) Test signals shall be generated and inserted in the vertical interval of the visual signal at the remote control point, and shall be observed at the remote control point after extraction from the radio frequency signal at the output of the transmitter. Normally, the radiated signal is utilized after off-the-air reception, but the signal may be obtained by coupling to the output circuit of the transmitter at the point where the radio frequency signal enters the antenna transmission line.

(1) The required test signals, and the place of insertion in the vertical interval shall be as follows:

(i) Multiburst, on field 1, line 18 (see Figure 13 of § 73.699).

(ii) Color bars, on field 2, line 18 (see Figure 14 of § 73.699). During monochrome transmission chrominance information shall not be included in this test signal.

(iii) Composite signal, on field 1, line 19 (see Figure 15 of § 73.699).

(iv) Generally, a composite signal of characteristics identical to those prescribed in subdivision (iii) of this subparagraph, shall be inserted on field 2, line 19, at the remote control point. However, to permit a separate determination to be made of the effects of the transmitter and the studio transmitter link on system performance, the composite signal on field 2, line 19 may be inserted at the transmitter input. Alternatively, in lieu of the composite signal, a licensee may insert any suitable test signal on field 2 of line 19, either at the remote control point or at the transmitter. When such signals are transmitted at the same time as program material and/or the required test signals, the characteristics of the licensee-selected signals shall be such as to minimize the possibility that their transmission will result in interference with the required test signals, or in degradation of the picture or sound signals.

Figures 6 and 7 of § 73.699 identify the numbered lines and fields referred to in this subparagraph.

(2) The required test signals shall be transmitted continuously during all periods of regular station operation.

(3) The required test signals shall be observed immediately after commencement of operation, and subsequently thereafter with intervals between successive observations not exceeding one-half hour. More frequent observations shall be made as necessary to insure proper performance of the transmitter and associated equipment.

(4) The date and time of each observation of the test signals shall be entered in the operating log, together with notations as to the results of these observations.

(5) Any signals or noise already existing on lines 18 and 19 (e.g., network test signals), shall be erased prior to the insertion in the vertical interval of locally generated test signals.

NOTE: Paragraph (f) of § 73.676 shall not become effective until April 1, 1972, by which time the equipment necessary for the generation and vertical interval insertion of the required test signals should be generally available.

• • • • • •

3. Section 73.681 is amended by inserting the following definition in alphabetical order to read as follows:

§ 73.681 Definitions.

• • • • • •

IRE standard scale. A linear scale for measuring, in IRE units, the relative amplitudes of the components of a television signal from a zero reference at blanking level, with picture information falling in the positive, and synchronizing information in the negative domain.

NOTE: When a carrier is amplitude modulated by a television signal in accordance with § 73.682, the relationship of the IRE standard scale to the conventional measure of modulation is as follows:

Level	IRE standard scale (units)	Modulation percentage
Zero carrier	120	0
Reference white	100	12.5
Blanking	0	75
Synchronizing peaks (maximum carrier level)	−40	100

• • • • • •

4. Section 73.682(a)(23)(vi) is amended to read as follows:

§ 73.682 Transmission standards.

(a) • • •

(23) • • •

(vi) Multiplexing of the aural carrier shall not result in transmitting system output noise levels exceeding those specified in § 73.687(b)(4) and (5).

• • • • • •

§ 73.699 [Amended]

5. Section 73.699 is amended by adding the following charts:

Multiburst test signal, Figure 13.

Color bar test signal, Figure 14.

Composite test signal, Figure 15.

[2] Certain of these signals are modified somewhat from their familiar configuration: The highest frequency of the multiburst signal is set at 4.1 MHz rather than the more usual 4.2 MHz, to insure its inclusion in the visual passband; a sine² 12.5T modulated signal is proposed, rather than a 20T signal, since its frequency spectrum conforms more closely to that of the chrominance signal in the NTSC system than does the spectrum of the 20T.

[3] Even when network test signals are not present, erasing facilities should be employed to remove excessive noise before the specified lines are locally utilized.

[4] Commissioners H. Rex Lee and Wells absent.

Title 49—TRANSPORTATION

Chapter V—National Highway Traffic Safety Administration, Department of Transportation

[Docket 69-23, Notice 3]

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

Seat Belt Assemblies; Reconsideration and Amendment

The purpose of this notice is to respond to petitions filed pursuant to § 553.35 of Title 49, Code of Federal Regulations, requesting reconsideration of various amendments to Motor Vehicle Safety Standard No. 209, Seat Belt Assemblies, that were published March 10, 1971 (36 F.R. 4607). The petitions are granted in part and denied in part. Requests not expressly discussed in this notice should be considered denied.

1. One of the results of the March 10 amendments was that as of September 1, 1971, the standard would have become a vehicle standard as well as an equipment standard, i.e., vehicles manufactured after the effective date would have had to have equipment conforming to the new requirements. The amendments relating to emergency-locking retractors are such, however, that with normal production tolerances it would be difficult to manufacture retractors that conform to the currently applicable requirements so that they would also conform to the post-September 1 requirements, and vice versa. This creates an awkward situation, in which retractors supplied to vehicle manufacturers for use on September 1 would have to be made on September 1 and not before.

The vehicle aspect of the standard is therefore being deleted, and the date on which the amended requirements become mandatory is postponed to January 1, 1972, to coincide with the effective date

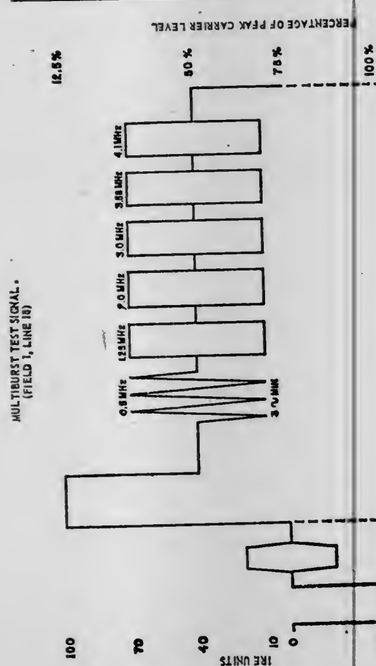

FIGURE 13

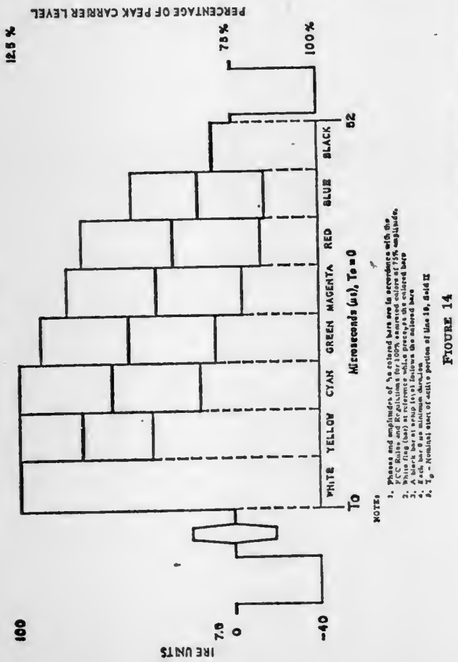

FIGURE 14

of the new Standard No. 208. To allow for efficient changeover, manufacturers are permitted to manufacture belts to either the current or the amended requirements between September 1, 1971, and January 1, 1972.

2. With respect to the technical amendments to the attachment hardware requirements in S4.1(f), American Safety Equipment Corp. requested that the reference to Standard No. 210 be omitted, so that anchorage nuts, plates, and washers would not have to be supplied if the vehicle has an anchorage that does not require them. The request has been found reasonable, and the standard is amended accordingly.

3. The National Highway Traffic Safety Administration has also evaluated requests by the American Safety Equipment Corp. concerning the range of occupants that a belt must adjust to fit, the test buckle release force test procedure, and the buckle crush resistance test procedure. The amended adjustment requirements (S4.1(g) (1) and (2)) specify more exactly the range of occupants that was intended by the original standard. The importance of having installed belts of proper length for the normal range of occupants outweighs, in the agency's judgment, the effort involved in ascertaining vehicle dimensions. The adjustment requirements are therefore not changed. With respect to the buckle test procedures, the petitioner's requests relating to the clarity of the buckle release procedure and to the need for an explanatory diagram to accompany the crush test are also denied. Although the buckle release test no longer refers to a method for testing lever action buckles, the method was little more than a suggestion and may in some cases have conflicted with the intent of the procedure that the force shall be applied so as to produce maximum releasing effect. The diagram requested to show the buckle crush procedure is not regarded as essential to understanding the procedure and has not been adopted.

4. Although no petition was received directly relating to the subject, the Swedish Trade Commission, on behalf of the Swedish manufacturers, has expressed uncertainty as to how the crush test is to be applied to seat belt assemblies that have a buckle mounted on a rigid or semirigid bracket between the front seats. As described by the Commission, one design would tend to bend downwards under the pressure of the test device long before the required force of 400 pounds could be reached. In this case, the buckle will have to be supported from beneath, just as the conventional lap belt has to have some rigid backing in order to reach the 400-pound level. It is anticipated that if additional questions are raised concerning the method of force application to specific buckles, such questions can be answered through administrative interpretation.

5. Several petitions questioned the need to test a vehicle-sensitive emergency-locking retractor by accelerating it "in three directions normal to each other with its central axis oriented horizontally." The pendulum device used in most vehicle-sensitive retractors can sense lateral accelerations and sense the tilt of the vehicle, but it cannot readily sense upward or downward accelerations of the type required by the three-direction test when the retractor is oriented horizontally. It was suggested by Volvo that a retractor that locks when tilted to 35° in any direction should be exempt from the acceleration requirement. Volkswagen recommended accelerating the retractor in the horizontal plane in two directions normal to each other. On reconsideration, the National Highway Traffic Safety Administration has concluded that it is appropriate to relieve such a retractor from the vertical acceleration requirement when it is oriented horizontally and to establish an alternative to the requirement that it lock when accelerated in directions out of the horizontal plane, but that accelerations within the horizontal plane should continue to be required.

Accordingly, S5.2(j) is amended to require a vehicle-sensitive retractor to be accelerated in the horizontal plane in two directions normal to each other. During these accelerations, the retractor will be oriented at the angle in which it is installed in the vehicle. In addition, the retractor must either lock when accelerated in orientations out of the horizontal as prescribed in the March 10 rule or lock by gravity when tilted in any direction to any angle greater than 45°.

6. One petitioner questioned the correctness of requiring webbing-sensitive retractors to be accelerated in the direction of webbing retraction, rather than in the direction of webbing withdrawal. The usage is neceessary because under the test procedures of S5.2(j) it is the retractor, and not the webbing, that is accelerated. The acceleration must be in the direction that will reel the webbing out of the retractor—i.e. the direction in which the webbing moves when retracting.

7. An additional question on retractor acceleration levels concerns the distance which a belt must be withdrawn in determining compliance with the requirement that the retractor shall not lock at 0.3 g. or less (S4.3(j)(ii)). The Hamill Manufacturing Co. has requested an amendment to S4.3(j)(ii) to provide that the retractor shall not lock before the webbing extends a short distance at an acceleration of 0.3 g. The National Highway Traffic Safety Administration recognizes that many retractors may be velocity-sensitive to some degree as well as acceleration-sensitive. Although a retractor that locks at too low a velocity would be an inconvenience, the NHTSA recognizes that an occupant does not ordinarily accelerate the belt after an initial pull and that the usual velocity involved in withdrawing the belt is low. On reconsideration, the NHTSA has therefore decided to amend S4.3(j)(ii) to provide that the retractor shall not lock before the webbing extends 2 inches at 0.3 g.

8. Several petitioners pointed out that the requirements for retractor force specified in S4.3(j) (iii) and (iv) were not appropriate for systems in which a single length of webbing is used to provide both lap and shoulder restraint. In a typical installation of this sort, the webbing passes from a floor-mounted retractor up to a fitting on the B-pillar, then down across the shoulder to a slip joint on the buckle connector, and from there back across the lap to an outboard floor attachment. Although such a system may provide satisfactory restraint, it cannot simultaneously exceed a retractive force of 1.5 pounds on the lap belt and have a retractive force on the shoulder belt of between 0.45 and 1.1 pounds, and it would therefore fail to conform to the standard as published March 10.

Upon reconsideration, the National Highway Traffic Safety Administration has decided to amend S4.3(j) by establishing retraction forces for 3-point systems that employ a single length of webbing. A new subsection (v) is added that requires such a system to have a retraction force falling within the range 0.45–1.50 pounds, and (iii) and (iv) are amended so that they do not apply to retractors in such systems. This range was suggested by Volkswagen, Volvo, and Klippan, and is considered to be a reasonable compromise between the need to provide complete retraction of the belt when not in use and the need to limit the force so that it will not be uncomfortable to occupants.

In consideration of the foregoing, Motor Vehicle Safety Standard No. 209, in § 571.21 of Title 49, Code of Federal Regulations, is amended to read as follows:

1. S2 is amended to read as follows:

S2. *Application.* This standard applies to seat belt assemblies for use in passenger cars, multipurpose passenger vehicles, trucks, and buses.

2. S4.1(f) is amended to read as follows:

(f) *Attachment hardware.* A seat belt assembly shall include all hardware necessary for installation in a motor vehicle in accordance with SAE Recommended Practice J800B, Motor Vehicle Seat Belt Installations, September 1965. However, seat belt assemblies designed for installation in motor vehicles equipped with seat belt assembly anchorages that do not require anchorage nuts, plates, or washers, need not have such hardware, but shall have 7/16–20 UNF–2A or 1/2–13UNC–2A attachment bolts or equivalent hardware. The hardware shall be designed to prevent attachment bolts and other parts from becoming disengaged from the vehicle while in service. Reinforcing plates or washers furnished for universal floor installations shall be of steel, free from burrs and sharp edges on the peripheral edges adjacent to the vehicle, at least 0.06 inch in thickness and at least 4 square inches in projected area. The distance between any edge of the plate and the edge of the bolt hole shall be at least 0.6 inch. Any corner

shall be rounded to a radius of not less than 0.25 inch or cut so that no corner angle is less than 135° and no side is less than 0.25 inch in length.

3. S4.3(j) is amended in pertinent part to read as follows:

(ii) Shall not lock before the webbing extends 2 inches when the retractor is subjected to an acceleration of 0.3 g. or less;

(iii) shall exert a retractive force of at least 1.5 pounds under zero acceleration when attached only to the pelvic restraint;

(iv) Shall exert a retractive force of not less than 0.45 pound and not more than 1.1 pounds under zero acceleration upon any strap or webbing that contacts the shoulder when the retractor is attached only to an upper torso restraint; and

(v) Shall exert a retractive force of not less than 0.45 pound and not more than 1.5 pounds under zero acceleration when attached to a strap or webbing that restrains both the upper torso and the pelvis.

4. S5.2(j) is amended to read as follows:

(j) *Emergency-locking retractor.* A retractor shall be tested in a manner that permits the retraction force to be determined exclusive of the gravitational forces on hardware or webbing being retracted. The webbing shall be fully extended from the retractor, passing over or through any hardware or other material specified in the installation instructions. While the webbing is being retracted, the lowest force of retraction within plus or minus 2 inches of 75 percent extension shall be determined. The retractor shall be subjected to an acceleration of 0.3 g. within a period of 50 milliseconds, while the webbing is at 75 percent extension, to determine compliance with S4.3(j)(ii). The retractor shall be subjected to an acceleration of 0.7 g. within a period of 50 milliseconds, while the webbing is at 75 percent extension, and the webbing movement before locking shall be measured under the following conditions: For a retractor sensitive to webbing withdrawal, the retractor shall be accelerated in the direction of webbing retraction while the retractor drum's central axis is oriented horizontally and at angles of 45°, 90°, 135°, and 180° to the horizontal plane. For a retractor sensitive to vehicle acceleration, the retractor shall be—

(1) Accelerated in the horizontal plane in two directions normal to each other, while the retractor drum's central axis is oriented at the angle at which it is installed in the vehicle; and,

(2) Accelerated in three directions normal to each other while the retractor drum's central axis is oriented at angles of 45°, 90°, 135°, and 180° from the angle at which it is installed in the vehicle, unless the retractor locks by gravitational force when tilted in any direction to any angle greater than 45° from the angle at which it is installed in the vehicle.

Effective date: January 1, 1972, except that seat belt assemblies manufactured on or after September 1, 1971, and before January 1, 1972, may conform either to the current requirements of Standard No. 209 in 49 CFR 571.21 or to the requirements of Standard No. 209 as amended by this notice and the notice of March 10, 1971 (36 F.R. 4607).

(Secs. 103, 112, 119, National Traffic and Motor Vehicle Safety Act, 15 U.S.C. 1393, 1401, 1407; delegation of authority at 49 CFR 1.51)

Issued on August 26, 1971.

CHARLES H. HARTMAN,
Acting Administrator.

Chapter X—Interstate Commerce Commission

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Ex Parte No. 246]

PART 1002—FEES

Services Performed in Connection With Licensing and Related Activities; Correction

AUGUST 25, 1971.

In its report of May 19, 1971, in Ex Parte No. 246, published at 36 F.R. 11293, the Commission in certain respects amended the existing regulations governing fees for Commission services. Through inadvertence items 17 and 45 of § 1002.2(d), Schedule of filing fees, incorrectly show filing fees of $200 rather than $700.

Accordingly, Items 17 and 45 of § 1002.2 (d) should be corrected to read as follows:

(17) An application for authority to abandon all or a portion of a line of railroad or the operation thereof, Section 1(18), $700.

(45) A complaint seeking or a petition requesting institution of an investigation seeking the prescription of divisions of joint rates, fares, or charges. Section 15(6), $700.

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc.71-12732 Filed 8-30-71;8:50 am]

Title 50—WILDLIFE AND FISHERIES

Chapter I—Bureau of Sport Fisheries and Wildlife, Fish and Wildlife Service, Department of the Interior

PART 32—HUNTING

Certain National Wildlife Refuges in Certain States

The following special regulations are issued and are effective on date of publication in the FEDERAL REGISTER (8-31-71).

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

ARIZONA AND CALIFORNIA

HAVASU NATIONAL WILDLIFE REFUGE

Public hunting of doves on the Havasu National Wildlife Refuge, Arizona and California, is permitted only on the area designated by signs as open to hunting. This open area, comprising 24,200 acres, is delineated on maps available at refuge headquarters, Needles, Calif., and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, NM 87103. Hunting seasons are as follows: Arizona—white-winged and mourning doves, from September 1 through September 12, 1971, inclusive; mourning doves only, from December 3, 1971 through January 9, 1972, inclusive. California—white-winged and mourning doves, from September 1 through September 30, 1971, inclusive; and November 27 through December 12, 1971, inclusive. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of doves subject to the following special condition:

(1) Hunting is prohibited within one-fourth mile of any occupied dwelling or concession operation.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 9, 1972.

IMPERIAL NATIONAL WILDLIFE REFUGE

Public hunting of doves on the Imperial National Wildlife Refuge, Arizona and California, is permitted only on the area designated by signs as open to hunting. This open area, comprising 10,500 acres, is delineated on maps available at refuge headquarters, Yuma, Ariz., and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, NM 87103. Hunting seasons are as follows: Arizona—mourning doves only, from December 3, 1971 through January 9, 1972, inclusive; California—white-winged and mourning doves, from November 27 through December 12, 1971, inclusive. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of doves.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 9, 1972.

COLORADO

ALAMOSA NATIONAL WILDLIFE REFUGE

Public hunting of mourning doves, sora and Virginia rails, and Wilson's snipe on the Alamosa National Wildlife Refuge, Colo., is permitted only on the area designated by signs as open to hunting. This open area, comprising 3,267 acres, is delineated on maps available at refuge headquarters, Alamosa, Colo., and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, NM 87103. Hunting seasons are as follows: Mourning doves, from September 1 through October 30, 1971, inclusive; sora and Virginia rails, from September 1 through November 9, 1971, inclusive; Wilson's snipe, from September 1 through November 4, 1971, inclusive. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of mourning doves, sora and Virginia rails, and Wilson's snipe subject to the following special conditions:

(1) Dogs—Not to exceed two dogs per hunter may be used only for retrieving.

(2) Boats—The use of boats is prohibited.

(3) Admittance—Entrance to the open area and parking of vehicles will be restricted to designated parking areas.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through November 9, 1971.

MONTE VISTA NATIONAL WILDLIFE REFUGE

Public hunting of mourning doves, sora and Virginia rails, and Wilson's snipe on the Monte Vista National Wildlife Refuge, Colo., is permitted only on the area designated by signs as open to hunting. This open area, comprising 5,314 acres, is delineated on maps available at refuge headquarters, Monte Vista, Colo., and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, NM 87103. Hunting seasons are as follows: Mourning doves, from September 1 through October 30, 1971, inclusive; sora and Virginia rails, from September 1 through November 9, 1971, inclusive; Wilson's snipe, from September 1 through November 4, 1971, inclusive. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of mourning doves, sora and Virginia rails, and Wilson's snipe subject to the following special conditions:

(1) Dogs—Not to exceed two dogs per hunter may be used only for retrieving.

(2) Boats—The use of boats is prohibited.

(3) Admittance—Entrance to the open area and parking of vehicles will be restricted to designated parking areas.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through November 9, 1971.

KANSAS

FLINT HILLS NATIONAL WILDLIFE REFUGE

Public hunting of mourning doves, rails, woodcock, and Wilson's snipe on the Flint Hills National Wildlife Refuge, Kans., is permitted only on the area designated by signs as open to hunting. This open area, comprising 2,906 acres, is delineated on maps available at refuge headquarters, Burlington, Kans., and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, NM 87103. Hunting seasons are as follows: Mourning doves, from September 1 through October 30, 1971, inclusive; rails, from September 1 through November 9, 1971, inclusive; woodcock, from October 16 through December 19, 1971, inclusive; Wilson's snipe, from September 18 through November 21, 1971, inclusive. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of doves, rails, woodcock, and Wilson's snipe subject to the following special condition:

(1) Vehicle access shall be restricted to designated parking areas and to existing roads.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 19, 1971.

KIRWIN NATIONAL WILDLIFE REFUGE

Public hunting of doves on the Kirwin National Wildlife Refuge, Kans., is permitted from September 1 through October 30, 1971, inclusive, but only on the area designated by signs as open to hunting. This open area, comprising 3,300 acres, is delineated on maps available at refuge headquarters, 5 miles west of Kirwin, Kans., and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, NM 87103. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of doves.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through October 30, 1971.

QUIVIRA NATIONAL WILDLIFE REFUGE

Public hunting of mourning doves, sora and Virginia rails, and gallinules on the Quivira National Wildlife Refuge, Kans., is permitted during the early teal season from September 4 through September 12, 1971, inclusive, but only on the areas designated by signs as open to hunting. This open area, comprising 7,990 acres, is delineated on maps available at refuge headquarters, Stafford, Kans., and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, NM 87103. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of mourning doves, rails, and gallinules.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through September 12, 1971.

NEW MEXICO

BITTER LAKE NATIONAL WILDLIFE REFUGE

Public hunting of mourning and white-winged doves on the Bitter Lake National Wildlife Refuge, N. Mex., is permitted from September 1 through September 30, 1971, inclusive, and from November 27 through December 26, 1971, inclusive, but only on the area designated by signs as open to hunting. This open area, comprising 3,320 acres, is delineated on maps available at refuge headquarters, Roswell, N. Mex., and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, NM 87103. Hunting shall be in accordance with all applicable State and Federal regulations governing the hunting of doves.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 26, 1971.

BOSQUE DEL APACHE NATIONAL WILDLIFE REFUGE

Public hunting of mourning and white-winged doves on the Bosque del Apache National Wildlife Refuge, N. Mex., is permitted from September 1 through September 30, 1971, inclusive, and from November 27 through December 26, 1971, inclusive, but only on the area designated by signs as open to hunting. This open area, comprising 19,020 acres, is delineated on maps available at refuge headquarters, 7 miles south of San Antonio, N. Mex., and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, NM 87103. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of doves subject to the following special conditions:

(1) Vehicles are permitted only on established roads.

(2) Hunters shall leave the refuge by one-half hour after sunset.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 26, 1971.

OKLAHOMA

TISHOMINGO NATIONAL WILDLIFE REFUGE

Public hunting of mourning doves on the Tishomingo National Wildlife Refuge, Okla., is permitted only on the area designated by signs as open to hunting. This open area, comprising 3,170 acres, is delineated on maps available at refuge headquarters, Tishomingo, Okla., and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, NM 87103. Hunting shall be in accordance with all applicable State and Federal regulations governing the hunting of mourning doves subject to the following special conditions.

(1) The open season for hunting mourning doves on the refuge extends from September 1 through September 30, 1971, inclusive.

(2) Dogs may be used for the purpose of hunting and retrieving.

(3) A Federal permit is not required to enter the public hunting area, but hunters, upon entering and leaving, shall report at designated checking stations as may be established for the regulation of the hunting activity and shall furnish information pertaining to their hunting, as requested.

The provisions of this special regulation supplement the regulations which

govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through September 30, 1971.

TEXAS

HAGERMAN NATIONAL WILDLIFE REFUGE

Public hunting of mourning doves on the Hagerman National Wildlife Refuge, Tex., is permitted only on the area designated by signs as open to hunting. This open area, comprising 2,644 acres, is delineated on maps available at refuge headquarters, 15 miles northwest of Sherman, Tex., and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, NM 87103. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of mourning doves subject to the following special condition:

(1) The open season for hunting mourning doves on the refuge extends from September 1 through September 30, 1971, inclusive.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through September 30, 1971.

WILLIAM M. WHITE,
Acting Regional Director,
Albuquerque, N. Mex.

AUGUST 24, 1971.

[FR Doc.71-12697 Filed 8-30-71;8:47 am]

PART 32—HUNTING

Rice Lake National Wildlife Refuge, Minn.

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER (8-31-71).

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

MINNESOTA

RICE LAKE NATIONAL WILDLIFE REFUGE

Public hunting of ruffed grouse on the Rice Lake National Wildlife Refuge is permitted from sunrise to sunset September 18 through November 30, 1971 inclusive, only on the area designated by signs as open to hunting. This open area comprising 2,200 acres, is delineated on a map available at refuge headquarters, McGregor, Minn., and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Federal Building, Fort Snelling, Twin Cities, MN 55111. Hunting shall be in accordance with all applicable State regulations governing the hunting of upland game.

CARL E. POSPICHAL,
Refuge Manager, Rice Lake National Wildlife Refuge, McGregor, Minn.

AUGUST 24, 1971.

Title 32A—NATIONAL DEFENSE, APPENDIX

Chapter I—Office of Emergency Preparedness

[Economic Stabilization Reg. No. 1 Amdt. 2]

E.S. REG. 1—STABILIZATION REGULATIONS FOR PRICES, RENTS, WAGES, AND SALARIES

Change in Dates and Word Change

SECTION 1. The purpose of the amendment contained in section 2 is to substitute the word "ceiling" for the word "maximum" in section 2(c) of Economic Stabilization Regulation No. 1, hereinafter referred to as the regulation. The purpose of the amendment contained in section 3 is to change the date in the regulation after which delayed or deferred wage or salary increases negotiated to take effect in the future, cost-of-living increases built into wage contracts or provided by management, and routine in-grade increases are not permitted. The purpose of the amendment contained in section 4 is to change the termination date of this regulation.

SEC. 2. Subparagraph (c) of section 2 of the regulation is hereby amended to read as follows:

Section 2. Prohibition.

* * * * *

(c) No person shall offer, demand, or receive any rent higher than the ceiling rent prevailing for the same or comparable property for a substantial number of actual transactions during the base period.

* * * * *

SEC. 3. Subparagraph (c) of section 3 of the regulation is hereby amended to read as follows:

Section 3. Guidance.

* * * * *

(c) Wages and salaries. Deferred wage or salary increases which were negotiated to take effect in the future, cost-of-living increases built into wage contracts or provided by management, and routine in-grade increases not in effect on or before August 14, 1971, are not permitted after August 15, 1971. Regardless of any right or contract heretofore or hereafter existing, no change or adjustment shall be made in rates of wages, salaries, or other forms of compensation whether by retroactive increase or otherwise.

SEC. 4. The last paragraph of the regulation entitled "Effective Date" is hereby amended to read as follows:

Effective date. This regulation, unless modified, superseded or revoked, is effective on the date of publication for a period terminating at midnight of November 13, 1971.

Dated: August 30, 1971.

G. A. LINCOLN,
Director,
Office of Emergency Preparedness.

[FR Doc.71-12887 Filed 8-30-71;2:10 pm]

[OEP Economic Stabilization Reg. 1; Circular No. 4]

SUPPLEMENTARY GUIDANCE FOR APPLICATION

Economic Stabilization Circular No. 4

This circular is designed for general information only. The statements herein are intended solely as general guides drawn from OEP Economic Stabilization Regulation No. 1 and from specific determinations by the Cost of Living Council and do not constitute legal rulings applicable to cases which do not conform to the situations clearly intended to be covered by such guides.

NOTE: Provisions of this and subsequent circulars are subject to clarification, revision, or revocation.

This fourth circular covers determinations by the Council through August 26, 1971.

APPENDIX I

ECONOMIC STABILIZATION CIRCULAR NO. 4

100. *Purpose.* (a) On August 15, 1971, President Nixon issued Executive Order No. 11615 providing for stabilization of prices, rents, wages, and salaries and establishing the Cost of Living Council, a Federal agency. The order delegated to the Council all of the powers conferred on the President by the Economic Stabilization Act of 1970, as amended. The effective date of the order was 12:01 a.m., August 16, 1971.

NOTE: This section is the same as section 100(a) in OEP Economic Stabilization Circulars Nos. 1, 2, and 3 except for the addition of the last sentence.

(b) By its Order No. 1 the Council delegated to the Director of the Office of Emergency Preparedness authority to administer the program for the stabilization of prices, rents, wages, and salaries as directed by section 1 of Executive Order No. 11615.

(c) The purpose of this circular, the fourth in a series to be issued, is to furnish further guidance to Federal officials and the public in order to promote maximum understanding and cooperation in the application of the program.

200. *Authority.* Relevant legal authority for the program includes the following:

The Constitution, Economic Stabilization Act of 1970, Public Law 91-379, 84 Stat. 799; Public Law 92-15, 85 Stat. 38.
Executive Order No. 11615, F.R. 15127, August 17, 1971.
Cost of Living Council Order No. 1 (36 F.R. 16215, August 20, 1971).
OEP Economic Stabilization Regulation No. 1, as amended (36 F.R. 16515, August 21, 1971).

300. *General guidelines.* (a) The guidance provided in this circular is in the nature of additions to or clarifications of previous determinations of the Cost of Living Council covered in previous OEP Economic Stabilization Circulars.

(b) The numbering system used in this circular corresponds to that used in previous OEP Circulars.

500. *Wage and salary guidelines.*

501. *General guidelines.* (a) Deferred wage or salary increases which were negotiated to take effect in the future, cost-of-living increases built into wage contracts or provided by management, and routine in-grade increases not in effect on or before August 14, 1971, are not permitted after August 15, 1971. Regardless of any right or contract heretofore or hereafter existing, no change or adjustment shall be made in rates of wages, salaries, or other forms of compensation whether by retroactive increase or otherwise.

NOTE: This section is the same as section 501(c) in OEP Economic Stabilization Circular No. 1 except for the change in date.

502. *Specific guidelines.* (a) Where the employer is willing to certify that an agreement was in existence that provided for increases in pay dependent on employees completing educational requirements for specific job levels, the pay increase can be granted during the freeze. For example, a teacher who has been awarded a master's degree can receive the increment which is normally given. If the effective date of the teacher's contract is after August 15, the increment must be the amount that was granted last year. Since the day of August 15 is not subject to the freeze the portion of the payment for that day may be made.

NOTE: This section is the same as section 502(k) in OEP Economic Stabilization Circular No. 1 except for the last sentence clarifying the effective date.

(b) If a salary increase was granted prior to August 15 and the employee actually performed under the new rate on or before August 15, he can be paid at the higher rate if the pay day is after August 15 provided there are adequate records to demonstrate that the increase was put into effect prior to the freeze date.

NOTE: This section is the same as section 502(m) in OEP Economic Stabilization Circular No. 1 except for the references to dates.

1001. *Effective date.* This circular, unless modified, superseded or revoked, is effective on the date of publication for a period terminating at midnight of November 13, 1971.

NOTE: This section is the same as section 1001 in OEP Economic Stabilization Circulars Nos. 1, 2, and 3 except for the change in date.

Dated: August 30, 1971.

G. A. LINCOLN,
Director,
Office of Emergency Preparedness.

[FR Doc.71-12885 Filed 8-30-71;2:10 pm]

[OEP Economic Stabilization Reg. 1; Circular No. 5]

SUPPLEMENTARY GUIDANCE FOR APPLICATION

Economic Stabilization Circular No. 5

This circular is designed for general information only. The statements herein are intended solely as general guides drawn from OEP Economic Stabilization Regulation No. 1 and from specific determinations by the Cost of Living Council and do not constitute legal rulings applicable to cases which do not conform to the situations clearly intended to be covered by such guides.

NOTE: Provisions of this and subsequent circulars are subject to clarification, revision, or revocation.

This fifth circular covers determinations by the Council through August 28, 1971.

APPENDIX I

ECONOMIC STABILIZATION CIRCULAR NO. 5

100. *Purpose.* (a) On August 15, 1971, President Nixon issued Executive Order No. 11615 providing for stabilization of prices, rents, wages, and salaries and establishing the Cost of Living Council, a Federal agency. The order delegated to the Council all of the powers conferred on the President by the Economic Stabilization Act of 1970, as amended. The effective date of the Order was 12:01 a.m., August 16, 1971.

(b) By its Order No. 1 the Council delegated to the Director of the Office of Emergency Preparedness authority to administer the program for the stabilization of prices, rents, wages, and salaries as directed by Section 1 of Executive Order 11615.

(c) The purpose of this circular, the fifth in a series to be issued, is to furnish further guidance to Federal officials and the public in order to promote maximum understanding and cooperation in the application of the program.

200. *Authority.* Relevant legal authority for the program includes the following:

The Constitution, Economic Stabilization Act of 1970, Public Law 91-379, 84 Stat. 799; Public Law 92-15, 85 Stat. 38.
Executive Order No. 11615, 36 F.R. 15127, August 17, 1971.
Cost of Living Council Order No. 1 (36 F.R. 16215, August 20, 1971).
OEP Economic Stabilization Regulation No. 1, as amended (36 F.R. 16515, August 21, 1971).

300. *General Guidelines.* (a) The guidance provided in this circular is in the nature of additions to or clarifications of previous determinations of the Cost of Living Council covered in previous OEP Economic Stabilization Circulars.

301. *Seasonal patterns.* (a) Prices, wages, and rents which normally fluctuate in distinct seasonal patterns may be adjusted during the wage-price freeze subject to the following conditions:

(1) Prices and wages must show a large distinct fluctuation at a specific, identifiable point in time, which must be a documented and established practice that has taken place in each of the past 3 years. Examples are Puerto Rican hotel rates at the beginning and end of the fall/winter season, auto dealers' selling prices at new-model-introduction time, and wage rates for some seasonal agricultural workers. New establishments or activities may determine their qualification from that generally prevailing for similar establishments or activities in the immediate area.

(2) Each change must be tied to a specific date (e.g., the introduction of new car models, beginning of resort seasons, etc.). The price change may not take place earlier this year than in 1970, unless the date is tied to a specific event such as a previously planned introduction of new models.

(3) If the price or wage change qualifies as seasonal by the above criteria, the seller is permitted a choice of base periods to use in determining his ceiling price or wage for the period following the specific event. He may use the statutory base period (30 days ending August 14, or the most recent 30 days when sales were made), or he may use the seasonal period of 1970 (from the date of the specific event through November 13). His ceiling price is based, therefore, on the prices realized on a substantial number of transactions during whichever base period he chooses to use.

(4) The seller or employer must have adequate records available to demonstrate the existence of the traditional practice in the 3 preceding years and the basis for calculating his ceiling price from the 1970 period.

(b) Attached hereto as Annex No. 1 is the text of remarks made by the Executive Director of the Cost of Living Council on the issue of "Seasonality" at a news conference on August 28, 1971.

302. *Charitable contributions.* Contributions to charitable organizations may be increased during the freeze.

400. *Price guidelines.*

401. *General guidelines.* (a) Dues are a fee for service, and as such are frozen under Executive Order No. 11615 and OEP Economic Stabilization Regulation No. 1, as amended. Examples are dues for membership in professional associations, trade associations, unions, and country clubs.

(b) Prices charged for advertising (publishing, television, and radio, etc.) and prices of newspapers, books, magazines, etc., are subject to the freeze.

403. *Prices on imports.* (a) The import surcharge should be shown in dollars and cents on the sales ticket or invoice when the charges are passed on to the consumer.

408. *Exemptions.* (a) The following list contains additional examples of exempt and nonexempt agricultural products:

Exempt	*Nonexempt*
Live cattle, calves, hogs, sheep and lambs.	Carcasses and mean cuts.
Live poultry	Dressed broilers and turkeys.
Raw milk	Pasteurized milk and processed products such as butter, cheese, ice cream.
Shell eggs, packaged or loose.	Frozen, dried or liquid eggs.
Sheared or pulled wool.	Wool products.
Raw honeycomb honey.	Processed and blended honeybutter product.

Exempt	*Nonexempt*
Mohair.	
Hay: bulk, pelleted, cubed or baled.	Dehydrated alfalfa meal or alfalfa meal pellets.
Wheat	Flour.
Feed grains including: Corn, Sorghum, Barley, Oats	Mixed feed. Cracked corn. Rolled barley. Rolled oats.
Soybeans	Soybean meal and oil.
Leaf tobacco	Cigarettes and cigars.
Baled cotton, cottonseed, cotton lint.	Cotton yarn, cottonseed oil, cottonseed meal.
Fresh potatoes, packaged or not.	Frozen french fries, dehydrated potatoes.
Unmilled rice	Milled rice.
All raw nuts—shelled and unshelled.	Roasted, salted or otherwise processed nuts.
Fresh mushrooms	Canned or freeze dried mushrooms.
Fresh mint	Mint oil.
Fresh hops.	
Dried beans, peas, and lentils.	
Sugar beets and sugar cane.	Raw and refined sugar.
Maple sap	Maple syrup and sugar.
All seeds for planting	Seeds processed for other uses.
Raw coffee bean	Roasted coffee bean.
All fresh vegetables and melons including: Tomatoes. Lettuce. Sweet corn. Onions. Green beans. Cantaloupe. Cucumbers. Cabbage. Carrots. Watermelons. Green peas. Asparagus. Peppers. Broccoli. Cauliflower. Spinach. Green lima beans. Honeydews. Escarole. Garlic. Artichokes. Eggplant. Brussel sprouts. Beets.	Canned and frozen vegetables.
Unpopped popcorn	Popped popcorn.
Stumpage, or trees cut from the stump.	Milled lumber.
All fresh or naturally dried fruits, packaged or not, including:	Canned, artificially dried frozen fruit or juices.
Fresh oranges	Glazed citrus peel.
Grapes and raisins	Canned grapes, wine.
Apples	Applesauce.
Peaches. Strawberries. Grapefruit. Pears. Lemons.	
Plums and prunes	Canned prunes and prune juice.
Cherries. Cranberries. Avocados. Blueberries. Apricots. Tangerines.	
Olives, uncured	Canned olives.
Nectarines. Raspberries. Blackberries. Figs. Tangelos. Limes. Dates. Papayas. Bananas. Pomegranates. Currants. Persimmons.	
Garden plants and cut flowers.	Floral wreath.

500. *Wage and salary guidelines.*

502. *Specific guidelines.* (a) If an employee is transferred from a job paid on a flat hourly rate to a job paid by an incentive system it is not a violation of the wage-price freeze as long as the new job is compensated under a previously established incentive system. However, no new incentive system can be established during the freeze.

(b) An employer may change the payment system for a job from a flat rate system to a previously established incentive system provided the employee on that job receives no more than the ceiling rate for the job established during the base period.

(c) A company has an established policy of increasing a supervisor's compensation when he must be temporarily transferred to a different city for an extended period. The company can continue to pay this extra compensation when these transfers are necessary but only if the company can document the fact that this is an established company policy. Furthermore, it can only pay at the rates previously established for such extra compensation.

(d) Business and government can continue to make cash awards during the freeze to employees for outstanding performance under the same formula and controls as existed during the base period. Records will have to be maintained on the incidence and amount of these awards which demonstrate that these programs are not used to give employees wage increases in violation of the freeze.

(e) Attached hereto and incorporated herein as Annex No. 2 is an official summary of Council decisions on wage and salary controls in the field of education.

600. *Rent guidelines.*

602. *Specific guidelines.* (a) A landlord cannot require a tenant to pay utilities after August 15, 1971, if prior to that date utilities had been paid by the landlord.

(b) An increase in rent may be charged for property which undergoes a substantial capital improvement if the following criteria are met:

(1) The capital improvement must equal at least 3 months' rent (with a minimum of $250) on items that would be classified as capital improvements by the Internal Revenue Service.

(2) If condition (1) is met the unit may be treated as a new apartment, with rent to be no higher than the rent charged on comparable apartments in the market area, but in no event shall the increase per month exceed 1½ percent of the amount spent for capital improvement.

(c) The ceiling price for rental property that was vacant during the base period is the rent charged the last time the property was rented.

1001. *Effective date.* This circular, unless modified, superseded, or revoked, is effective on the date of publication for a period terminating at midnight of November 13, 1971.

Dated: August 30, 1971.

G. A. LINCOLN,
Director,
Office of Emergency Preparedness.

ANNEX NO. 1 TO OEP ECONOMIC STABILIZATION CIRCULAR NO. 5

Opening remarks by Arnold R. Weber, Executive Director, Cost of Living Council at news conference August 28, 1971:

In the last 12 days, the Cost of Living Council has considered a large number of issues concerning the wage-price freeze. Decisions on these issues have been made in the spirit of the President's basic premise: That the inflation threatening the Nation's economic stability must be halted. As these decisions have been made, we have distributed them to the American public as quickly as possible, because we know that many critical decisions hang upon those actions.

Again today we are issuing a press release, Q & A No. 9, which addresses issues decided by the Council. One of these is the issue of seasonality, which I would like to discuss with you now.

Seasonality. As you know, the prices and wages associated with a large number of products and industries follow distinct seasonal patterns. This is the issue of seasonality and it is not only an important issue, but one that requires immediate action.

The key question is: Should prices and wages that follow a distinct seasonal pattern qualify for exemption under the wage-price freeze?

The answer is not simple. To qualify, prices and wages must show a distinct fluctuation at a specific, identifiable point in time. There must also be a documented and established practice that has taken place in each of the past 3 years. Examples are Puerto Rican hotel rates at the beginning or end of the fall/winter season, auto dealers' selling prices at new-model-introduction time; and wage rates for seasonal agricultural workers.

The important thing here is that each seasonal price change must be tied to a specific date, e.g., the introduction of new car models, the end of a specific month as in the case of traditional August furniture sales, the onset of a specific holiday such as Labor Day, or the start of a particular harvest season. The price change may not take place earlier this year than in 1970, unless the date is tied to a specific event such as previously planned introduction of new models or new television programs.

If the price or wage change qualifies as seasonal by the criteria just stated, the seller is permitted a choice of base periods to use in determining his ceiling price or wage. He may use the statutory base period (30 days prior to August 14 or the most recent 30 days when sales were made) or he may use the same seasonal period for 1970 (from the date of the specific event through November 13).

His selling price is based, therefore, on the prices he realized on a substantial number of transactions during whichever of the alternative base periods he chooses to use.

The seller or employer must have adequate records available to demonstrate the existence of the traditional practice in three preceding years and the basis for calculating his selling price for the 1970 period. New establishments or activities may determine their qualification from that generally prevailing for similar establishments or activities in the immediate area.

Industries that regularly introduce new models require special procedures; separate ceilinga must be calculated for the 1971 models and the 1972 models (even if there is no difference in the posted prices of the two models). Taking automobiles, washing machines or snowmobiles, for example, the ceiling for the 1971 models would continue to be based on the July 16–August 14, 1971 base period, while the ceiling for the 1972 models would, if the dealer chooses, be based on prices charged for the 1971 models when they were introduced during the comparable 1970 period.

ANNEX NO. 2 TO OEP ECONOMIC STABILIZATION CIRCULAR NO. 5

Cost of Living Council today issued the following summary of decisions on wage and salary contracts in the field of education.

If a teacher (or other educational personnel) in a school system has either performed work prior to August 15 under a new contract calling for a wage increase or if the teacher was eligible to have earned a salary at the new rate prior to August 15 the new rate is permissible. To be eligible means that the teacher in fact accrued earnings (at the new rate) which covered a period prior to August 15, although he or she may not have actually performed any work during that period.

In many cases a contract may read that its effective date is July 15 or some other day prior to August 15. The effective date of the pay increase for purposes of the wage-price freeze for individual contracts is determined by the two criteria—when the work is performed or when the individual is eligible to receive the new increase. Eligibility is proven by the period covered by and indicated on the pay check (which may be issued after August 15). As an example, if a college has five cafeterias, three of which close down for the summer, and if the cafeteria workers are employed under a wage scale and under individual contracts keyed to those scales, the increase applies only to the summer employee who performed work prior to August 15. Those returning in September who have not performed work under the new contract do not receive the increase. If, however, there was one uniform system contract for all, then those cafeteria workers returning in the fall also receive the increase.

In the case of school systems that have negotiated a systemwide contract which is applicable to all teachers in the system and which makes all teachers eligible to receive payment prior to August 15, all teachers may receive these increased payments if any one teacher either performed work or was accruing pay prior to August 15.

The question has arisen as to whether this applies to cafeteria workers and others. Where there is a system contract that meets the above criteria it applies. Otherwise the rule that applies is that before the increase is granted work must be performed under the new individual contract or the individual must have been eligible to accrue pay during a period prior to August 15.

A distinction is drawn between a system's contract negotiated for all teachers, or for other personnel, and a pay schedule on which individual contracts are based. Under the former, all teachers are eligible for increases if one teacher has performed under the contract prior to August 15 or was eligible to earn under it; under the uniform pay schedule each individual is dealt with individually: If he or she has performed work under the contract prior to August 15 or has been eligible to earn the new increase prior to that date the increase is allowed.

Another question involves multiyear contracts calling for annual increases on a date after the August 15 freeze. The increase may not go into effect.

What about longevity increases due after August 15? The longevity increase is frozen even though the pay raise is approved under conditions described here.

Does a teacher who has completed courses and received additional degrees making her eligible for the higher pay rate get a new salary level? Yes. This is a promotion, not a pay raise.

Can a newly hired teacher whose contract is signed after the freeze date collect the higher pay in a school system where all the wages are frozen under these rulings? No.

The question has been asked as to how this applies to college teachers. Where there is a system contract uniformly applying to college teachers in a college or university system, the same rule applies—if work was performed by any one faculty member under the new contract prior to August 15, or if any faculty member accrued the new salary prior to that date even if no work was performed, all faculty members affected by the contract are eligible for the increase. Where there are individual contracts, the two criteria of work performed or eligibility for accruing salary apply.

It is apparent that variations in contracts will continue to raise questions. School related organizations needing further information for their particular situations should wire Teacher Information at one of the 10 OEP regional centers (see list below), and state their specific questions or problems. A response will be made as soon as possible. Only requests from school related organizations will be honored.

Proposed Rule Making

DEPARTMENT OF THE INTERIOR

Office of the Secretary

[43 CFR Part 4]

EQUAL EMPLOYMENT OPPORTUNITY

Proposed Rules of Practice and Procedure

Pursuant to delegated authority, and in accordance with Executive Order No. 11246, as amended by Executive Order No. 11375, and rules and regulations implementing said order, as amended, the Secretary of the Interior proposes to adopt the following rules of practice and procedure to be used in proceedings for the imposition of sanctions under section 209(a) (1), (5), and (6) of Executive Order No. 11246, as amended, for violations of the Executive order, as amended, and rules, regulations and orders thereunder.

The proposed regulations reflect the authority delegated by the Secretary to the Director, Office for Equal Opportunity, Department of the Interior, to initiate the formal administrative proceedings for the imposition of such sanctions, by the filing of a notice of hearing upon the parties concerned, and the authority delegated by the Secretary to the Director, Office of Hearings and Appeals, Office of the Secretary, to issue a final decision for the Department after full opportunity for hearing before a hearing examiner of the Office of Hearings and Appeals.

It is proposed to place these regulations within Part 4 of Title 43 of the Code of Federal Regulations, Department Hearings and Appeals Procedures, as Subpart H thereof, and to provide that, to the extent they are not inconsistent with these special rules, the general rules applicable to all types of proceedings before the Hearings Division and the several Appeals Boards of the Office of Hearings and Appeals, contained in Subpart B of Part 4, will be applicable also to proceedings under these proposed regulations.

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportunity to participate in the rule making process. Accordingly, interested persons may submit written comments, suggestions or objections with respect to the proposed regulations to the Director, Office of Hearings and Appeals, Attention: Special Assistant to the Director (Regulations), 4015 Wilson Boulevard, Arlington, VA 22203, within 30 days from the date of publication of this notice in the FEDERAL REGISTER.

Dated: August 23, 1971.

W. T. PECORA,
Acting Secretary of the Interior.

POSTHEARING PROCEDURES

4.787 Proposed findings of fact and conclusions of law.
4.788 Record for decision.
4.789 Recommended determination.
4.790 Exceptions to recommended determination.
4.791 Record.
4.792 Final decision.

AUTHORITY: The provisions of this Subpart H, issued under Executive Order No. 11246 of September 24, 1965 (30 F.R. 12319), as amended by Executive Order No. 11375 of October 13, 1967 (32 F.R. 14303), and 41 CFR 60–1.26(b), 33 F.R. 7804 (May 28, 1968).

CROSS REFERENCE: See Subpart A for the organization, authority and jurisdiction of the Office of Hearings and Appeals, including its Hearings Division. To the extent they are not inconsistent with these special rules, the general rules applicable to all types of proceedings before the Hearings Division and the several Appeals Boards of the Office of Hearings and Appeals, contained in Subpart B of this part, are applicable also to proceedings under these regulations.

Subpart H—Special Procedural Rules Applicable to Proceedings Conducted Pursuant to Enforcement of Executive Order 11246, as Amended by Executive Order 11375, and Rules, Regulations and Orders Issued Thereunder

GENERAL

§ 4.750 Authority.

These rules of procedure supplement, and are established pursuant to, the provisions of 41 CFR 60–1.26(b).

§ 4.751 Scope of rules.

These rules govern the practice and procedure for proceedings conducted, and decisions made, by the Department precedent to the imposition of sanctions under section 209(a) (1), (5), and (6) of Executive Order 11246, as amended by Executive Order 11375, for violations of the Executive Order 11246, as amended, and rules, regulations and orders thereunder.

§ 4.752 Definitions.

Except as otherwise indicated in the context in which it appears in these regulations, the term

(a) "Department" means the Department of the Interior.

(b) "Secretary" means the Secretary of the Interior.

(c) "Director" means the Director, Office for Equal Opportunity, Department of the Interior.

(d) "Office for Equal Opportunity" means the Office for Equal Opportunity in the Department of the Interior.

(e) "Office of Federal Contract Compliance" means the Office of Federal Contract Compliance, U.S. Department of Labor.

(f) "Office of Hearings and Appeals" means the Office of Hearings and Appeals in the Office of the Secretary, Department of the Interior.

(g) "Hearing examiner" means a hearing examiner appointed by the Director, Office of Hearings and Appeals.

(h) "Executive Order" means Executive Order 11246, 30 F.R. 12319, as

amended by Executive Order 11375, 32 F.R. 14303.

(i) "Notice" means a notice of hearing in a proceeding instituted under 41 CFR 60–1.26(b) and these regulations.

(j) "Party" means a respondent; the Director; and any person or organization participating in a proceeding pursuant to § 4.757.

(k) "Respondent" means a person or organization against whom sanctions are proposed because of alleged violations of Executive Order 11246, as amended, and rules, regulations, and orders thereunder.

§ 4.753 Time computation.

Except as otherwise provided by law, in computing any period of time under these rules or in an order issued hereunder, the time begins with the day following the act or event, and includes the last day of the period, unless it is a Saturday, Sunday, or Federal legal holiday, or other nonbusiness day, in which event it includes the next following day which is not a Saturday, Sunday, Federal legal holiday, or other nonbusiness day. When the period of time prescribed or allowed is 7 days or less, intermediate Saturdays, Sundays, Federal legal holidays and other nonbusiness days shall be excluded in the computation.

DESIGNATION AND RESPONSIBILITIES OF HEARING EXAMINER

§ 4.754 Designation.

Hearings shall be held before a hearing examiner designated by the Chief Hearing Examiner, Hearings Division, Office of Hearings and Appeals.

§ 4.755 Authority and responsibilities.

(a) The hearing examiner shall have all powers necessary to preside over the parties and the proceedings, conduct the hearing, and enter recommended findings and conclusions and a recommended determination. His powers shall include, but not be limited to, the power to:

(1) Hold conferences to settle, simplify, or fix the issues in a proceeding, or to consider other matters that may aid in the expeditious disposition of the proceeding.

(2) Require parties to state their position with respect to the various issues in the proceedings.

(3) Establish rules for media coverage of the proceedings.

(4) Rule on motions and other procedural items in matters before him.

(5) Regulate the course of the hearing, the conduct of counsel, parties, witnesses and other participants.

(6) Administer oaths, call witnesses on his own motion, examine witnesses and direct witnesses to testify.

(7) Receive, rule on, exclude, or limit evidence.

(8) Fix time limits for submission of written documents in matters before him.

(9) Take any action authorized by these regulations or in conformance with the provisions of applicable law.

(b) The hearing examiner shall recommend a determination of the issues on the basis of the record before him. Together with his recommended determination, he shall recommend findings of fact and conclusions of law to the Director, Office of Hearings and Appeals.

APPEARANCE AND PRACTICE

§ 4.756 Participation by a party.

Subject to the provisions contained in Part 1 of this subtitle, a party may appear in person, by representative, or by counsel, and participate fully in any proceeding held pursuant to these regulations.

§ 4.757 Determination of parties.

(a) The Respondent and the Director are the initial parties to the proceeding. To the extent that proceedings hereunder are based in whole or in part on matters subject to a collective bargaining agreement, any labor organization which is signatory to such agreement shall also have the right to participate as a party.

(b) Other persons or organizations shall have the right to participate as parties if the final decision could directly and adversely affect them or the class they represent, and if they may contribute materially to the disposition of the proceedings.

(c) Any person or organization wishing to participate as a party under this section shall submit a petition to the hearing examiner within 15 days after the notice has been served. The petition should be filed with the hearing examiner and served on Respondent, on the Director, and on any other person or organization who has been made a party at the time of filing. Such petition shall concisely state: (1) Petitioner's interest in the proceeding, (2) how his participation as a party will contribute materially to the disposition of the proceeding, (3) who will appear for petitioner, (4) the issues on which petitioner wishes to participate, and (5) whether petitioner intends to present witnesses.

(d) The hearing examiner shall promptly ascertain whether there are objections to the petition. He shall then determine whether petitioners have the requisite interest to be a party in the proceedings, as defined in paragraphs (a) and (b) of this section, and shall permit or deny participation accordingly. Where petitions to participate as parties are made by individuals or groups with common interests, the hearing examiner may request all such petitioners to designate a single representative, or he may recognize one or more of such petitioners to represent all such petitioners; provided that the representative of a labor organization qualifying to participate under paragraph (a) of this section shall be permitted to participate as a party. The hearing examiner shall give each such petitioner written notice of the decision on his petition. If the petition is denied, he shall briefly state the grounds for denial and shall then treat the petition as a request for participation as amicus curiae. The hearing examiner shall give written notice to each party of each petition granted.

(e) Persons or organizations whose petition for party participation is denied may appeal the decision to the Director, Office of Hearings and Appeals, within 7 days of receipt of denial. The Director, Office of Hearings and Appeals, will make the final decision for the Department to grant or deny the petition.

§ 4.758 Determination and participation of amici.

(a) Any interested person or organization wishing to participate as amicus curiae in the proceeding shall file a petition before the commencement of the hearing. Such petition shall concisely state the petitioner's interest in the hearing and who will represent petitioner.

(b) The hearing examiner will grant the petition if he finds that the petitioner has an interest in the proceedings and may contribute materially to the disposition of the proceedings. The hearing examiner shall give the petitioner written notice of the decision on his petition.

(c) An amicus curiae is not a party but may only participate as provided in paragraph (d) of this section.

(d) An amicus curiae may submit a written statement of position to the hearing examiner at any time prior to the beginning of a hearing, and shall serve a copy on each party. He may also file a brief or written statement at such time as the parties submit proposed findings and conclusions and supporting briefs to the hearing examiner and at such time as the parties file exceptions to the recommended determination of the hearing examiner.

FORM AND FILING OF DOCUMENTS

§ 4.759 Form.

Documents filed pursuant to a proceeding herein shall show the docket description and title of the proceeding, the party or amicus submitting the document, the date signed, and the title, if any, and address of the signatory. The original will be signed in ink by the party representing the party or amicus. Copies need not be signed, but the name of the person signing the original shall be reproduced.

§ 4.760 Filing and service.

(a) All documents submitted in a proceeding shall be served on all parties. The original and two copies of each document shall be submitted for filing. Filings shall be made with the hearing examiner, at the address stated in the notice. With respect to exhibits and transcripts of testimony, only originals need be filed.

(b) Service upon a party or amicus shall be made by delivering one copy of each document requiring service in person or by certified mail, return receipt requested, properly addressed with postage prepaid, to the party or amicus or his attorney, or designated representative. Filing will be made in person or by certified mail, return receipt requested, to the hearing examiner, at the address stated in the notice of scheduled hearing.

(c) The date of filing or of service shall be the day when the matter is deposited in the United States mail or is delivered in person.

§ 4.761 Certificate of service.

The original of every document filed and required to be served upon parties shall be endorsed with a certificate of service signed by the party or amicus curiae making service or by his attorney or representative, stating that such service has been made, the date of service, and the manner of service.

PROCEDURES

§ 4.762 Notice of hearing.

In response to Respondent's request for a hearing, the Director shall serve on the Respondent, pursant to 41 CFR 60–1.26(b), a notice of hearing by registered mail, return receipt requested, to Respondent's last known address. Such notice shall contain the time and place of the hearing; the legal authority under which the proceedings are to be held; and the matters pursuant to which sanctions or other actions are proposed.

§ 4.763 Answer to notice.

Within 15 days after receipt of the notice of hearing, Respondent may file an answer. This answer shall admit or deny specifically and in detail matters set forth in each allegation of the notice unless Respondent is without knowledge, in which case his answer should so state, and the statement shall be deemed a denial. Matters not specifically denied shall be deemed admitted. Matters alleged in the answer as affirmative defenses shall be separately stated and numbered. Failure of Respondent to file an answer within the 15-day period following receipt of the notice may be deemed an admission of all facts recited in the notice.

§ 4.764 Amendments.

The Director may amend his notice once as a matter of course before an answer is filed, and Respondent may amend its answer once as a matter of course not later than 15 days after it is filed. Other amendments of the notice or of the answer to the notice shall be made only by leave of the hearing examiner. An amended notice shall be answered within 10 days of its service, or within the time for filing an answer to the original notice, whichever period is longer.

§ 4.765 Motions.

Motions and petitions shall state the relief sought, the basis for relief and the authority relied upon. If made before or after the hearing itself, these matters shall be in writing. If made at the hearing, they may be stated orally; but the hearing examiner may require that they be reduced to writing and filed and served on all parties. Within 8 days after a written motion or petition is served, any party may file a response to a motion or petition. An immediate oral response may be made to an oral motion. Oral argument on motions will be at the discretion of the hearing examiner.

§ 4.766 Disposition of motions.

The hearing examiner may not grant a written motion or petition prior to expiration of the time for filing responses thereto, but may overrule or deny such motion or petition without awaiting response: *Provided however*, That prehearing conferences, hearings, and decisions need not be delayed pending disposition of motions or petitions. Oral motions and petitions may be ruled on immediately.

§ 4.767 Interlocutory appeals.

No interlocutory appeals will be permitted from an adverse ruling except as specifically provided in these rules.

§ 4.768 Exhibits.

Proposed exhibits shall be exchanged at the prehearing conference, or otherwise prior to the hearing, if the hearing examiner so directs. Proposed exhibits not so exchanged in accordance with the hearing examiner's order may be denied admission as evidence. The authenticity of all exhibits submitted prior to the hearing, under direction of the hearing examiner, will be deemed admitted unless written objection thereto is filed and served on all parties, or unless good cause is shown for failure to file such written objection.

§ 4.769 Admissions as to facts and documents.

Not later than 25 days prior to the date of the hearing any party may serve upon an opposing party a written request for the admission of the genuineness and authenticity of any relevant documents described in, and exhibited with, the request, or for the admission of the truth of any relevant matters of fact stated in the request. Each of the matters as to which an admission is requested shall be deemed admitted, unless within a period of 20 days, the party to whom the request is directed serves upon the requesting party a statement either (a) denying specifically the matters as to which an admission is requested, or (b) setting forth in detail the reasons why he cannot truthfully either admit or deny such matters.

§ 4.770 Discovery.

(a) *Methods.* Parties may obtain discovery as provided in these rules by depositions, written interrogatories, production of documents, or other items; or by permission to enter property, for inspection and other purposes.

(b) *Scope.* Parties may obtain discovery regarding any matter, not privileged, which is relevant to the subject matter involved in the hearing.

(c) *Protective orders.* Upon motion by a party or by the person from whom discovery is sought, and for good cause shown, the hearing examiner may make any order which justice requires to limit or condition discovery in order to protect a party or person from annoyance, embarrassment, oppression, or undue burden or expense.

(d) *Sequence and timing.* Methods of discovery may be used in any sequence. The fact that a party is conducting discovery shall not operate to delay any other party's discovery.

(e) *Time limit.* Discovery by all parties will be completed within such time as the examiner directs, from the date the notice of hearing is served on Respondent.

§ 4.771 Depositions.

(a) A party may take the testimony of any person, including a party, by deposition upon oral examination. This may be done by stipulation or by notice, as set forth in paragraph (b) of this section. On motion of any party or other person upon whom the notice is served, the hearing examiner may for cause shown enlarge or shorten the time for the deposition, change the place of the deposition, limit the scope of the deposition or quash the notice. Depositions of persons other than parties shall be upon consent of the deponent.

(b (1) The party will give reasonable notice in writing to every other party of the time and place for taking depositions, the name and address of each person to be examined, if known, or a general description sufficient to identify him or the particular class or group to which he belongs.

(2) The notice to a deponent may be accompanied by a request for the production of documents and tangible things at the taking of the deposition.

(3) A party may name as the deponent a corporation, partnership, association, or governmental agency and may designate a particular person within the organization whose testimony is desired and the matters on which examination is requested. If no particular person is named, the organization shall designate one or more agents to testify on its behalf, and may set forth the matters on which each will testify. The persons so designated shall testify as to matters known or reasonably available to the organization.

(c) Examination and cross-examination of witnesses may proceed as permitted at the hearing. The witness shall be placed under oath by a disinterested person qualified to administer oaths by the laws of the United States or of the place where the examination is held, and the testimony taken by such person shall be recorded verbatim.

(d) During the taking of a deposition a party or deponent may request suspension of the deposition on grounds of bad faith in the conduct of the examination, annoyance, embarrassment, oppression of a deponent or party or improper questions propounded. The deposition will then be adjourned. However, the objecting party or deponent must immediately move the hearing examiner for a ruling on his objections to the deposition conduct or proceedings. The hearing examiner may then limit the scope or manner of the taking of the deposition.

(e) The officer shall certify the deposition and promptly file it with the hearing examiner. Documents or true copies of documents and other items produced for inspection during the examination of

the witness shall, upon the request of a party, be marked for identification and annexed to the deposition.

(f) The party taking the deposition shall give prompt notice of its filing to all other parties.

§ 4.772 Use of depositions at hearing.

(a) Any part or all of a deposition, so far as admissible under § 4.780 applied as though the witness were then present and testifying, may be used against any party who was present or represented at the taking of the deposition or who had reasonable notice thereof as follows:

(1) Any deposition may be used for contradition or impeachment of the deponent as a witness.

(2) The deposition of a party, or of an agent designated to testify on behalf of a party, may be used by an adverse party for any purpose.

(3) The deposition of any witness may be used for any purpose if the party offering the deposition has been unable to procure the attendance of the witness because he is dead; or if the witness is at a greater distance than 100 miles from the place of hearing, or is out of the United States, unless it appears that the absence of the witness was procured by the party offering the deposition; or if the witness is unable to attend or testify because of age, illness, infirmity, or imprisonment; or, upon application and notice, that such exceptional circumstances exist as to make it desirable, in the interest of justice and with due regard to the importance of presenting the testimony of witnesses orally in open hearing, to allow the deposition to be used.

(b) If only part of a deposition is offered in evidence, the remainder becomes subject to introduction by any party.

(c) Objection may be made at the hearing to receiving in evidence any deposition or part thereof for any reason which would require the exclusion of the evidence if the witness were then present and testifying.

§ 4.773 Interrogatories to parties.

(a) Any party may serve upon any other party written interrogatories after the notice of hearing has been filed. If the party served is a corporation, partnership, association, or governmental agency, an agent shall furnish such information as is available to the party.

(b) Each interrogatory shall be answered separately and fully in writing under oath, unless it is objected to, in which event the objection shall be stated in lieu of an answer. The answers are to be signed by the person making them, and the objections signed by the attorney or other representative making them. Answers and objections shall be made within 30 days after the service of the interrogatories. The party submitting the interrogatories may move for an order under § 4.775 with respect to any objection to or other failure to answer an interrogatory.

(c) Interrogatories shall relate to any matter not privileged which is relevant to the subject matter of the hearing.

§ 4.774 Production of documents and things and entry upon land for inspection and other purposes.

(a) After the notice of hearing has been filed, any party may serve on any other party a request to produce and/or permit the party, or someone acting on his behalf, to inspect and copy any designated documents, phonorecords, and other data compilations from which information can be obtained and which are in the possession, custody or control of the party upon whom the request is served. If necessary, translation of data compilations shall be done by the party furnishing the information.

(b) After the notice of hearing has been filed, any party may serve on any other party a request to permit entry upon designated property in the possession or control of the party upon whom the request is served for the purpose of inspection, measuring, surveying or photographing, testing, or sampling the property or any designated object.

(c) Each request shall set forth with reasonable particularity the items to be inspected and shall specify a reasonable time, place, and manner of making the inspection and performing the related acts.

(d) The party upon whom the request is served shall respond within 15 days after the service of the request. The response shall state, with respect to each item, that inspection and related activities will be permitted as requested, unless there are objections in which case the reason for each objection shall be stated. The party submitting the request may move for an order under § 4.775 with respect to any objection to or other failure to respond.

§ 4.775 Sanctions.

(a) A party, upon reasonable notice to other parties and all persons affected thereby, may move for an order as follows:

(1) If a deponent fails to answer a question propounded or submitted under § 4.771(c), or a corporation or other entity fails to make a designation under § 4.771(b)(3), or a party fails to answer an interrogatory submitted under § 4.773, or if a party, under § 4.774 fails to respond that inspection will be permitted or fails to permit inspection, the discovering party may move for an order compelling an answer, a designation, or inspection.

(2) An evasive or incomplete answer is to be treated as a failure to answer.

(b) If a party or an agent designated to testify fails to obey an order to permit discovery, the hearing examiner may make such orders as are just, including:

(1) That the matters regarding which the order was made or any other designated facts shall be established in accordance with the claim of the party obtaining the order;

(2) Refusing to allow the disobedient party to support or oppose designated claims or defenses, or prohibiting him from introducing designated matters in evidence.

(c) If a party or an agent designated to testify fails after proper service (1) to appear for his deposition, (2) to serve answers or objections to interrogatories submitted under § 4.773, or (3) to serve a written response to a request for inspection, submitted under § 4.774, the hearing examiner on motion may make such orders as are just, including those authorized under subparagraphs (1) and (2) of paragraph (b) of this section.

§ 4.776 Ex parte communications.

(a) Written or oral communications involving any substantive or procedural issue in a matter subject to these proceedings, directed to the hearing examiner, the Director, the Director, Office of Federal Contract Compliance, or the Director, Office of Hearings and Appeals, shall be deemed ex parte communications and are not to be considered part of any record or the basis for any official decision, unless the communication is made by motion pursuant to these rules.

(b) The hearing examiner shall not consult any person, or party, on any fact in issue or on the merits of the matter before him unless upon notice and opportunity for all parties to participate.

(c) No employee or agent of the Federal Government engaged in the investigation and prosecution of a proceeding governed by these rules shall participate or advise in the rendering of the recommended or final decision, except as witness or counsel in the proceeding.

PREHEARING

§ 4.777 Prehearing conferences.

(a) Within 15 days after the answer has been filed the hearing examiner will establish a prehearing conference date for all parties including persons or organizations whose petition requesting party status has not been ruled upon. Written notice of the prehearing conference shall be sent by the hearing examiner.

(b) At the prehearing conference the following matters, among others, shall be considered: (1) Simplification and delineation of the issues to be heard; (2) stipulations; (3) limitation of number of witnesses; and exchange of witness lists; (4) procedure applicable to the proceeding; (5) offers of settlement; and (6) scheduling of the dates for exchange of exhibits. Additional prehearing conferences may be scheduled at the discretion of the hearing examiner, upon his own motion or the motion of a party.

HEARING

§ 4.778 Appearances.

In the event that a party appears at the hearing and no party appears for the opposing side, the party who is present shall have an election to present his evidence in whole or such portion thereof sufficient to make a prima facie case before the hearing examiner. Failure to appear at a hearing shall not be deemed to be a waiver of the right to be served

with a copy of the hearing examiner's proposed decision and to file exceptions to it.

§ 4.779 Purpose.

(a) The hearing is directed primarily to receiving factual evidence and expert opinion testimony related to the issues in the proceeding. A hearing will be held in order to determine whether Respondent has failed to comply with one or more applicable requirements of Executive Order 11246, and rules, regulations, and orders thereunder. However, this shall not prevent the parties from entering into a stipulation of the facts.

(b) If all facts are stipulated, the proceedings shall go to conclusion in accordance with §§ 4.787 to 4.792.

§ 4.780 Evidence.

Formal rules of evidence will not apply to the proceeding. Irrelevant, immaterial, unreliable, and unduly repetitious evidence will be excluded from the record of a hearing. Hearsay evidence shall not be inadmissible as such.

§ 4.781 Official notice.

Whenever a party offers a public document, or part thereof, in evidence, and such document, or part thereof, has been shown by the offeror to be reasonably available to the public, such document need not be produced or marked for identification, but may be offered for official notice as a public document item by specifying the document or relevant part thereof. Official notice may also be taken of other matters, at the discretion of the hearing examiner.

§ 4.782 Testimony.

Testimony shall be given under oath by witnesses at the hearing. A witness shall be available for cross-examination, and, at the discretion of the hearing examiner, may be cross-examined without regard to the scope of direct examination as to any matter which is material to the proceeding.

§ 4.783 Objections.

Objections to evidence shall be timely, and the party making them shall briefly state the ground relied upon.

§ 4.784 Exceptions.

Exceptions to rulings of the hearing examiner are unnecessary. It is sufficient that a party, at the time the ruling of the hearing examiner is sought, makes known the action which he desires the hearing examiner to take, or his objection to an action taken, and his ground therefor.

§ 4.785 Offer of proof.

An offer of proof made in connection with an objection taken to any ruling of the hearing examiner excluding proffered oral testimony shall consist of a statement of the substance of the evidence which counsel contends would be adduced by such testimony. If the excluded evidence consists of evidence in written form or consists of reference to documents, a copy of such evidence shall be marked for identification and shall accompany the record as the offer of proof.

§ 4.786 Official transcript.

An official reporter will be designated for all hearings. The official transcripts of testimony and argument taken, together with any exhibits, briefs, or memoranda of law filed therewith, shall be filed with the hearing examiner. Transcripts may be obtained by the parties and the public from the official reporter at rates not to exceed the applicable rates fixed by the contract with the reporter. Upon notice to all parties, the hearing examiner may authorize such corrections to the transcript as are necessary to accurately reflect the testimony.

POSTHEARING PROCEDURES

§ 4.787 Proposed findings of fact and conclusions of law.

Within 30 days after the close of the hearing each party may file, or the hearing examiner may request, proposed findings of fact and conclusions of law together with supporting briefs. Such proposals and briefs shall be served on all parties and amici. Reply briefs may be submitted within 15 days after receipt of the initial proposals and briefs. Reply briefs should be filed and served on all parties and amici.

§ 4.788 Record for decision.

The hearing examiner will make his recommended findings, conclusions, and recommended decision upon the basis of the record before him. The transcript of testimony, exhibits, and all papers, documents, and requests filed in the proceedings, except the correspondence section of the docket, shall constitute the record.

§ 4.789 Recommended determination.

The hearing examiner shall, in an expeditious manner, rule on proposed findings and conclusions submitted by the parties; and shall make recommended findings, conclusions, and decision. These rulings and recommendations shall be certified, together with the record for decision, to the Director, Office of Hearings and Appeals, for his decision. The rulings, recommended findings, conclusions, and decision of the hearing examiner shall be served on all parties and amici curiae to the proceedings.

§ 4.790 Exceptions to recommended determination.

Within 30 days after receipt of the recommended determination, all parties to the proceeding may file with the Director, Office of Hearings and Appeals, exceptions to the recommended findings, conclusions and decision of the hearing examiner, together with supporting briefs. Service of such exceptions and briefs shall be made on all parties and amici. Such briefs may be responded to within 15 days of their receipt by the other parties. Responses shall be filed with the Director, Office of Hearings and Appeals, and served on all parties and amici.

§ 4.791 Record.

After expiration of the time for filing briefs and exceptions, the Director, Office of Hearings and Appeals, shall make a decision on the basis of the record before him. The record includes the record before the hearing examiner, the rulings, the recommended findings, conclusions and decision of the hearing examiner, and the exceptions and briefs filed subsequent to the hearing examiner's decision.

§ 4.792 Final decision.

The Director, Office of Hearings and Appeals, may affirm, modify, or set aside in whole or in part, the recommended findings, conclusions, and decision of the hearing examiner. The decision of the Director, Office of Hearings and Appeals, shall not be final without the approval of the Director, Office of Federal Contract Compliance, Department of Labor.

Oil Import Administration

[32A CFR Ch. X]

[Oil Import Reg. 1 (Rev. 5)]

IMPORTS OF RESIDUAL FUEL OIL TO BE USED AS FUEL; DISTRICT I

Notice of Extension of Time for Comment

By notice of proposed rule making published in the FEDERAL REGISTER of August 5, 1971 (36 F.R. 14388), the Oil Import Administration requested comments by August 31, 1971, upon a proposed revision to section 12 of Oil Import Regulation 1 (Revision 5), as amended, which provides for the making of allocations of residual fuel oil in District I.

Several requests have been received for an extension of time within which to comment based upon a belief that the proposal represents a change in the policy by whereby maximum levels of imports of residual fuel oil to be used as fuel are set. Proclamation 3279, as amended, establishes the method for determining the maximum level of imports into District I of residual fuel oil. The proposal makes no change in that policy. However, it is deemed advisable to extend the time for comments to September 30, 1971, in order to give all interested parties adequate time to prepare and submit such comments as they desire.

Comments in response to the notice of proposed rule making concerning Imports of Residual Fuel Oil to be Used as Fuel in District I published in the FEDERAL REGISTER on August 5, 1971, (36 F.R. 14388), may be submitted to the Administrator, Oil Import Administration, Department of the Interior, Washington, D.C., 20240. Each person sub-

mitting comments is asked to submit fifteen (15) copies.

T. C. SNEDEKER,
Acting Administrator,
Oil Import Administration.

DEPARTMENT OF AGRICULTURE

Consumer and Marketing Service

[7 CFR Part 911]

LIMES GROWN IN FLORIDA

Proposed Budget of Expenses and Rate of Assessment

Notice is hereby given that the Department is considering a proposed amendment, as hereinafter set forth, to the provisions of § 911.209 *Expenses and rate of assessment* (Subpart—Budget of Expenses and Rate of Assessment) currently effective pursuant to the applicable provisions of the marketing agreement, as amended, and Order No. 911, as amended (7 CFR Part 911), regulating the handling of limes grown in Florida, effective under applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

The amendment to the said budget of expenses and rate of assessment was proposed by the Florida Lime Administrative Committee, established under said marketing agreement and order as the agency to administer the terms and provisions thereof.

The proposed amendment would authorize the carryover of the committee's unexpended assessment funds for the fiscal year ended March 31, 1971.

As amended, § 911.209 *Expenses and rate of assessment* (36 F.R. 13583) would read as follows:

§ 911.209 Expenses and rate of assessment.

* * * * *

(c) *Reserve.* Unexpended assessment funds, in excess of expenses incurred during the fiscal year ended March 31, 1971, shall be carried over as a reserve in accordance with the applicable provisions of §§ 911.42 and 911.204 (36 F.R. 16570).

All persons who desire to submit written data, views, or arguments in connection with the aforesaid proposal shall file the same, in quadruplicate, with the Hearing Clerk, U.S. Department of Agriculture, Room 112, Administration Building, Washington, DC 20250, not later than the 10th day after the publication of this notice in the FEDERAL REGISTER. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

Dated: August 25, 1971.

PAUL A. NICHOLSON,
Deputy Director, Fruit and Vegetable Division, Consumer and Marketing Service.

[9 CFR Part 331]

MEAT INSPECTION

Notice of Intended Designation of Guam and Virgin Islands Under Federal Meat Inspection Act

The Secretary of Agriculture has determined, after consultation with appropriate officials of the Territory of Guam and the Territory of the Virgin Islands of the United States that neither of said Territories has developed or activated requirements at least equal to those under titles I and IV of the Federal Meat Inspection Act (21 U.S.C. 601 et seq.), with respect to establishments within such Territory at which cattle, sheep, swine, goats, or equines are slaughtered, or their carcasses, or parts or products thereof, are prepared for use as human food, solely for distribution within such Territory. Therefore, notice is hereby given that the Secretary of Agriculture will designate said Territories under section 301 (c) of the Federal Meat Inspection Act (21 U.S.C. 661(c)) as jurisdictions in which the requirements of titles I and IV shall apply to intraterritorial operations and transactions and to persons, firms, and corporations engaged therein with respect to meat products and other articles and animals subject to the Act. Such designations will be made as soon as necessary arrangements can be made for determining which establishments are eligible for Federal inspection, for providing inspection at the eligible establishments, and for otherwise enforcing the applicable provisions of the Federal Act with respect to intraterritorial activities when the designations are made and become effective. As soon as these arrangements are completed, notice of the designations will be published in the FEDERAL REGISTER. Upon the expiration of 30 days after such publication, the provisions of titles I and IV of said Act shall apply to intraterritorial operations and transactions and to persons, firms, and corporations engaged therein, in Guam and the Virgin Islands of the United States, to the same extent and in the same manner as if such operations and transactions were conducted in or for "commerce," within the meaning of the Act, except as otherwise provided in subsection 301(c)(2) of the Act, and any establishment in Guam or the Virgin Islands which conducts any slaughtering or preparation of carcasses or parts or products thereof as described above must have Federal inspection or cease its operations, unless it qualifies for an exemption under the Act. The exemption provisions of the Act are very limited.

Therefore, the operator of each such establishment who desires to continue or commence such operations in either of said Territories after designation of the Territory becomes effective should immediately communicate with the Regional Director specified below:

VIRGIN ISLANDS

Dr. N. B. Isom, Acting Director, Southeastern Region for Meat and Poultry Inspection Program, Room 216, 1718 Peachtree Street NW., Atlanta, GA 30309. Telephone: AC 404/526-3911.

GUAM

Dr. E. M. Christopherson, Director, Western Region for Meat and Poultry Inspection Program, Room 822, Appraisers Building, 630 Sansome Street, San Francisco, CA 94111. Telephone: AC 415/556-8622.

Done at Washington, D.C., on August 24, 1971.

RICHARD E. LYNG,
Assistant Secretary.

DEPARTMENT OF LABOR

Office of Federal Contract Compliance

[41 CFR Part 60-2]

AFFIRMATIVE ACTION PROGRAMS

Notice of Proposed Rule Making

Notice is hereby given that pursuant to Executive Order 11246 (30 F.R. 12319), as amended by Executive Order 11375 (32 F.R. 14303), the Department of Labor proposes to amend 41 CFR Part 60-2 in the manner set forth below.

This proposed amendment concerns matters relating to public contracts. While public participation in this rule making is not required by 5 U.S.C. 553, the Department wishes to invite written comments, suggestions, or objections regarding this proposed amendment. Accordingly, interested persons are invited to submit written comments regarding the proposed amendment to John L. Wilks, Deputy Assistant Secretary for Employment Standards, U.S. Department of Labor, 14th Street and Constitution Avenue NW., Washington, DC 20210, within 30 days of publication of this notice in the FEDERAL REGISTER.

PART 60-2—AFFIRMATIVE ACTION PROGRAMS

Subpart A—General

Sec.
60-2.1 Title, purpose and scope.
60-2.2 Agency action.

Subpart B—Required Contents of Affirmative Action Programs

60-2.10 Purpose of affirmative action program.
60-2.11 Required utilization analysis and goals.
60-2.12 Additional required ingredients of affirmative action programs.
60-2.13 Compliance status.

Subpart C—Suggested Methods of Implementing the Requirements of Subpart B

60-2.20 Development or reaffirmation of the equal employment opportunity policy.
60-2.21 Dissemination of the policy.
60-2.22 Responsibility for implementation.
60-2.23 Identification of problem areas by organization unit and job categories.
60-2.24 Establishment of goals and timetables.
60-2.25 Development and execution of programs.
60-2.26 Internal audit and reporting systems.
60-2.27 Support of action programs.

Subpart D—Miscellaneous

Sec.
60-2.30 Use of goals.
60-2.31 Preemption.
60-2.32 Supersedure.

AUTHORITY: The provisions of this Part 60-2 issued pursuant to section 201, Executive Order 11246 (30 F.R. 12319).

Subpart A—General

§ 60-2.1 Title, purpose and scope.

This part shall also be known as "Revised Order No. 4," and shall cover nonconstruction contractors. Section 60-1.40 of this chapter, Affirmative Action Compliance Programs, requires that within 120 days from the commencement of a contract each prime contractor or subcontractor with 50 or more employees and a contract of $50,000 or more develop a written affirmative action compliance program for each of its establishments. A review of agency compliance surveys indicates that many contractors do not have affirmative action programs on file at the time an establishment is visited by a compliance investigator. This part details the agency review procedure and the results of a contractor's failure to develop and maintain an affirmative action program and then sets forth detailed guidelines to be used by contractors and Government agencies in developing and judging these programs as well as the good faith effort required to transform the programs from paper commitments to equal employment opportunity. Subparts B and C are concerned with affirmative action plans only. They do not deal with remedial relief for members of an "affected class" who, by virtue of past discrimination, continue to suffer the present effects of that discrimination. Although the remedy for an "affected class" shall not be included in a contractor's affirmative action plan, an "affected class" problem must be remedied in order for a contractor to be considered in compliance. Therefore, § 60-2.2 pertaining to an acceptable affirmative action program is also applicable to the failure to remedy discrimination against members of an "affected class."

§ 60-2.2 Agency action.

(a) Any contractor required by § 60-1.40 of this chapter to develop an affirmative action program at each of his establishments who has not complied fully with that section is not in compliance with Executive Order 11246, as amended, (30 F.R. 12319). Until such programs are developed and found to be acceptable in accordance with the standards and guidelines set forth in §§ 60-2.10 through 60-2.32, the contractor is unable to comply with the equal employment opportunity clause.

(b) If, in determining such contractor's responsibility for an award of a contract it comes to the contracting officer's attention, through sources within his agency or through the Office of Federal Contract Compliance or other Government agencies, that the contractor has not developed an acceptable affirmative action program at each of his establishments, the contracting officer shall declare the contractor-bidder nonresponsible unless he can otherwise affirmatively determine that the contractor is able to comply with his equal employment obligations or, unless, upon review, it is determined by the Director that substantial issues of law or fact exist as to the contractor's responsibility to the extent that a hearing is, in his sole judgment, required prior to a determination that the contractor is nonresponsible: *Provided*, That during any preaward conferences every effort shall be made through the processes of conciliation, mediation and persuasion to develop an acceptable affirmative action program meeting the standards and guidelines set forth in §§ 60-2.10 through 60-2.32 so that, in the performance of his contract, the contractor is able to meet his equal employment obligations in accordance with the equal opportunity clause and applicable rules, regulations, and orders: *Provided further*, That when the contractor-bidder is declared nonresponsible more than once for inability to comply with the equal employment opportunity clause a notice setting a timely hearing date shall be issued concurrently with the second nonresponsibility determination in accordance with the provisions of § 60-1.26 of this chapter proposing to declare such contractor-bidder ineligible for future contracts and subcontracts.

(c) Immediately upon finding that a contractor has no affirmative action program or that his program is not acceptable the contracting officer, the compliance agency representative or the representative of the Office of Federal Contract Compliance, whichever has made such a finding, shall notify officials of the appropriate compliance agency and the Office of Federal Contract Compliance of such fact. The compliance agency shall issue a notice to the contractor giving him 30 days to show cause why enforcement proceedings under section 209(b) of Executive Order 11246, as amended, should not be instituted.

(1) If the contractor fails to show good cause for his failure or fails to remedy that failure by developing and implementing an acceptable affirmative action program within 30 days, the compliance agency, upon the approval of the Director, shall immediately issue a notice of proposed cancellation or termination of existing contracts or subcontracts and debarment from future contracts and subcontracts pursuant to § 60-1.26(b) of this chapter, giving the contractor 10 days to request a hearing. If a request for hearing has not been received within 10 days from such notice, such contractor will be declared ineligible for future contracts and current contracts will be terminated for default.

(2) During the "show cause" period of 30 days every effort shall be made by the compliance agency through conciliation, mediation and persuasion to resolve the deficiencies which led to the determination of noncompliance or noncompliance responsibility. If satisfactory adjustments designed to bring the contractor into compliance are not concluded, the compliance agency, with the prior approval of the Director, shall promptly commence formal proceedings leading to the cancellation or termination of existing contracts or subcontracts and debarment from future contracts and subcontracts under § 60-1.26(b) of this chapter.

(d) During the "show cause" period and formal proceedings, each contracting agency must continue to determine the contractor's responsibility in considering whether or not to award a new or additional contract.

Subpart B—Required Contents of Affirmative Action Programs

§ 60-2.10 Purpose of affirmative action program.

An affirmative action program is a set of specific and result-oriented procedures to which a contractor commits himself to apply every good faith effort. The objective of those procedures plus such efforts is equal employment opportunity. Procedures without effort to make them work are meaningless; and effort, undirected by specific and meaningful procedures, is inadequate. An acceptable affirmative action program must include an analysis of areas within which the contractor is deficient in the utilization of minority groups and women, and further, goals and timetables to which the contractor's good faith efforts must be directed to correct the deficiencies and, thus to increase materially the utilization of minorities and women, at all levels and in all segments of his work force where deficiencies exist.

§ 60-2.11 Required utilization analysis and goals.

Affirmative action programs must contain the following information:

(a) An analysis of all major job categories at the facility, with explanation if minorities or women are currently being underutilized in any one or more job categories (job "category" herein meaning one or a group of jobs having similar content, wage rates and opportunities). "Underutilization" is defined as having fewer minorities or women in a particular job category than would reasonably be expected by their availability. In making the work force analysis, the contractor shall conduct such analysis separately for minorities and women.

(1) In determining whether minorities are being underutilized in any job category, the contractor will consider at least all of the following factors:

(i) The minority population of the labor area surrounding the facility;

(ii) The size of the minority unemployment force in the labor area surrounding the facility;

(iii) The percentage of the minority work force as compared with the total work force in the immediate labor area;

(iv) The general availability of minorities having requisite skills in the immediate labor area;

(v) The availability of minorities having requisite skills in an area in which the contractor can reasonably recruit;

(vi) The availability of promotable minorities within the contractor's organization;

(vii) The anticipated expansion, contraction and turnover of and in the work force;

(viii) The existence of training institutions capable of training persons in the requisite skills; and

(ix) The degree of training which the contractor is reasonably able to undertake as a means of making all job classes available to minorities.

(2) In determining whether women are being underutilized in any job category, the contractor will consider at least all of the following factors:

(i) The size of the female unemployment force in the labor area surrounding the facility;

(ii) The percentage of the female work force as compared with the total work force in the immediate labor area;

(iii) The general availability of women having requisite skills in the immediate labor area;

(iv) The availability of women having requisite skills in an area in which the contractor can reasonably recruit;

(v) The availability of women seeking employment in the labor or recruitment area of the contractor;

(vi) The availability of promotable and transferable female employees within the contractor's organization;

(vii) The anticipated expansion, contraction, and turnover of and in the work force;

(viii) The existence of training institutions capable of training persons in the requisite skills; and

(ix) The degree of training which the contractor is reasonably able to undertake as a means of making all job classes available to women.

(b) Goals, timetables and affirmative action commitments must be designed to correct any identifiable deficiencies. Where deficiencies exist and where numbers or percentages are relevant in developing corrective action, the contractor shall establish and set forth specific goals and timetables separately for minorities and women. Such goals and timetables, with supporting data and the analysis thereof shall be a part of the contractor's written affirmative action program and shall be maintained at each establishment of the contractor. Where the contractor has not established a goal, his written affirmative action program must specifically analyze each of the factors listed in "a" above and must detail his reason for a lack of a goal. In the event it comes to the attention of the compliance agency or the Office of Federal Contract Compliance that there is a substantial disparity in the utilization of a particular minority group or men or women of a particular minority group, the compliance agency or OFCC may require separate goals and timetables for such minority group and may further require, where appropriate, such goals and timetables by sex for such group for such job categories and organizational units specified by the compliance agency or OFCC. In establishments with over 1,000 employees, or where otherwise appropriate, goals and timetables may be presented by organizational unit. The goals and timetables should be attainable in terms of the contractor's analysis of his deficiencies and his entire affirmative action program. Thus, in establishing his goals and timetables the contractor should consider the results which could be reasonably expected from his good faith efforts to make his overall affirmative action program work. If he does not meet his goals and timetables, the contractor's "good faith efforts" shall be judged by whether he is following his program and attempting to make it work toward the attainment of his goals.

(c) Support data for the above analysis and program shall be compiled and maintained as part of the contractor's affirmative action program. This data should include progression line charts, seniority rosters, applicant flow data, and applicant rejection ratios indicating minority and sex status.

(d) Based upon the Government's experience with compliance reviews under the Executive order programs and the contractor reporting system, minority groups are most likely to be underutilized in departments and jobs within departments that fall within the following Employer's Information Report (EEO–1) designations: Officials and managers, professionals, technicians, sales workers, office and clerical and craftsmen (skilled). As categorized by the EEO–1 designations, women are likely to be underutilized in departments and jobs within departments as follows: Officials and managers, professionals, technicians, sales workers (except over-the-counter sales in certain retail establishments), craftsmen (skilled and semi-skilled). Therefore, the contractor shall direct special attention to those categories in his analysis and goal setting for minorities and women.

§ 60–2.12 Additional required ingredients of affirmative action programs.

Effective affirmative action programs shall contain, but not necessarily be limited to, the following ingredients:

(a) Development or reaffirmation of the contractor's equal employment opportunity policy in all personnel actions.

(b) Formal internal and external dissemination of the contractor's policy.

(c) Establishment of responsibilities for implementation of the contractor's affirmative action program.

(d) Identification of problem areas (deficiencies) by organizational units and job categories.

(e) Establishment of goals and objectives by organizational units and job category, including timetables for completion.

(f) Development and execution of action oriented programs designed to eliminate problems and further designed to attain established goals and objectives.

(g) Design and implementation of internal audit and reporting systems to measure effectiveness of the total program.

(h) Compliance of personnel policies and practices with the Sex Discrimination Guidelines (Part 60–20 of this chapter).

(i) Active support of local and national community action programs and community service programs, designed to improve the employment opportunities of minorities and women.

(j) Consideration of minorities and women not currently in the workforce having requisite skills who can be recruited through affirmative action measures.

§ 60–2.13 Compliance status.

No contractor's compliance status shall be judged alone by whether or not he reaches his goals and meets his timetables. Rather, each contractor's compliance posture shall be reviewed and determined by reviewing the contents of his program, the extent of his adherence to this program, and his good faith efforts to make his program work toward the realization of the program's goals within the timetables set for completion. There follows an outline of suggestions and examples of procedures that contractors and Federal agencies may use as guidelines for establishing, implementing, and judging an acceptable affirmative action program.

Subpart C—Suggested Method of Implementing the Requirements of Subpart B

§ 60–2.20 Development or reaffirmation of the Equal Employment Opportunity Policy.

(a) The contractor's policy statement should indicate the chief executive officers' attitude on the subject matter, assign overall responsibility and provide for a reporting or monitoring procedure. Specific items to be mentioned should include, but not limited to:

(1) Recruit, hire, train, and promote persons in all job classifications, without regard to race, color, religion, sex or national origin, except where sex is a bona fide occupational qualification.

(2) Base decisions on employment so as to further the principle of equal employment opportunity.

(3) Insure that promotion decisions are in accord with principles of equal employment opportunity by imposing only valid requirements for promotional opportunities.

(4) Insure that all personnel actions such as compensation, benefits, transfers, layoffs, return from layoff, company sponsored training, education, tuition assistance, social and recreation programs, will be administered without regard to race, color, religion, sex, or national origin.

§ 60–2.21 Dissemination of the policy.

(a) The contractor should disseminate his policy internally as follows:

(1) Include it in contractor's policy manual.

(2) Publicize it in company newspaper, magazine, annual report and other media.

(3) Conduct special meetings with executive, management, and supervisory personnel to explain intent of policy and individual responsibility for effective implementation, making clear the chief executive officer's attitude.

(4) Schedule special meetings with all other employees to discuss policy and explain individual employee responsibilities.

(5) Discuss the policy thoroughly in both employee orientation and management training programs.

(6) Meet with union officials to inform them of policy, and request their cooperation.

(7) Include nondiscrimination clauses in all union agreements, and review all contractual provisions to ensure they are nondiscriminatory.

(8) Publish articles covering EEO programs, progress reports, promotions, etc., of minority and female employees, in company publications.

(9) Post the policy on company bulletin boards.

(10) When employees are featured in product or consumer advertising, both minority and nonminority, men and women should be pictured.

(11) Communicate to employees the existence of the contractors affirmative action program and explain such elements of his program as will enable such employees to know of and avail themselves of its benefits.

(b) The contractor should disseminate his policy externally as follows:

(1) Inform all recruiting sources verbally and in writing of company policy, stipulating that these sources actively recruit and refer minorities and women for all positions listed.

(2) Incorporate the equal opportunity clause in all purchase orders, leases, contracts, etc. covered by Executive Order 11246, as amended, and its implementing regulations.

(3) Notify minority and women's organizations, community agencies, community leaders, secondary schools and colleges, or company policy, preferably in writing.

(4) Communicate to prospective employees the existence of the contractor's affirmative action program and explain such elements of his program as will enable such prospective employees to know of and avail themselves of its benefits.

(5) When employees are pictured in consumer or help wanted advertising, both minorities and non-minority men and women should be shown.

(6) Send written notification of company policy to all subcontractors, vendors, and suppliers requesting appropriate action on their part.

§ 60–2.22 Responsibility for implementation.

(a) An executive of the contractor should be appointed as director or manager of company Equal Opportunity Programs. Depending upon the size and geographical alignment of the company, this may be his or her sole responsibility. He or she should be given the necessary top management support and staffing to execute the assignment. His or her identity should appear on all internal and external communications on the company's Equal Opportunity Programs. His or her responsibilities should include, but not necessarily be limited to:

(1) Developing policy statements, affirmative action programs, internal and external communication techniques.

(2) Assisting in the identification of problem areas.

(3) Assisting line management in arriving at solutions to problems.

(4) Designing and implementing audit and reporting systems that will:

(i) Measure effectiveness of the contractor's programs.

(ii) Indicate need for remedial action.

(iii) Determine the degree to which the contractor's goals and objectives have been attained.

(5) Serve as liaison between the contractor and enforcement agencies.

(6) Serve as liaison between the contractor and minority organizations, women's organizations, and community action groups concerned with employment opportunities of minorities and women.

(7) Keep management informed of latest developments in the entire equal opportunity area.

(b) Line responsibilities should include, but not be limited to, the following:

(1) Assistance in the identification of problem areas and establishment of local and unit goals and objectives.

(2) Active involvement with local minority organizations, women's organizations, community action groups, and community service programs.

(3) Periodic audit of training programs, hiring and promotion patterns to remove impediments to the attainment of goals and objectives.

(4) Regular discussions with local managers, supervisors and employees to be certain the contractor's policies are being followed.

(5) Review of the qualifications of all employees to insure that minorities and women are given full opportunities for transfers and promotions.

(6) Career counseling for all employees.

(7) Periodic audit to insure that each location is in compliance in areas such as:

(i) Posters are properly displayed.

(ii) All facilities, including company housing, which the contractor maintains for the use and benefit of his employees, are in fact desegregated, both in policy and use. If the contractor provides facilities such as dormitories, locker rooms, and rest rooms, they must be comparable for both sexes.

(iii) Minority and female employees are afforded a full opportunity and are encouraged to participate in all company sponsored educational, training, recreational, and social activities.

(8) Supervision should be made to understand that their work performance is being evaluated on the basis of their equal employment opportunity efforts and results, as well as other criteria.

(9) It shall be a responsibility of supervisors to take actions to prevent harassment of employees placed through affirmative action efforts.

§ 60–2.23 Identification of problem areas by organizational units and job categories.

(a) An in-depth analysis of the following should be made, paying particular attention to trainees and those categories listed in § 60–2.11(d).

(1) Composition of the work force by minority group status and sex.

(2) Composition of applicant flow by minority group status and sex.

(3) The total selection process including position descriptions, worker specifications, application forms, interview procedures, test administration, test validity, referral procedures, final selection process, and similar factors.

(4) Transfer and promotion practices.

(5) Facilities, company sponsored recreation and social events, and special programs such as educational assistance.

(6) Seniority practices and seniority provisions of union contracts.

(7) Apprenticeship programs.

(8) All company training programs, formal and informal.

(9) Work force attitude.

(10) Technical phases of compliance, such as poster and notification to labor unions, retention of applications, notification to subcontractors, etc.

(b) If any of the following items are found in the analysis, special corrective action should be appropriate.

(1) An "underutilization" of minorities or women in specific work classifications.

(2) Lateral and/or vertical movement of minority or female employees occurring at a lesser rate (compared to work force mix) than that of nonminority or male employees.

(3) The selection process eliminates a higher percentage of minorities or women than nonminorities or men.

(4) Application and related pre-employment forms not in compliance with Federal legislation.

(5) Position descriptions inaccurate in relation to actual functions and duties.

(6) Tests and other selection techniques not validated as required by the OFCC Order on Employee Testing and other Selection Procedures.

(7) Test forms not validated by location, work performance and inclusion of minorities and women in sample.

(8) Referral ratio of minorities or women to the hiring supervisor or manager indicates an abnormal percentage are being rejected as compared to nonminority and male applicants.

(9) Minorities or women are excluded from or are not participating in company sponsored activities or programs.

(10) De facto segregation still exists at some facilities.

(11) Seniority provisions contribute to overt or inadvertent discrimination, i.e., a disparity by minority group status or sex exists between length of service and types of jobs held.

(12) Nonsupport of company policy by managers, supervisors, or employees.

(13) Minorities or women underutilized or underrepresented in training or career improvement programs.

(14) No formal techniques established for evaluating effectiveness of EEO programs.

(15) Lack of access to suitable housing inhibits recruitment efforts and employment of qualified minorities.

(16) Lack of suitable transportation (public or private) to the work place inhibits minority employment.

(17) Labor unions and subcontractors not notified of their responsibilities.

(18) Purchase orders do not contain EEO clause.

(19) Posters not on display.

§ 60–2.24 Establishment of goals and timetables.

(a) The goals and timetables developed by the contractor should be attainable in terms of the contractor's analysis of his deficiencies and his entire affirmative action program. Thus, in establishing the size of his goals and the length of his timetables, the contractor should consider the results which could reasonsonably be expected from his putting forth every good faith effort to make his overall affirmative action program work. In determining levels of goals, the contractor should consider at least the factors listed in § 60–2.11(a).

(b) Involve personnel relations staff, department and division heads, and local and unit managers in the goal setting process.

(c) Goals should be significant, measurable and attainable.

(d) Goals should be specific for planned results, with timetables for completion.

(e) Goals may not be rigid and inflexible quotas which must be met, but must be targets reasonably attainable by means of applying every good faith effort to make all aspects of the entire affirmative action program work.

§ 60–2.25 Development and execution of programs.

(a) The contractor should conduct detailed analyses of position descriptions to insure that they accurately reflect position functions, and are consistent for the same position from one location to another.

(b) The contractor should validate worker specifications by division, department, location or other organizational unit and by job category using job performance criteria. Special attention should be given to academic, experience and skill requirements to insure that the requirements in themselves do not constitute inadvertent discrimination. Specifications should be consistent for the same job classification in all locations and should be free from bias as regards to race, color, religion, sex, or national origin, except where sex is a bona fide occupational qualification. Where requirements screen out a disproportionate number of minorities or women such requirements should be professionally validated to job performance.

(c) Approved position descriptions and worker specifications, when used by the contractor, should be made available to all members of management involved in the recruiting, screening, selection and promotion process. Copies should also be distributed to all recruiting sources.

(d) The contractor should evaluate the total selection process to insure freedom from bias and, thus, aid the attainment of goals and objectives.

(1) All personnel involved in the recruiting, screening, selection, promotion, disciplinary and related processes should be carefully selected and trained to insure elimination of bias in all personnel actions.

(2) The contractor shall observe the requirements of the OFCC Order pertaining to the validation of employee tests and other selection procedures.

(3) Selection techniques other than tests may also be improperly used so as to have the effect of discriminating against minority groups and women. Such techniques include but are not restricted to, unscored interviews, unscored application forms, arrest records, credit checks, considerations of marital status or dependency or minor children. Where there exist data suggesting that such unfair discrimination or exclusion of minorities or women exists, the contractor should analyze his unscored procedures and eliminate them if they are not objectively valid.

(e) Suggested techniques to improve recruitment and increase the flow of minority or female applicants follow:

(1) Certain organizations such as the Urban League, Job Corps, Equal Opportunity Programs, Inc., Concentrated Employment Programs, Neighborhood Youth Corps, Secondary Schools, Colleges, and City Colleges with high-minority enrollment, the State Employment Service, specialized employment agencies, Aspira, LULAC, SER, the G.I. Forum, the Commonwealth of Puerto Rico are normally prepared to refer minority applicants. Organizations prepared to refer women with specific skills are: National Organization for Women, Welfare Rights Organizations, Talent Bank from Business and Professional Women (including 26 women's organizations), Professional Women's Caucus, Negro Women's sororities and service groups such as Delta Sigma Theta, Alpha Kappa Alpha, and Zeta Phi Beta; National Council of Negro Women, American Association of University Women, YWCA, and other sectarian groups such as Jewish Women's Groups and Catholic Women's Groups, also women's colleges. In addition, community leaders as individuals shall be added to recruiting sources.

(2) Formal briefing sessions should be held, preferably on company premises, with representatives from these recruiting sources. Plant tours, presentations by minority and female employees, clear and concise explanations of current and future job openings, position descriptions, worker specifications, explanations of the company's selection process, and recruiting literature should be an integral part of the briefings. Formal arrangements should be made for referral of applicants, follow-up with sources, and feedback on disposition of applicants.

(3) Minority and female employees, using procedures similar to subparagraph (2) of this paragraph, should be actively encouraged to refer applicants.

(4) A special effort should be made to include minorities and women on the Personnel Relations staff.

(5) Minority and female employees should be made available for participation in Career Days, Youth Motivation Programs, and related activities in their communities.

(6) Active participation in "Job Fairs" is desirable. Company representatives so participating should be given authority to make on-the-spot commitments.

(7) Active recruiting programs should be carried out at secondary schools, junior colleges, and colleges with predominant minority or female enrollments.

(8) Recruiting efforts at all schools should incorporate special efforts to reach minorities and women.

(9) Special employment programs should be undertaken whenever possible. Some possible programs are:

(i) Technical and non-technical co-op programs with predominately Negro and Women's colleges.

(ii) "After school" and/or work-study jobs for minority youths, males and females.

(iii) Summer jobs for underprivileged youth, male, and female.

(iv) Summer work-study programs for male and female faculty members of the predominantly minority schools and colleges.

(v) Motivation, training, and employment programs for the hard-core unemployed, male and female.

(10) When recruiting brochures pictorially present work situations, the minority and female members of the work force should be included, especially when such brochures are used in school and career programs.

(11) Help wanted advertising should be expanded to include the minority news media and women's interest media on a regular basis.

(f) The contractor should insure that minority and female employees are given equal opportunity for promotion. Suggestions for achieving this result include:

(1) Post or otherwise announce promotional opportunities.

(2) Make an inventory of current minority and female employees to determine academic, skill and experience level of individual employees.

(3) Initiate necessary remedial, job training, and work-study programs.

(4) Develop and implement formal employee evaluation programs.

(5) Make certain "worker specifications" have been validated on job performance related criteria. (Neither minority nor female employees should be required to possess higher qualifications than those of the lowest qualified incumbent.)

(6) When apparently qualified minority or female employees are passed over for upgrading, require supervisory personnel to submit written justification.

(7) Establish formal career counseling programs to include attitude development, education aid, job rotation, buddy system and similar programs.

(8) Review seniority practices and seniority clauses in union contracts to insure such practices or clauses are nondiscriminatory and do not have a discriminatory effect.

(g) Make certain facilities and company-sponsored social and recreation activities are desegregated. Actively encourage all employees to participate.

(h) Encourage child care programs appropriately designed to improve the employment opportunities for minorities and women.

§ 60–2.26 Internal audit and reporting systems.

(a) The contractor should monitor records of referrals, placements, transfers, promotions and terminations at all levels to insure nondiscriminatory policy is carried out.

(b) The contractor should require formal reports from unit managers on a schedule basis as to degree to which corporate or unit goals are attained and timetables met.

(c) The contratcor should review report results with all levels of management.

(d) The contractor should advise top management of program effectiveness and submit recommendations to improve unsatisfactory performance.

§ 60–2.27 Support of action programs.

(a) The contractor should appoint key members of management to serve on Merit Employment Councils, Community Relations Boards, and similar organizations.

(b) The contractor should encourage minority and female employees to participate actively in National Alliance of Businessmen programs for youth motivation.

(c) The contractor should support Vocational Guidance Institutes, Vestibule Training Programs, and similar activities.

(d) The contractor should assist secondary schools and colleges in programs designed to enable minority and female graduates of these institutions to compete in the open employment market on a more equitable basis.

(e) The contractor should publicize achievements of minority and female employees in local and minority news media.

(f) The contractor should support programs developed by such organizations as National Alliance of Businessmen, the Urban Coalition and other organizations concerned with employment opportunities for minorities or women.

Subpart D—Miscellaneous

§ 60–2.30 Use of goals.

The purpose of a contractor's establishment and use of goals is to insure that he meet his affirmative action obligation. It is not intended and should not be used to discriminate against any applicant or employee because of race, color, religion, sex, or national origin.

§ 60–2.31 Preemption.

To the extent that any State or local laws, regulations or ordinances, including those which grant special benefits to persons on account of sex, are in conflict with Executive Order 11246, as amended, or with the requirements of this part, we will regard them as preempted under the Executive Order.

§ 60–2.32 Supersedure.

This part is an amplification of and supersedes a previous "Order No. 4" from this Office dated January 30, 1970.

Effective date. This part shall become effective on the date of its publication in the FEDERAL REGISTER.

Signed at Washington, D.C., this 25th day of August 1971.

J. D. HODGSON,
Secretary of Labor.

ARTHUR A. FLETCHER,
Assistant Secretary for Employment Standards.

JOHN L. WILKS,
Director, Office of Federal Contract Compliance.

Specifications for Tank Cars

Correction

In F.R. Doc. 71–12212 appearing at page 16680 in the issue of Wednesday, August 25, 1971, the following changes should be made:

1. In § 179.5(a), the phrase "From AAR 4–2" in the fifth line should read "Form AAR 4–2".

2. In § 179.102–9(a), the phrase "Tank cars used to transport nitro- tetroxide" in the first and second lines should read "Tank cars used to transport nitrogen tetroxide".

3. In § 179.201–3(b), the reference to specification "103W" in the sixth line should read "103BW".

4. In § 179.202–2, the phrase "must be equipped with bottom discharge outlet" in the sixth and seventh lines should read "must not be equipped with bottom discharge outlet".

5. In § 179.300–9(a), the word "fabrication" in the sixth line should read "fabricators".

AGREEMENTS BETWEEN COMMON CARRIERS BY WATER AND/OR "OTHER PERSONS"

Rules Governing Filing; Enlargement of Time To File Comments

Comments on the Commission's notice of proposed rule making in this proceeding (36 F.R. 15128) are currently due to be submitted by September 13, 1971. Upon the request of interested parties, and good cause appearing, time within which interested parties may participate in this rule making proceeding is enlarged to and including October 15, 1971.

Time within which the Federal Maritime Commission, Bureau of Hearing Counsel, shall file a reply to comments is enlarged to and including November 5, 1971. Answers to Hearing Counsel's replies shall be submitted on or before November 19, 1971.

All comments should be filed with the Secretary, Federal Maritime Commission, Washington, D.C. 20573, in an original with 15 copies. Suggestions for changes in the proposed rules should be accompanied by drafts of the language thought necessary to accomplish the desired changes and by statements in support thereof.

By the Commission.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

ALASKA

Notice of Proposed Withdrawal and Reservation of Lands

AUGUST 24, 1971.

The Bureau of Sport Fisheries and Wildlife, Fish and Wildlife Service, Department of the Interior, has filed an application, serial No. F–13951, for withdrawal of the lands described herein from all forms of appropriation under the public land laws, including the mining laws, but not the mineral leasing laws nor disposals of materials under the act of July 13, 1947, as amended. The land involved was initially withdrawn for use of the Department of the Air Force for distant early warning station sites, and was later transferred to the jurisdiction of the Department of the Navy. The Navy has filed notice of intention to relinquish the sites. The land is located within the exterior boundaries of the Arctic National Wildlife Range, and the Bureau of Sport Fisheries and Wildlife desires to have the tracts included in the Wildlife Range for use as sites for facilities for Arctic research, range administration, and public shelter purposes.

For a period of 30 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management, 555 Cordova Street, Anchorage, AK 99501.

The Department's regulation, 43 CFR 2351.4(c), provides that the authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the lands and their resources. He will also undertake negotiations with the applicant agency with the view of adjusting the application to reduce the area to the minimum essential to meet the applicant's needs, to provide for the maximum concurrent utilization of the lands for purposes other than the applicant's, to eliminate lands needed for purposes more essential than the applicant's, and to reach agreement on the concurrent management of the lands and their resources.

The authorized officer will also prepare a report for consideration by the Secretary of the Interior who will determine whether the lands will be withdrawn as requested by the applicant agency.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

If circumstances warrant, a public hearing will be held at a convenient time and place, which will be announced.

The lands involved in the application are described as follows:

Beginning at a point on the mean high tide line of the Beaufort Sea which bears N. 12°00' E., approximately 3,200 feet from U.S.C. & G.S. Station "Maybell," thence by metes and bounds: South, approximately 2,000 feet; west approximately 7,800 feet to a point on the mean high tide line of Simpson Cove; northerly and westerly following said tide line approximately 7,300 feet to the intersection of the mean high tide line of the Beaufort Sea; southwesterly following said tide line approximately 9,750 feet to the point of beginning. The tract described contains approximately 456 acres.

BEAUFORT LAGOON AREA

Beginning at a point on the mean high tide line of the Beaufort Sea which bears S. 82°00' W., approximately 5,615 feet from U.S.C. & G.S. Station "Beaufort," thence by metes and bounds: South, approximately 2,650 feet; east approximately 4,500 feet to a point on the mean high tide line of Beaufort Sea; northeasterly, following said mean high tide line, approximately 8,150 feet to a point, northwesterly, following same said mean high tide line approximately 5,250 feet to a point; southwesterly, following same said mean high tide line, approximately 8,500 feet to the point of beginning. The tract described contains approximately 420 acres.

T. G. BINGHAM,
Acting State Director.

Office of the Secretary

FORT BELKNAP INDIAN COMMUNITY OF FORT BELKNAP RESERVATION, MONT.

Order for Restoration of Lands to Tribal Ownership; Partial Revocation of Certain Departmental Order

Whereas, pursuant to authority contained in the Act of March 3, 1921 (41 Stat. 1355), the townsite of Hays, Mont., was established on the Fort Belknap Indian Reservation, and;

Whereas, the departmental order dated May 17, 1923, approved the townsite plat and authorized the disposal of the townsite lots, pursuant to section 2381 of the Revised Statutes as was provided for by the 1921 Act, and;

Whereas, the Fort Belknap Indian Community of the Fort Belknap Reservation requests that the departmental order dated May 17, 1923, be revoked so far as it affects the therein-described lands, and further requests that the said lands be restored to tribal ownership, which the Assistant Area Director at the Billings Area Office and the Commissioner of Indian Affairs have recommended be granted;

Now, therefore, by virtue of the authority contained in section 3 of the Act of June 18, 1934 (48 Stat. 984; 25 U.S.C. 463), I hereby find that the restoration to tribal ownership of the lands hereinafter described in this paragraph will be in the public interest, and the said lands are hereby restored to tribal ownership of the Fort Belknap Indian Community of the Fort Belknap Reservation, Mont., subject to any valid existing rights and the Departmental Order of May 17, 1923, is hereby revoked insofar as it affects the following-described lands:

HUMANELY SLAUGHTERED LIVESTOCK

Identification of Carcasses; List of Establishments

Pursuant to section 4 of the Act of August 27, 1958 (7 U.S.C. 1904), and the statement of policy thereunder in 9 CFR 381.1, the following table lists the establishments operated under Federal inspection pursuant to the Federal Meat Inspection Act (21 U.S.C. 601 et seq.) which were officially reported on July 1, 1971, as humanely slaughtering and handling on that date the species of livestock respectively designated for such establishments in the table. Additions to and deletions from this list will be made from time to time as the facts may warrant, by notices published in the FEDERAL REGISTER. The establishment number given with the name of the establishment is branded on each carcass of livestock inspected at that establishment. The table should not be understood to indicate that all species of livestock slaughtered at a listed establishment are slaughtered and handled by humane methods unless all species are listed for that establishment in the table. Nor should the table be understood to indicate that the affiliates of any listed establishment use only humane methods.

ENVIRONMENTAL PROTECTION AGENCY

MOTOR VEHICLE POLLUTION CONTROL

Waiver of Application of Clean Air Act to California State Standards

On April 30, 1971, I rendered a decision (36 F.R. 8172) on a request by the State of California for waiver of application of section 209(a) of the Clean Air Act, as amended (42 U.S.C. 1857f-6a(a), 81 Stat. 501, Public Law 91-604), to a number of proposed California laws and regulations related to the control of emissions from new motor vehicles. The decision granted California's request in a case of most of the laws and regulations for which waiver was sought but denied the request with respect to the following laws and regulations:

(1) Section 2110, title 13, California Administrative Code, as amended February 17, 1971 (assembly-line test procedures), insofar as applicable to 1973 and subsequent model year motor vehicles.

(2) Part I, Division 26, Health and Safety Code, West Annotated California Codes, as enacted by Chapter 1585, California Laws 1970, Assembly Bill No. 1174 approved September 20, 1970, to the extent that Bill No. 1174 prohibits sale and registration of motor vehicles manufactured during the 1972 model year and requires the use of 91 research octane number fuel in testing such vehicles.

By a letter dated May 25, 1971, California requested that the decision be reconsidered insofar as waiver was denied with respect to the above provisions. On the basis of California's request, and to insure that no pertinent data was overlooked in the initial decision, the public hearing held to receive information pertinent to this matter was reconvened in Los Angeles, Calif., on July 13, 1971 (36 F.R. 11824, June 19, 1971). Additional information was received from California and from other interested persons.

Having given due consideration to the record of the public hearing, to all materials submitted for that record, and to other relevant information, I have concluded that my initial decision in this matter must be revised to grant California's request for waiver with respect to section 2110 of title 13 of the California Administrative Code. The initial decision is confirmed with respect to Part I, Division 26 of the California Health and Safety Code.

In reaching these conclusions I make the following additional findings and determinations:

1. Section 2110 of title 13 of the California Administrative Code requires manufacturers to perform a quality audit of at least 2 percent of each engine displacement size beginning with the 1972 model year. For purposes of the quality audit, manufacturers are required to perform emission tests on the production sample identical to tests under which prototype vehicles are certified by California prior to production. The provisions requiring the quality audit by their terms remain applicable during subsequent model years and are designed to provide a statistical basis for determining whether production vehicles are generally in compliance with applicable California standards.

2. In addition to the quality audit, section 2110 includes provisions which require manufacturers to test production vehicles by performing an emission test different from and shorter than applicable certification tests. Separate numerical standards associated with the short assembly-line test were designed and promulgated by the California Air Resources Board to provide an alternative basis for determining compliance with the State's basic certification standards. During the 1972 model year, one-quarter of each manufacturer's California vehicles are required to be tested under the short assembly-line test. Beginning with the 1973 model year, every production vehicle sold in California must be tested. In my initial decision, waiver was granted to permit California to require 25 percent assembly-line testing in 1972 but was denied to the extent that section 2110 requires manufacturers to test 100 percent of their production vehicles beginning with the 1973 model year. California's request for reconsideration is principally concerned with the denial of waiver for 100 percent assembly-line testing of 1973 and later model vehicles.

3. By act of the 1970 California legislature the sale or attempted sale of a new motor vehicle in California during or after the 1973 model year subjects the manufacturer to a civil penalty of $5,000 if the vehicle does not meet applicable emission standards. Although California takes the position that the civil penalty applies whether or not manufacturers are required to perform an emission test on each production vehicle, the 100 percent assembly-line test requirement is, in part, an attempt to provide a basis for enforcing the statutory penalty.

4. Section 209 of the Clean Air Act requires that I waive Federal preemption of California emission standards for new motor vehicles that are more stringent than applicable Federal standards, unless I find that California does not require more stringent standards to meet compelling and extraordinary conditions of air pollution in California or unless I find that the California standard and accompanying enforcement procedures are not consistent with section 202(a) of the Clean Air Act. Denial of waiver on the ground of inconsistency with section 202 (a) requires a finding that the California standard and accompanying enforcement procedures do not "take effect after such period as the Administrator finds necessary to permit the development and application of the requisite technology, giving appropriate consideration to the cost of compliance within such period." It is California's position that the statute does not permit me to take into account the extent of the burden placed on residents of California or on regulated interests, unless the California requirement fails to provide an adequate period of time for compliance. On careful consideration, I agree. The law makes it clear that the waiver request cannot be denied unless the specific findings designated in the statute can properly be made. The issue of whether a proposed California requirement is likely to result in only marginal improvement in California air quality not commensurate with its cost or is otherwise an arguably unwise exercise of regulatory power is not legally pertinent to my decision under section 209, so long as the California requirement is consistent with section 202(a) and is more stringent than applicable Federal requirements in the sense that it may result in some further reduction in air pollution in California.

5. Certain manufacturers who tested 1971 production vehicles on the proposed short assembly-line test experienced failure rates as high as 40 percent. California contends that these high rates of failure, and the fact that in a majority of instances minor adjustments were effective to bring failing vehicles into compliance, establishes the value as an air pollution control measure of the requirement for 100 percent assembly-line testing. This argument, however, assumes that adjustments made to undriven production vehicles in order to pass the short assembly-line test will in fact improve their emission performance in actual use after break-in. Existing data raises serious questions concerning the validity of the assembly-line test as an indicator of true vehicle emission performance.

6. The fact that substantial numbers of vehicles pass California's present certification test but fail the proposed assembly-line test is consistent with California's contention that implementation of the assembly-line test requirement will require more stringent control of emissions than is required to meet certification standards. Although manufacturers argue that the proposed short test may not selectively fail vehicles that are in fact relatively high emitters, a definitive judgment cannot be made on the basis of information presently available as to the validity of the California assembly-line test. In the face of this uncertainty, I cannot properly make an affirmative determination that the assembly-line test requirement is not more stringent than applicable Federal requirements.

7. California suggests that favorable action by its legislature on various proposals for mandatory inspection of in-use vehicles requires that some form of assurance be given California motorists that automobile emission standards were met at the time of manufacture. The California Air Resources Board, in a July 1, 1971, report to the California Legislature, recommends that legislation at present be limited to a pilot program. In addition, the various possible inspection tests discussed in the report do not appear to be designed to correlate with the California assembly-line test. Nevertheless, we agree that inspection of in-use vehicles will reduce vehicle emissions, and we must respect the judgment of California officials that public and political support in California for a program of mandatory vehicle inspection will be greater if manufacturers are required to perform an emission test on each production vehicle prior to sale.

8. For the reasons set forth in paragraphs 5, 6, and 7 above, California's contention that the proposed assembly-line test will result in control of automobile emissions more stringent than applicable Federal requirements has not been effectively refuted. The most that can be said on the basis of information and data submitted by opponents of the requirement is that the proposed assembly-line tests appear to correlate poorly with present certification tests, that implementation of the assembly-line test requirement will be costly to California consumers, and that the requirement will be of questionable value in reducing air pollution in California. This, in my judgment, does not constitute adequate support for the findings required to deny California's request for waiver under controlling provisions of the Clean Air Act.

9. It is pointed out by California regulatory officials that an emission test of each production vehicle is necessary to implement provisions of California law requiring that each automobile have a label or sticker which compares its actual emissions with applicable California emission standards. Again, however, this measure will result in lower emissions only if the California assembly-line test in fact accurately predicts the emission performance of vehicles in actual use. If the test does not measure true emission performance, attempts by concerned Californians to reduce air pollution through selective purchasing of automobiles would be ineffective.

10. The cost to the consumer of the proposed 100 percent assembly-line test requirement is substantial. Initial estimates, accepted by the California Air Resources Board, ranged from $15 to more than $50 for each automobile sold in California. Additional information submitted by manufacturers indicates that these estimates are limited to variable costs incurred in performing the tests, once test facilities have been constructed, and do not include the cost of constructing the test facilities themselves or of purchasing and installing the necessary equipment. Capital expenditures by the industry as a whole are likely to be between $40 million and $50 million. Economies of scale are probably applicable, with the result that unit costs can be expected to be significantly greater for smaller manufacturers. Most manufacturers indicate that the price of automobiles sold in California will, and should properly, reflect additional costs directly attributable to California regulatory requirements.

11. Estimates by manufacturers as to the time required to construct necessary test facilities and install necessary equipment vary widely. It appears that manufacturers should be able to begin testing 50 percent of current production by the beginning of the 1973 model year and 100 percent of current production by January 30, 1973. Manufacturers do not contend that the cost of compliance will be significantly reduced by extending lead time beyond the minimal period required for compliance.

On the basis of the findings and determinations heretofore made in this matter, and on the basis of the additional findings and determinations set forth in this decision, I hereby waive application of section 209(a) of the Clean Air Act, as amended, to section 2110, title 13, California Administrative Code, as amended February 17, 1971: *Provided*, That, after giving consideration to the period of time necessary for development and application of the requisite technology (as required by section 202 of the Clean Air Act), this waiver shall not permit application of said section 2110 to require assembly-line testing of more than 50 percent of production vehicles prior to January 30, 1973. This waiver shall not prohibit California from adopting modifications of the presently proposed assembly-line test and associated numerical standards where such modifications are designed to improve correlation with certification standards and test procedures or where California determines that the objectives of the assembly-line test requirement can be satisfied at reduced cost to the consumer.

No additional information has been presented which questions the validity of the determination previously made in this matter that the required use of 91 research octane fuel in testing 1972 light-duty motor vehicles does not afford manufacturers of vehicles presently designed to use higher octane fuels the period of time necessary to apply the requisite technology and does not give appropriate consideration to the cost of compliance within such period. Accordingly, waiver of application of section 209(a) of the Clean Air Act, as amended, to Part I, Division 26, Health and Safety Code, West Annotated California Codes, as enacted by Chapter 1585, California Laws 1970, Assembly Bill No. 1174 approved September 20, 1970, is denied to the extent that Bill No. 1174 prohibits sale and registration of motor vehicles manufactured during the 1972 model year and requires the use of 91 research octane fuel in testing such vehicles.

Dated: August 27, 1971.

WILLIAM D. RUCKELSHAUS,
Administrator.

FEDERAL MARITIME COMMISSION

BOARD OF COMMISSIONERS OF THE PORT OF NEW ORLEANS AND SEA-LAND SERVICE, INC.

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1405 I Street NW., Room 1015; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, La., and San Francisco, Calif. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 10 days after publication of this notice in the FEDERAL REGISTER. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Mr. Cyrus C. Guidry, Port Counsel, Board of Commissioners of the Port of New Orleans, Post Office Box 60046 New Orleans, LA 70160.

Agreement No. T-2550, between the Board of Commissioners of the Port of New Orleans (Port) and Sea-Land Service, Inc. (Sea-Land), provides for the 20-year lease to Sea-Land of Berth 1, 17.2 acres of land, and certain improvements at the France Road Container Terminal at New Orleans for use in conjunction with its container and break-bulk operations. As compensation, the Port is to receive a flat annual rental starting at $404,512 and escalating to $678,300 within 3 years, in lieu of charges otherwise applicable under the Port's tariff for dockage, wharfage, sheddage, and first call on berth privileges. Sea-Land is to provide all equipment required to handle containers at the facility. This agreement terminates Agreement No. T-1753 between the Port and Waterman of Puerto Rico-U.S.A., Inc.

Dated: August 26, 1971.

By order of the Federal Maritime Commission.

JOSEPH C. POLKING,
Assistant to the Secretary.

FEDERAL POWER COMMISSION

[Docket No. G-4904, etc.]

AMOCO PRODUCTION CO., ET AL.

Findings and Order

AUGUST 16, 1971.

Findings and order after statutory hearing issuing certificates of public convenience and necessity, amending orders issuing certificates, permitting and approving abandonment of service, terminating certificates, making successors co-respondents, redesignating proceedings, and accepting rate schedules for filing.

Each Applicant herein has filed an application pursuant to section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce or for permission and approval to abandon service or a petition to amend an order issuing a certificate, all as more fully set forth in the applications and petitions to amend.

Applicants have filed FPC gas rate schedules or supplements to rate schedules on file with the Commission and propose to initiate, abandon, add, or discontinue in part natural gas service in interstate commerce as indicated in the tabulation herein.

J. Gregory Merrion et al., Applicants in Dockets Nos. CI71-630 and CI71-632, propose to continue in part sales of natural gas heretofore authorized in Docket No. G-11984 to be made pursuant to Mobil Oil Corp. (Operator), et al., FPC Gas Rate Schedule No. 38 and to continue in part the sale of natural gas heretofore authorized in Docket No. G-10995 and in toto the sale of natural gas heretofore authorized in Docket No. G-14149 to be made pursuant to Skelly Oil Co., FPC Gas Rate Schedule No. 107. The effective rates under Mobil's and Skelly's rate schedules at the time of the transfer of the producing properties were in effect subject to refund in Dockets Nos. RI69-430 and RI69-389, respectively. Therefore, Applicants will be made co-respondents in said proceedings and the proceedings will be redesignated accordingly.

The Commission's staff has reviewed the applications and recommends each action ordered as consistent with all substantive Commission policies and required by the public convenience and necessity.

After due notice by publication in the FEDERAL REGISTER, no petition to intervene, notice of intervention, or protest to the granting of the applications has been filed.

At a hearing held on August 11, 1971, the Commission on its own motion received and made a part of the record in this proceeding all evidence, including the applications and petitions, as supplemented and amended, and exhibits thereto, submitted in support of the authorizations sought herein, and upon consideration of the record,

The Commission finds:

(1) Each Applicant herein is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission or will be engaged in the sale of natural gas in interstate commerce for resale for ultimate public consumption, subject to the jurisdiction of the Commission, and will, therefore, be a "natural-gas company" within the meaning of the Natural Gas Act upon the commencement of service under the authorizations hereinafter granted.

(2) The sales of natural gas hereinbefore described, as more fully described in the applications in this proceeding, will be made in interstate commerce subject to the jurisdiction of the Commission; and such sales by Applicants, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are subject to the requirements of subsections (c) and (e) of section 7 of the Natural Gas Act.

(3) Applicants are able and willing properly to do the acts and to perform the service proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules, and regulations of the Commission thereunder.

(4) The sales of natural gas by Applicants, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are required by the public convenience and necessity; and certificates therefor should be issued as hereinafter ordered and conditioned.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the orders issuing certificates of public convenience and necessity in various dockets involved herein should be amended as hereinafter ordered.

(6) The sales of natural gas proposed to be abandoned, as hereinbefore described and as more fully described in the applications and in the tabulation herein, are subject to the requirements of subsection (b) of section 7 of the Natural Gas Act.

(7) The abandonments proposed by Applicants herein are permitted by the public convenience and necessity and should be approved as hereinafter ordered.

(8) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the certificates heretofore issued to applicants relating to the abandonments hereinafter permitted and approved should be terminated.

(9) Increased rates have not been collected subject to refund in Dockets Nos. RI63-321 and RI68-437 by the predecessor in interest to Applicant in Docket No. G-9517.

(10) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that J. Gregory Merrion, et al., should be made co-respondents in the proceedings pending in Dockets Nos. RI69-389 and RI69-430 and that said proceedings should be redesignated accordingly.

(11) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the FPC gas rate schedules and supplements related to the authorizations hereinafter granted should be accepted for filing.

The Commission orders:

(A) Certificates of public convenience and necessity are issued upon the terms and conditions of this order authorizing sales by Applicants of natural gas in interstate commerce for resale, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, all as hereinbefore described and as more fully described in the applications and in the tabulation herein.

(B) The certificates granted in paragraph (A) above are not transferable and shall be effective only so long as Applicants continue the acts or operations hereby authorized in accordance with the provisions of the Natural Gas Act and the applicable rules, regulations, and orders of the Commission.

(C) The grant of the certificates issued in paragraph (A) above shall not be construed as a waiver of the requirements of section 7 of the Natural Gas Act or of Part 154 or Part 157 of the Commission's regulations thereunder and is without prejudice to any findings or orders which have been or which may hereafter be made by the Commission in any proceedings now pending or hereafter instituted by or against Applicants. Further, our action in this proceeding shall not foreclose or prejudice any future proceedings or objections relating to the operation of any price or related provisions in the gas purchase contracts herein involved. The grant of the certificates aforesaid for service to the particular customers involved does not imply approval of all of the terms of the contracts, particularly as to the cessation of service upon termination of said contracts as provided by section 7(b) of the Natural Gas Act. The grant of the certificates aforesaid shall not be construed to preclude the imposition of any sanctions pursuant to the provisions of the Natural Gas Act for the unauthorized commencement of any sales of natural gas subject to said certificates.

(D) The orders issuing certificates of public convenience and necessity in Dockets Nos. G-4904, G-10033, CI64-670, CI64-1422, CI67-286, CI68-962, CI69-49, CI69-328, and CI70-986 are amended by adding thereto or deleting therefrom authorization to sell natural gas as more fully described in the applications and in the tabulation herein. In all other respects said orders shall remain in full force and effect.

(E) The orders issuing certificates of public convenience and necessity in Dockets Nos. G-9517, G-18963, CI62-1004, and CI70-751 are amended by substituting successors in interest as certificate holders as more fully described in the applications and in the tabulation herein. In all other respects said orders shall remain in full force and effect.

(F) The orders issuing certificates of public convenience and necessity in the following dockets are amended to reflect the deletion of acreage where new certificates are issued herein or outstanding certificates are amended herein by authorizing the continuation of service from the subject acreage, and in all other respects said orders shall remain in full force and effect:

Amend to delete acreage	*New certificate and/or amendment to add acreage*
G-4825	CI70-1125
G-7648	CI71-797
G-10995	CI71-632
G-11948	CI71-630
G-13633	CI71-755
CI70-745	CI71-620

(G) The certificate issued in Docket No. G-14149 is terminated since the service authorized therein will be continued by Applicant in Docket No. CI71-632.

(H) The certificate authorization granted in Docket No. CI70-986 and the certificate granted in Docket No. CI71-582 are subject to any determination which may be made by the Commission in Docket No. R-338 with respect to the transportation of liquids and liquefiable hydrocarbons.

(I) Applicant in Docket No. G-18963 shall charge and collect 20.625 cents per Mcf at 15.025 p.s.i.a. for sales from November 1, 1970, through January 9, 1971, and 22.625 cents per Mcf at 15.025 p.s.i.a., subject to refund in Docket No. RI71-413, for sales from January 10, 1971, from acreage acquired from Gulf Oil Corp. and 20 cents per Mcf at 15.025 p.s.i.a. from sales from acreage acquired from Hassie Hunt Trust.

(J) Applicant in Docket No. CI71-64 shall charge and collect 20 cents per Mcf at 14.65 p.s.i.a. for sales from Oklahoma production and 15.0 cents per Mcf at 15.025 p.s.i.a. for sales from Colorado production.

(K) The certificate authorizations and certificates granted in Dockets Nos. G-4904, G-10033, CI64-1422, CI68-962, CI69-328, CI70-986, CI71-64, CI71-514, CI71-582, and CI71-829 are subject to the Commission's findings and order accompanying Opinion No. 586. If the quality of the gas deviates at any time from the quality standards set forth in § 154.106 (d) of the regulations under the Natural Gas Act so as to require a downward adjustment of the existing rates, notices of changes in rate shall be filed pursuant to section 4 of the Natural Gas Act; provided, however, that changes reflecting changes in B.t.u. content of the gas shall be computed by the applicable formula and charged without the filing of notices of changes in rate.

(L) Within 90 days from the date of this order, Applicant in Docket No. CI71-64 shall file three copies of a rate schedule-quality statement with respect to sales from Oklahoma production in the form prescribed in Opinion No. 586.

(M) Within 90 days from the date of this order, Applicant in Docket No. G-18963 shall file three copies of a rate schedule-quality statement in the form prescribed in Opinion No. 598.

(N) Within 90 days from the date of initial delivery, Applicants in Dockets Nos. G-4904 and CI64-1422 shall each file three copies of a rate schedule-quality statement in the form prescribed in Opinion No. 586.

(O) The certificate authorizations and certificates granted in Dockets Nos. G-9517, CI62-1004, CI71-755, and CI71-797 are subject to the Commission's findings and order accompanying Opinion No. 595 and any further orders which may be issued in Docket No. AR64-2, et al.

(P) The certificate issued in Docket No. CI17-828 determines the rate which legally may be paid by the buyer to the seller but is without prejudice to any action which the Commission may take in any rate proceeding involving either company.

(Q) J. Gregory Merrion et al., are made co-respondents in the proceedings pending in Dockets Nos. RI69-389 and RI69-430 and said proceedings are redesignated accordingly. They shall comply with the refunding procedure required by the Natural Gas Act and § 154.102 of the regulations thereunder.

(R) The proceedings pending in Dockets Nos. RI63-321 and RI68-437 are terminated.

(S) Permission for and approval of the abandonment of service by Applicants, as hereinbefore described and as more fully described in the applications and in the tabulation herein, are granted.

(T) The certificates issued in Dockets Nos. G-9166, CI63-1163, and CI68-466 are terminated.

(U) Applicant in Docket No. CI71-793 is not relieved of any refund obligations in Dockets Nos. RI68-2 and RI68-648 as a result of the abandonment permitted and approved in Docket No. CI71-793.

(V) The rate schedules and rate schedule supplements related to the authorizations granted herein are accepted for filing or are redesignated, all as set forth in the tabulation herein.

By the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

W. E. BAKKE ET AL.

Order Terminating Certificates, Cancelling FPC Gas Rate Schedules, and Terminating Rate Proceedings

AUGUST 24, 1971.

Each certificate holder herein has been granted a small producer certificate of public convenience and necessity pursuant to section 7(c) of the Natural Gas Act and § 157.40 of the regulations thereunder authorizing sales of natural gas in interstate commerce. The small producer certificate holders were theretofore authorized to sell natural gas pursuant to FPC gas rate schedules on file with the Commission. The certificates authorizing the former sales, which are now made under the small producer certificates, will be terminated and the related FPC gas rate schedules will be canceled. Some sales made pursuant to the certificates terminated herein and the related FPC gas rates schedules were made at rates in effect subject to refund. There are other rate increases which are suspended and have not been collected subject to refund. The proceedings in which increased rates are suspended or collected subject to refund by any of these certificate holders and which were equal to or below area ceiling rates will be terminated.

The Commission orders:

Certificates of public convenience and necessity heretofore issued to small producer certificate holders for sales continued under their small producer certificate are terminated and the related FPC gas rate schedules are canceled. The proceedings in which any related increased rates which have not been made effective or have been made effective subject to refund are equal to or below the applicable area rate base are terminated. The details of the cancellations and terminations are indicated in the Appendix hereto.

This order is subject to our statement of policy implementing the Economic Stabilization Act of 1970 (Public Law 91-379, 84 Stat. 799, as amended by Public Law 92-15, 85 Stat. 38) and Executive Order No. 11615, including such amendments as the Commission may require.

By the Commission.

[Docket No. E-7275]

COMMONWEALTH EDISON CO. AND CENTRAL ILLINOIS ELECTRIC AND GAS CO.

Notice of Final Report Regarding Intended Disposition of Reserved Issue

AUGUST 24, 1971.

Take notice that on July 15, 1971, Commonwealth Edison Co. (Commonwealth), pursuant to the order issued in this proceeding on December 2, 1966, 36 FPC 927, as modified November 5, 1970, 46 FPC —, and pursuant to Commission orders extending the time for filing, the most recent of which was issued June 18, 1971, filed a final report with respect to the issue reserved in this proceeding concerning Commonwealth's retention of certain noncontiguous electric properties formerly owned and operated by Central Illinois Electric and Gas Co. (Central). The Commission's December 2, 1966, order states in part: "Jurisdiction is retained over the question of Commonwealth's continued operation of Central's downstate divisions; namely, Lincoln and associated Homer and Bement areas, and the Albion division * * * for final determination by subsequent order. * * *" Commonwealth requests that the Commission formally "relinquish jurisdiction" over this reserved issue.

The order issued in this proceeding, as modified, provides that not later than July 15, 1971, Commonwealth shall show, inter alia, why it should continue to own and operate the noncontiguous electric properties described therein. The order also provides for interim reports showing what progress has been made in this regard. Five such reports have been filed. The most recent report was filed on March 30, 1971.

Commonwealth states that an agreement for the disposition of the noncontiguous electric properties has been reached with Central Illinois Light Co. (CILCO), and that it entered into a "Memorandum of Agreement" with CILCO July 13, 1971, which states the principal terms and conditions under which Commonwealth agrees to sell its noncontiguous electric properties to CILCO. A copy of the memorandum of agreement is attached to the subject report.

As more specifically set forth in the memorandum of agreement, Commonwealth and CILCO propose, subject to the necessary regulatory approval, that the noncontiguous electric properties of Commonwealth located in the Lincoln Bement, Homer, and Albion areas be purchased by CILCO for $24 million, plus the amount of the capital additions made to the properties from June 30, 1971 to June 30, 1972 (Closing Date) less depreciation accrued on such additions. Upon receipt of regulatory approval, CILCO would take over the operation of Commonwealth's noncontiguous electric properties for the account of Commonwealth with the Commonwealth employees then at the properties and subject to Commonwealth's overall control until the Closing Date. At the Closing Date Commonwealth would transfer from its payroll to that of CILCO the employees then on Commonwealth's Lincoln, Homer, Bement, and Albion area payrolls.

Commonwealth further states that upon completion of the sale of electric properties to CILCO, Commonwealth will have no interest, direct or indirect, in the noncontiguous electric properties formerly owned by Central.

Any person desiring to be heard or to make any protest with reference to the subject request should on or before September 20, 1971, file with the Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to

intervene in accordance with the Commission's rules. The final report and the interim reports to which it refers are on file with the Commission and open to public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP72-39]

EL PASO NATURAL GAS CO.

Notice of Application

AUGUST 23, 1971.

Take notice that on August 16, 1971, El Paso Natural Gas Co. (applicant), Post Office Box 1492, El Paso, TX 79978, filed an application in Docket No. CP72-39 pursuant to sections 7(b) and 7(c) of the Natural Gas Act for permission and approval to abandon certain facilities and for a certificate of public convenience and necessity authorizing the acquisition, construction and operation of certain facilities, all as set forth in the application on file with the Commission and open to public inspection.

Applicant proposes to abandon, by transfer to Arizona Public Service Co. (APS), facilities which consist of: (1) approximately 7.906 miles of 4½" O.D. pipe located in Cochise County, Ariz.; (2) approximately 7.231 miles of 2⅜" O.D. pipe located in Yuma County, Ariz.; and (3) four taps located on said 2⅜" O.D. pipeline. Applicant also proposes to abandon by removal and salvage facilities consisting of four meter stations located in Yuma and Cochise Counties, Ariz., which are utilized for natural gas service to APS.

Applicant seeks authorization to acquire from APS approximately 6 miles of the 6⅝" O.D. pipeline known as the Palomas Plains Pipeline located in Maricopa County, Ariz. Applicant was previously authorized, at Docket No. CP65-252, 33 FPC 949 (1965), to acquire approximately 7.2 miles of said line. In place of the four meter stations to be abandoned, applicant proposes to construct two master meter stations, one located in Cochise County, Ariz., and the other in Yuma County, Ariz.

The application further states that the pipelines proposed to be abandoned now essentially serve the function of distribution rather than transmission for which they were initially installed. The proposed abandonment will eliminate applicant's need to own, maintain and operate transmission facilities, a part of which are located in congested areas. The abandonment of four meter stations and construction of two will permit consolidation of delivery points and more efficient control of sales volumes.

The total estimated cost of the proposed abandonment is $3,100 and the total estimated cost of the facilities to be constructed is $23,295, which costs, applicant states, will be financed from working funds.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 13, 1971, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Projects Nos. 574, 590]

FOREST SERVICE, DEPARTMENT OF AGRICULTURE

Finding and Order Regarding Lands Withdrawn in Montana

AUGUST 24, 1971.

Application has been filed by the U.S. Department of Agriculture, Forest Service, for vacation of land withdrawals for Projects Nos. 574 and 590 in their entirety, affecting the following described lands, thereby requiring Commission consideration under section 24 of the Federal Power Act.

PRINCIPAL MERIDIAN, MONTANA

(1) Portions (totaling about 37 acres) of the following described tracts were withdrawn pursuant to the filing on January 12, 1925, of an application for license for Project No. 574 for which the Commission gave notice of land withdrawal to the General Land Office (now Bureau of Land Management) by letter dated January 27, 1925.

T. 31 N., R. 34 W.,
Sec. 20, S½NE¼, N½S½;
Sec. 21, SW¼NW¼, SE¼NE¼, N½S½;
Sec. 22, SW¼NE¼;
Sec. 23, NE¼NE¼NE¼, S½NE¼NE¼, SW¼NE¼, S½SE¼NW¼;
Sec. 24, NW¼NW¼NW¼.

(2) The following described lands (totaling about 360 acres) were withdrawn pursuant to the filing on March 9, 1925, of an application for license for Project No. 590 for which the Commission gave notice of land withdrawal to the General Land Office by letter dated April 10, 1925.

T. 31 N., R. 34 W.,
Sec. 21, SE¼NE¼, NE¼SE¼;
Sec. 22, SW¼NE¼, NE¼SW¼, N½SE¼;
Sec. 23, NE¼NE¼NE¼, SW¼NE¼NE¼, S½SE¼NW¼, NW¼SW¼, SW¼NE¼.

The subject lands lie within the Kootenai National Forest and are located along Callahan Creek, a tributary of the Kootenai River which is tributary to the Columbia River, near the town of Troy, Lincoln County, Mont.

Project No. 574 consisted of a 6.6 kv. wood pole transmission line which served the mining properties of the Snow Storm Silver Lead Co. Project No. 590 consisted of a 274 horsepower diversion-conduit development on Callahan Creek which also served the said mining properties.

Both projects were constructed in 1917, under authority of Forest Service special use permits, by Snow Storm Consolidated (predecessor of the Snow Storm Silver Lead Co.) and were subsequently conveyed to the Montana Light & Power Co.

A 25-year license for Project No. 574 was issued to the Montana Light & Power Co. on August 4, 1925, and a 25-year license for Project No. 590, issued to the Snow Storm Silver Lead Co. on April 30, 1926, was transferred to the Montana Light & Power Co. effective August 29, 1929.

The projects were dismantled after the mine closed. The Commission accepted the surrender of the license for Project No. 574 by order dated July 9, 1940, and the license for Project No. 590 was canceled February 16, 1938, by court decree.

The Commission finds: The subject lands have no significant power value.

The Commission orders: The land withdrawals for Projects Nos. 574 and 590 are hereby vacated in their entirety.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[Docket No. CP72-40]

LAKE SHORE PIPE LINE CO. AND CONSOLIDATED GAS SUPPLY CORP.

Notice of Application

AUGUST 24, 1971.

Take notice that on August 16, 1971, Lake Shore Pipe Line Co. (Lake Shore), 1717 East Ninth Street, Cleveland, OH 44114, and Consolidated Gas Supply Corp. (Consolidated Supply), 445 West Main Street, Clarksburg, WV 26301, filed in Docket No. CP72-40 a joint application pursuant to section 7(b) and section 7(c) of the Natural Gas Act for permission and approval for Lake Shore to abandon all its facilities and service and for a certificate of public convenience and necessity authorizing Consolidated Supply to acquire and operate certain of these facilities and to render the service now provided by Lake Shore, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The applicants, and The East Ohio Gas Co. (East Ohio) are wholly owned subsidiaries of the Consolidated Natural Gas Co., a public utility holding company. Except for a small volume of local production in Pennsylvania, all of Lake Shore's gas supply is purchased from Consolidated Supply; and East Ohio is Lake Shore's only customer. The applicants propose herein to eliminate Lake Shore as an intermediate pipeline between Consolidated Supply and East Ohio, thereby reducing intercompany transactions between affiliates and simplifying the corporate structure of the holding company system.

No new facilities are required to accomplish the simplification proposed herein, and no reduction in service to ultimate consumers will result. Specifically, the applicants propose that the portions of Lake Shore's pipeline and gathering facilities and any other property which are located in Pennsylvania, and two measuring stations located in Ohio at the Pennsylvania border, will be transferred to and acquired by Consolidated Supply; the remainder of Lake Shore's pipeline and property located in Ohio, will be transferred to and acquired by East Ohio.

East Ohio and Consolidated Supply will acquire a portion of Lake Shore's debt equal to the net book value of the Lake Shore properties acquired by each. When the transfers proposed herein are consummated, Lake Shore will cease to be an operating company, and it will be dissolved.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 17, 1971, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. E-7659]

MINNESOTA POWER & LIGHT CO.

Notice of Application

AUGUST 24, 1971.

Take notice that on August 20, 1971, Minnesota Power & Light Co. (applicant) filed an application with the Federal Power Commission seeking an order pursuant to section 204 of the Federal Power Act authorizing the issuance and sale from time to time prior to July 1, 1973, of promissory notes to evidence bank borrowings and commercial paper up to $30 million in aggregate principal amount.

Applicant is incorporated under the laws of the State of Minnesota, with its principal place of business office at Duluth, Minnesota, and is engaged in the electric utility business within the State of Minnesota.

Bank notes issued will bear interest at a rate not to exceed the prime commercial bank rate in effect at the time of issue. The commercial paper will mature not later than 270 days from date of issue and will carry an interest rate which will be dependent on the terms of the notes and the money market conditions at the time of issuance.

According to the application, proceeds from the notes to be issued will provide funds to refund $7.9 million principal amount of notes presently outstanding and to meet expenditures in connection with the Company's construction program which will require an estimated $34.6 million in 1971, and approximately $44 million in 1972 and $13 million in 1973, the bulk of which will be spent on generation, transmission and distribution facilities.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 14, 1971, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules.

The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.71-12709 Filed 8-30-71;8:49 am]

[Docket No. CP72-41]

NORTHERN NATURAL GAS CO.

Notice of Application

AUGUST 24, 1971.

Take notice that on August 19, 1971, Northern Natural Gas Co. (applicant), 2223 Dodge Street, Omaha, NE 68102, filed in Docket No. CP72-41 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval for the abandonment of certain natural gas compression facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, applicant proposes to abandon one 350 horsepower compressor unit on its North Gomez System in Pecos County, Tex., and one 80 horsepower compressor unit on its Martin County System, Martin County, Tex. Applicant states that it has installed additional natural gas purchase facilities in or adjacent to the aforementioned systems which resulted in a revised design operation of said systems. The 350 and 80 horsepower units have been rendered unnecessary thereby, and applicant proposes to abandon and salvage these units at an estimated cost of $14,000.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 17, 1971, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required,

further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

FEDERAL RESERVE SYSTEM

DAI-ICHI BANK, LTD.

Notice of Application for Approval of Acquisition of Shares of Bank

Notice is hereby given that application has been made, pursuant to section 3(a)(1) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a)(1)), by the Dai-Ichi Bank, Ltd., Tokyo, Japan, or its proposed successor through amalgamation with the Nippon Kangyo Bank, Ltd., Tokyo, Japan, the Dai-Ichi Kangyo Bank, Ltd., Tokyo, Japan, for prior approval by the Board of Governors of action whereby applicant would become a bank holding company through the acquisition of 100 per cent of the voting shares (less directors' qualifying shares) of the First Pacific Bank of Chicago, Chicago, Ill., a proposed new bank.

Section 3(c) of the Act provides that the Board shall not approve:

(1) Any acquisition or merger or consolidation under section 3 which would result in a monopoly, or which would be in furtherance of any combination or conspiracy to monopolize or to attempt to monopolize the business of banking in any part of the United States, or

(2) Any other proposed acquisition or merger or consolidation under section 3 whose effect in any section of the country may be substantially to lessen competition, or to tend to create a monopoly, or which in any other manner would be in restraint of trade, unless the Board finds that the anticompetitive effects of the proposed transaction are clearly outweighed in the public interest by the probable effect of the transaction in meeting the convenience and needs of the community to be served.

Section 3(c) further provides that, in every case, the Board shall take into consideration the financial and managerial resources and future prospects of the company or companies and the banks concerned, and the convenience and needs of the community to be served.

Not later than thirty (30) days after the publication of this notice in the FEDERAL REGISTER, comments and views regarding the proposed acquisition may be filed with the Board. Communications should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. The application may be inspected at the office of the Board of Governors or the Federal Reserve Bank of Chicago.

Board of Governors of the Federal Reserve System, August 25, 1971.

[SEAL] TYNAN SMITH,
Secretary.

NILES CAPITAL CORP.

Notice of Application for Approval of Acquisition of Shares of Bank

Notice is hereby given that application has been made, pursuant to section 3(a)(1) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a)(1)), by Niles Capital Corp., Chicago, Ill., for prior approval by the Board of Governors of action whereby applicant would become a bank holding company through the acquisition of 51.5 percent of the voting shares of The Bank of Niles, Niles, Ill.

Section 3(c) of the Act provides that the Board shall not approve:

(1) Any acquisition or merger or consolidation under section 3 which would result in a monopoly, or which would be in furtherance of any combination or conspiracy to monopolize or to attempt to monopolize the business of banking in any part of the United States, or

(2) Any other proposed acquisition or merger or consolidation under section 3 whose effect in any section of the country may be substantially to lessen competition, or to tend to create a monopoly, or which in any other manner would be in restraint of trade, unless the Board finds that the anticompetitive effects of the proposed transaction are clearly outweighed in the public interest by the probable effect of the transaction in meeting the convenience and needs of the community to be served.

Section 3(c) further provides that, in every case, the Board shall take into consideration the financial and managerial resources and future prospects of the company or companies and the banks concerned, and the convenience and needs of the community to be served.

Not later than thirty (30) days after the publication of this notice in the FEDERAL REGISTER, comments and views regarding the proposed acquisition may be filed with the Board. Communications should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. The application may be inspected at the office of the Board of Governors or the Federal Reserve Bank of Chicago.

Board of Governors of the Federal Reserve System, August 25, 1971.

TERREBONNE CORP.

Notice of Application for Approval of Acquisition of Shares of Bank

Notice is hereby given that application has been made, pursuant to section 3(a)(1) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a)(1)), by Terrebonne Corp., Houma, La., for prior approval by the Board of Governors of action whereby applicant would become a bank holding company through the acquisition of 100 percent of the voting shares of the successor by merger to the Bank of Terrebonne and Trust Co., Houma, La., to be known as Terrebonne Bank & Trust Co., Houma, La.

Section 3(c) of the Act provides that the Board shall not approve:

(1) Any acquisition or merger or consolidation under section 3 which would result in a monopoly, or which would be in furtherance of any combination or conspiracy to monopolize or to attempt to monopolize the business of banking in any part of the United States, or

(2) Any other proposed acquisition or merger or consolidation under section 3 whose effect in any section of the country may be substantially to lessen competition, or to tend to create a monopoly, or which in any other manner would be in restraint of trade, unless the Board finds that the anticompetitive effects of the proposed transaction are clearly outweighed in the public interest by the probable effect of the transaction in meeting the convenience and needs of the community to be served.

Not later than thirty (30) days after the publication of this notice in the FEDERAL REGISTER, comments and views regarding the proposed acquisition may be filed with the Board. Communications should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. The application may be inspected at the office of the Board of Governors or the Federal Reserve Bank of Atlanta.

SECURITIES AND EXCHANGE COMMISSION

[70-5066]

CONSOLIDATED NATURAL GAS CO.

Notice of Proposed Issue and Sale of Debentures

AUGUST 24, 1971.

Notice is hereby given that Consolidated Natural Gas Co. (Consolidated), 30 Rockefeller Plaza, New York, N.Y. 10020, a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 (Act), designating sections 6(a) and 7 of the Act and rule 50 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transaction.

Consolidated proposes to issue and sell, subject to the competitive bidding requirements of rule 50, $25 million principal amount of — percent debentures due October 1, 1996. The interest rate (which will be a multiple of one-eighth of 1 percent) and the price, exclusive of accrued interest (which will be not less than 99 percent nor more than 102 percent of the principal amount thereof) will be determined by the competitive bidding. The debentures will be issued under an indenture dated May 1, 1971, between Consolidated and Manufacturers Hanover Trust Co., New York, N.Y., as trustee, as supplemented by a First Supplemental Indenture to be dated October 1, 1971, and which includes, subject to certain exceptions, a prohibition until October 1, 1976, against refunding the issue with the proceeds of funds borrowed at a lower annual cost of money. The proceeds of the sale of the debentures will be used to finance, in part, the 1971 plant construction expenditures of Consolidated's subsidiary companies, presently estimated at $97,845,000.

It is stated that the fees and expenses to be incurred in connection with the proposed transaction are estimated at $85,000, including service charges of Consolidated Natural Gas Service Co., Inc., an associate company, at cost, of $26,000, accountants' fees and expenses of $12,000, and fees of counsel for the trustee of $2,000. The fees and expenses of counsel for the underwriters, to be paid by the successful bidders, will be supplied by amendment.

It is further stated that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than September 17, 1971, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon the declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] THEODORE L. HUMES,
Associate Secretary.

[File No. 1-4692]

FAS INTERNATIONAL, INC.

Order Suspending Trading

AUGUST 24, 1971.

The common stock, 2 cents par value and the 5 percent convertible subordinated debentures due 1989 of FAS International, Inc. being traded on the New York Stock Exchange, Inc., pursuant to provisions of the Securities Exchange Act of 1934 and all other securities of FAS International, Inc. being traded otherwise than on a national securities exchange; and

It appearing to the Securities and Exchange Commission that the summary suspension of trading in such securities on such Exchange and otherwise than on a national securities exchange is required in the public interest and for the protection of investors:

It is ordered, Pursuant to sections 15(c)(5) and 19(a)(4) of the Securities Exchange Act of 1934, that trading in such securities on the above mentioned exchange and otherwise than on a national securities exchange be summarily suspended, this order to be effective for the period August 25, 1971 through September 3, 1971.

By the Commission.

[SEAL] THEODORE L. HUMES,
Associate Secretary.

[70-5063]

PENNSYLVANIA POWER CO.

Notice of Proposed Issue and Sale of First Mortgage Bonds and Preferred Stock

AUGUST 24, 1971.

Notice is hereby given that Pennsylvania Power Co. (Pennsylvania), 1 East Washington Street, New Castle, PA 16103, an electric utility subsidiary company of Ohio Edison Co., a registered holding company, has filed an application with this Commission pursuant to the Public Utility Holding Company Act of 1935 (Act), designating section 6(b) of the Act and rule 50 promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the application, which is summarized below, for a complete statement of the proposed transactions.

Pennsylvania proposes to issue and sell, subject to the competitive bidding requirements of rule 50 under the Act, $10 million principal amount of First Mortgage Bonds, —— percent Series due October 1, 2001 (Bonds). The interest rate (which will be a multiple of one-eighth percent) and the price, exclusive of accrued interest, to be paid to Pennsylvania (which will be not less than 100 percent nor more than 102.75 percent of the principal amount thereof) will be determined by the competitive bidding. The Bonds will be issued under the indenture dated November 1, 1945, between Pennsylvania and First National City Bank, as trustee, as heretofore amended and supplemented and to be further amended and supplemented by a Tenth Supplemental Indenture to be dated October 1, 1971, and which includes a prohibition until October 1, 1976, against refunding the issue with the proceeds of funds borrowed at a lower interest cost.

The net proceeds from the sale of the Bonds will be used by Pennsylvania to construct and acquire new facilities, for the betterment of existing facilities, to pay bank loans, and to reimburse its Treasury in part for moneys expended for such purposes. Pennsylvania's 1971 and 1972 construction program is estimated to aggregate approximately $60,790,000.

Pennsylvania also proposes to issue $858,000 principal amount of First Mortgage Bonds, 3¼ percent Series due 1982 (Sinking Fund Bonds) to the First National City Bank, as trustee, under its indenture dated November 1, 1945, as amended and supplemented and to surrender such Sinking Fund Bonds to the trustee in accordance with the sinking fund requirements. The Sinking Fund Bonds are to be identical with those authorized by the Commission on April 20, 1970 (Holding Company Act Release No. 16644), and due to be issued on the basis of property additions. Pensylvania proposes to use the Sinking Fund Bonds solely to obtain the inclusion in its general funds of the sinking fund payments on deposit and required to be made on or before December 1, 1971, with the Trustee under the sinking fund provisions of the Indenture. The cash so acquired by Pennsylvania will be applied toward its cash requirements in 1971.

Pennsylvania also proposes to issue and sell, subject to the competitive bidding requirements of rule 50 under the Act, 58,000 of its —— percent Series Preferred Stock, $100 par value per share. The dividend rate of the preferred stock (which will be a multiple of 0.04 percent) and the price, exclusive of accrued interest, to be paid to Pennsylvania (which will not be less than $100 nor more than $102.75 per share) will be determined by the competitive bidding. The terms will include a prohibition until October 1, 1976, against refunding the issue, directly or indirectly, with the proceeds of funds derived from the issuance of debt securities at a lower effective interest cost or

of other preferred stock at a lower effective dividend cost.

The net proceeds from the sale of the preferred stock will be used by Pennsylvania to construct and acquire new facilities and for the betterment of existing facilities, and to reimburse its Treasury in part for moneys expended for such purposes.

Pennsylvania has consented and agreed to the imposition by the Commission of terms and conditions in any order issued authorizing the proposed preferred stock similar to those conditions imposed in previous orders authorizing preferred stock (Holding Company Act Release Nos. 10426 and 13765).

It is stated that the Pennsylvania Public Utility Commission has jurisdiction over the proposed issue and sale of the Bonds, the Sinking Fund Bonds, and the preferred stock and that such Commission's orders will be supplied by amendment. It is represented that no other State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions. The fees and expenses to be incurred in connection with the issue and sale of the preferred stock and the Bonds will be supplied by amendment. The fees and expenses to be incurred in connection with the Sinking Fund Bonds are estimated at $1,700, including counsel fee of $500.

Notice is further given that any interested person may, not later than September 17, 1971, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (airmail if the person being served is located more than 500 miles from the point of mailing) upon the applicant at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application, as filed or as it may be amended, may be granted as provided in rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] THEODORE L. HUMES,
Associate Secretary.

[Rel. Nos. 33-5178, 34-9285, IC-6670, IA-291]

OFFSHORE FUNDS

Formation of Inter-Agency Task Force To Explore Possible Regulation and Foreign Portfolio Sales Corporations

In accordance with the recommendation made to the Congress in its transmittal letter of the Institutional Investor Study Report, the Securities and Exchange Commission announced today formation of an interagency task force to explore the possibility of the establishment and regulation under Federal securities laws of Foreign Portfolio Sales Corporations and offshore investment companies which invest in U.S. securities. (See Institutional Investor Study Report, House Doc. 92-64, 92d Cong. first sess., Vol. 3, Ch. VII and Letter of Transmittal of Mar. 10, 1971, pp. XVI and XVII.) The task force will consider appropriate tax treatment for such funds and for nonresident foreign investors in such funds, the regulatory issues under the Federal securities laws, various methods of gathering data with respect to foreign institutional investors in order to facilitate further study of developments in this area and related matters. The task force consists of representatives of this Commission, the Department of State, the Department of the Treasury, and the Board of Governors of the Federal Reserve System.

By the Commission, August 11, 1971.

[SEAL] RONALD F. HUNT,
Acting Associate Secretary,

INTERSTATE COMMERCE COMMISSION

ASSIGNMENT OF HEARINGS

AUGUST 26, 1971.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the official docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 52657 Sub 677, Arco Auto Carriers, Inc., assigned September 14, 1971, at Washington, D.C., postponed indefinitely.

MC 134024 Sub 1, James L. Womick, DBA Old Orchard Homes Transit, assigned September 13, 1971, at St. Louis, Mo., hearing canceled and application dismissed.

FD 26241 Sub 7, Penn Central Transportation Co. Reorganization, assigned October 6, 1971, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 56679 Sub 41, Brown Transport Corp., assigned September 13, 1971, at Atlanta, Ga., postponed indefinitely.

MC 3647 Sub 426, Public Service Coordinated Transport, MC 109312 Sub 41, DeCamp Bus Lines, MC 109802 Sub 29, Lakeland Bus Lines, Inc., and MC 135331, Independent Bus Lines, now assigned September 27, 1971, at Newark, N.J., the hearing is canceled and the applications are dismissed.

No. 35363, Handling of Empty Tank and Freight Cars, U.S.A., No. 35419 Handling of Empty Rail Cars of Private Ownership, U.S.A., No. 35419 Sub 1, Handling of Empty Rail Cars of Private Ownership, U.S.A., assigned September 27, 1971, postponed to October 4, 1971, at the Offices of the Interstate Commerce Commission, Washington, D.C.

[SEAL] ROBERT L. OSWALD,
Secretary.

[Notice 356]

MOTOR CARRIER TEMPORARY ANTHORITY APPLICATIONS

AUGUST 26, 1971.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC-67 (49 CFR Part 1131) published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, within 15 calendar days after the date of notice of the filing of the application is published in the FEDERAL REGISTER. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 29120 (Sub-No. 127 TA), filed August 18, 1971. Applicant: ALL-AMERICAN TRANSPORT, INC., Post Office Box 769, 1500 Industrial Avenue (57104), Sioux Falls, SD 57101. Applicant's representative: Mead Bailey (same adress as above). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities*, except those of unusual value, classes A and B explosives, household goods and hides as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading; from Omaha, Nebr., to Kansas City, Mo., and its commercial zone, serving the intermediate point of St. Joseph, Mo., and its commercial zone; from Omaha, Nebr., over city streets to Council Bluffs, Iowa, to Iowa Highway 92; thence over Iowa Highway 92 to its junction with U.S. Highway 59; thence over U.S. Highway 59 to its junction with Interstate Highway 29; thence over Interstate Highway 29 to Kansas City, Mo., Restriction: (1) *Restricted* to the transportation of shipments moving through Omaha, Nebr., which shipments have had a point of origin (or a point of interline from another carrier) other than Omaha, Nebr., or its commercial zone, and which shipments are destined for delivery (or interline to another carrier) to points in St. Joseph or Kansas City, Mo., or their respective commercial zone. (2) *Restricted against* local service from St. Joseph, Mo., to Kansas City, Mo., and their respective commercial zones for 180 days. NOTE: Applicant is authorized to tack the foregoing authority at Omaha, Nebr., with its existing authority under Docket No. MC 29120. Applicant is authorized to interline with other carriers at St. Joseph, and Kansas City, Mo., and their respective commercial zones shipments moving through Omaha as hereinabove indicated. Supported by: There are approximately 17 statements of support attached to the application which may be examined here at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: J. L. Hammond, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Room 369, Federal Building, Pierre, S. Dak. 57501.

No. MC 30884 (Sub-No. 18 TA), filed August 18, 1971. Applicant: JACK COOPER TRANSPORT CO., INC., 3501 Manchester Trafficway, Kansas City, MO 64130. Applicant's representative: A. Doyle Cloud, Jr., 2111 Sterick Building, Memphis, TN 38103. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Automobiles, trucks and buses* as described in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 766 in initial movements, in truckaway service, from the plantsites of General Motors Corp. located in Janesville, Wis., to Kansas City, Mo., with no transportation for compensation on return except as otherwise authorized. The initial authority here sought may be used in combination with applicant's existing secondary authority for the transportation of vehicles moving from Janesville, Wis., to Kansas City, Mo., and subsequently reshipped by General Motors Corp. to destinations beyond Kansas City, Mo., Applicant holds secondary authority as here pertinent from Kansas City, Mo., to points in New Mexico, Utah, Wyoming, South Dakota, Idaho, Montana, Missouri, Kansas, Nebraska, Iowa, Arkansas, Colorado, Oklahoma, and Texas, for 180 days. Supporting shipper: General Motors Corp., General Motors Building, 3044 West Grand Boulevard, Detroit, MI 48202. Send protests to: John V. Barry, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 1100 Federal Office Building, 911 Walnut Street, Kansas City, MO 64106.

No. MC 95876 (Sub-No. 115 TA), filed August 18, 1971. Applicant: ANDERSON TRUCKING SERVICE, INC., 203 Cooper Avenue North, Post Office Box 844, St. Cloud, MN 56301. Applicant's representative: Eugene L. Cannon (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Snowmobiles* (2) *parts, attachments and accessories* for snowmobiles and (3) *snowmobile clothing and accessories*, from Twin Valley, Minn., to points in Washington, Oregon, California, Idaho, Nevada, Montana, Wyoming, Utah, Colorado, North Dakota, South Dakota, Nebraska, Minnesota, Iowa, Michigan, Wisconsin, Illinois, Indiana, Ohio, New York, Pennsylvania, Maine, Vermont, New Hampshire, Massachusetts, Connecticut, Rhode Island, and New Jersey, for 180 days. Supporting shipper: Virking Snowmobiles, Inc., Twin Valley, Minn. 56584. Send protests to: A. N. Spath, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 448 Federal Building and U.S. Courthouse, 110 South Fourth Street, Minneapolis MN 55401.

No. MC 114533 (Sub-No. 236 TA), filed August 18, 1971. Applicant: BANKERS DISPATCH CORPORATION, 4970 South Archer Avenue, Chicago, IL 60632. Applicant's representative Stanley Komosa (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Small parts, components, and supplies used in the repair, maintenance, and operations of electronic and mechanical office machines*, between Madison, Wis., on the one hand, and, on the other, points in Illinois, and Iowa, limited to shipments not weighing more than 600 pounds, for 180 days. Supporting shipper: Xerox Corp., Midwest Region Office, 3000 Des Plaines Avenue, Des Plaines, IL 60018. Send protests to: Robert G. Anderson, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Everett McKinley Dirksen Building, 219 South Dearborn Street, Room 1086, Chicago, IL 60604.

No. MC 114533 (Sub-No. 237 TA), filed August 18, 1971. Applicant: BANKERS DISPATCH CORPORATION, 4970 South Archer Avenue, Chicago, IL 60632. Applicant's representative: Stanley Komosa (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Restorative dentistry products*, (A) between Kansas City, Mo., on the one hand, and, on the other, points in Kansas (B) between Kansas City, Mo., on the one hand, and, on the other, points in Missouri (C) between Mission, Kans., on the one hand, and, on the other, points in Missouri (D) between Kansas City, Mo., on the one hand, and, on the other, points in Kansas and Missouri. Supporting shippers: Dysart Dental Laboratory, 600 West 39th Street, Kansas City, MO 64111.; Daniel L. Root Dental Laboratory, Inc., 810 East 63d Street, Kansas City, MO 64111.; T.R.U. Dental Studio, 4733 Belleview, Kansas City, MO 64141.; Myron & Dicks Dental Laboratory, 1106 North 13th Street, Kansas City, MO 66102.; Hansen Dental Laboratory, 5755 Foxridge Drive, Mission, KS 66202.; Bill Hatfield & Associates, 7933 State Line Road, Kansas City, MO 64114. Send protests to: Robert G. Anderson, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Everett McKinley Dirksen Building, 219 South Dearborn Street, Room 1086, Chicago, IL 60604.

No. MC 121060 (Sub-No. 11 TA), filed August 18, 1971. Applicant: ARROW TRUCK LINES, INC., Post Office Box 5568, 1220 West Third Street, Birmingham, AL 35207. Applicant's representative: William P. Jackson, Jr., 919 18th Street NW., Washington, DC 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Feed handling systems, grain bins, storage tanks, automatic feeder units and iron and steel articles*, from Birmingham, Ala., to points in Missouri, Kansas, Arkansas, Texas, and Kentucky, for 180 days. Supporting shipper: Read Steel Products, Inc., 906 40th Street North, Birmingham, AL 35223. Send protests to: Clifford W. White, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 814, 2121 Building, Birmingham, Ala. 35203.

No. MC 125543 (Sub-No. 5 TA), filed August 20, 1971. Applicant: PERISHABLE SERVICES, INC., 770 Springdale Road, Waukesha, WI 53186. Applicant's representative: Glen L. Gissing, Eight South Madison Street, Evansville, WI 53536. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Such merchandise* as is dealt in by wholesale and retail food business houses, between Waukesha and Madison, Wis., on the one hand, and, on the other, points in Boone, De Kalb, Lee, Ogle, Stephenson, and Winnebago Counties, Ill., for 180 days. Supporting shipper: Milwaukee Cheese Co., 1327 Broadway, Rockford, IL 61104, Glenn P. Holzhausen, Warehouse Manager. Send protests to: District Supervisor Lyle D. Helfer, Interstate Commerce Commission, Bureau of Operations, 135 West Wells Street, Room 807, Milwaukee, WI 53203.

MOTOR CARRIER TRANSFER PROCEEDINGS

AUGUST 26, 1971.

Synopses of orders entered pursuant to section 212(b) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings within 20 days from the date of publication of this notice. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-72987. By order of August 25, 1971, the Motor Carrier Board approved the transfer of Moniowczak Transit Co., a corporation, Bark River, Mich., of Certificates Nos. MC-81835 and MC-81835 (Sub-No. 5), issued to John Swanson, doing business as Swanson Trucking Co., Manistique, Mich., authorizing the transportation of: Household goods, as defined by the Commission, between Manistique, Mich., and 50 miles, on the one hand, and, on the other, points in Michigan and Wisconsin, and malt beverages and wines, from Milwaukee, Wis., and Chicago, Ill., to specified points in Michigan. William B. Elmer, attorney, 23801 Gratiot Avenue, East Detroit, MI 48921.

No. MC-FC-73012. By order of August 24, 1971, the Motor Carrier Board approved the transfer to Delphi Overseas Moving & Shipping Co., Inc., Brooklyn, N.Y., of the operating rights in Certificate No. MC-22562 (Sub-No. 5), issued April 18, 1967, to Acme Van Co., Inc., New York, N.Y. (now Louis Destefanis, Inc.), authorizing the transportation of household goods between points in New York, on the one hand, and, on the other, points in Rhode Island, Maryland, Massachusetts, New Jersey, Connecticut, Delaware, Pennsylvania, Virginia, New York, and the District of Columbia; and theatrical production equipment and materials used therefor, musical instruments, trunks, and wardrobes between points in New York, New Jersey, and Connecticut within 75 miles of New York, N.Y., including New York, N.Y. Robert J. Gallagher and Alvin Altman, 1776 Broadway, New York, NY 10019, attorneys for applicants.

No. MC-FC-73074. By order of August 25, 1971, the Motor Carrier Board approved the transfer to Harold D. Smith, doing business as Harold D. Smith Trucking Service, Camargo, Ill., of the operating rights in Certificate No. MC-82449 issued May 25, 1971 to Mayde Cornwell, Arthur, Ill., authorizing the transportation of named commodities from specified points and areas in Illinois and Indiana to specified points and areas in Illinois and Indiana. Robert T. Lawley, 300 Reisch Building, Springfield, Ill. 62701, attorney for applicants.

No. MC-FC-73078. By order of August 25, 1971, the Motor Carrier Board approved the transfer to Bond Transport, Inc., Pittsburgh, Pa., of the operating rights in Certificate No. MC-83745 issued November 27, 1957, to Steel City Transport, Inc., McKees Rocks, Pa., authorizing the transportation of specified commodities between Pittsburgh, Pa., on the one hand, and, on the other, points in Ohio, West Virginia, and Maryland, and general commodities, with exceptions, between Pittsburgh, Pa., on the one hand, and, on the other, points in Pennsylvania within 25 miles of Pittsburgh. Arthur J. Diskin, 806 Frick Building, Pittsburgh, PA 15219, attorney for applicants.

No. MC-FC-73079. By order of August 25, 1971, the Motor Carrier Board approved the transfer to Ogden Transfer and Storage Co., a corporation, 2105 Wall Avenue, Ogden, UT, Certificate No. MC-75138, issued to Damon Rufus Ford and Edgar Allen Ford, a partnership, doing business as Ogden Transfer and Storage Co., 2105 Wall Avenue, Ogden, UT, authorizing the transportation of: Various commodities of a general commodity nature, between points in Utah, California, Colorado, Idaho, Montana, Oregon, and Wyoming.

MOTOR CARRIER TRANSFER PROCEEDINGS

Synopses of orders entered pursuant to section 212(b) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

As provided in the Commission's general rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings within 30 days from the date of service of the order. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-72111. By report and order of August 5, 1971, Division 3, Acting as an Appellate Division approved, subject to the conditions set forth in its report, the transfer to CF Tank Lines, Inc., Menlo Park, Calif., of a portion of the operating rights of Consolidated Freightways Corporation of Delaware (transferor), Menlo Park, Calif., under certificate No. MC-42487 and subnumbered proceedings thereunder, as hereinafter described in the multiple-lettered appendixes. CF Tank Lines, Inc., shall acquire those portions of certificate No. MC-42487 and subnumbered proceedings thereunder to the extent described in Appendix A and as described in Appendix B, subject to the applicable modifications set forth in Appendix B. The portions of certificate No. MC-42487 and subnumbered proceedings to the extent shown as retained by Consolidated Freightways Corporation of Delaware in Appendix A, in Appendixes AA and BBB, without modification, and subject to modifications as indicated in each, in Appendixes AAA, AAAA, and BB, shall be retained by Consolidated Freightways Corporation of Delaware. Prior to, or concurrently with notice of consummation of the transaction authorized, applicants named above shall submit in writing, their request for cancellation of those portions of transferor's operating rights set forth in Appendix C and to the extent affected by the modification shown therein, in Appendix AAAA. The multiple-lettered appendixes herein referred to and omitted from the above-described report of August 5, 1971, and served on August 23, 1971, are filed as part of the original document.

PUBLIC PAPERS OF THE PRESIDENTS OF THE UNITED STATES

Richard Nixon — 1969

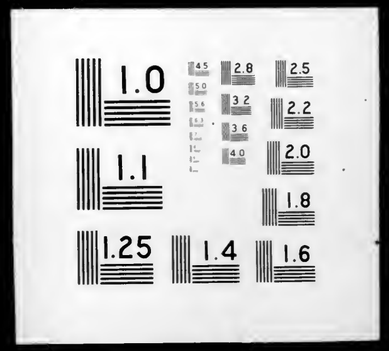
1183 Pages – Price: $14.50

CONTENTS

- Messages to the Congress
- Public speeches and letters
- The President's news conferences
- Radio and television reports to the American people
- Remarks to Informal groups

PUBLISHED BY

Office of the Federal Register
National Archives and Records Service
General Services Administration



ORDER FROM

Superintendent of Documepts
U.S. Government Printing Office
Washington, D.C. 20402

PRIOR VOLUMES

Volumes covering the administrations of Presidents Truman, Eisenhower, Kennedy, and Johnson are available at varying prices from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

RESOLUTION CHART

7

100 MILLIMETERS

INSTRUCTIONS Resolution is expressed in terms of the lines per millimeter recorded by a particular film under specified conditions. Numerals in chart indicate the number of lines per millimeter in adjacent "T-shaped" groupings.

In microfilming, it is necessary to determine the reduction ratio and multiply the number of lines in the chart by this value to find the number of lines recorded by the film. As an aid in determining the reduction ratio, the line above is 100 millimeters in length. Measuring this line in the film image and dividing the length into 100 gives the reduction ratio. Example: the line is 20 mm. long in the film image, and 100/20 = 5.

Examine "T-shaped" line groupings in the film with microscope, and note the number adjacent to finest lines recorded sharply and distinctly. Multiply this number by the reduction factor to obtain resolving power in lines per millimeter. Example: 7.9 group of lines is clearly recorded while lines in the 10.0 group are not distinctly separated. Reduction ratio is 5, and 7.9 x 5 = 39.5 lines per millimeter recorded satisfactorily. 10.0 x 5 = 50 lines per millimeter which are not recorded satisfactorily. Under the particular conditions, maximum resolution is between 39.5 and 50 lines per millimeter.

Resolution, as measured on the film, is a test of the entire photographic system, including lens, exposure, processing, and other factors. These rarely utilize maximum resolution of the film. Vibrations during exposure, lack of critical focus, and exposures yielding very dense negatives are to be avoided.
